MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY OVERVIEW

As per expert market research the global castor oil market size has reached 795 Kilo Tons in 2023. And looking to the same the publisher expects the market to reach 887.2 Kilo Tons by 2032, showing a growth rate (CAGR) of 5.1% during 2024-2032.

The rising utilization of castor oil in numerous industries, such as personal care, chemicals, pharmaceuticals, lubricants, etc., owing to its unique properties and versatility, are primarily driving the market.

Castor oil exports were at around 6,39,260 Metric Tons in 2023-24 as compared to 6,06,376 Metric in 2022-23. Going by the current demand and the crop estimate it can be assumed that there would be enough supply to meet the demand. Considering the Geopolitical disturbances and rising interest rates it is expected to keep the demands under control.

India has a large production share of castor and castor oil in the world with almost 85 % share and Gujarat is still the leader in contributing more than 75 % in production of castor and castor oil followed by Rajasthan and Andhra Pradesh in the race. The castor plant appears to have originated in eastern Africa, around Ethiopia. Hot and humid tropical climate is more suitable for Castor growth though it grows in different climatic conditions as well. The major castor-growing countries like India, China and Brazil are sharing about 80 per cent of its total area in the world. Castor is grown in thirty different nations, and between 15 and 20 lakh tonnes of castor seed are produced in a year. Castor oil is used in the making of washing soaps, lubricating grease, laxative, surfactants, rubber chemicals, nylons, hydraulic brake fluids, paints and polymers, perfumery products, biodiesel, etc. Castor cake is also used in agriculture as organic manure. Considering the increased and wider use, the price of castor seed has gone up to Rs 6175 per quintal in July 2024. It is to be noted that India is exporting castor-seed oil of about Rs 7000 to Rs 8000 Crores per year.

Looking forward, the global castor oil market is expected to experience moderate growth during the forecast period (2026-2031) Castor oil is becoming an essential bio-based raw material which makes it ideal for various industrial applications. As a result, its demand is rising as a potential alternative to petroleum-based chemicals. On account of its distinctive chemical structure, castor oil acts as a major raw material which is used in the production of various end products such as biodiesel, polyurethane adhesives, machining oils, refrigeration lubricants, etc. This versatile nature of castor oil has been contributing towards the propelling growth of the market. As compared to other vegetable oils, castor oil is a healthier and less expensive alternative. Owing to this, food grade castor oil has gained a momentum in the food industry in the form of flavourings, mould inhibitor, food additives and packaging. The global castor oil market is being hindered by the unstable prices of castor beans which is the result of their fluctuating supply. This supply highly depends upon the weather conditions of the region and a long harvesting process of castor beans.

GLOBAL CASTOR OIL MARKET DRIVERS/CONSTRAINTS:

The global castor oil market size the global castor oil derivatives market size was USD 1,035.4 million in 2019 and is projected to reach USD 1,429.7 million by 2027 exhibiting a CAGR of 4.3% during the forecast period. Castor oil and its derivatives are multi-featured chemicals and widely used in the manufacturing of paints, lubricants, coatings, cosmetics, pharmaceuticals, and other products. Owing to their excellent chemical properties, these derivatives are gaining popularity. Leading ingredient manufacturing companies are launching castor oil-based ingredients to tap opportunities in the green chemicals market. For instance, in August 2020, BASF SE launched a Lamesoft Balance, a hydrogenated castor oil-based product to stabilize ingredients in hair and skin cleansing formulations. It helps in providing homogeneous rheology in cleansing formulations, which is often challenging to obtain. Such activities are fueling the castor oil derivatives market growth.

Some of the major restraints for the castor oil derivatives market are poor extraction techniques, lack of innovation, and higher demand for chemical-based cosmetics, and alternatives.

Material Uncertainty Related to Going Concern

1. The company is having accumulated losses (after taking into account the balance of reserves) of ₹ 34864.94 lakhs as at 31.03.2024 and the net worth of the company is negative. However, as per the business plan and future cash flow projections submitted by the management to us and accepted by us, The Company is making sincere efforts for the revival of the Business & the management is confident to recover the losses through improved profitability in foreseeable future. Therefore, no provision for the impairment has been made and accounts for the year have been prepared on "going concern basis." Further the above projections also contains business plan/ projected cash flow prepared by the management and accepted by us with respect to the subsidiaries company i.e. Banpal Oil Chem Private limited and NK OIL Mills Private limited, (Except Tirupati Retail India Pvt Ltd where proper provision of Impairment has been done)the management is confident to also revive the operations of the loss making subsidiary companies, hence no provision for impairment in the fair value of the investment made in the said subsidiary companies has been made in the books of accounts. (Refer Note No 33 of standalone INDAS Standalone financial statements)

Our opinion is not modified on the above matter.

Key Audit Matters

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter:

Description of Key audit Matter	Our response and results
<p>Litigations and claims</p> <p>(Refer note 28) to the standalone Ind AS financial statements)</p> <p>The cases are pending with multiple tax authorities like Income Tax, Sales tax etc. and there are claims against the company which have not been acknowledged as debt by the company.</p> <p>In normal course of business, financial exposures may arise from pending proceedings and from claims of the customers not acknowledged as debt by the company. Whether a claim needs to be recognized as liability or disclosed as contingent liability in the standalone Ind AS financial statements is dependent on a number of significant assumptions and judgments. The amounts involved are potentially significant and determining the amount, if any, to be recognised or disclosed in the standalone Ind AS financial statements, is inherently subjective.</p> <p>We have considered Litigations and claims, a Key Audit Matter as it requires significant management judgement, including accounting estimates that involves high estimation uncertainty.</p>	<p>Our audit procedures, inter alia, included following:</p> <ul style="list-style-type: none"> - Discussed disputed litigation matters with the company's management. - Evaluated the management's judgment of tax risks, estimates of tax exposures, other claims and contingencies. Past and current experience with the tax authorities and management's correspondence/ response including on the claims lodged by customers, were used to assess the appropriateness of management's best estimate of the most likely outcome of each uncertain contingent liability. - Critically assessed the entity's assumptions and estimates in respect of claims, included in the contingent liabilities disclosed in the financial statements. Also, assessed the probability of negative result of litigation and the reliability of estimates of related obligations. <p>Conclusion:</p> <p>Based on the procedures described above, we did not find any material exceptions to the management's assertions and treatment, presentation & disclosure of the subject matter in the standalone Ind AS financial statements.</p>

Pending effect of the various orders of adjudicating authorities by the Income Tax Department, the Company is yet to provide final entries in its books of accounts even during the year under review. In view of non-availability of order of the appeal effects from the Income Tax Department, we are unable to opine on the same. (Refer to the note no 30 of the IND AS Standalone Financial Statement)

Auditor's Responsibilities for the Audit of the Standalone IND AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone IND AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone IND AS financial statements.

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone IND AS financial statements, including the disclosures, and whether the standalone IND AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1.1 Recent Accounting Pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards. There is no such notification which would have been applicable from April 1st, 2024.

MATERIAL ACCOUNTING POLICIES

1.2 BASIS OF PREPARATION OF FINANCIAL STATEMENTS

(a) Basis of preparation and compliance with Ind AS

These Standalone Financial Statements are prepared in accordance with Indian Accounting Standard (Ind AS) under historical cost convention on accrual basis. The Ind AS are prescribed under section 133 of the Act, read with Rule 3 of the Companies (Indian Accounting Standard) Rules 2015 & relevant amendment rules issued thereafter.

Accounting policies have been consistently applied except where a newly issued Accounting Standard is initially adopted or revision to an existing Accounting Standard requires a change in accounting policy hitherto in use.

(b) USE OF ESTIMATES:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting year end. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

(c) Revenue Recognition

Revenue comprises of all economic benefits that arises in the ordinary course of activities of the Company which result in increase in Equity other than increases relating to contributions from equity participants. Revenue is measured at the fair value of the consideration received or receivable, net of discounts, volume rebates.

Goods and service tax is not received by the Company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the Government. Accordingly, it is excluded from revenue.

Revenue from sales is recognized when all significant risks and rewards of ownership of the commodity sold are transferred to the customer, which generally coincides with delivery. Revenues from sale of by- products are included in revenue. Inter-transfers, other benefits passed on the customer in kind etc are expensed in statement of Profit and loss.

Interest is accounted on accrual basis.

Rent income is accounted on accrual basis.

(d) Property, Plant and Equipment

(i) Property, plant and equipment [PPE]

All PPE are stated at original cost (net of tax/duty credit availed) less accumulated depreciation and impairment losses except freehold land which is carried at cost. Cost includes cost of acquisition, construction and installation, taxes, duties, freight, other incidental expenses relating to the acquisition, trail run expenses (net of revenue) and pre-operative expenses including attributable borrowing costs incurred during pre-operational period.

Expenditure incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance, are normally charged to the statements of profit and loss in the period in which the costs are incurred. Major inspection and overhaul expenditure is capitalized if the recognition criteria are met. Thus

the policy of the company is that subsequent costs are included in the asset's carrying amount or recognized as separate asset, as appropriate, only when it is probable that the future economic benefits associated with the items will flow to the entity and the cost of the same can be measured reliably.

When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in the statement of profit and loss as incurred.

Gains and losses on disposal of an item of property, plant and equipments are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within other income/other expenses in statement of profit and loss.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss, when the asset is derecognized.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed periodically and adjusted prospectively, if appropriate.

a. Capital work in progress

Assets in the course of construction are capitalized in capital work in progress account. At the point when an asset is capable of operating in the manner intended by management, the cost of construction is transferred to the appropriate category of property, plant and equipment. Costs associated with the commissioning of an asset are capitalized when the asset is available for use but incapable of operating at normal levels until the period of commissioning has been completed. Revenue generated from production during the trial period is credited to capital work in progress.

b. Depreciation

Assets in the course of development or construction and freehold land are not depreciated.

Other property, plant and equipment are stated at cost less accumulated depreciation and any provision for impairment. Depreciation commences when the assets are ready for their intended use.

Depreciation is calculated on the depreciable amount, which is the cost of an asset less its residual value. Depreciation is provided at rates calculated to write off the cost, less estimated residual value, of each asset on a written down value basis over except Computers, office equipment office building and Factory building which has been provided on the basis of Straight-line method over its useful life (as per Schedule II of Companies Act,2013), as follows:

The useful lives of assets are as follows:

Buildings	30-60 Years
Plant and equipments	15 Years
Furniture and fixtures	10 Years
Vehicles	8-10 Years
Others- Computer Hardware	3-6 Years
Office equipments	5 Years

Major inspection and overhaul costs are depreciated over the estimated life of the economic benefit derived from such costs. The carrying amount of the remaining previous overhaul cost is charged to the statement of profit and loss if the next overhaul is undertaken earlier than the previously estimated life of the economic benefit.

When significant spare parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Depreciation methods, useful lives and residual values are reviewed at each financial year end and changes in estimates, if any, are accounted for prospectively.

(e) Intangible assets

Intangible assets acquired are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite. The Company currently does not have any intangible assets with indefinite useful life. Intangible assets are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

(f) Financial instruments

• **Financial Assets:**

The company classifies its financial assets as those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and those to be measured at amortized cost.

The Company measures all equity instruments in subsidiaries at cost initially and also on subsequent recognition.

The company measures all quoted equity instruments other than in subsidiaries at fair value on initial and subsequent recognition. Changes in fair value of quoted instruments in equity shares are shown as profit/loss on fair valuation of investments in Statement of Profit and Loss.

Trade Receivables represents receivables for goods sold by the company upto to the end of the financial year. The amounts are generally unsecured and are usually received as per the terms of payment agreed with the customers. The amounts are presented as current assets where receivable is due within 12 months from the reporting date. They are recognized initially and subsequent measured at amortized cost.

The company assesses the expected credit losses associated with its assets carried at amortized cost. Trade receivables are impaired using the lifetime expected credit loss model under simplified approach. The Company uses a provision matrix to determine the impairment loss allowance based on its historically observed default rates over expected life of trade receivables and is adjusted for forward looking estimates. At every reporting date, the provision for such impairment loss allowance is determined and updated and the same is deducted from Trade Receivables with corresponding charge/credit to profit and loss.

A financial asset is derecognized only when the company has transferred the rights to receive cash flows from the financial asset, or when it has transferred substantially all the risks and rewards of the asset, or when it has transferred the control of the asset.

Investments that are readily realizable and intended to be held for not more than a year are classified as current investments. All other investments are classified as Non-Current /Long-term investments. Current investments are carried at lower of cost or market value on individual investment basis. Non-current investments are considered at cost, unless there is an "other than temporary" decline in value, in which case adequate provision is made for the diminution in the value of investments.

• **Financial Liabilities**

Borrowings are initially recognized and subsequently measured at amortized cost, net of transaction costs incurred. The transaction costs is amortized over the period of borrowings using the effective interest method in Capital Work in Progress upto the commencement of related plant, property and Equipment and subsequently under finance costs in profit and loss account.

Borrowings are removed from balance sheet when the obligations specified in the contract is discharged, cancelled or expired.

Borrowings are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Trade payables represent liabilities for goods and services provided to the company up to the end of the financial year. The amounts are unsecured and are usually paid as per the terms of payment agreed with the vendors. The amounts are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially and subsequently measured at amortized cost.

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

- **Equity**

Equity shares are classified as equity.

Provision is made for the amount of any dividend declared and dividend distribution tax thereon, being appropriately authorized and no longer at the discretion of the entity on or before the end of the reporting period but not distributed at the end of the reporting period.

(g) Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

(h) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences if any, to the extent regarded as an adjustment to the borrowing costs.

Investment income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowings costs eligible for capitalization.

(i) Impairment of Non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an assets or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a post-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated.

Impairment losses of continuing operations, including impairment on inventories, are recognized in the statement of profit and loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit and loss.

(j) Inventories

Inventories are valued at the lower of cost and net realisable value except scrap and by products which are valued at net realisable value.

Costs incurred in bringing the inventory to its present location and conditions are accounted for as follows:

- Stores & Spares: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

Obsolete inventories are identified and written down to net realisable value. Slow moving and defective inventories are identified and provided to net realisable value.

(k) Accounting For Taxes on Income:

Tax expenses comprise of current tax and deferred tax including applicable surcharge and cess.

Current Income tax is computed using the tax effect accounting method, where taxes are accrued in the same period in which the related revenue and expenses arise. A provision is made for income tax annually, based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable.

Deferred tax is provided using the balance sheet approach on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profits against which the deductible temporary differences, and the carry forward unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it is become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on the tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognized in the statement of profit and loss, except to the extent that it relates to items recognized in other comprehensive income. As such, deferred tax is also recognized in other comprehensive income.

Deferred Tax Assets and Deferred Tax Liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the Deferred Tax Assets and Deferred Tax Liabilities relate to taxes on income levied by same governing taxation laws.

(l) Employee benefit schemes

Short-term employee benefits are recognized as an expense at the undiscounted amount in the Statement of Profit and Loss of the year in which the related service is rendered.

Post-Employment and Retirement benefits in the form of Gratuity and Leave Encashment are considered as defined benefit obligations and are provided for on the basis of third-party actuarial valuation, using the projected unit credit method, as at the date of the Balance Sheet. Every Employee who has completed five years or more of service is entitled to Gratuity on terms not less favorable than the provisions of The Payment of Gratuity Act, 1972.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions of the defined benefit obligation are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Employee benefits in the form of Provident Fund is considered as defined contribution plan and the contributions to Employees' Provident Fund Organization established under The Employees' Provident Fund and Miscellaneous Provisions Act 1952 is charged to the Statement of Profit and Loss of the year when the contributions to the respective funds are due. The Company pays provident fund contributions to publicly administered provident funds as per local regulations. The Company has no further payment obligations once the contributions have been paid.

(m) Provision for liabilities and charges, Contingent liabilities and contingent assets

The assessments undertaken in recognizing provisions and contingencies have been made in accordance with the applicable Ind AS.

Provisions represent liabilities to the Company for which the amount or timing is uncertain. Provisions are recognized when the Company has a present obligation (legal or constructive), as a result of past events, and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows to net present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Unwinding of the discount is recognized in the statement of profit and loss as a finance cost. Provisions are reviewed at each reporting date and are adjusted to reflect the current best estimate.

Contingent assets are not recognized but disclosed in the financial statements when an inflow of economic benefits is probable.

Contingent liabilities are not provided for but are disclosed by way of Notes on Accounts. Contingent Liabilities are disclosed in case of a present obligation from past events (a) when it is not probable that an outflow of resources will be required to settle the obligation; (b) when no reliable estimate is possible; (c) unless the probability of outflow of resources is remote.

(n) Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit and loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit and loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

(o) Investments

Investment in Subsidiary Companies are valued at Original Cost. Investment in NSC and investments in unquoted equity shares are stated at cost. Investment in quoted equity shares are stated at Fair Value through statement of Profit and loss account.

(p) Cash Flow Statement

Cash flows are reported using indirect method as set out in Ind AS -7 "Statement of Cash Flows", whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

(q) Related Party Transactions:

(r) Current and Non-Current Classification:

The Normal Operating Cycle for the Company has been assumed to be of twelve months for classification of its various assets and liabilities into "Current" and "Non-Current".

The Company presents assets and liabilities in the balance sheet based on current and non-current classification.

An asset is current when it is (a) expected to be realised or intended to be sold or consumed in normal operating cycle; (b) held primarily for the purpose of trading; (c) expected to be realised within twelve months after the reporting period; (d) Cash and cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period. All other assets are classified as non-current.

A liability is current when (a) it is expected to be settled in normal operating cycle; (b) it is held primarily for the purpose of trading; (c) it is due to be discharged within twelve months after the reporting period; (d) there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. All other liabilities are classified as non-current.

(s) Critical Accounting Judgments, Assumptions and Key Sources of Estimation Uncertainty

The preparation of the Standalone Financial Statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities at the date of the financial statements. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

a) Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the standalone financial statements:

(i) Determination of Functional Currency

Currency of the primary economic environment in which the Company operates ("the functional currency") is Indian Rupee (₹) in which the company primarily generates and expends cash. Accordingly, the Management has assessed its functional currency to be Indian Rupee (₹).-i.e. Rupees in lakhs

(ii) Evaluation of Indicators for Impairment of Property, Plant and Equipment

The evaluation of applicability of indicators of impairment of assets requires assessment of external factors (significant decline asset's value, significant changes in the technological, market, economic or legal environment, market interest rates etc.) and internal factors (obsolescence or physical damage of an asset, poor economic performance of the asset etc.) which could result in significant change in recoverable amount of the Property, Plant and Equipment.

b) Assumptions and Estimation Uncertainties

Information about estimates and assumptions that have the significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may differ from these estimates.

(i) Taxes

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Company has ₹ 2307.28 lakhs (P.Y ₹ 2347.71 lakhs) of tax losses carried forward on which deferred tax asset is created, based on probability that future profits will be available against which the deductible temporary difference can be realized.

(ii) Useful lives of Property, Plant and Equipment/Intangible Assets

Property, Plant and Equipment/ Intangible Assets are depreciated/amortised over their estimated useful lives, after taking into account estimated residual value. The useful lives and residual values are based on the Company's historical experience with similar assets and taking into account anticipated technological changes or commercial obsolescence. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation/amortisation to be recorded during any reporting period. The depreciation/amortisation for future periods is revised, if there are significant changes from previous estimates and accordingly, the unamortized/depreciable amount is charged over the remaining useful life of the assets.

(iii) Contingent Liabilities

In the normal course of business, Contingent Liabilities may arise from litigation and other claims against the Group. Potential liabilities that are possible but not probable of crystallizing or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the Notes but are not recognized. Potential liabilities that are remote are neither recognized nor disclosed as contingent liability. The management decides whether the matters need to be classified as 'remote', 'possible' or 'probable' based on expert advice, past judgements, experiences etc.

(iv) Evaluation of Indicators for Impairment of Property, Plant and Equipment

The evaluation of applicability of indicators of impairment of assets requires assessment of external factors (significant decline in asset's value, economic or legal environment, market interest rates etc.) and internal factors (obsolescence or physical damage of an asset, poor economic performance of the idle assets etc.) which could result in significant change in recoverable amount of the Property, Plant and Equipment and such assessment is based on estimates, future plans as envisaged by the Company.

(v) Provisions

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

Delta effect of +1% change in rate of employee turnover	2.65	2.64
Delta effect of -1% change in rate of employee turnover	(2.97)	(2.95)

The sensitivity analysis have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

The sensitivity analysis presented above may not be representative of the actual change in the projected benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis the present value of the projected benefit obligation has been calculated using the unit credit method at the end of the reporting period, which is the same method as applied in calculating the projected benefit obligation as recognized in the balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

(F) RISK ANALYSIS

Gratuity is a defined benefit plan and company is exposed to the Following Risks:

Interest Rate risk

A fall in the discount rate which is linked to the G.Sec. Rate will increase the present value of the liability requiring higher provision.

Salary Risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salary of the members more than assumed level will increase the plan's liability.

Asset Liability Matching Risk

The plan faces the ALM risk as to the matching cash flow. Company has to manage pay-out based on pay as you go basis from own funds.

Mortality Risk

Since the benefits under the plan is not payable for life time and payable till retirement age only, plan does not have any longevity risk.

The above data is taken on the basis of actuary report of K.A. Pandit Consultants and Actuaries.

INDEPENDENT AUDITORS' REPORT

TO THE MEMBERS OF N.K. INDUSTRIES LIMITED

Report on the Audit of the Consolidated IND AS Financial Statements

Qualified Opinion

We have audited the accompanying Consolidated Ind AS Financial statements of **M/s N.K. INDUSTRIES LIMITED** ("the Holding Company"), and its subsidiaries (the Holding Company and its subsidiaries together referred to as 'the Group'), which comprise the Consolidated balance sheet as at March 31, 2024, and the Consolidated statement of profit and loss (including other comprehensive income), Consolidated statement of changes in equity and Consolidated statement of cash flows for the year then ended, and notes to the consolidated Ind AS financial statements including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, except for the effects of the matter described in the Basis for Qualified Opinion Section of our report, and based on the consideration of the reports of the other auditors on separate financial statements and on the other financial information of the subsidiaries, the aforesaid Consolidated Ind AS financial statements give the information required by the Companies Act, 2013 (the Act) in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the Consolidated state of affairs (Consolidated financial Position) of the Group as at March 31, 2024, and its Consolidated losses (Consolidated financial performance including other comprehensive income), its Consolidated Cash flows and Consolidated changes in equity for the year ended on that date.

Basis for Qualified Opinion

1. The Holding Company had entered into financial arrangement with National Spot Exchange Ltd (NSEL) through trading and Clearing Member, N.K. Proteins Private Ltd (erstwhile N. K. Proteins Limited (NKPL) (Group Company) by way of purchase and sales of various goods up to financial year 2012-13. The trade payables and trade receivables arising out of the said transactions through National Spot Exchange Limited (NSEL) from the concerns other than the group concerns are subject to confirmations by the respective parties/NSEL and reconciliations/adjustments, if any. Further, NSEL has suspended the trading on 31.07.2013, as per the directions issued by the Government of India, Ministry of Consumer Affairs. NSEL has initiated recovery proceedings against the group company NKPL and also against the Holding company by filing a civil suit in the Hon'ble High Court of Mumbai for an alleged amount of around ₹937 crores plus interest and the said proceedings are pending as on date. Further, the Home department, Government of Maharashtra has issued a notification under the Maharashtra Protection of Interest of Depositors (in financial establishments)-Act, 1999 (MPID Act) attaching the Land, Building & Plant & Machinery of the Holding company located at Kadi, Gujarat. The Holding company had challenged the notification issued by Home department of Maharashtra before Hon'ble Gujarat High Court which was disposed off vide its order dated 29th March 2017. The Holding company preferred a Special Leave Petition before the Hon'ble Supreme Court of India against the order of Hon'ble Gujarat High Court and The Hon'ble Supreme Court of India had disposed off the Special Leave Petition on 17th April, 2017 with an observation to file an application before Hon'ble Bombay High Court, Mumbai, and as informed by the management, the Holding company has filed petition before the Hon'ble Bombay High Court in June 2017 which is pending. Besides the above, the Holding company has also filed its objections against the attachment notification before the Designated Special MPID Court, Mumbai. In view of the above that the matter is subjudice, and the alleged liability /claim are not accepted by the holding company we are unable to quantify the final liability and its impact if any, on the loss of the Holding company for the Year ended on 31st March, 2024. (Refer note No. 38 of consolidated Ind AS financial statements).
2. The Directorate of Enforcement, Government of India has initiated proceedings against the Holding company under section 5(1) of the prevention of Money Laundering Act, 2002, along with group company NKPL, and by virtue of the provisional attachment order dated 10/03/2015, attached the assets of the Holding company comprising of Land, building, plant and machinery situated at Survey Nos.719, 720, 721, 732/1, 732/2, 733, 741, 743, 744, 745, Kadi Thol Road, Village Kadi Kasba , taluka- Kadi, District Mehsana-382715 Gujarat. As explained to us, The Holding Company has preferred an appeal before the Hon'ble Appellate Tribunal under the Prevention of Money laundering Act, 2002 against the order of Adjudicating Authority.

Further , the Director of Enforcement (hereinafter referred to as ED), Government of India had initiated proceedings of search/seizure on 30.05.2018 on the group company NKPL, the promoters of the Holding company late Shri Nilesh Patel and Shri Nimish Patel, one of the family member as well as on the Holding company and thereafter on 29.06.2018, the ED, Government of India, had preferred an application u/s 17(4) of the Prevention of Money Laundering Act, 2002 before the Adjudicating Authority, New Delhi, vide it's Application No. OA/236 of 2018 against the company as well as group company NKPL and the promoters for retention of the seized properties and for continuation of order of freezing the

properties, till finalization of the proceedings, of the properties mentioned in the application u/s 17(4) of the PMLA Act, 2002. The Holding company along with Group Company and promoters challenged the show cause notice issued by the adjudicating authority New Delhi, before the Hon'ble High Court of Delhi and the Hon'ble High Court has set aside the said show cause notice. The Director of Enforcement has attached assets of the Holding company, group company NKPL and the promoters of the Holding company by issuing a fresh show cause notice dated 30/08/2018 and the Holding company has filed an appeal before PMLA Appellate Tribunal, Delhi. In view of the above that the matter is subjudice, and the alleged liabilities /claims are not accepted by the Holding company we are unable to quantify the final liability and its impact, if any, on the loss of the Holding company for the Year ended on 31st March, 2024. (Refer note No. 39 of consolidated Ind AS financial statements).

3. The, Government of Maharashtra, (at the instance of Economic wing offence Mumbai), has filed supplementary Charge sheet dated 25th December, 2018 under the various sections of IPC AND MPID Act against the Holding Company and its Chairman Shri Nimish Patel. Further MPID Court on the basis of above supplementary charge sheet has issued summons dated 19th March, 2019 asking them to remain present on 26th April 2019. The Holding Company has complied with the said summons and the matter was adjourned to 7th November, 2019 and further adjourned to various dates and now the matter is further adjourned to 18th June, 2024. Thus, in view of the fact that the said criminal proceedings which have been initiated, inter alia, against the holding company and its Chairman Shri Nimish Patel are pending, we are unable to ascertain/quantify the final liability, if any, that may arise from the said criminal proceedings and therefore we are unable to quantify its impact, if any, on the loss of the Holding company for the year ended on 31.03.2024. (Refer note No. 40 of consolidated Ind AS financial statements).
4. The Subsidiary Company Tirupati Retail (India) Pvt Ltd had entered into financial arrangement with National Spot Exchange Ltd (NSE) through trading and Clearing Member, N.K. Proteins private Limited erstwhile N.K Proteins Limited (NKPL) by way of purchase and sales of various goods up to financial year 2013-14. The trade payables and trade receivables (now reflected under non-current financial liabilities & non-current financial assets) arising out of the transactions through National Spot Exchange Limited (NSE) from the concerns other than the group concerns are subject to confirmations by the respective parties and reconciliations / adjustments, if any. Further, NSE has initiated recovery proceedings against the company viz. N.K. Proteins private Limited and Holding Company viz. N K Industries limited and also against the subsidiary Company and the said proceedings are pending as on date. In view of the fact that the matter is sub-judice, and the alleged liability/Claim are not accepted by the said subsidiary company, we are unable to quantify the final liability and its impact if any, on the loss of the Consolidated Accounts. (Refer note No. 50 of consolidated Ind AS financial statements).

We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Ind AS Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act, and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred in of the Other Matters paragraph below is sufficient and appropriate to provide a basis for our qualified opinion on the consolidated financial statements.

Material Uncertainty Related to Going Concern

1. The Consolidated financial statements reflect accumulated losses (after taking into account the balance of reserves) of ₹ 35011.07 lakhs as at 31.3.2024 and the net worth of the Consolidated accounts as well as Holding Company and Subsidiary Companies as at 31.03.2024 is negative. However, as per the business plan and future cash flow projections submitted by the management of the holding company to us and accepted by us, and as informed by the management of the Holding Company, the Holding Company is making sincere efforts for the revival of the Business & the management is confident to recover the losses through improved profitability in foreseeable future. Therefore, provision for the impairment has not been made for and accounts for the year have been prepared on "going concern basis." Similarly, the Management of the Subsidiary Companies i.e Banpal Oil Chem Private limited and NK OIL Mills Private limited, (Except Tirupati Retail India Pvt Ltd where proper provision of Impairment has been done) is also making sincere efforts to revive the business and the management of the said Subsidiary companies are confident to recover the losses through improved profitability in foreseeable future. Therefore, no provision for the impairment has been made in the books of said subsidiary companies and in the consolidated accounts and accounts of the Holding and said Subsidiary Companies for the year have been prepared on "going concern basis." (Refer Note No. 35 of consolidated financial statements).

Our opinion is not modified in the above matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment and based on the consideration of the reports of the other auditors on separate standalone Ind AS financial statements and on the other financial information of the subsidiaries were of most significance in our audit of the consolidated Ind AS financial statements of the current period. These matters were addressed in the context of our audit of the consolidated Ind AS financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter:

Description of Key audit Matter	Our response and results
<p>Litigations and claims (Refer note 29) to the Consolidated Ind AS financial statements)</p> <p>The cases are pending with multiple tax authorities like Income Tax, Sales tax etc. and there are claims against the Holding company & its subsidiary company which have not been acknowledged as debt by the company.</p> <p>In normal course of business, financial exposures may arise from pending proceedings and from claims of the customers not acknowledged as debt by the company. Whether a claim needs to be recognized as liability or disclosed as contingent liability in the financial statements is dependent on a number of significant assumptions and judgments. The amounts involved are potentially significant and determining the amount, if any, to be recognised or disclosed in the Consolidated financial statements, is inherently subjective.</p> <p>We have considered Litigations and claims, a Key Audit Matter as it requires significant management judgement, including accounting estimates that involves high estimation uncertainty.</p>	<p>Our audit procedures, inter alia, included following:</p> <ul style="list-style-type: none"> - Discussed disputed litigation matters with the management. - Evaluated the management's judgment of tax risks, estimates of tax exposures, other claims and contingencies. Past and current experience with the tax authorities and management's correspondence/response including on the claims lodged by customers, were used to assess the appropriateness of management's best estimate of the most likely outcome of each uncertain contingent liability. - Critically assessed the entity's assumptions and estimates in respect of claims, included in the contingent liabilities disclosed in the Consolidated Ind AS financial statements. Also, assessed the probability of negative result of litigation and the reliability of estimates of related obligations. <p>Conclusion: Based on the procedures described above, we did not find any material exceptions to the management's assertions and treatment, presentation & disclosure of the subject matter in the Consolidated Ind AS financial statements.</p>

The respective Board of Directors of the companies included in the Group are also responsible for overseeing the financial reporting process of the respective companies.

Auditor's Responsibilities for the Audit of the consolidated Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated Ind AS financial statements

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated Ind AS financial statement or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated Ind AS financial statements, including the disclosures, and whether the consolidated Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence; and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Independent Auditor's Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the Consolidated Ind AS financial statements of M/s N.K. INDUSTRIES LIMITED ("the Holding Company") and its subsidiaries (the Holding company and its subsidiaries together referred to as the Group) as at and for the year ended 31st March 2024, we have audited the internal financial controls with reference to Consolidated Financial Statements of the Holding company and its subsidiaries, which are companies covered under the Act, as at that date.

Management's Responsibility for Internal Financial Controls

The Respective Board of Directors of the Holding Company and its subsidiary companies incorporated in India, which are companies covered under the Act, are responsible for establishing and maintaining internal financial controls based on the internal control with reference to Consolidated Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls with reference to Consolidated Financial Statements issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to Consolidated Financial Statements of the company and its subsidiary companies as aforesaid, based on our audit. We conducted our audit in accordance with the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to Consolidated Financial Statements and the Guidance Note issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to Consolidated Financial Statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to Consolidated Financial statements and their operating effectiveness. Our audit of internal financial controls with reference to Consolidated Financial Statements included obtaining an understanding of internal financial controls with reference to Consolidated Financial Statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by other auditors in terms of their reports referred to in the Other matter paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system with reference to Consolidated Financial Statements of the Holding company and its subsidiaries as aforesaid.

Meaning of Internal Financial Controls with reference to Consolidated Ind AS Financial statements

A company's internal financial control with reference to Consolidated Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to Consolidated Financial Statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Consolidated Ind AS Financial Statements

Because of the inherent limitations of internal financial controls with reference to Consolidated Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Consolidated Financial Statements to future periods are subject to the risk that the internal financial control with reference to Consolidated Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, and based on the consideration of the reports of the other auditors on the internal financial controls with reference to Consolidated Financial Statements, of the Holding Company and its subsidiaries which are companies covered under the Act, have, in all material respects, an adequate internal financial controls system with reference to Consolidated Financial Statements and such internal financial controls with reference to Consolidated Financial Statements were operating effectively as at 31st March 2024, based on the internal control with reference to Consolidated Financial Statements established by the Holding Company and its subsidiaries as aforesaid, considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls with reference to Consolidated Financial Statements issued by the Institute of Chartered Accountants of India.

Other Matter

Our aforesaid reports under section 143(3)(i) of the act on the adequacy and operating effectiveness of the internal financial controls with reference to Consolidated Financial Statements in so far as it relates to three subsidiary companies, incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India.

1.1 BASIS OF PREPARATION OF FINANCIAL STATEMENTS

1.1a Basis of preparation and compliance with Ind AS

These Financial Statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as prescribed under section 133 of the Companies Act, 2013 read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Act.

The Financial Statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle. Accordingly, all assets and liabilities have been classified as current or non-current as per the Group operating cycle and other criteria set out in Ind AS 1 – 'Presentation of Financial Statements' and Schedule III to the Companies Act, 2013.

Accounting policies have been consistently applied consistently to all the periods presented in the financial statements.

The financial statements are presented in Indian Rupees ('₹'). Where changes are made in presentation, the comparative figures of the previous year are regrouped and re-arranged accordingly.

USE OF ESTIMATES:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting year end. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

1.2 Basis of consolidation

- i. NKIL consolidates entities which it owns or controls. The consolidated financial statements comprise the financial statements of the Company, its subsidiaries. Control exists when the parent has power over the entity, is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over the entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. Subsidiaries are consolidated from the date control commences until the date control ceases.

The financial statements of the Group Companies are consolidated on a line-by-line basis and intra-group balances and transactions including unrealized gain/loss from such transactions are eliminated upon consolidation. These financial statements are prepared by applying uniform accounting policies in use at the Group. Non-controlling interests which represent part of the net profit or loss and net assets of subsidiaries that are not, directly or indirectly, owned or controlled by the Company, are excluded.

Associates are entities over which the Group has significant influence but not control. Investments in associates are accounted for using the equity method of accounting. The investment is initially recognized at cost, and the carrying

amount is increased or decreased to recognize the investor's share of the profit or loss of the investee after the acquisition date. The Group's investment in associates includes goodwill identified on acquisition.

ii. Companies included in Consolidation:

The Group's consolidated Financial Statements includes financial statements of the holding company N K Industries Limited as well as its three wholly owned subsidiaries which are as follows:

- o N K Oil Mills
- o Banpal Oil-Chem Private Limited
- o Tirupati Retail Private Limited

2 Estimates and Judgments

The preparation of the financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates under different assumptions and conditions.

3 Basis of measurement

The Ind AS Financial Statements have been prepared on a going concern basis using historical cost convention and on an accrual method of accounting, except for certain financial assets and liabilities, including derivative financial instruments which have been measured at fair value as described below and defined benefit plans which have been measured at actuarial valuation as required by relevant Ind ASs.

Fair value measurement

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Fair value for measurement and /or disclosure purpose in these financial statements is determined on such a basis, except for measurements that have some similarities to fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36, if any.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

4 Functional and presentation currency

These Ind AS Financial Statements are prepared in Indian Rupee which is the Group's functional currency.

All financial information presented in Rupees has been presented in full figure

1.3 Recent Accounting Pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards. There is no such notification which have been applicable from April 1st, 2024.

1.4 MATERIAL ACCOUNTING POLICIES

The Group has applied following accounting policies to all periods presented in the Ind AS Financial Statement.

a) Revenue Recognition

Revenue comprises of all economic benefits that arises in the ordinary course of activities of the Group which result in increase in Equity other than increases relating to contributions from equity participants. Revenue is measured at the fair value of the consideration received or receivable, net of discounts, volume rebates.

Goods and service tax is not received by the Group on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the Government. Accordingly, it is excluded from revenue.

Revenue from sales is recognized when all significant risks and rewards of ownership of the commodity sold are transferred to the customer, which generally coincides with delivery. Revenues from sale of by- products are included in revenue. Inter-transfers, other benefits passed on the customer in kind etc are expensed in P&L Account. Rent income and Interest Income is accounted on accrual basis.

b) Property, Plant and Equipment

a. Property, plant and equipment [PPE]

All PPE are stated at original cost (net of tax/duty credit availed) less accumulated depreciation and impairment losses except freehold and lease hold land which is carried at cost. Cost includes cost of acquisition, construction and installation, taxes, duties, freight, other incidental expenses relating to the acquisition, trail run expenses (net of revenue) and pre-operative expenses including attributable borrowing costs incurred during pre-operational period.

Expenditure incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance, are normally charged to the statements of profit and loss in the period in which the costs are incurred. Major inspection and overhaul expenditure is capitalized if the recognition criteria are met. Thus, the policy of the company is that subsequent costs are included in the asset's carrying amount or recognized as separate asset, as appropriate, only when it is probable that the future economic benefits associated with the items will flow to the entity and the cost of the same can be measured reliably.

When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in the statement of profit and loss as incurred.

Gains and losses on disposal of an item of property, plant and equipments are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within other income/other expenses in statement of profit and loss.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss, when the asset is derecognized.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed periodically and adjusted prospectively, if appropriate.

b. Capital work in progress

Assets in the course of construction are capitalized in capital work in progress account. At the point when an asset is capable of operating in the manner intended by management, the cost of construction is transferred to the appropriate category of property, plant and equipment. Costs associated with the commissioning of an asset are capitalized when the asset is available for use but incapable of operating at normal levels until the period of commissioning has been completed. Revenue generated from production during the trial period is credited to capital work in progress.

c. Depreciation

Assets in the course of development or construction and freehold and lease hold land are not depreciated.

Other property, plant and equipment are stated at cost less accumulated depreciation and any provision for impairment. Depreciation commences when the assets are ready for their intended use.

Depreciation is calculated on the depreciable amount, which is the cost of an asset less its residual value. Depreciation is provided at rates calculated to write off the cost, less estimated residual value, of each asset on a written down value except office building and Factory building on which depreciation has been provided on Straight line basis over its expected useful life (as per Schedule II of the Companies Act 2013), as follows:

The estimated useful lives of assets are as follows:

Buildings	30-60	Years
Plant and equipments	15	Years
Furniture and fixtures	5	Years
Vehicles	8-10	Years
Office equipments	5	Years
Others Computer hardware	3-6	Years

Major inspection and overhaul costs are depreciated over the estimated life of the economic benefit derived from such costs. The carrying amount of the remaining previous overhaul cost is charged to the statement of profit and loss if the next overhaul is undertaken earlier than the previously estimated life of the economic benefit.

When significant spare parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Depreciation methods, useful lives and residual values are reviewed at each financial year end and changes in estimates, if any, are accounted for prospectively.

c) Intangible assets

Intangible assets acquired are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite. The Company currently does not have any intangible assets with indefinite useful life. Intangible assets are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

d) Financial instruments

- **Financial Assets:**

The Group classifies its financial assets as those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and those to be measured at amortized cost.

The Group measures all equity instruments in subsidiaries at cost initially and also on subsequent recognition.

The Group measures all quoted equity instruments other than in subsidiaries at fair value on initial and subsequent recognition. Changes in fair value of quoted instruments in equity shares are shown as profit/loss on fair valuation of investments in Statement of Profit and Loss. Currently there are no quoted investments.

Trade Receivables represents receivables for goods sold by the Group up to the end of the financial year. The amounts are generally unsecured and are usually received as per the terms of payment agreed with the customers. The amounts are presented as current assets where receivable is due within 12 months from the reporting date. They are recognized initially and subsequent measured at amortized cost.

The Group assesses the expected credit losses associated with its assets carried at amortized cost. Trade receivables are impaired using the lifetime expected credit loss model under simplified approach. The Group uses a provision matrix to determine the impairment loss allowance based on its historically observed default rates over expected life of trade receivables and is adjusted for forward looking estimates. At every reporting date, the provision for such impairment loss allowance is determined and updated and the same is deducted from Trade Receivables with corresponding charge/credit to profit and loss.

A financial asset is derecognized only when the Group has transferred the rights to receive cash flows from the financial asset, or when it has transferred substantially all the risks and rewards of the asset, or when it has transferred the control of the asset.

Investments that are readily realizable and intended to be held for not more than a year are classified as current investments. All other investments are classified as Non-Current/Long-term investments. Current investments are carried at lower of cost or market value on individual investment basis. Non-current investments are considered at cost, unless there is an "other than temporary" decline in value, in which case adequate provision is made for the diminution in the value of investments.

- **Financial Liabilities**

Borrowings are initially recognized and subsequently measured at amortized cost, net of transaction costs incurred. The transaction costs is amortized over the period of borrowings using the effective interest method in Capital Work in Progress upto the commencement of related plant, property and Equipment and subsequently under finance costs in profit and loss account.

Borrowings are removed from balance sheet when the obligations specified in the contract is discharged, cancelled or expired.

Borrowings are classified as current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Trade payables represent liabilities for goods and services provided to the company up to the end of the financial year. The amounts are unsecured and are usually paid as per the terms of payment agreed with the vendors. The amounts are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially and subsequently measured at amortized cost.

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

- **Equity**

Equity shares are classified as equity incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds.

Provision is made for the amount of any dividend declared and dividend distribution tax thereon, being appropriately authorized and no longer at the discretion of the entity on or before the end of the reporting period but not distributed at the end of the reporting period.

- e) **Cash and cash equivalents**

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

- f) **Borrowing Costs**

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences if any, to the extent regarded as an adjustment to the borrowing costs.

Investment income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowings costs eligible for capitalization.

- g) **Impairment of non-financial assets**

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a post-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group CGUs to which the individual assets are allocated.

Impairment losses of continuing operations, including impairment on inventories, are recognized in the statement of profit and loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit and loss.

h) Inventories

Inventories are valued at the lower of cost and net realisable value except scrap and by products which are valued at net realisable value.

Costs incurred in bringing the inventory to its present location and conditions are accounted for as follows:

Stores and Spares: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

Obsolete inventories are identified and written down to net realisable value. Slow moving and defective inventories are identified and provided to net realisable value.

i) Accounting For Taxes On Income:

Tax expenses comprise of current tax and deferred tax including applicable surcharge and cess.

Current Income tax is computed using the tax effect accounting method, where taxes are accrued in the same period in which the related revenue and expenses arise. A provision is made for income tax annually, based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable.

Deferred tax is provided using the balance sheet approach on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profits against which the deductible temporary differences, and the carry forward unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. Unrecognised deferred tax assets are reassessed at each reporting date and are recognized to the extent that it is become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on the tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognized in the statement of profit and loss, except to the extent that it relates to items recognized in other comprehensive income. As such, deferred tax is also recognized in other comprehensive income.

Deferred Tax Assets and Deferred Tax Liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the Deferred Tax Assets and Deferred Tax Liabilities relate to taxes on income levied by same governing taxation laws.

j) Employee benefit schemes

Short-term employee benefits are recognized as an expense at the undiscounted amount in the Statement of Profit and Loss of the year in which the related service is rendered.

Post Employment and Retirement benefits in the form of Gratuity and Leave Encashment are considered as defined benefit obligations and are provided for on the basis of third-party actuarial valuation, using the projected unit credit method, as at the date of the Balance Sheet. Every Employee who has completed five years or more of service is entitled to Gratuity on terms not less favorable than the provisions of The Payment of Gratuity Act, 1972.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions of the defined benefit obligation are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Employee benefits in the form of Provident Fund is considered as defined contribution plan and the contributions to Employees' Provident Fund Organization established under The Employees' Provident Fund and Miscellaneous Provisions Act 1952 is charged to the Statement of Profit and Loss of the year when the contributions to the respective funds are due. The Group pays provident fund contributions to publicly administered provident funds as per local regulations. The Group has no further payment obligations once the contributions have been paid.

k) Provision for liabilities and charges, Contingent liabilities and contingent assets

The assessments undertaken in recognizing provisions and contingencies have been made in accordance with the applicable Ind AS.

Provisions represent liabilities to the Group for which the amount or timing is uncertain. Provisions are recognized when the Group has a present obligation (legal or constructive), as a result of past events, and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows to net present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Unwinding of the discount is recognized in the statement of profit and loss as a finance cost. Provisions are reviewed at each reporting date and are adjusted to reflect the current best estimate.

Contingent assets are not recognized but disclosed in the financial statements when an inflow of economic benefits is probable.

Contingent liabilities are not provided for but are disclosed by way of Notes on Accounts. Contingent Liabilities are disclosed in case of a present obligation from past events (a) when it is not probable that an outflow of resources will be required to settle the obligation; (b) when no reliable estimate is possible; (c) unless the probability of outflow of resources is remote.

l) Earnings per share

The Group presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit and loss attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit and loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

m) Cash Flow Statement

Cash flows are reported using indirect method as set out in Ind AS -7 "Statement of Cash Flows", whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

n) Related Party Transactions:

A related party is a person or entity that is related to the reporting entity preparing its financial statements

- a) A person or a close member of that person's family is related to a reporting entity if that person; has control or joint control of the reporting entity; (ii) has significant influence over the reporting entity; or (iii) is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.

o) Current And Non-Current Classification:

The Normal Operating Cycle for the Company has been assumed to be of twelve months for classification of its various assets and liabilities into "Current" and "Non-Current".

The Group presents assets and liabilities in the balance sheet based on current and non-current classification.

An asset is current when it is (a) expected to be realised or intended to be sold or consumed in normal operating cycle; (b) held primarily for the purpose of trading; (c) expected to be realised within twelve months after the reporting period; (d) Cash and cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period. All other assets are classified as non-current.

An liability is current when (a) it is expected to be settled in normal operating cycle; (b) it is held primarily for the purpose of trading; (c) it is due to be discharged within twelve months after the reporting period; (d) there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. All other liabilities are classified as non-current.

p) Investments

Quoted investments are stated at Fair value through profit and loss account and Unquoted investments are Stated at its cost.

q) LEASE

The Group evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Group uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate. The Group determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Group is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Group is reasonably certain not to exercise that option. In assessing whether the Group is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Group to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Group revises the lease term if there is a change in the non-cancellable period of a lease.

r) Critical Accounting Judgments, Assumptions and Key Sources of Estimation Uncertainty

The preparation of the Consolidated Financial Statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities at the date of the financial statements. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

a) Judgements

In the process of applying the Group accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the Consolidated financial statements:

(i) Determination of Functional Currency

Currency of the primary economic environment in which the Group operates ("the functional currency") is Indian Rupee (₹) in which the company primarily generates and expends cash. Accordingly, the Management has assessed its functional currency to be Indian Rupee (₹).

(ii) Evaluation of Indicators for Impairment of Property, Plant and Equipment

The evaluation of applicability of indicators of impairment of assets requires assessment of external factors (significant decline asset's value, significant changes in the technological, market, economic or legal environment, market interest rates etc.) and internal factors (obsolescence or physical damage of an asset, poor economic performance of the asset etc.) which could result in significant change in recoverable amount of the Property, Plant and Equipment.

b) Assumptions and Estimation Uncertainties

Information about estimates and assumptions that have the significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may differ from these estimates.

(i) Taxes

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

The Group has tax losses carried forward on which deferred tax asset is created, based on probability that future profits will be available against which the deductible temporary difference can be realized.

(ii) Useful lives of Property, Plant and Equipment/Intangible Assets

Property, Plant and Equipment/ Intangible Assets are depreciated/amortised over their estimated useful lives, after taking into account estimated residual value. The useful lives and residual values are based on the Company's historical experience with similar assets and taking into account anticipated technological changes or commercial obsolescence. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation/amortization to be recorded during any reporting period. The depreciation/amortisation for future periods is revised, if there are significant changes from previous estimates and accordingly, the unamortised/depreciable amount is charged over the remaining useful life of the assets.

(iii) Contingent Liabilities

In the normal course of business, Contingent Liabilities may arise from litigation and other claims against the Group. Potential liabilities that are possible but not probable of crystallising or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the Notes but are not recognised. Potential liabilities that are remote are neither recognised nor disclosed as contingent liability. The management decides whether the matters need to be classified as 'remote', 'possible' or 'probable' based on expert advice, past judgements, experiences etc.

(iv) Evaluation of Indicators for Impairment of Property, Plant and Equipment

The evaluation of applicability of indicators of impairment of assets requires assessment of external factors (significant decline in asset's value, economic or legal environment, market interest rates etc.) and internal factors (obsolescence or physical damage of an asset, poor economic performance of the idle assets etc.) which could result in significant change in recoverable amount of the Property, Plant and Equipment and such assessment is based on estimates, future plans as envisaged by the Group.

(v) Provisions

Provisions and liabilities are recognised in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

(vi) Leases

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Group makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Group considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to Group's operations taking into account the location of the underlying asset and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances.

Delt effect of -1% change in rate of employee turnover	(2.97)	(2.95)

The sensitivity analysis have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

The sensitivity analysis presented above may not be representative of the actual change in the projected benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis the present value of the projected benefit obligation has been calculated using the unit credit method at the end of the reporting period, which is the same method as applied in calculating the projected benefit obligation as recognized in the balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

(F) RISK ANALYSIS

Gratuity is a defined benefit plan and following are the risks associated with defined benefit plan :

Interest Rate risk

A fall in the discount rates which is linked to the G. Sec. rate will increase the present value of the liability requiring higher provision.

Salary Risk

The present value of defined benefit plan liability is calculated by reference to the future salaries of members. As such, an increase in the salaries of the members more than assumed level will increase the plan's liability.

Asset Liability Matching Risk

The plan faces the ALM risk as to the matching cash flow. Company has to manage pay-out based on pay as you go basis from owned funds.

Mortality Risk

Since the benefits under the plan are not payable for life time and payable till retirement age only, plan does not have any longevity risk.

The above data is taken on the basis of actuary report of K.A. Pandit Consultants and Actuaries.
