Adani Enterprises Q3 Net Plunges 97%

Co attributes fall to a mark-to-market cost on Australian mining due to depreciation of the country's currency

Our Bureau

Mumbai: Adani Enterprises, the flagship company of the Adani Group, on Thursday reported a 97% fall in net profit for the third quarter to ₹58 crore from ₹1,888 crore a year earlier, hurt majorly by a mark-to-market cost on Australian mining due to the depreciation of the Australian dollar.

The Adani Group incubator company cut its capital expenditure plan for this fiscal year to around ₹30,000 crore, from the guidance of ₹80,000 crore given at the beginning of the fiscal year and the revised target of ₹67,000 crore announced last quarter. Group chief financial officer Jugeshinder Singh said this was because some of the expenditure expected to happen this fiscal year will now be recorded in FY26.

Revenue for the three months ended December 31 fell 9% to ₹22,848 crore from ₹25,050 crore. Earnings before interest, tax, depreciation and amortisation were ₹3,723 crore, compared with ₹3,716 crore a year earlier. Total income dropped to ₹23,500 crore from ₹25,540 crore.

Last quarter, the company had cut its capex guidance to ₹67,000 crore citing project delays due to an extended monsoon. The ₹80,000 crore capex target anno-

unced at the beginning of the fiscal year itself was lower than an earlier guidance of about ₹92,000 crore for FY25 given in January last year.

During a post-earnings call, when CFO Singh was asked about the capex guidance, he said it has been reduced to ₹30,000 crore. "From an accounting perspective, since the Navi Mumbai airport will be completing its phase I in April 2025, we will consider the ₹11,000 crore capex in the coming fiscal. Similarly, for ANIL (Adani New Industries Ltd), another ₹28,000 crore will be considered next fiscal."

PVC project capex, too, will spill over to early next fiscal year; but the capex will happen, he said.

Co's debt increased by 43.1% during the first nine months of this fiscal year to ₹54,436 crore

Explaining the impact of the strong dollar, Singh said: "Within the holding structure of the mining business under AEL, we use a specific instrument for investments. When AEL invests in its mining subsidiary, it does so through a shareholder loan, typically issued in US dollars, primarily for its mining business in Australia. As a result, we have a non-cash, non-payable mark-to-market impact. This can fluctuate, but for this quarter, it was over ₹1,000 crore. Consequently, due to reporting requirements, there is a proportionate increase in the interest cost, bringing the total finance cost to ₹2,141 crore."
