Chennai, 5th November, 2015

OGPL reports Q2 FY16 Results

Revenue stood at Rs. 156 crore

Operating Margins up 500 bps at 78.8%

Orient Green Power Company Limited (OGPL) a leading independent renewable energy-based power generation company in India has announced its results for the quarter and half year ended September 30, 2015.

Q2 FY16 vs. Q2 FY15 (Consolidated)

Revenue from Operations Rs. 156 crore v/s Rs. 172 crore

EBITDA at Rs. 123 crore v/s Rs. 127 crore

Total Operational Capacity ~534 MW

Commenting on the performance, Mr. S. Venkatachalam, MD - OGPL, said: “We are in a transitory phase at present and as such our results fail to capture the full impact of various measures undertaken by us in the recent past towards improving the operational and financial strength of the business.

The recent fund raise of 250 crore will enable us to complete our capacity expansion plan as well as refinance debt on more favorable terms. The demerger of the Biomass business will streamline the business model and allow us to customize and implement strategies for each segment more appropriately besides enabling value unlocking for our shareholders.

We are encouraged by the support and positive regulatory intent as initiatives to introduce interest subvention, resurrect the REC mechanism and strengthen the financial health of SEBs signal the beginning of a meaningful transformation into an operating environment that is conducive to sustainable growth and improved profitability.”

Performance Update

The company's performance during Q2 FY16 has been driven by:

- Lower wind availability more than off-set the combined benefits of higher operational capacities and grid connectivity resulting in subdued revenue generation for the quarter.
- Despite revenue contraction, EBITDA margins for the quarter improved 500 bps to 78.8% primarily on account of improved efficiencies and better maintenance of assets.
- Chalked out strategic initiatives towards reviving Biomass business. In advance talks to divest few of the non-performing biomass assets. Fund inflow from asset liquidation to be utilized towards working capital and retirement of debt.
- Challenges pertaining to grid back-down subsided considerably during the period. The state of TN introduced Scheduling and Forecasting through NIWE, completed the green corridor from the South of TN to the consuming Centers in the North of the State
- Performance of REC's expected to improve following Supreme Court's ruling on the HZL vs RERC, wherein the State regulators now feel empowered to strictly enforce the RPO obligations. Further, validity extension of the certificates to 1,095 days is expected to further improve the viability of this revenue stream.
- Total operating capacity stood at 533.5 Mw as of September 2015, of which Wind assets constituted 427.5 Mw, while remaining 106 Mw were Biomass assets

-ENDS-

Q2 and H1 FY16 Results

Disclaimer

Certain statements in this presentation concerning our future growth prospects are forward-looking statements, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, fluctuations in earnings, our ability to manage growth, competitive intensity in our industry of operations including those factors which may affect our cost advantage, wage increases, our ability to attract and retain highly skilled professionals, sufficient availability of inputs, price of inputs, setting of appropriate tariffs by regulatory bodies, our ability to successfully complete and integrate potential acquisitions, liability for damages on our contracts to supply electricity, the success of the companies in which Orient Green Power has made or shall make strategic investments, withdrawal of governmental incentives, political instability, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Orient Green Power may, from time to time, make additional written and oral forward-looking statements, including those in our reports to shareholders. The Company does not undertake to update any forward-looking statement that may be made from time to time by or on behalf of the company

Financial & Operational Highlights – H1 FY16

Key Highlights

- Successfully raised Rs. 2,500 million for augmenting Wind energy capacities and retirement of high cost debt
 - Investors - Edelweiss funds and Shriram Group (promoter)
- Demerger of Biomass business to result in two separate focused entities, besides leading to value unlocking of individual businesses
- H1 FY16 generated sales of Rs. 2349 million, down by 17% (Y-o-Y) owing to lower availability of wind.
- Operational EBITDA for H1 FY16 has reduced to Rs. 1733.60 Million from a level of Rs. 2,100.6 Million primarily owing to lower wind availability
- Loss after Tax was at Rs. 710.71 Million as against Rs. 168.13 Million during H1 FY 15
- Aggregate capacity available and generating during the H1 was at a level of 533 MW across both businesses as against 510 Mw in H1 FY 2015

Renewable Energy Certificates

- Overall performance continued to remain tepid with supply of certificates outstripping the demand, resulting in majority of the transaction at floor price
- However, increasing focus on RPO both from the courts and from regulators is expected to increase demand
- OGPL's share in trading on the exchange represented 4.33% of trading volumes over the last 6 months
- OGPL had an unsold inventory of 519,586 RECs as of September 30, 2015

REC Trading and Revenue – April 2015 to September 2015

Besides the above gross tariff, (4 Tamil Nadu units) are eligible for REC benefits

Capacity Expansion Trend

BUSINESS	2010-11	2011-12	2012-13	2013-14	2014-15	Planned	Total Capacity (including planned)
WIND	179.5	317.1	339.0	421.7	427.5	57.5	485.0
BIOMASS	40.5	60.5	60.5	86.0	106.0	0	106.0
TOTAL	220.0	377.6	399.5	507.7	533.0	57.5	591.0

Regulatory Environment & Outlook

Wind Business Outlook

- Grid availability in TN was better in Q 2 FY 16 at 86.2% against 78.8% in the corresponding quarter.
- However due to low wind overall generation was lower than the corresponding quarter.
- Initiated forecasting exercise on trial for the state as a whole in phased manner. Grid operator finds this useful for planning and this is expected to improve through better visibility .
- Represented through Association for relaxation of regulatory impediments for improving evacuation. Honble CERC has come out with draft amendments for public comments. The draft does not propose a significant relaxation as suggested by the Association and efforts are being made for increasing this in the final regulations

Biomass Business Outlook

- Recent orders on Tariff by CERC for biomass power plants are more future oriented with annual reset prescribed on fuel cost(5.90 v/s 5.57 for Chippabarod, 6.78 v/s 6.52 for Kishanganj and 6.27 in Hanumangarh)
- Increase in tariff levels for approved by Rajasthan ERC would enable the business to have improved margins and mitigate the adverse impact of fuel price increase in the coming quarters.
- During Q2 one of the plant located in pollachi was transferred from OGPL to a separate entity and was moved to group captive mechanism . The unit has started the operation and started generating power.
- Operational improvements for enhanced efficiencies in progress across all units resulting in higher plant availability
- IREDA has announced that it will refinance 30% of loan outstanding in biomass unit with 2% interest and 10 years of repayment.
- There is improvement in the availability of fuel for the south plant and will improve the working in the coming quarter.
- Three electricity commission has enforced RPO compliance and on account of this company is expecting improved realization on REC.

Leading Diversified Renewable Energy Generation Company
