FOLLOWING A DECLINE IN INTERNATIONAL OIL PRICES

Windfall Tax on Domestic Crude, Fuel Exports Scrapped After 30 Months

Road and infrastructure cess levied on export of petrol and diesel also withdrawn

Our Bureau

New Delhi: India Monday scrapped the 30-month old windfall profit tax on domestically-produced crude oil and oil export of jet fuel (ATF), diesel and petrol following a decline in international oil prices.

The government has collected Rs 44,000 crore from the windfall tax since it was first imposed in July 2022.

Ministry of state for finance Piyush Goyal tabled a notification in Parliament scrapping the levy.

The notification rescinded June 30, 2022 and withdrew levy of special additional excise duty (SAED) on production of crude oil (which is refined into fuels like petrol and diesel) and on export of aviation turbine fuel (ATF), diesel and petrol, the notifications said.

Windfall Tax Collections

toms (\$40 per barrel) windfall profit tax on domestic crude production was also levied.

Finance minister Nirmala Sitharaman had then said "phenomenal profits" on exports at that level of domestic availability forced the government to impose export duties on petrol, diesel and jet fuel, and the windfall levy, adding that those duties will be reviewed every fortnight in the light of international prices.

The domestic producers of petroleum crude sell their crude at international price levels and the international crude prices rose sharply those producers made super-normal profits.

The Centre collected ₹25,000 crore in the windfall tax, which came down sharply in FY23/24 to ₹13,000 crore in the first eight months of the current fiscal year; the Centre has collected ₹6,000 crore.

At that time, export duties of ₹6 per litre (\$1 per barrel) each were levied on petrol and ATF and ₹13 a litre (\$2.65 a barrel) on diesel. A ₹2,350 a

diesel.

The government had first imposed windfall profit taxes on July 1, 2022 to tax super-normal profits of energy companies.

Separately, the government has also withdrawn the road and infrastructure cess (RIC) levied on export of petrol and

Peak Power Demand may Rise 5.4-7.8% between Dec & Feb

Shilpa Samant

New Delhi: Peak power demand between this month and February next year is likely to be

5.4-7.8% higher year-on-year, according to an assessment by the Grid Controller of India. The projections could change in line with moderation in weather forecast, another official said.

Last year, peak demand recorded in December was around 214

GWh. January this year recorded peak demand of 224 GWh followed by a similar demand recorded in February. The power ministry sees no issues with the availability of capacity to meet de-

mmand in the winter and is taking steps to ensure that there is no shortage of power supply.

Electricity demand has risen in the last 10 days with the peak remaining over the 200-GWh mark. "Western and northern region demand has already picked up," the official said.

Factory Activity at 11-mth Low in Nov Amid Cost Pressure

Our Bureau

New Delhi: India's manufacturing sector activity slowed to an 11-month low in November, pulled down by cost pressures and lower-order, a private survey revealed.

The HSBC India Manufacturing Purchasing Managers' Index (PMI), compiled by S&P Global, stood at 56.5. It had picked up pace in October with a reading of 57.5 from 55.8 in September. In November 2023, the PMI reading was 56.

Despite the decline, the growth remained above its long-run average. A PMI reading above 50 signals expansion, while a reading below indicates contraction.

"Strong broad-based international demand, evidenced by a four-month high in new export orders, helped underpin manufacturing sector activity and modest growth," said Pranjal Bhambhani, chief economist at HSBC. New business orders showed a weaker but still robust growth in November, though the survey showed.

Favourable demand conditions supported this growth, with challenges from competition and price pressure, it said.

Selling prices or charge input inflation hit a 12-year high, while input cost inflation was the highest since July although still below its long-run average.

"Input prices for a variety of intermediate goods, including chemicals, cotton, leather, and rubber, rose in November, while output prices faced an elec-

Italy & India Focus on Maritime Ties

Dipanjan Roy Chaudhury

New Delhi: Italian policy makers, including a senior senator, defence secretary and foreign minister, are advised to PM Narendra Modi, visited New Delhi and Mumbai last week and this week to push maritime partnership with India as an immediate follow-up on the Joint Action Plan adopted at the PM-level meeting in Brazil on the sidelines of the G20 meet in November.

India and Italy are working to put together a maritime partnership, including via the India-Middle East Europe Economic Corridor (IMEEC), on what it calls "Coast-to-Coast" connectivity, Indian ports and Indian ports in the Western Indian Ocean with a focus on trade, defence and blue economy. Italy wants to be India's gateway to Europe via IMECC.

Italy is also keen to set up a space cooperation with India and is opening a section in the Italian consulate in Bangalore for this purpose. Italian Minister of Enterprise and Made in Italy Adolfo Urso, currently on a trip to India, said here on Monday to a select group of ministers, Urso while mentioning that Italy, which once possessed atomic and nuclear energy, is keen to partner with India to re-launch third and fourth generations of nuclear-power systems.

Besides meeting Union commerce minister Piyush Goyal and India's mining minister, Urso also met Union coal minister to explore cooperation in the critical minerals sector.

Over the weekend, a conference on 'Blue and Space Economy' was held at the Villaggio Italia, set up at the Indian Institute of Management in Mumbai for the Vespucci World Tour stop in India.

The event was inaugurated by the Italian ambassador to India Antonio Bartoli and attended by Minister of Ports, Shipping and Waterways Sarath Samarasinghe. The Italian minister highlighted how sixty years after the launch of the first Italian satellite - San Marco I - made Italy the third country to reach the milestones in 1964 after the then Soviet Union and US.

Meloni's former diplomatic adviser and senior diplomat Francesco Talo, who was in Mumbai over the weekend, said that both India and Italy are peninsular countries which make them automatic partners in the Mediterranean. The idea is to create synergy for trade by safeguarding freedom of navigation. "Talmo" noted that the idea is to connect ports of Trieste and Venice with India which can then be expanded to connect ports in Slovenia and Croatia.

Reliance Industries, Tata Consultancy Services, HDFC Bank, Maruti Suzuki, Larsen & Toubro, Mahindra & Mahindra, Bajaj Finance and Jubilant Foodworks are among the companies that have joined the pilot project.

PM Internship Plan may be Unveiled this Month

Job-linked sops scheme may be launched jointly

Our Bureau

New Delhi: The government is considering formally setting the pilot project under the PM Internship scheme later this month along with another critical job-related initiative—the employment-linked incentive programme—linked to the development said.

The original formal launch of the pilot project of the internship scheme was proposed to be December 2.

A precise date will soon be set and the schemes could be launched together as a package, said Prime Minister Narendra Modi, they said.

"The pilot PM Internship scheme has not been put off or cancelled; work is very much going on. But its formal launch could now take place along with the other employment initiative, most likely in late December this month," said one of the persons involved in the implementation of the scheme.

In fact, the first batch of

interns started work on Monday as planned, he added.

The government will also soon finalise the employment-linked incentive schemes proposed in the July Budget.

The person said offers are being extended to candidates under the pilot project of the internship scheme. The plan will be substantially expanded from next fiscal to accommodate more candidates, factoring in learnings from the initial experience.

The scheme, announced by finance minister Nirmala Sitharaman in the July budget, has a broad target of providing internship opportunities to 10 million young Indians in 300 top companies over five years to enhance employability among young Indians.

Companies placed internships in the first phase of the pilot project target of 125,000, while about 5,000 aspirants applied for it before the registration window was shut on November 15.

Priyanka Sits Next to Rahul in Front Row

New Delhi: Neely-elected member of the Lok Sabha Priyanka Gandhi Vadra on Tuesday sat in a front row seat of the Opposition benches, right next to her brother, Rahul Gandhi, who is the leader of the Opposition. The siblings were sitting together, chatting and looking at the Congress MPs, who were raising slogans from the well when the Lok Sabha was assembled at 12 noon after the first session of the year at 11 am. They remained seated till 11 am. The House adjourned for the day within a few minutes.

While Vadra sat next to Gandhi coincided with chat about the emerging dual centre of power in the Congress benches in the Lok Sabha, some party MLAs later said she had occupied the third-row seat, still an upgrade for a first-termer, but they also added there can't be any Vadra from sitting next to Gandhi if she wishes so and if a seat is vacant next to the Lok Congress circles are closely watching whether Vadra will choose to sit next to her brother.

The SFIO investigation revealed that several restricted

Three EV Makers Raided for ₹297cr Subsidy 'Fraud'

Our Bureau

New Delhi: The corporate affairs ministry on Monday said the Serious Fraud Investigation Office (SFIO) has conducted search at three electric vehicle manufacturers—Hero Electric Vehicles, Bengaluru, India Energy and Technology and OlaTech International.

"These cases arise from the fraudulent availment of subsidies amounting to ₹297 crore cumulatively by all three companies under the Faster Adoption and Manufacturing of Electric Vehicles (FAME) II scheme of the Ministry of Heavy Industries," the ministry said in a statement.

Subsidy disbursements in the programme were floated by the PMP guidelines under FAME II, the ministry said.

Evidences like digital books and other material have been recovered during the search operations.

The investigations, it said, adding that further investigation is in progress.

The government had launched the FAME II scheme in 2019 with an outlay of ₹10,000 crore, revamping its earlier version, to promote

electric and hybrid vehicles in India. The scheme and the PMP guidelines stipulated the manufacturing of some key components in India, for the vehicle to be eligible for subsidy.

For claiming subsidies, the three companies "had deposited various documents with the applicable guidelines" to the heavy industries ministry, which was subsequently found to be incorrect and false, according to the statement.

Subsidy disbursements in the programme were floated by the PMP to ensure higher localisation as years passed. While these companies did not adhere to the PMP, they continued seeking FAME subsidy, defeating the intent of the scheme, the heavy industries ministry had found.
