INDIAN STAFFING FEDERATION REPORT

IT staffing to grow 7% annually till FY26

FE BUREAU New Delhi, November 14

FLEXI STAFFING HAS been witnessing a major growth in the Indian IT sector and is expected to grow at an average annual rate of 7% till FY26, as per the report by the Indian Staffing Federation (ISF).

The IT flexi staffing workforce in FY24 stood at 597,000, which is 7% lower than the previous fiscal, but in FY25, it's projected to rise to 625,000 and by FY26, to 663,000. For perspective, the total IT workforce in India in FY24 was 6.7 million.

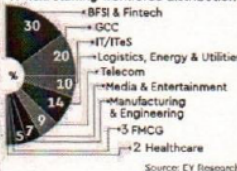

At the report's launch, Lohit Bhatia, president, ISF, said that the report was released at an apt time when the IT industry has started showing signs of revival since last quarter. 'India's continued growth as a hub for flexible staffing is essential to meeting the competitive demands of

IN A NUTSHELL

IT flexi staffing workforce

IT flexi staffing workforce distribution

the digital economy" ISF Vice President Manmeet Singh, said that flexi employment contributions coming from T and IT-enabled Services (ITES) sectors, along with global capability centers (GCCs), account for 51% of its overall value and employ a significant flexi workforce of 296,000 professionals. As per the report, the market value of the IT flexi

staffing workforce stood at \$4.9 billion in FY24, down from \$5.1 billion in FY23. But in FY25, it's likely to rise to \$5.2 billion, and further to \$5.6 billion in FY26.

In FY24, the growth of the IT Flexi Staffing market was affected by various geo-political conflicts in Europe & West Asia. Inflation peaking amid low growth led to reduced affordability, demand and spending

by clients in last fiscal, said ISF. However, from now on, the ISF says, GCCs, telecom, BFSI, media & entertainment sectors will drive the growth due to new technology adoption and technology transformation in the next two years. Ahmedabad, Coimbatore, Yuhakhapatnam, Surat, Kochi and Nagpur are seeing a growing demand for flexi staffing in the IT industry. This is driven by factors such as a skilled workforce, strategic location, and strong manufacturing bases, the report said.

Additionally, the report said Delhi-NCR is leading in promoting gender balance, with a workforce distribution of 55% male and 45% female in flexi-staffing roles. Karnataka follows closely, with a female labour force participation rate of 37%. In line with India's national average. Other states like Maharashtra (33% female representation), Telangana (39%), and Tamil Nadu (23%) show lower female participation, underscoring regional disparities in gender inclusivity within flexi-staffing. Flexi employees are hired for a particular period of time and get the benefits of social security, standard wages, legal compliances, registration under the EPFO etc.
