PRESS RELEASE

Commissioning of New Solar Power Plant at Nawa Refinery

Jaipur, Rajasthan – November 07, 2024 – Saboo Sodium Chloro Limited ("SSCL") is pleased to announce the successful commissioning of the expanded captive solar power plant at our Nawa refinery, located in Sambhar Lake, Rajasthan. The additional 150 kW of solar power has now been integrated into the existing 500 kW solar facility, bringing the total captive solar power capacity at the refinery to 650 kW.

Commissioned on November 6, 2024, the new solar energy plant is now fully operational and providing a stable and satisfactory supply of electricity. This expanded solar capacity enables SSCL to generate more in-house solar energy, resulting in significant energy cost savings, estimated at INR 40,00,000 annually.

SSCL's Ongoing Commitment to Sustainability

- Increased Efficiency: With the new solar capacity now fully functional, the Nawa refinery is meeting an even larger portion of its energy needs through renewable sources, boosting operational efficiency.
- Cost Savings: The expanded solar capacity is anticipated to reduce energy costs substantially, with projected savings of INR 40 lakhs annually.
- Environmental Impact: This initiative underscores the company's dedication to sustainability by reducing greenhouse gas emissions, aligning with national green energy objectives.

SSCL remains committed to furthering its contributions to sustainable development and operational efficiency across all its facilities.
