Sub: Intimation of Credit Rating

Ref: Information under Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (“Listing Regulations”)

Dear Sir/Madam,

Pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to inform you that ‘Crisil Ratings’ has Assigned/Reassigned the credit rating as **CRISIL A+/Positive** for bank loan facilities of Rs. 350 Crore as follows:

Total Bank Loan Facilities Rated	Rs. 350 Crore (Enhanced from Rs. 200 crore)
Long Term Rating (Rs.150 crore)	Crisil A+/Positive (Assigned)
Long Term Rating (Rs.200 crore)	Crisil A+/ Positive (Reassigned, in place of Crisil A1)

The rating rationale issued by the credit rating agency is enclosed for reference.

We request you to kindly take the aforesaid information on record.

Thanking you,

for ACME Solar Holdings Limited

Rajesh Sodhi
Company Secretary & Compliance officer
Membership No.: F3043

Encls: As stated

Rating Rationale

February 11, 2025 | Mumbai

ACME Solar Holdings Limited

'Crisil A+/Positive' reassigned to Bank Debt

Rating Action

Total Bank Loan Facilities Rated	Rs.350 Crore (Enhanced from Rs.200 Crore)
Long Term Rating (Rs.200 Crore)	Crisil A+/Positive (Reassigned, in place of 'Crisil A1')
Long Term Rating (Rs.150 Crore)	Crisil A+/Positive (Assigned)

Note: None of the Directors on Crisil Ratings Limited's Board are members of rating committee and thus do not participate in discussion or assignment of any ratings. The Board of Directors also does not discuss any ratings at its meetings.

1 crore = 10 million

Refer to annexure for Details of Instruments & Bank Facilities

Detailed Rationale

Crisil Ratings has reassigned its '**Crisil A+/Positive**' rating to the bank facilities of Rs.200 crore of Acme Solar Holdings Ltd (ASHL; part of the Acme group), in place of 'Crisil A1' earlier. Crisil Ratings has also assigned its '**Crisil A+/Positive**' rating to enhanced bank facilities of Rs.150 crore. Crisil Ratings has assigned ratings to the long-term bank facilities on basis company request.

Crisil Ratings has noted successful equity listing of ASHL in November 2024, leading to a raise of ~Rs 2395 crores were through fresh issue by the company. ASHL has repaid ~Rs 2069 crores of debt (Subsidiary project loan / non project loan) from IPO proceeds. Also, ASHL has long track record of refinancing projects at Lower rate of Interest which gives comfort to overall liquidity of the group. In house execution of single location largest solar project in Rajasthan i.e. commissioned 1.2 GW in the current year proves the ability of group to deliver projects of large scale.

In line with changed philosophy of management and group structure post listing, Crisil Ratings has revised its analytical approach of assessing ASHL independently from Acme Cleantech Solutions Pvt Ltd (ACSPL). This is because the scope of the holding companies has been redefined.

ACSPL would serve as promoter holding company and undertake ventures such as development of green ammonia projects. ASHL would be the developer and operator for renewable energy projects including conventional solar and wind, RTC, FDRE, battery and pumped hydro projects. All EPC and O&M would be done by ASHL or its wholly owned subsidiaries. Comprehensive non-compete agreements have been signed by both the ACSPL and ASHL.

Positive outlook reflects that proportion of operational portfolio composition of ASHL may improve through commissioning of under implementation portfolio, especially projects with storage requirements, within time and cost.

The ratings reflect the track record of development and operation of renewable power assets, above average financial profile supported by diverse portfolio of assets, and above average financial flexibility supported. These strengths are partially offset by implementation risk and investment requirement of under-construction portfolio and variability in operating margin of engineering, procurement and construction (EPC) segment.

Analytical Approach

Crisil Ratings has considered the standalone business and financial risk profiles of ASHL and moderately consolidated it with its special purpose vehicles (SPVs). And in line with the moderate consolidation approach, equity requirement for under-construction SPVs, including cost overrun in projects under implementation projects, as estimated by Crisil Ratings, have also been factored into the projections.

ASHL is expected to be ring fenced and separated from ACSPL following management articulation and other safeguards such as independent board and committees which will monitor any related party transactions.

Please refer Annexure - List of entities consolidated, which captures the list of entities considered and their analytical treatment of consolidation

Key Rating Drivers & Detailed Description

Strengths:

Track record in the development and operation of solar power assets

ASHL has extensive experience of more than a decade in the execution and operation of solar power projects in India. This is reflected in commissioning of approximately 4 gigawatts (GW) alternate current (AC) of solar power projects without any material cost and time overruns by ASHL, a part of which has been sold in the past. Currently, the group has an operational solar capacity of ~2.54 GW_{AC}.

Above average financial risk profile, supported by large and diverse portfolio of assets

Acme group has an operational asset base of 2.54 GW_{AC} currently, the cash flow upstreaming to the holding company from surplus generation is expected to remain strong for fiscal 2026. The business profile is further supported by geographical and off-taker diversity. The portfolio is spread across more than 11 states and has 17 different counterparties. Additionally, power generation at an overall portfolio level has been satisfactory for the past three years.

From the IPO proceeds ASHL has repaid ~Rs 2069 crores of debt (Subsidiary project loan / non project loan). This has removed their dependency on cash flow from the operational SPVs to meet debt servicing obligations. Going forward, leverage profile is expected to be prudently managed with expectation that gross holding company and operational project debt to run-rate EBITDA of operational projects should stay less than 5.5 times.

Above average financial flexibility

ASHL successfully executed the IPO in November 2024 and raised Rs. 2900 crores through it (including offer for sale proceeds). This has improved its financial flexibility by diversifying funding sources. Additionally, group has track record of divesting operational solar power assets of around 1.4 GW in past.

Going forward, along with better access to markets, the total portfolio of around 2.54 GW_{AC} of solar power assets provides flexibility of raising funds through fresh issues, accrual, refinancing or stake sale, if required.

Weaknesses:

Sizeable under-construction portfolio

ASHL has a sizeable under-construction portfolio of 2340 MWs which exposes the company to implementation and stabilisation risks. PPAs have been signed for these projects and these projects are expected to be commissioned over next 2- 3 years. Also, under construction capacity around 1890 MW is FDRE, peak power and hybrid project which require considerably higher capital expenditure and operating risks as compared to pure play solar and wind power projects. As a result, under-construction pipeline entails implementation and stabilisation risks.

Material delays in the implementation of these projects and higher-than-projected investment requirement can exert pressure on cash flow upstreaming to holding companies and weaken the financial flexibility of Acme group.

Variability in EPC margin

The renewable power industry has in past faced cost pressures on account of volatility in module prices, exchange rates, freight, and commodity prices. This may impact the EPC margin of ASHL.

Liquidity: Strong

Crisil rating expects cash accruals (including upstreaming from operational SPVs) to be over Rs 500 crores during fiscal 2026. ASHL has long track record of refinancing projects at lower rate of interest which gives comfort to overall liquidity of the group. From the IPO proceeds they have completely repaid the non-project debt and hence there are no debt servicing obligations. ASHL has an unencumbered cash balance of ~Rs 1900 crores as on December 31, 2024.

Outlook: Positive

Reflects increase in operational capacity of ASHL through project commissioning basis past track record of developing renewable projects.

Rating Sensitivity Factors

Upward Factors

- Timely commissioning of under-construction portfolio of 2.34 GW without external non-project debt resulting in an improvement in the proportion of operational projects in the portfolio
- Improvement in standalone credit profiles of operating SPVs resulting in materially higher cash inflows along with maintenance of leverage profiles

Downward Factors

- Time/ cost over-run from under-construction portfolio and/ or weaker than anticipated performance of operational portfolio
- Higher-than-expected debt levels especially 0 non-project debt at ASHL currently

About the Company

Established in 2015, ASHL is a renewable power developer with 2.54 GW of operational capacity and another 2.34 GW of capacity under construction. Their projects include pure play solar and wind power projects and FDRE, hybrid and solar power projects with energy storage systems. Apart from this ASHL is also into EPC and O&M for in-house renewable power projects.

It is promoted by Mr. Manoj Kumar Upadhyay, a first-generation entrepreneur, having close to 25 years of experience in clean energy.

About Crisil Ratings Limited (A subsidiary of Crisil Limited, an S&P Global Company)

Crisil Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

Crisil Ratings Limited ('Crisil Ratings') is a wholly-owned subsidiary of Crisil Limited ('Crisil'). Crisil Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").
