# Major Economic Highlights

- The Monetary Policy Committee (MPC) of the Reserve Bank of India (RBI) has kept the repo rate unchanged at 6.5 percent for the eleventh consecutive time in its December meeting.
- The MPC has retained the 'neutral' monetary policy stance to remain unambiguously focused on a durable alignment of inflation with the target of 4 percent (with a leeway of 2 percentage points on either side), while supporting growth.
- the MPC has reduced the Cash Reserve Ratio (CRR) by 50 basis points to 4.0 percent.
- In order to address the liquidity deficit in the banking system, the RBI will conduct daily variable rate repo (VRR) auctions on all working days, with reversal occurring on the next working day.
- The Indian economy remains resilient, according to the latest Financial Stability Report (FSR, Dec 2024) of the RBI.
- The FSR Report also highlighted the soundness of Scheduled Commercial Banks (SCBs), which is strengthened by strong profitability, steady credit demand, declining NPAs, reducing slippages, and adequate capital & liquidity buffers.
- India has registered the highest growth among major advanced & emerging market economies in this period (World Economic Outlook, IMF, Oct-24). As per the IMF, India is likely to become the third-largest economy in 2027.

The IMF has updated its economic forecast for calendar year 2025 and has projected the growth for India for 2025 at 6.5 percent.

The RBI has revised its forecast for retail price inflation for FY 25 at 4.8%, with Q3 at 5.7%, Q4 at 4.5%, Q1FY26 at 4.6% and for Q2FY26 at 4.0%.

The MPC has revised its growth projection for India's GDP at 6.6% for the financial year 2024-25.
