The Lumax-DK Jain Group

# Transforming Automotive Technology with Cutting-Edge Innovation

The Lumax-DK Jain Group is the embodiment of passion, precision and perfection, serving the Indian automotive components industry with unmatched vigor. The visionary founder of the Group, Mr SC Jain brought his extraordinary business acumen and steadfast dedication to fore by venturing into the automotive industry in 1945. Since then, the Group continues to remain at the forefront of technology innovation and service excellence, revolutionizing the way people perceived automotive technology. With leading-edge automotive lighting solutions, gear shifters, vehicle interior systems and other avant-garde automotive components, the Lumax-DK Jain Group continues to raise the standard within the industry, bringing Indian manufacturing excellence to the global arena.

The Group taps into its technological expertise through strong partnerships to cement its dominance within highly competitive Indian automotive components industry. Through its two flagship entities, Lumax Industries Limited (LIL) and Lumax Auto Technologies Limited (LATL), the Group continues to scale greater heights, harnessing its experience, expertise, excellence in service and quality. The Group's sustained leadership within the industry is further manifested through diligently fueling the assembly lines of nearly all top automotive OEM brands.

Lumax-DK Jain Group is rooted in the timeless values of Respect, Integrity, Passion & Excellence. The strong fundamentals of the Group enable it to make a robust mark on the global scale, strengthening its influence beyond the shores of India. Buoyed by its unique market positioning, cutting-edge innovation and diverse expertise, global automotive leaders from Japan, USA, Italy, Spain, Israel, Germany, and South Korea forged strategic alliances with the Group. A versatile amalgamation of enduring legacy and unmatched adaptability, the Group continues to script new chapters in its ever-young journey of success.

## About Lumax Industries Limited

# Leading the Charge with Bespoke Solutions

Lumax Industries Limited (hereafter referred to as 'LIL', or 'Lumax Industries' or 'the Company'), is an integral part of the renowned Lumax-DK Jain Group established in 1945. Harnessing its robust manufacturing prowess, and bespoke designing, the Company is well-positioned as a prominent supplier of end-to-end automotive lighting solutions and components in India. LIL's cutting-edge lighting solutions are tailor-fit for a wide cross-section of automotives, including two-wheelers, four-wheelers, and commercial vehicles, catering to original equipment manufacturers (OEMs) across domestic and global automotive markets.

Lumax Industries, with its vast portfolio of end-to-end lighting products, including headlamps, tail lamps and other lamps, leads the charge in technological innovation. By adopting advanced technologies, including LED lighting solutions for automobiles, LIL demonstrates its firm conviction to redefining industry standards and driving-forward automotive lighting excellence.

The decade-long collaboration and strategic partnerships with renowned partners are the reflection of Lumax

Industries' esteemed standing in the Indian automotive lighting business. A significant four-decade long partnership with Japan-based Stanley Electric Co., signifies the Company's dedication to collaboration, innovation, and excellence. Moreover, the Company's nearly three-decade long strategic alliance with SL Corporation South Korea further advances its commitment to quality excellence, while propelling innovation in the automotive lighting sector.

Partnerships

# Empowering Growth through Synergistic Collaborations

Lumax Industries draws strength from its strategic alliances excelling through synergistic collaborations. With an eye to capitalize on partnership and scale with new capabilities, the Company established a cutting-edge design center in the Czech Republic. This significant move marks a remarkable achievement in the strides of LIL, enabling enhanced access to the European market and solidifying its presence on the global stage. These advancements are anticipated to drive sustained growth and innovation, reinforcing the Company's leadership in the industry.

Along the course of its resilient journey, Lumax Industries remains focused on fostering impactful partnerships. LIL's long-standing alliances with Stanley Electric Co. and SL Corporation are instrumental in enabling the Company deliver cutting-edge automotive lighting solutions across India.

## Collaboration with Stanley Electric Co., Japan

Lumax Industries cultivated a robust partnership with Stanley Electric Co., Japan for four decades. This enduring collaboration is instrumental in developing leading-edge lighting solutions, particularly the Printed Circuit Board (PCB) integral for LED lighting systems in the Indian market. Building on the synergy, driven by shared expertise, advanced technology and industry insight, LIL is a reliable and innovative leader in the sector.

## Partnership with SL Corporation, South Korea

Lumax Industries forged a dynamic alliance with SL Corporation in a significant move to widen its portfolio of offerings. This transformative collaboration includes manufacturing of state-of-the-art lighting systems and varied range of automotive components. The robust synergy between these industry leaders drives innovation and excellence, revolutionizing the automotive sector.

### New Greenfield Facility

Lumax Industries inaugurated Phase-1 of the new Chakan plant during the year under review. The plant is witnessing robust order flows resulting in strong capacity utilization quarter-on-quarter. This move is aimed at significantly increasing LIL's manufacturing prowess, enhancing its capacity to cater to a broader spectrum of client needs and future automotive models. Moreover, in response to strong demand for advanced lighting solutions from select OEMs, Lumax Industries is establishing a new production facility in Sanand, Gujarat.

Letter from the Management

# Forging Ahead with Innovation and Purpose

“ We at LIL, have pioneered the field of automotive lighting, consistently leading the way in this evolving industry. ”

## Dear Shareholders,

We are honored to present the Annual Report of Lumax Industries for FY 2023-24. With each passing year, we evolve stronger towards our overarching vision and the collective efforts of our dedicated team, fortifying our belief in a bright and prosperous tomorrow.

## Navigating the Macro Environment

The global economy has faced a multitude of challenges in recent times. The geopolitical tensions resulting from the Russia-Ukraine conflict had disrupted supply chains and created widespread uncertainty. Simultaneously, the Red Sea Crisis and the ongoing tense situation in the Middle East have further exacerbated the instability. High inflation rates and disrupted supply lines, have placed additional pressures on economies worldwide.

Amid these global headwinds, the resilience of the Indian economy stands out. Despite the turbulence on the international stage, India has continued to forge a path of growth and development. Key drivers of this resilience have been robust growth in infrastructure, rising per capita income, government policies like 'Make in India', and high foreign investment.

## Illuminating the Road Ahead

In the early days, automobile lightings were rudimentary at best, offering limited visibility and safety. Fast forward to today, the evolution of automotive lighting has been nothing short of revolutionary. As we navigate the highways and byways of modern life, automotive lighting plays a crucial role in ensuring safety, enhancing aesthetics, and driving technological advancements. This transformation has been driven by relentless innovation and the pursuit of excellence of organizations dedicated to advancing automotive technology. Modern lights are not just about seeing and being seen; they are an integral part of a vehicle's design language. Sleek, stylish, and often iconic, lighting elements define the character and identity of a vehicle.

## Industry Dynamics and Company Positioning

The automotive lighting industry is undergoing significant evolution and transformation, driven by a combination of technological advancements, regulatory changes, and shifting consumer preferences. Consumers are increasingly prioritizing safety and luxury features in their vehicles, leading to a rise in demand for advanced lighting solutions that not only improve visibility but also enhance the vehicle's aesthetic appeal. The integration of lighting with vehicle communication systems is also becoming more common, improving functionality and comfort. Growth has been driven by the increasing demand for effective interior lighting solutions and advanced safety features, especially in passenger and electric vehicles. Additionally, we are

observing a significant transition from traditional halogen lighting to advanced LED technology.

We, at LIL, have pioneered the field of automotive lighting, consistently leading the way in this evolving industry. Our front lighting solutions have become instrumental in enhancing driver visibility and safety. They now offer exceptional precision in detecting uneven road surfaces, other vehicles, pedestrians, and potential hazards. This technological enhancement is pivotal in improving driving conditions and ensuring greater road safety.

In parallel, rear lighting has undergone a transformation from a purely functional component to a defining design element and stylistic statement for vehicles. The adoption of LED technology has revolutionized vehicle aesthetics, with its sophisticated designs and dynamic animations setting new standards in automotive style. This evolution not only enhances the visual appeal of vehicles but also reflects our commitment to cutting-edge innovation in automotive lighting.

## Lighting Bright

Reflecting on our financial performance, we are pleased to announce a double-digit growth for Lumax Industries during the year under review. On Standalone basis, total revenue stood at ₹ 2,637 Crore in FY 2023-24, increasing from ₹ 2,320 Crore in FY 2022-23 reflecting a rise of 13.7 % Y-o-Y. EBITDA stood at ₹ 266 Crore in FY 2023-24, rising from ₹ 222 Crore in FY 2022-23, showcasing a rise of 19.6% Y-o-Y. PAT during FY 2023-24 was recorded at ₹ 86 Crore, a rise from ₹ 71 Crore in FY 2022-23, growing at a rate of 21.9 % Y-o-Y.

This growth can be attributed to several strategic initiatives and market trends. Firstly, the rising demand for automotive lighting solutions, particularly with the advent of advanced safety features and the growing popularity of electric vehicles, has expanded our market reach. Additionally, our focus on innovation and product advancement has allowed us to

capture a larger share of the automotive component market. Strengthened by robust infrastructure investments, we have effectively responded to increased customer demands and market opportunities. Additionally, our strategic initiatives to optimize our supply chain and enhance supplier relationships. Furthermore, prudent financial management and strategic investments have supported this growth, reinforcing our position as a leading player in the automotive lighting industry.

In FY 2023-24, the passenger vehicle industry achieved remarkable growth by reaching a historic milestone of 4.9 Million units, reflecting a 7% increase in production numbers. The market dynamics have shifted notably with a growing preference for SUVs over sedans and hatchbacks, with SUVs now accounting for approximately 60% of total sales.

The two-wheeler segment also showed strong performance, especially in the later half of FY 2023-24. Production rose to 22 Million units, marking a 10% increase compared to the previous year. This segment's recovery highlights its resilience and growth potential.

In contrast, the commercial vehicle sector experienced stagnation due to weakened demand and a slowdown in private sector capital expenditures.

### Capex

During FY 2023-24, we proudly inaugurated Phase-1 of our new Chakan plant. As we look ahead, we expect a rapid increase in production capacities in the coming months. We are also excited to announce plans for Phase-2 of the Chakan plant expansion. This expansion will significantly enhance our production capacity, enabling us to meet a wider range of client needs and adapt swiftly to future automotive innovations.

In addition, we are establishing a new manufacturing facility in Sanand, Gujarat, to better address the growing demand for advanced lighting solutions from key OEM partners. These strategic initiatives position Lumax Industries to exceed industry growth expectations and achieve its targeted growth rate with strong operating margins.

Our confidence is driven by our ongoing focus on operational efficiency and the anticipated increase in production at both the Chakan and Sanand facilities. By enhancing our manufacturing capabilities and optimizing our processes, we are well-positioned to capitalize on key market opportunities and deliver exceptional performance.

### People as the Driving Force Behind Our Success

At Lumax Industries, we recognize that our employees are central to our success. Over the past year, we've rolled out innovative programs focused on skill development, employee engagement, diversity, and inclusion. Our talent

development efforts are dedicated to identifying and nurturing high-potential employees, preparing them for future leadership roles. Additionally, our ongoing Gurukul program helped improve training effectiveness of our employees. This approach aligns with our goal to continually enhance employee skills and well-being, reinforcing our dedication to a conducive work environment.

These initiatives reflect our commitment to cultivating a culture of continuous growth and empowering our employees.

### Way Forward

Looking ahead to FY 2024-25, Lumax Industries recognizes the challenges and opportunities that lie ahead in the automotive sector. While we anticipate a moderation in growth for passenger vehicles due to high prices and capacity constraints among OEMs, we are optimistic about the two-wheeler market, which is expected to maintain its upward momentum. The introduction of new high-end models by OEMs is likely to invigorate consumer interest and drive sales in this segment. Furthermore, we foresee a rebound in rural demand, which has been subdued over the past year, providing an additional impetus for revenue growth.

Our focus on research and development will enable us to introduce advanced lighting solutions and automotive components that meet the evolving needs of the industry. By enhancing our product offerings, we aim to increase the value per vehicle, which is projected to grow significantly. This strategy not only positions us to capture a larger

market share but also aligns with our vision of sustainable growth.

Collaborations with international firms allows us to integrate advanced technologies and best practices, enhancing our competitiveness in both domestic and international markets. Our strong order book, with a significant portion coming from the passenger vehicle segment, reflects the confidence the OEMs have in our ability to deliver high-quality products.

Moreover, we are focused on improving operational efficiencies and cost management

to maintain competitive pricing without compromising on quality. This approach, combined with our commitment to sustainability and innovation, will help us navigate the anticipated challenges while capitalizing on growth opportunities in the automotive lighting and components sector.

### Closing Note

We are deeply thankful to our esteemed customers, suppliers, investors and colleagues for their continuous support. Your unflinching dedication towards our values, coupled with your confidence in our vision shape our narrative of success and fuel our anticipation of a brighter future. Together, we forge a path where collaboration and commitment converge, propelling us towards collective progress.

# Securing Future with Financial Stewardship

Lumax Industries maintains a resilient financial footing to ensure sustained growth in business, harnessing prudent financial management and strategic investments. Focusing on propelling long-term sustainability rather than gaining short-term benefits, the Company strives to uphold the trust bestowed upon it by its investors and stakeholders. Additionally, LIL draws traction from the persistent upgradation of operational efficiency, that contributes to maximizing profitability, while paving the way for greater achievements. The resilience of Lumax Industries is rooted in its ability to swiftly embrace innovation and adapt to changing market dynamics, equipping it effectively to face challenges. Constant focus on fiscal responsibility remains the pillar of LIL's enduring success, guiding the Company towards continued leadership in the automotive lighting sector.

# Shaping the Future with Formidable R&D

**Lumax Industries stands out for its formidable R&D and impeccable innovative capabilities, pushing the Company at the forefront of cutting-edge automotive lighting technology. The cohort of highly skilled designers and engineers, driving the advancements forward, play the catalysts in stimulating the growth trajectory of LIL. Firm in its conviction to innovate and sustain, the Company leads the charge in developing future-focused automotive lighting solutions, delivering products that perfectly align with the ever-shifting demands of the consumer.**

Lumax Industries continues to deliver precision-crafted globally benchmarked solutions along its growth trajectory, embodying the advancements in the industry. The research and development endeavors of the Company extend beyond product development, to encompass a holistic approach toward process optimization, manufacturing efficiency and cost-effectiveness through ongoing improvements.

LIL is committed to prioritize highest safety standards by aligning its technological advancement and product development to meet the specific requirements of different markets. Considering the fact that lighting is the most heavily regulated component on a vehicle, the Company remains firm in its dedication to uphold an uncompromising stance on safety. This robust commitment defines its business strategies and future progress, enabling LIL to embed safety measures in all its endeavors.

### R&D Focus

Lumax Industries is dedicated to developing products that are specifically suited for the Indian market. The Company diligently considers the unique demands of Indian driving conditions during the development and designing phases, thereby emphasizing to serve Indian customers with tailored solutions. In India, vehicles navigate diverse scenarios, from bustling traffic with pedestrians and animals to varied road conditions. The Company seeks input from the engineering team to understand the specific issues and challenges encountered, such as condensation in lighting systems and the development of Advanced Driver Assistance Systems (ADBs). These insights are valuable in focusing on emerging technologies like OLEDs, laser lighting, diffractive structures and animated signal lamps, among others.

### Staying Ahead of the Curve

The Company is involved in the creation of regulations, particularly the Economic Commission for Europe (ECE) regulations, which are applicable in India as well. In an ever-evolving landscape of regulations, it is imperative for the Company to comprehend the regulatory requirements and stay attuned to the ways by which the industry is adapting to meet them. This invaluable insight allows LIL to align its innovations with the latest global standards and industry best practices. The Company also benefits from its associations with ICAT and SAE India by gaining access to cutting-edge automotive technologies, ensuring regulatory compliance and fostering collaboration with industry experts.

## R&D Efforts

### Development of Projector Modules

Lumax Industries is swift to capitalize on the potential of projector modules which are gaining importance, especially in the EV market, where design flexibility and low power consumption are vital. While reflectors remain technically more efficient, projector modules are perceived as advanced, prompting LIL to invest substantially in developing these modules for EV applications. The Company, in stark contrast with European Tier-II suppliers who focus on high-speed performance, tailors its lighting solutions to better suit Indian road conditions by optimizing light distribution for the visibility of pedestrians and animals.

### Advanced Driving Beam Technology

Lumax Industries leverages the Advanced Driving Beam (ADB) technology, widely used in Europe, to enable drivers to use high beams without causing glare for oncoming traffic, thereby significantly augmenting the level of safety. ADB integrates with vehicle systems, using cameras and sensors to adapt lighting dynamically.

### Lit Logos and Grills

Lumax Industries is venturing into the development of lit logos and grills, taking advantage of the new regulations, ushering fresh business opportunities. This area, especially relevant for electric vehicles that lack traditional grills, allows creative lighting designs and functionalities, such as charging indicators. Moreover, the incorporation of personalization and animation, including lock/unlock sequences, enhances the level of customization and consumer appeal, further emphasizing on leading-edge innovation.

### Standardization

Lumax Industries deploys a unique approach to standardize internal components, while tailor-fitting visible elements, with the objective of optimizing cost and engineering efficiency. To drive down weight, costs, and power consumption, the Company prioritizes optical efficiency. Moreover, the advanced virtual validation tools of LIL, including proprietary optical software, is designed to enhance its ability to develop and test innovations promptly and accurately. By harnessing this strategic approach, Lumax Industries is capable of cutting down the need for physical prototypes, thereby accelerating the time-to-market.

## Transitioning More Toward Electronics

Lumax Industries is undertaking a major overhaul in its manufacturing operations to transition toward electronics. While plastics remain integral to the Company's business, especially with innovative technologies for molding complex light guides, there is a growing emphasis on electronics. The establishment of the top-edge SMT plant exemplifies this shift, enabling LIL to vertically integrate and capture value from its electronic components, thereby enhancing overall profitability.

Ensuring stringent electrostatic discharge protection measures in LIL's assembly operations across India is essential to safeguard the Company's electronic content, which now surpasses the plastic content in its lamps. This shift in mindset necessitates a disciplined approach to manufacturing processes, focusing on electronic management. Additionally, it is imperative for the Company to ensure that end-of-line testers are equipped with the appropriate software, demonstrating Lumax Industries' growing emphasis on software as a key component in its products. This transition is reflective of LIL's commitment to effectively manage engineering and manufacturing processes with a stronger emphasis on electronics.

### Implementing Strong Data Security Measures

Lumax Industries prioritizes data security. The Company is implementing a Product Data Management (PDM) system to ensure secure data control and facilitate global collaboration. This system is designed to eliminate the use of shared drives and personal laptops for storing critical files, thereby mitigating potential security threats. Moreover, the centralization of data on the PDM is expected to empower LIL's teams across locations, including the Czech Republic, Taiwan, Pune and Gurugram, along with its production units, to access the same data seamlessly.

Furthermore, the PDM is expected to enable secure data sharing with the Company's Tier-II partners, which is crucial for incorporating innovations into its products. Establishing strong partnerships with Tier-II suppliers is slated to help LIL bring cutting-edge technology to the Indian market, concurrently managing data securely.

Manufacturing Excellence

# Striding Forward with Unmatched Manufacturing Prowess

**Lumax Industries is scripting a robust journey toward manufacturing excellence, bolstering its operations with a refined supply chain to improve efficiency, optimize raw material utilization, and minimize waste. Embracing a future-forward approach, LIL is pioneering top-tier processes and harnessing digital innovations to propel the Company toward these ambitious goals with precision and ingenuity. Striding forward with a firm conviction to enhance productivity and surpass industry benchmark in manufacturing prowess, LIL remains committed to consolidate its leadership in the automotive lighting sector.**

Lumax Industries follows a comprehensive approach to enhance facility maintenance, with a focus on boosting productivity, minimizing resource waste, eliminating accidents and defects, and unplanned downtime. Embodying a commitment to advance manufacturing capabilities, the Company embraces Total Productive Maintenance (TPM) across all its manufacturing sites, with plans to extend this initiative throughout its supply chain.

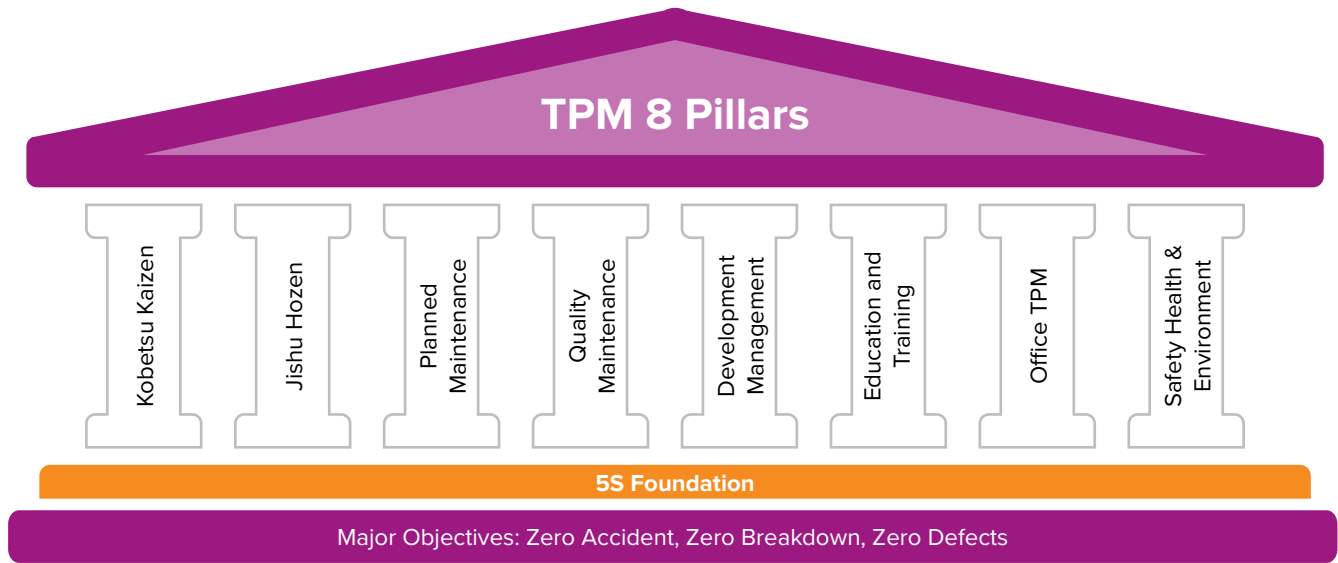

Aligned with JIPM-TPM standards, Lumax Industries puts in place TPM guidelines to standardize and strengthen maintenance activities across the organization. Additionally, the Company celebrates excellence with Lumax TPM Awards, honoring facilities with remarkable achievements in TPM implementation.

## Ensuring Efficient Manufacturing Operations

Lumax Industries seamlessly integrates TPM across its manufacturing systems and various functions such as LCIA, Energy Management and QCC. This integrated approach marks a significant milestone for the Company, empowering the identification of improvement opportunities/Kaizens under TPM and ensure their effective implementation through LCIA, Energy Management, and QCC frameworks. By adopting this holistic strategy, LIL strives to continuously enhance its performance and achieve sustained improvement that align with its strategic business objectives.

PILLARS of TMP

**Role of Corporate Sourcing towards Manufacturing**

Lumax Industries orchestrates its corporate sourcing function with precision, placing it at the core of all the commercial discussions and nomination of the suppliers across its diverse entities. The Company boasts three distinct verticals within the sourcing function.

- The first vertical encompasses strategic sourcing which handles all the direct materials.
- The second vertical pertains to capital procurement that assists the production units to manufacture products for OEMs.
- The third vertical is focused on the development of suppliers through training and upgradation of their manufacturing processes and systems.

Additionally, the Company organizes workshops involving suppliers to meet savings targets. Moreover, to ensure supply base consolidation, the Company aims to bring down the number of suppliers, laying the path for efficient supply chain management.

External Focus

### Global ESG Trends

The Company closely monitors global ESG trends, drawing insights from authoritative sources such as the World Economic Forum Global Risk Report, ERM 2024 Sustainability trends, and MSCI ESG Trends to Watch. These sources help to identify relevant sectoral aspects that are integral to its strategy development.

### Sector ESG Trends

Recognizing that each sector has unique ESG issues that influence its operations, the Company considers sectoral ESG trends. The Company relies on reputable organizations like S&P Global, MSCI, and SASB as well as peers & customers to identify these sector-specific ESG trends, which are essential in shaping its strategy.

Internal Focus

Materiality Assessment

In the fiscal year 2024, Lumax Industries conducted its inaugural comprehensive materiality assessment. This initiative aimed to identify the critical issues that influence our business growth and significantly affect our stakeholders. The Company employed a structured approach involving one-on-one discussions, online surveys, and reviews with both internal and external stakeholders to gather valuable insights and assess risks that may impact its value creation capabilities. Additionally, an extensive desk review was carried out to evaluate topics pertinent to the Company.

All relevant aspects were compiled to create a Universe of Material Issues. These aspects were then shortlisted based on their importance to our sector and their frequency of occurrence. This process enables us to identify key focus areas for the Company to prioritize in our ESG strategy, ensuring alignment with our sector's unique dynamics and global ESG trends.

The final output of the above process is the materiality matrix as below:

Material Topics for Lumax Industries

- Energy Management & Conservation
- Employee Well-Being
- Code of Conduct
- Carbon Emissions
- Diversity, Equity & Inclusion
- Regulatory Compliance
- Waste Management
- Customer Satisfaction
- Risk & Crisis Management
- Water Management
- Research and Development
- Data Security
- Occupational Health & Safety
- Corporate Social Responsibility
- Sustainable Procurement
- Stakeholder Management

ESG Strategy

# ESG Strategy: Turning Goals into Action

The Company believes that ESG is not only a responsibility, but an opportunity to create lasting value for all stakeholders. The Company's dynamic and adaptable approach helps to translate aspirations into tangible results, ensuring both financial success and positive social and environmental impact. The Company has created a strategic framework that guides toward responsible and scalable operations, a talented and future-proof workforce, and consistent financial returns.

The Company remains committed to building a better world, and this commitment is woven into its culture. The Company encourages cross-functional collaboration and initiative development, ensuring that every team member contributes to ESG initiatives aligned with its core values. The Company's relentless pursuit of environmental stewardship and employee well-being forms the foundation of its success. The Company firmly believes that sustainability and social responsibility are not simply goals, but essential elements of a thriving and enduring organization.

## Strategy Framework

To achieve sustainable growth, the Company used the insights from its Materiality Assessment to develop its ESG strategy. This strategy is based on four pillars: Environment Resilience, Workforce Synergy, Business Outreach, and Sustainable Business Practices. Within these pillars, the Company has identified 16 focus areas that drive our goals. The Company has established a robust governance structure to ensure effective oversight and transparent monitoring of progress and disclosures. This structure ensures that the Company's strategy is well-executed and accountable at every step.

## Contribution to UN SDGs

The Company's extensive ESG strategy is designed to align with the United Nations' Sustainable Development Goals (UN SDGs) and contribute to India's environmental and socioeconomic development objectives.

ESG Strategic Pillar

Environment Resilience

This strategic focus area aims to minimize the environmental impact and carbon footprint of the Company's operations. The Company prioritizes enhancing the sustainability of its assets, optimizing resource use, increasing efficiency, and reducing waste generation and water consumption. It emphasizes on:

Material Topic	3-Year Target
<ul style="list-style-type: none"> <li>Energy Management &amp; Conservation</li> <li>Carbon Emissions</li> <li>Waste Management</li> <li>Water Management</li> </ul>	<ul style="list-style-type: none"> <li>RE100 by 2027-2028</li> <li>Monitor Reduction and Report GHG emissions</li> <li>Waste Management as per 3'R</li> <li>Water Neutral</li> </ul>

Workforce Synergy

The Company's Workforce Synergy pillar highlights the importance of a motivated and engaged workforce for achieving true success. The Company prioritizes creating a safe, inclusive, and positive work environment where its team members can thrive, fostering the unique character of the organization. It emphasizes on:

Material Topic	3-Year Target
<ul style="list-style-type: none"> <li>Occupational Health &amp; Safety</li> <li>Employee Well-Being</li> <li>Diversity, Equity &amp; Inclusion</li> </ul>	<ul style="list-style-type: none"> <li>Maintain Zero fatality at our sites</li> <li>Employee Feedback and Redressal</li> <li>Increase women's representation in the workforce by 25%</li> </ul>

Business Outreach

The Company has consistently held the belief that comprehensive and inclusive growth is essential for its long-term and sustained well-being. The Company's commitment lies in fostering sustainable growth through customer satisfaction, innovation, and social responsibility which leads to overall societal development. It emphasizes on:

Material Topic	3-Year Target
<ul style="list-style-type: none"> <li>Customer Satisfaction</li> <li>Research &amp; Development</li> <li>Corporate Social Responsibility</li> </ul>	<ul style="list-style-type: none"> <li>To Implement Customer Satisfaction Survey and Score, Redressal Mechanism for Customer Complaints</li> <li>Increase Focus on Patent</li> <li>Strengthen Community Relations</li> </ul>

Sustainable Business Practices

The Company's Sustainable Business Practices pillar aligns with our mission to be the customer's first choice for superior engineered solutions. The Company has achieved this by conducting business ethically, transparently, and responsibly to build trust and foster long-term relationships.

Material Topic	3-Year Target
<ul style="list-style-type: none"> <li>Code of Conduct</li> <li>Regulatory Compliance</li> <li>Risk &amp; Crisis Management</li> <li>Data Security</li> <li>Sustainable Procurement</li> </ul>	<ul style="list-style-type: none"> <li>Zero Tolerance towards Violation of Code of Conduct</li> <li>100% Mitigation of Identified Risks</li> <li>Zero Data Security Breaches</li> <li>100% Adherence to Sustainable Procurement Policy</li> </ul>

# Environment

In today's world, where environmental challenges loom large, the Company's role as an automotive component manufacturer extends beyond crafting quality products—it encompasses a broader responsibility to safeguard the planet. The Company understands that its actions today profoundly impact the world passed on to future generations. This understanding is what propels us to place environmental sustainability at the core of its business.

## Energy and Emissions

### Navigating Towards a Sustainable Future

In an era of escalating environmental concerns and the urgent need for eco-conscious practices, our commitment to sustainable, low-carbon operations is a cornerstone of our corporate ethos. As an automotive component manufacturer, the Company recognizes the crucial role played in the global ecosystem.

### Measuring Carbon Footprint

The urgent global need for a rapid transition to a sustainable, low-carbon future has never been more critical. In 2024, the Company assessed our greenhouse gas emissions, or carbon footprint, using the WRI Greenhouse Gas Protocol methodology. This analysis provided insights into the main contributors to emissions and highlighted key areas for reduction.

Through the commitment to responsible energy stewardship and sustainable practices, the Company aims to leave a positive environmental impact, enhance operational efficiency, and benefit both the stakeholders and the broader planet.

GHG Emissions	Units of measurement	FY 2023-24
Scope 1	tCO <sub>2</sub> e	1,220.75
Scope 2	tCO <sub>2</sub> e	52,406.24
Total	tCO <sub>2</sub> e	53,626.99
Emissions Avoided (Solar Power Plants)	tCO <sub>2</sub> e	10,035.45

### Reducing Impact

Understanding the significant impact of energy use on the environment, the Company is dedicated to taking the first steps toward reducing our energy consumption. The Company's approach emphasizes the importance of starting with achievable, practical measures that will set the stage for ongoing improvements and greater sustainability efforts.

The Company's initial projects focus on straightforward, yet effective, strategies that promote energy efficiency across the operations. These projects span various aspects of its infrastructure and processes, highlighting the commitment to sustainability and energy conservation.

# 1 Energy Efficiency Projects

## Lighting and Electrical Efficiency

The Company's efforts to enhance lighting and electrical efficiency include:

- Replacing mercury streetlights with solar streetlights and optimizing indoor lighting using LES (Light Energy Saver) technology.
- Installing motion sensors in washrooms, meeting rooms, and gangways for automatic light control.
- Upgrading old ceiling fans to BLDC fans for higher efficiency.

## Heating and Cooling Enhancements

The Company has implemented several measures to optimize its heating and cooling systems, including:

- Installed infrared (IR) heaters and replaced old heaters with energy efficient coil heaters and DP heaters.
- Implemented Variable Frequency Drive (VFD) systems on various ovens, cooling towers, and conveyors to optimize energy use.
- Installed energy efficient air washers and upgraded old air conditioners to inverter-based or 5-star rated models for better performance and lower energy consumption.

## Compressor and Motor Upgrades

To improve the efficiency of the mechanical systems, the Company has:

- Replaced outdated, inefficient compressors and motors with high-efficiency models, including IE3, IE4 grade motors, and EC motors.

## Miscellaneous Improvements

Additional measures undertaken include:

- Utilizing VFD panels in powder coating booths.
- Introducing descaling machines for the molding area and metalizing pumping groups.
- Installing servo motors in various machines to enhance their operational efficiency.

## Automation and Control Systems

The Company has implemented several measures to optimize its heating and cooling systems:

- Installed solenoid valves and auto drain valves to reduce air leakage and prevent unnecessary air draw during no-load conditions.
- Utilized real-time power factor correction systems and online energy monitoring systems for enhanced energy management.

## Air Management

Enhancing air management within the Company facilities:

- Conducted air leakage identification and implemented countermeasures to prevent energy loss.
- Installed cyclic timers and pressure switches on air conditioners to optimize their operation.
- Added air pressure vessels to improve the efficiency of air systems.

## 2 Renewable Energy

In its pursuit of sustainability and reducing reliance on non-renewable energy sources, the Company has prioritized the integration of renewable energy solutions. The Company's initiatives in this area are designed to harness clean energy, decrease greenhouse gas emissions, and foster a more sustainable operational model.

### Rooftop Solar Plants

One of the Company's significant projects involves the installation of rooftop solar plants on its existing manufacturing facilities. This initiative is a pivotal step towards utilizing renewable energy to power its operations. By converting sunlight into electricity, these solar panels provide a reliable and sustainable energy source that significantly reduces its dependency on conventional fossil fuels. In FY 2023-24, the Company's eight solar installations across various locations generated 1,21,93,754 kWh of clean energy which helped the Company to avoid 10,035.45 tCO<sub>2</sub>e.

Looking ahead, the Company plans to expand its renewable energy initiatives by exploring the feasibility of additional solar installations.

## Water

In the automotive component manufacturing industry, where precision, innovation, and efficiency are essential, responsible resource management has become increasingly vital. Water, a critical yet limited resource, significantly impacts Company's operations, influencing product quality and environmental preservation. As a responsible industry leader, the Company understands the importance of water in its processes and is dedicated to its responsible use and conservation. The Company's commitment to sustainable water management reflects its dedication to corporate responsibility and underscores its vision for a thriving, eco-conscious future.

### Total Water Withdrawal and Consumption

Parameter	Units	FY 2023-24
Total Water Withdrawal	KL	1,33,430.36
Total Water Discharge	KL	12,206.00
Total Water Consumption	KL	1,21,224.36

### Water Saving Initiatives

As part of the Company's commitment to sustainable practices and environmental stewardship, the Company has implemented a range of water-saving initiatives aimed at reducing the water consumption, promoting efficient water use, and safeguarding this vital resource for future generations.

Below are some of the primary strategies the Company has adopted:

#### Zero Liquid Discharge

A fundamental aspect of water conservation strategy is the implementation of Zero Liquid Discharge (ZLD) systems via Effluent Treatment Plants (ETPs) and Sewage Treatment Plants (STPs) at Company's facilities. These cutting-edge systems allow the Company to treat and recycle wastewater, ensuring that no liquid waste is released into the environment. The Company has established Effluent Treatment Plants (ETPs) and Sewage Treatment Plants (STPs) at all facilities, wherever required, underscoring Company's commitment to responsible water management across its operations.

The Company plans to expand the implementation of ZLD systems to additional facilities and explore new technologies to improve the efficiency and effectiveness of its water treatment processes.

#### Other Initiatives

**Water Saving Tap Aerators:** The Company has installed Water Saver (Shower Base) taps in all toilets, hand wash stations, and dining halls. These taps are designed to reduce water flow while maintaining sufficient pressure for effective cleaning, minimizing water wastage without compromising hygiene and convenience for the employees.

**Efficient Dish Washer Machines:** In the dining halls, the Company has installed efficient dish washer machines that are optimized to use minimal water while ensuring thorough cleaning. This has significantly contributed to reducing water consumption in food service areas.

**Water Reuse from Solar Panel Cleaning:** To further enhance water conservation efforts, the Company has implemented a system to reuse water used in cleaning solar panels. This water is collected and stored in water harvesting tanks and is then reused for gardening purposes. This not only reduces water consumption but also supports the maintenance of green spaces around facilities.

By adopting these water-saving measures, the Company has not only reduced its environmental footprint but also demonstrates its dedication to sustainable practices in every aspect of its operations.

## Waste

In the Company's ongoing efforts to manage waste responsibly, the Company has made several notable improvements within its organization, all contributing to its commitment to environmental sustainability.

Parameter	Units	FY 2023-24
Plastic Waste	MT	1,384.51
E-Waste	MT	20.10
Biomedical Waste	MT	0.007
Construction & Demolition Waste	MT	0
Battery Waste	MT	33.43
Radioactive Waste	MT	0
Other Hazardous Waste	MT	762.98
Other Non-Hazardous Waste	MT	725.68
<b>Total</b>	<b>MT</b>	<b>2,926.70</b>

### Waste Reduction

The Company is dedicated to minimizing waste generation and maximizing recycling and reuse. Company's strategies focus on implementing effective waste management practices and fostering a culture of sustainability across all operations. Some key initiatives in this direction include:

### Waste Segregation and Recycling Programs

The Company has implemented waste reduction strategies, including waste segregation at the source and recycling programs. This ensures that different types of waste are appropriately sorted, facilitating efficient recycling and reducing landfill.

### Collaboration with Certified Waste Management Vendors

To guarantee the proper disposal of both hazardous and non-hazardous waste generated during manufacturing processes, the Company collaborates with certified waste management vendors. This partnership ensures compliance with environmental regulations and promotes safe, responsible waste disposal practices.

### Setting and Monitoring Waste Reduction Targets

The Company is in the process of establishing waste reduction targets. This approach will help to improve waste management practices and reduce environmental impact.

### Switching from Wooden to Plastic Pallets

Wooden pallets, while traditional, have a higher propensity to break, leading to increased waste and recurring costs associated with repairs and replacements. The transition has significantly reduced the volume of waste generated from broken and discarded wooden pallets.

### Transition from Corrugated Boxes to Returnable Trolleys

The Company has proactively implemented the use of returnable trolleys for customer material handling, eliminating the need for corrugated boxes which has significantly decreased the volume of packaging waste generated in its operations. Returnable trolleys are designed for durability and can be reused multiple times, reducing the need for frequent replacements and minimizing resource consumption, contributing to Company's waste reduction goals.

Through these initiatives, the Company is committed to advancing sustainable waste management practices, contributing to a cleaner environment, and enhancing operational efficiency.

# Social

**The Company's vision is to create a better future, and the commitment to sustainability goes beyond providing exceptional products and services to its customers. The Company understands that fostering holistic and inclusive growth for all its stakeholders is essential for continued well-being of the Company. Engaging and involving its employees, supply chain partners, customers, and the community in the sustainability-driven growth journey is fundamental to this approach.**

## Employees

The success of Lumax Industries is driven by the talents and contributions of its employees. Their dedication and efforts turn the goals into reality. The Company offers a meritocratic workplace that ensures equal opportunity and promotes excellence, regardless of race, religion, color, nationality, gender, age, disability, or other characteristics.

The Company's comprehensive people policies are designed to make every employee feel secure and confident. Given the nature of its operations, the Company maintains a relentless focus on measures that ensure the health and safety of its employees.

The Company takes pride in being an employee-friendly workplace that prioritizes the well-being and professional growth of its team members. Throughout the past year, the Company has implemented initiatives aimed at fostering a supportive and inclusive environment, where every employee feels valued and empowered. Company's commitment to work-life balance is reflected in flexible work arrangements, comprehensive health benefits, and ongoing

opportunities for skill development. The Company believes that a happy and engaged workforce is the foundation of its success. The Company is dedicated to creating a culture of collaboration, respect, and recognition. The Company is also committed to creating an inclusive and safe workplace that provides equal advancement opportunities for all. To achieve this goal, a comprehensive training and diversity strategy has been formulated.

### Employee Training and Development:

The Company believes that equipping its employees with the necessary skills and competencies is vital to meeting customer expectations and ensuring the smooth operation of its processes.

The Company's training and development programs prioritize leadership development, functional skills, and operational training. These initiatives focus on enhancing productivity, safety, and minimizing losses. The Company collaborates with esteemed external trainers to offer a blend of self-paced and instructor-led programs.

**Regulatory and Compliance Training**

- POSH Awareness
- Prohibition of Insider Trading
- New Policies & Guidelines

**Sustainability and ESG Training**

- Basics of ESG & Sustainability
- ESG Awareness
- GHG Accounting
- ISO 50001:2018

**Operational and Technical Training**

- Job-Specific Functional Training
- SAP Module
- Quality Function Development
- Low-Cost Automation

**Leadership and Personal Development Training**

- Leadership Development
- Performance Management
- Sessions on Goal Setting

## Employee Benefits

The Company's employee benefits program is designed to motivate and engage its workforce while providing them with financial security. The Company offers a comprehensive suite of benefits to support its employees and their families, ensuring their well-being and fostering a positive work environment.

**Life Insurance and Compensation in the Event of Death:** In the unfortunate event of an employee's or worker's death, the Company provides life insurance and compensatory packages to offer financial support to their families during difficult times.

**Social Security:** The Company's commitment to the financial well-being of its employees and workers are demonstrated through comprehensive benefits package.

## Health & Safety

The Company has integrated an Occupational Health and Safety Management System as a vital aspect of its operations. The primary objective is to cultivate a work environment that prioritizes the health and safety of employees while upholding principles of environmental sustainability. To achieve this, the Company has established various mechanisms, including continuous improvement of its environmental Occupational Health and Safety performance, creating an incident-free work environment, minimizing waste to conserve natural resources, ensuring compliance with applicable legal requirements, proper disposal of waste and pollutants, and promoting innovation to prevent pollution, injury, and illness. Furthermore, the Company is ISO 45001 certified, covering 81.8% of its plants, demonstrating its commitment to maintaining high standards of occupational health and safety across its operations.

### Hazard Identification and Risk Assessment (HIRA):

This process involves a thorough evaluation of the work environment and operational tasks to identify potential hazards that could harm employees, visitors, or the surrounding ecosystem. Each identified hazard's risk is carefully assessed to determine the likelihood and potential consequences of an incident. After analyzing the situation, appropriate actions are developed and implemented to mitigate the risks.

**Health, Safety and Environment (HSE) Inspections:** This involves reviewing the organization's policies, procedures, and practices related to environmental management, health, and safety. HSE inspections and audits identify areas for improvement to reduce incident risks and ensure compliance with regulatory obligations and industry

standards. Corrective action plans are developed based on audit results.

During hazard assessments, the Company reviews all routine and non-routine activities to identify significant risks and define control measures. For routine tasks, the Company uses a Safety Audit checklist with 188 points covering various operational areas. For non-routine tasks like working at heights and excavation, the Company uses a work permit system and other hazard identification techniques to ensure safety.

## Zero

Total Recordable Work-Related Injuries in FY 2023-24

## Employee Well-Being

Enhancing the healthcare infrastructure for its employees is a priority at Lumax Industries. The Company provides the convenience of having an in-house doctor available for consultation to all employees. Several health initiatives are implemented to promote the well-being of staff, including health check-up camps, vaccination drives, and scheduled visits by external doctors from renowned hospitals. During the year, Lumax Industries established six fully functional medical rooms/OHC services. These medical rooms offer a range of services, including consultation, medicines for minor ailments, emergency care, pre-employment health check-ups for contractual employees, daily hygiene audits of the plant, and health wellness and awareness sessions. These efforts ensure that the employees have access to comprehensive healthcare support, contributing to their overall well-being and creating a healthier work environment.

## Corporate Social Responsibility

At Lumax, the Company is dedicated to creating a substantial positive impact by envisioning a bright future for the communities in which it operates. The Company believes in its responsibility to improve and enrich the lives of these communities, contributing to their social and economic development.

The Company's CSR activities are primarily focused on the areas surrounding its operations. Through strategically designed and diligently executed projects, the Company strives to achieve the United Nations' Sustainable Development Goals (UN SDGs), fostering holistic and inclusive growth.

To maximize the impact of its initiatives, the Company employs a structured approach:

- Conducting detailed needs assessments to identify the areas and communities that would benefit most from its CSR activities.
- Engaging stakeholders and community members through effective on-ground mobilization strategies.
- Partnering with organizations that share similar values and can effectively contribute to the Company goals.
- Monitoring projects on a periodical basis to ensure timely progress and address any challenges.
- Performing thorough internal and external evaluations to assess the impact and success of its initiatives.

### 'Sunehra Kal' - Life Skill Development Initiative

The 'Sunehra Kal' Life Skill Development Initiative, conducted in Haryana, Maharashtra, and Gujarat, aims to develop essential life skills in students from grades 9 to 12. The project focuses on fostering the health and well-being of children and adolescents by equipping them with the skills necessary to make essential life decisions and lead successful lives. Topics such as communication skills, decision-making, self-awareness, critical thinking, empathy, problem-solving, time management, interpersonal relationships, and stress management are covered, following guidelines from the World Health Organization (WHO). This initiative was selected to empower students to navigate the complexities of daily life effectively and achieve their goals. Life skills are the building blocks of a successful and fulfilling life, enabling students to thrive in various aspects of life and contribute positively to society. The project has touched the lives of 2,600 students, significantly benefiting students by enhancing their skill sets.

### Career Counselling

Career counseling, provided to students in Haryana, Maharashtra, and Gujarat, aims to inform students about various career options available in the market. It includes aptitude tests to align students' personalities with their chosen career options. The initiative was selected because students from deprived communities often have limited exposure, resources, networking opportunities, and mentorship. By providing career counseling, the project helps bridge these gaps. The project has impacted 2,600 individuals, significantly benefiting students by enhancing their understanding of career paths and aligning their skills with their future aspirations.

### 'Usha Ki Kiran' Scholarship

The 'Usha Ki Kiran' Scholarship, available in Haryana, Maharashtra, and Gujarat, provides financial support to underprivileged students to ensure equitable access to higher education. This initiative was selected because students in government schools, especially in rural areas, have less access to scholarships. These scholarships boost students' self-confidence and encourage them to pursue their dreams without financial worries. The project has directly benefited 240 students and inspired over 5,000 additionally, motivating them to aim higher in their educational pursuits.

### School Infrastructure Support

School infrastructure support is provided in Haryana, Maharashtra, and Uttarakhand to ensure students have conducive environments for their education. The Lumax-DK Jain Group's CSR arm, Lumax Charitable Foundation, works with government schools in these states to address numerous challenges in providing basic facilities. For example, the lack of safe toilets can hinder students' attendance and increase the dropout rate. This initiative was selected to improve the basic infrastructure in schools, thereby enhancing the overall learning environment.

### Cancer Awareness and Screening Camps

Cancer awareness and screening camps are organized in rural areas of Haryana to provide free screening and early detection for communities. The initiative also provides financial support to patients detected in the camps. Cancer screening camps are crucial for comprehensive cancer control efforts, increasing access, addressing disparities, promoting education and awareness, and fostering community engagement. This initiative was selected to reduce the burden of cancer and improve health outcomes for society members. The project has reached 473 rural individuals, providing essential screenings and support.

### Eye Screening and Free Cataract Surgeries

The eye screening and free cataract surgeries project in Haryana organizes eye camps to provide comprehensive eye care services to underserved populations. The services include eye screenings, distributing medicines and spectacles, and performing cataract surgeries. The aim is to address the high prevalence of cataracts and refractive errors, which are leading causes of blindness and vision impairment in India. This initiative was selected to provide accessible and affordable eye care services to underserved populations. The project has successfully conducted 167 cataract surgeries, significantly improving the vision and quality of life for many individuals.

### Juvenile Diabetes

The 'Juvenile Diabetes' project in Maharashtra provides financial support to deprived patients for consultation, diabetic support (medicines, regular investigations and nutritional support), counseling, sensitization on social issues, and a 24/7 helpline. Juvenile diabetes, or Type 1 diabetes, often diagnosed in children and young adults, requires consistent management. Maharashtra, one of the most populous states in India, has a significant number of individuals living with juvenile diabetes. This initiative was selected to provide regular medical check-ups, insulin, education about diet and exercise, and emotional support to manage the condition effectively. The project supports 15 patients, helping them manage their diabetes and live fulfilling lives.

# Governance

**Integrating environmental, social, and governance (ESG) considerations into a framework allows the Company to manage risks, seize opportunities, and contribute to society and the environment. The Company's commitment to responsible governance builds stakeholder trust, drives sustainable growth, and creates enduring value. By adhering to high standards, the Company prioritizes stakeholder needs and ensure accountability and responsible resource use. This section of the Company's sustainability report highlights the practices and dedication to transparency, ethical conduct, and meeting evolving stakeholder expectations.**

## ESG Management System

As part of its dedication to responsible and sustainable business practices, the Company has established a robust ESG Management System that guides its strategic direction and operational processes.

The ESG team sets sustainability goals for the organization and guides the agenda on this front, formulates strategies and execution roadmaps in line with the ESG vision defined by the Leadership. The team reviews public disclosures (such as the ESG Report, policies, and other related presentations or reports), and presents them to the Leadership Committee and the Board for approval. Additionally, the Committee engages with stakeholders, including external agencies and auditors, on topics relevant to our ESG performance and meets every quarter.

## Roles and Responsibilities of the ESG Team

### Formulate Strategies and Execution Roadmaps

Align strategies with the ESG vision set by the ESG Team.

### Set Annual Targets

Establish yearly goals to achieve the organization's sustainability objectives.

### Identify KPI Owners

Assign owners for specific KPIs in each focus area and map their roles and responsibilities.

### Provide Guidance and Operational Insight

Support KPI owners and the ESG Working Team with necessary guidance and insights.

## Stakeholder Engagement

As an automotive manufacturer, the Company understands that its sustainability journey relies on the active involvement of its diverse stakeholders, including employees, suppliers, customers, communities, government agencies, and investors.

The Company uses various channels such as e-mails, SMS, community meetings, notice boards, and its website to engage regularly with stakeholders, fostering transparency and understanding. The Company's engagement initiatives address a wide spectrum of topics and concerns, including:

 <p><b>Employees</b></p> <p>The Company ensures their voices are heard and acted upon, creating a positive and inclusive work environment.</p>	 <p><b>Local Communities</b></p> <p>The Company's CSR activities focus on building sustainable relationships and addressing community-specific concerns.</p>
 <p><b>Suppliers and Service Providers</b></p> <p>The Company collaborates on business operations, aiming for mutually beneficial outcomes.</p>	 <p><b>Government Agencies</b></p> <p>The Company maintains regulatory and statutory compliance, proactively engaging with authorities.</p>
 <p><b>Customers</b></p> <p>The Company gathers feedback to improve its products and services, ensuring customer satisfaction and loyalty.</p>	 <p><b>Investors and Shareholders</b></p> <p>During regular meetings, the Company discusses financial and strategic topics, shaping its corporate direction.</p>

### Policies and Standards

The Company's policies provide a framework that enables it to realize its governance vision and ensure transparency both within and outside the organization.

### External Audits and Assessments

In its pursuit of robust internal controls and timely compliance, the Company regularly undergoes external audits and assessments. These audits serve as a crucial mechanism to ensure that the Company's operations align with industry standards, regulatory requirements, and ethical norms. It reflects the Company's commitment to transparency and accountability in its business practices.

 <p><b>Track KPI Progress</b></p> <p>Monitor the progress of KPIs on a quarterly basis.</p>	 <p><b>Review and Approve Public Disclosures</b></p> <p>Evaluate and approve ESG-related public disclosures, including the Annual Report, ESG Report, and specific disclosures and policies.</p>	 <p><b>Present Disclosures for Approval</b></p> <p>Submit the reviewed disclosures to the Board for final approval.</p>	 <p><b>Engage with Stakeholders</b></p> <p>Interact with stakeholders, including external agencies and auditors, relevant to ESG matters.</p>

### d. AMOUNT TRANSFER TO RESERVES

The Board of the Company do not propose to transfer any amount to reserves other than transfer of undistributed profits to surplus in statement of profit & loss.

### e. PERFORMANCE OF SUBSIDIARY AND ASSOCIATE COMPANY & CONSOLIDATED FINANCIAL STATEMENTS

"Lumax Industries Czech s.r.o." is a Wholly Owned Subsidiary (WOS) of the Company and is engaged in the business of providing technical and engineering solutions for the automotive lighting systems.

During the FY 2023-24, the profit of the WOS attributable to the Company was ₹ 163.20 Lakhs.

The Company also has one Associate Company viz. SL Lumax Limited, in which the Company holds 21.28% of equity share capital. SL Lumax is based in Chennai and primarily engaged in manufacturing of automotive components which includes lamp assemblies, chassis, mirror and front-end modules (FEM).

During FY 2023-24, the Associate's profit attributable to the Company was ₹ 5,811.63 Lakhs as compared to the ₹ 4,170.54 Lakhs in the last year.

In accordance with the provisions of the Companies Act, 2013 ("the Act") and Regulation 33 of the Listing Regulations and applicable Accounting Standards, the Audited Consolidated Financial Statements of the Company for the FY 2023-24, together with the Auditors' Report form part of this Annual Report.

In accordance with the provisions of Section 129(3) of the Act read with Rule 8(1) of the Companies (Accounts) Rules, 2014, a report on performance and financial position of the WOS and Associate Company, included in the Consolidated Financial Statement (CFS) is presented in a separate section in this Annual Report in the prescribed **Form AOC-1**.

In accordance with Section 136 of the Act, the electronic copy of Financial Statements of the WOS and Associate Company shall be available in the investor section of website of the Company at <https://www.lumaxworld.in/lumaxindustries/associate-financials.html>. Any Member desirous of obtaining a copy of the said Financial Statements may write to the Company Secretary at the Registered Office of the Company. The Financial Statements including the CFS, and all other documents required to be attached to this report have been uploaded on the website of the Company at <https://www.lumaxworld.in/lumaxindustries/index.html>

## 2. STATE OF COMPANY'S AFFAIRS

The fiscal year 2023-24 was a significant year for the Indian automotive segment especially for the passenger vehicle segment where India maintained its 3rd position after China and United States. The passenger vehicle segment recorded a growth of 6% in production vis-à-vis the last year. Two-wheeler segment showed a decent growth of 9% indicating the strong economic growth. With the significant new model launches and the trust shown by the Original Equipment Manufacturers (OEMs), the Company was able to clock growth more than that of the industry.

It has been a pretty successful year for the Company with addition of new customers in its portfolio coupled with the new businesses from existing customers to improve top line.

With the technological advancements happening in the automotive industry and with increased focus of OEMs on localization, the Company invested significantly on its R&D facility and opening of new R&D office at Gurgaon to maintain the competitive edge against the competition.

## Board's Report (Contd.)

This has been evident with the strong order book that the Company maintains with the development and production of new technology parts.

The Company with the new launches planned in the FY 2024-25, started new manufacturing plant in the western region coupled with expansion in the Gujarat region. The new facility will support existing and new customers with the supplies of future generation of automotive lamps. In FY 2024-25, the Company is planning to venture into a new vertical with the introduction of Automotive Heater Control Panel for a prestigious OEM. The product shall enable the Company to expand the horizon into a new segment with support from its partners.

The technology has been changing and evolving rapidly, and in order to always be ahead with the competition, the Company has been focussing on strengthening its R&D capability. In this direction the Company's Wholly Owned Subsidiary in Czech Republic is playing a pivotal role to further enhance the skill of the local staff with exposure to new futuristic technologies.

With the introduction and emphasis of localization by OEMs, to avoid the risks associated with the supply chains, Lumax has invested in the upgradation of its existing manufacturing facilities. The same will help in successful localization of technologically advanced products thus giving the customers immunity from supply chain risks with best quality products.

This year, the Company focused extensively on digitalization and cybersecurity. All process approvals have been digitized, covering:

- Capital Expenditure (Capex)
- Corporate Sourcing
- Human Resources and Administration
- Marketing
- Strategy and Business
- Finance and Accounts
- Banking
- Legal and Secretarial etc.

On the ERP front, the Company has upgraded its existing SAP system to SAP S/4 HANA RISE and all SAP servers will now be hosted in Google's data-center and managed by the SAP team. Earlier servers were hosted in a local data-center. This transition is expected to enhance cyber security and system availability, with SAP providing a 99.70% uptime guarantee. Additionally, the Company has acquired licenses for SAP Analytics Cloud, which includes built-in AI capabilities to support data-driven decision-making.

To enhance customer support and integration, the Company has implemented Electronic Data Integration (EDI) to establish real-time connections for daily supply schedules and delivery status.

LSETU, the Suppliers' portal of the Company is now available to all domestic and international suppliers. All schedules are generated through SAP's Material Resource Planning (MRP) system, which integrates with LSETU in real time. Suppliers must create Advance Shipment Notes before sending deliveries, and they can check real-time delivery payment status.

To reinforce cybersecurity, the Company has upgraded from traditional antivirus to Endpoint Detection & Response (EDR) and acquired tools for Vulnerability Assessment and Penetration Testing (VAPT). With these tools, the Company now tests its IT environment regularly, whereas previously, this process was conducted by third-party software only twice a year.

The Company is experiencing an increased interest to implement high level technology in future vehicles. The accelerated interest in the Electric Vehicle (EV) segment, is resulting in a growing spend on lighting technologies. OEMs are using lighting as the differentiator, and to define their signature. New regulations are now allowing for lit logos, and drives lighting into full front grill and full decklid applications. This gives design studios access to a new canvas to create innovative designs that appeal to customers and give a "tech look" to their vehicles. Not only are there new lit elements on the vehicle, but now complex animation in the form of welcome and goodbye sequences, charging indication status, and completely new features that didn't exist before. This is all driven by a rapidly growing electronic and software content on the vehicle. The Customers are now benchmarking what is going on in the Chinese market, with more creative uses of lighting on their vehicles.

The Company is focused on developing the necessary building blocks to enable the industry trends and the visions given by the customers. A strong effort is being made to optimize the efficiency of low-profile headlamps, hidden-til-lit features and ultra homogeneous signal functions. Developing the technical competency of teams through training and proprietary engineering tools, allow the Company to develop these new innovative technologies in India. These new features need to balance the appearance demands of the design studios, but not compromise on key metrics like power consumption, performance, weight, and sustainability. Adapting global technologies for the cost conscious Indian Market is also a key element of success.

## Board's Report (Contd.)

Centers of Competency continue to improve, both in terms of capability and capacity. The Company leverages its technical centers in Czech Republic and Taiwan to grow that capability in India and allow the teams to interface directly with customers. This also ensures engineering footprint to remain at a competitive cost, and still capable to deliver leading edge technologies to customers.

The Company continues to uphold the highest standards of Corporate Governance, treating its various stakeholders as an ethical requisite rather than a regulatory necessity and continue to base all its actions on the principles of fairness, trust and transparency, standing by its core values of Respect, Integrity, Passion and Excellence.

All in all, the Company made good progress in all areas in FY 2023-24, and the management is quite confident that going forward the Company will continue to deliver value to all its customers and stakeholders. The long term outlook for the Company remains positive and it will continue to outperform the industry.

### a. CAPACITY EXPANSION & MODERNIZATION OF FACILITIES

The Company is constantly expanding the boundaries of its existing facilities and during the year under review, the Company has invested ₹ 23,032 Lakhs towards capacity expansion of its manufacturing facilities. Further, an expenditure to the tune of ₹ 323 Lakhs was done on Research and Development facilities of Chakan and Gurugram.

### b. TECHNOLOGY, INNOVATION AND QUALITY

Safety remains the top most priority when developing new innovations, and no matter the topic, safety of the end consumer is never compromised. Lighting regulations continue to evolve that allow for even more safety enhancing features to be put on the road. Adaptive Driving Beam (ADB) or Matrix Headlamps are an excellent example of this, and this is now being actively implemented on new vehicles that will be produced in India. This allows consumers to drive with high beams on at all times, but not glare oncoming traffic, allowing the driver to have unparalleled visibility at night, but not cause discomfort, or unsafe conditions for other drivers. These new features are being implemented in India at an accelerated pace, largely driven by the EV market. This market is looking to bring on more technological features, and the Company is expecting this to quickly migrate to ICE vehicles, once the benefits of the technology is

realized. The technology trends going on in China are being watched very closely by the Indian OEM's, where the features are both enhanced performance as well as new aesthetic appearance. Personalization topics are of great interest, as well as animation and other lit elements.

Interior lighting has also risen in terms of technology, from simple lit elements, to highly integrated solutions that can be adapted to end consumer desires, as well as driving conditions. Lighting is used as a communication tool for both the interior and exterior applications.

Technology Shows are regularly scheduled at all key customers, and this allows the Company to showcase all of these latest innovations. These shows are collaborative events from all technical centers, as well as the strong partnership with Stanley. The Center's of Competency teams work tirelessly towards the goal of self-reliance, and will continue to develop new cost effective innovations to meet customer's requirements.

### c. MANAGEMENT DISCUSSION & ANALYSIS REPORT

As stipulated under the provisions of Regulation 34 of the Listing Regulations read with Schedule V thereto, Management Discussion & Analysis Report forms an integral part of this Report as **Annexure - A** and provides details on overall Industry Structure and Developments, financial and operational performance and other material developments during the Financial Year under review.

### d. KEY BUSINESS DEVELOPMENTS

During the year under review, the Company has commenced commercial production on November 01, 2023 at its new manufacturing plant situated at Plot No A 79, Block - C, Horizon Industrial Park, Village - Sawardari, Chakan, Pune - 410501 Maharashtra.

The Board of Directors of Company in its meeting held on March 12, 2024 have also approved the following proposals in order to cater to the new orders received from OEM customers for advance lighting solutions:

- a) Setting up of Company's New Manufacturing Facility at Sanand (Plant-3), Gujarat.
- b) Expansion of Chakan Plant (Phase-II) at Pune. This would require an investment of ₹ 15,260 Lakh and bring about a capacity addition of 8.50 Lakh lamps per annum.

The abovementioned facilities at Sanand and Pune are expected to be commissioned by Q3 of FY 2024-25.

### e. THE CHANGE IN THE NATURE OF BUSINESS, IF ANY

During the financial year ended March 31, 2024, there was no change in the nature of business of the Company.

## Board's Report (Contd.)

### 3. GOVERNANCE AND ETHICS

#### a. CORPORATE GOVERNANCE

The Report on Corporate Governance together with the Auditor's Certificate regarding the Compliance of conditions of Corporate Governance as stipulated in Regulation 34 read with Schedule V of the Listing Regulations is annexed and forms part of this Report as an **Annexure - B**.

### **Transfer to investor education and protection fund (IEPF)**

Pursuant to the provisions of Section 124(5), 125 and other applicable provisions of the Act, read with the IEPF Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 (including any statutory modification(s) or re-enactment(s) thereof for the time being in force), all unpaid or unclaimed Dividends are required to be transferred by the Company to the IEPF established by the Central Government, after the completion of seven (7) years from the date of transfer to Unclaimed/Unpaid Dividend Account of the Company.

Further, pursuant to provisions of Section 124(6) of the Act read with the IEPF Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, the shares in respect of which Dividend has not been claimed or unpaid for seven (7) consecutive years or more shall also be transferred to the Demat account of IEPF Authority. The said provisions do not apply to shares in respect of which there is a specific Order of Court, Tribunal or Statutory Authority, restraining any transfer of the shares.

Accordingly, the details relating to amount of Dividend transferred to the IEPF and corresponding shares on which Dividends were unclaimed for seven (7) consecutive years, are provided in the Report on Corporate Governance annexed to this Report.

### **Transfer of unclaimed dividend and underlying shares for FY 2016-17**

The last date for transfer into IEPF of the Unpaid/Unclaimed Dividend lying in the Unpaid Dividend Account of the Company for the FY 2016-17 is September 19, 2024. In compliance with the provisions of Section 124 of the Act read with the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 as amended from time to time, the Company had issued a due notice in the newspapers and also sent the individual notices through speed post/registered post, at the latest available address to the concerned Shareholders, whose Dividend/Shares were liable to be transferred to IEPF, requesting them to claim their dividend on or before August 21, 2024.

## Board's Report (Contd.)

### **Code of Conduct to regulate, monitor and report trading by Designated Persons (Code of Conduct)**

The Company has adopted a Code of Conduct to regulate, monitor and report trading by Designated Persons [Pursuant to Regulation 9 of Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015]. This Code of Conduct is intended to prevent misuse of Unpublished Price Sensitive Information ("UPSI") by Designated Persons.

The said Code lays down guidelines, which advise Designated Persons and Insiders on the procedures to be followed and disclosures to be made in dealing with the shares of the Company and cautions them on consequences of non-compliances.

This Code includes a Policy and Procedure for Inquiry in case of leakage of UPSI or suspected leakage of UPSI.

## Economic Overview

### Global Economic Scenario

The global economy demonstrates remarkable resilience and adaptability, with a steady growth trajectory and a swift deceleration in inflation, mirroring the pace at which it previously escalated. This resilience underscores the collective strength of the world as it has navigated the initial post-pandemic supply chain challenges, consequential energy and food crises due to geopolitical tensions, and vigorous inflationary pressures that followed.

In 2023, the global economy grew by **3.2%**, highlighting its underlying stability and potential for future prosperity. While this figure is modestly below the long-term average, it reflects a prudent approach to monetary policy, a strategic reduction in fiscal stimulus, and a focus on sustainable productivity advancements. Additionally, inflation rates are projected to ease, with headline inflation anticipated to fall from **6.8%** in 2023 to **5.9%** in 2024 and further down to **4.5%** in 2025, signaling a return to more stable economic conditions. Furthermore, advanced economies, particularly the Euro Area, are poised for a resurgence, contributing to the global upturn, while emerging markets continue to display robust growth dynamics, despite regional disparities.

In this environment of gradual yet steady recovery, the global economy continues to navigate the path forward with confidence and flexibility. Through vigilant and proactive policy interventions, a strong foundation is established to maintain this positive momentum and promote inclusive growth across all regions. Additionally, the future appears promising, and with ongoing collaboration and innovation, the global economy is poised for success.

## Way Forward

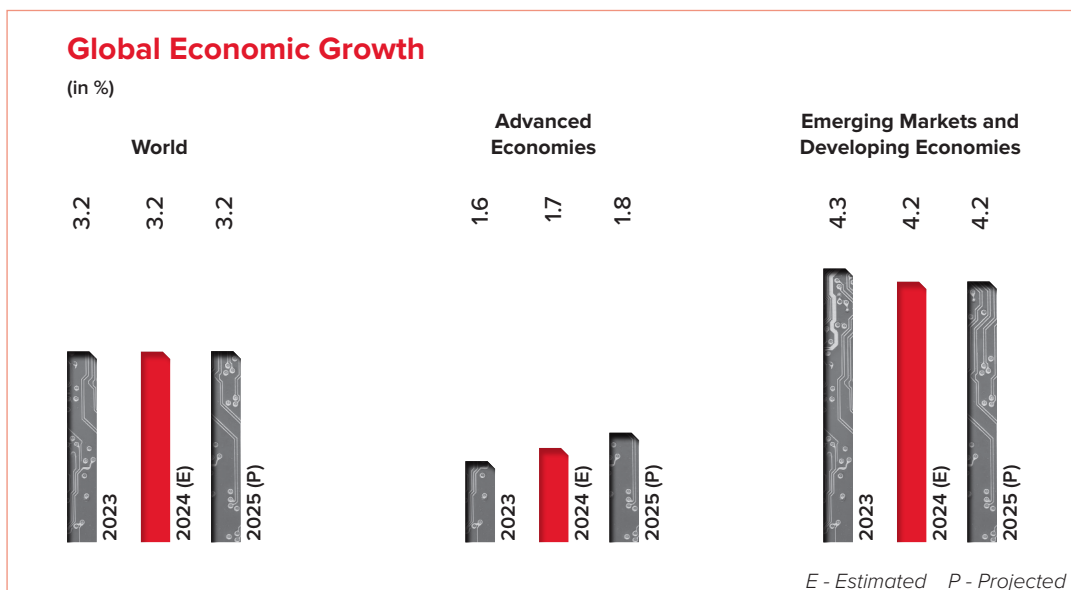

Looking ahead, global economic growth is expected to maintain its steadiness, although the impact of favorable factors may diminish and tighter credit conditions may arise. Despite the anticipation of a moderation in inflation, persistent supply disruptions and shifting inflation sentiment may constrain this trend. Pressure is likely to intensify within the business sector, potentially leading to reduced margins, which, in turn, could result in a slowdown in hiring and expenditure.

While advanced economies are anticipated to experience modest growth, primarily driven by a rebound in the Euro Area following subdued growth in 2023, emerging markets and developing economies are forecasted to sustain stable growth throughout 2024 and 2025, albeit with variations across regions.

### Indian Economic Scenario

The Indian economy has demonstrated remarkable resilience in the face of global economic challenges, with a strong growth rate of 8.4% in the third quarter of fiscal year 2024. This surpasses market expectations, which had predicted a slower growth rate between 6.6% and 7.2% for the quarter. The country's GDP growth has already touched 8.2% year-on-year (YoY) in the first three quarters of the fiscal year, prompting a revision of growth predictions for the year to a range of 7.6-7.8%, up from previous estimates.

The Indian economy maintains a positive growth trajectory, with a GDP growth rate of 8.2% in FY 2023-24, marking the third consecutive year of over 7% growth despite global economic uncertainties. This robust performance is attributed to increased public sector investment, a resilient financial sector, and a substantial expansion in non-food credit. The

Ministry of Finance projects that India is on track to become the third-largest economy globally in the next three years, reaching a GDP of USD 5 Trillion, with aspirations to become a USD 7 Trillion economy by 2030. Factors contributing to this positive outlook include strong GDP growth forecasts, manageable inflation levels, political stability, and the conclusion of monetary policy tightening by the central bank. India's foreign exchange reserves stood at USD 670.12 Billion as of August 16, 2024, providing a comfortable cushion for the economy. The country also witnessed a total of USD 49.8 Billion in PE-VC investments in 2023, highlighting its attractiveness to investors. Merchandize exports in March 2024 stood at USD 41.68 Billion, with total merchandize exports of USD 437.06 Billion during the period of April 2023 to March 2024, underscoring India's position as a significant player in global trade.

The government's economic policy agenda focuses on revitalizing India's growth potential. This involves reinvigorating the financial sector, streamlining business conditions to spur economic activity, and significantly enhancing both physical and digital infrastructure to strengthen connectivity and boost the competitiveness of the manufacturing sector. Guided by this vision, the government has implemented a range of economic reforms aimed at fostering a business-friendly environment, improving ease of living, and fortifying governance systems and processes.

### Way Forward

Moody's expects India to be the fastest-growing economy among major G20 countries in fiscal year 2023-24, with growth

accelerating to around 8% from 7%. Strong government capital expenditure and robust domestic consumption will underpin India's economic growth. India is also poised to benefit from increased global trade and investment opportunities as companies diversify away from China. Moody's expects India's inflation rate to decline to 5.5% in FY 2023-24 from a peak of 6.7% in the previous fiscal year, which will support monetary easing going forward. The rating agency expects policy continuity after the 2024 general election and continued focus on infrastructure development in India. Furthermore, embracing its 'Amrit Kaal' with confidence, the country views growth challenges as opportunities for inclusive development rather than hindrances.

### Key Growth Drivers of the Indian Economy

#### Favorable Demographics

India has a large and young population, with a low dependency ratio for the next 20 years. This provides a window of opportunity to boost productivity and economic growth.

#### Increasing Labor Force Participation

Raising the labor force participation rate, especially for women, can increase the potential growth of the economy.

#### Domestic Consumption

India is a domestic demand-driven economy, with consumption accounting for around 60% of GDP. The rise of the middle-income class and growing demand for luxury and high-end products are positive signs.

#### Exports

While exports have fared well during the pandemic, their contribution may moderate due to economic slowdowns in India's trade partners. However, exports are still expected to reach USD 1 Trillion by 2030.

### Industry Overview

#### Indian Automotive Industry Scenario

The Indian automotive sector is undergoing significant growth and is projected to achieve a value of USD 300 Billion by the conclusion of calendar year 2026. This expansion is driven by factors such as rising income levels, rapid urbanization, and a growing middle-class with increased purchasing ability. Forecasts indicate that by 2035, the Indian automotive industry, currently the third-largest globally, is poised to surpass the USD 1 Trillion mark. This growth trajectory encompasses an additional USD 400 Billion or more from areas like design, development, and technology, positioning the country as a prominent global automotive hub.

India has solidified its position on the global automotive stage, emerging as the world's third-largest automobile market. During FY 2023-24, the country produced a total of 28.43

Million vehicles across various categories, encompassing Passenger Vehicles, Commercial Vehicles, Three-Wheelers, Two-Wheelers, and Quadricycles. India's dominance extends across specific segments, where it leads as the largest tractor manufacturer, second-largest bus manufacturer, and third-largest heavy truck manufacturer globally. This diverse manufacturing capability underscores India's significant role in the global automotive supply chain, reinforcing its growth trajectory.

The Indian passenger vehicle segment grew by 8.4% in FY 2023-24 with overall sales touching almost 5 Million units, including 4.2 Million domestic sales and 0.7 Million exports. Within the passenger vehicles segment, luxury vehicle segment performed creditably on account of the rise in SUV sales as the consumers aim to experience a certain degree of elevation in status symbol.

Two-wheeler segment continued the recovery path registering a growth of over 13% in domestic sales to reach 18 Million units, even though still lower than the earlier peak of 21 Million units in FY 2018-19.

Domestic commercial vehicle industry witnessed a marginal growth to 0.97 Million units on account of the modest decline in LCVs and SCVs and de-growth in the CNG segment. The commercial vehicles segment growth was affected by the migration to higher tonnage trucks which created higher payload capacity. The three-wheeler industry growth was close to the earlier peak of 0.7 Million units in FY 2018-19.

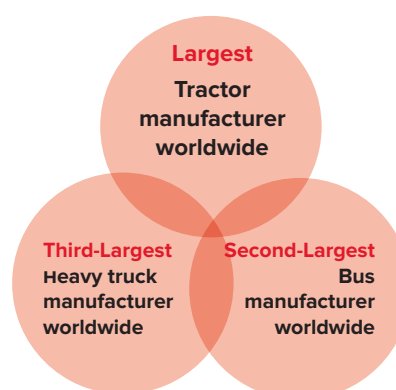

India's electric vehicle (EV) market experienced significant growth in FY 2023-24, with sales surging by 42% to reach 1.67 Million units. This growth was driven primarily by the two- and three-wheeler segments, which together accounted for 94% of total EV sales in India during that fiscal year. The segment is

projected to become the third-largest EV market by 2025, with 2.5 Million vehicles. India is on track to become the largest EV market by 2030, with a total investment opportunity of over USD 200 Billion over the next 8-10 years.

### Government Initiative

The new Electric Vehicle (EV) Policy in India aims to boost the country's EV sector by aligning with climate goals, promoting indigenous manufacturing, and reducing emissions intensity. Key highlights include duty reductions for EV imports, import caps, investment prerequisites, manufacturing requirements, and maximum import allowances. The policy incentivizes investment, promotes local manufacturing, and aims to attract global players like Tesla by offering import duty reductions. It aligns with India's goal of becoming a prime manufacturing hub for EVs, contributing to economic growth and environmental sustainability. The policy also emphasizes the importance of achieving net-zero emissions by 2070 and reducing emissions intensity by 45% by 2030.

The year also demonstrated the sustainability commitments of the auto industry as it commenced producing vehicles which are material compliant to 20% ethanol and witnessed growth of 90% in electric passenger vehicles and 30% in electric two-wheelers. Furthermore, the revamped Vehicle Scrappage Policy and the introduction of Bharat NCAP, India's own vehicle safety assessment program, underscore the government's commitment to fostering innovation and sustainability in the automotive sector.

### Indian Automotive Component Industry Scenario

The Indian auto components market is one of the most dynamic sectors at present. The sector is a significant engine of macroeconomic expansion and job creation. The Indian auto components sector includes participants of various sizes from massive enterprises to small businesses dispersed among clusters around the nation. The industry has experienced a 12.6% year-on-year revenue growth in the first half of the current fiscal year, reaching ₹ 2.98 Lakh Crore (USD 36.1 Billion), with expectations of continued growth into the next financial year. The auto components sector employed

over 1.5 Million people directly and contributed 2.3% to India's overall GDP.

Domestic sales of components to OEMs grew by 13.9% year-on-year to ₹ 2.54 Lakh Crore in the first half of the current fiscal, driven by market preference toward larger and more powerful vehicles. Auto component exports grew by 2.7% to USD 10.4 Billion, while imports grew by 3.6% to USD 10.6 Billion, with Asia accounting for 63% of imports, led by China. The aftermarket witnessed a growth of 7.5% year-on-year, and the Electric Vehicle (EV) segment is showing growth in revenue from sales of EV components compared to the previous fiscal year.

The industry has shown resilience and a will to succeed despite economic hardships, supply chain disruptions, technological upheavals and major global impacts. Not only supply shortages from China but also powerful incentives offered by the Indian government to encourage domestic manufacturing have been the industry's driving forces.

The shift of the nation's mobility sector has been aided by the auto component industry. The industry wants to lead the world and transition to sustainability through tech-driven innovation. The industry is embracing advanced technologies such as robotics, automation, Industry 4.0 technologies, 3D printing, lightweight materials and electric vehicle components to enhance manufacturing processes, improve productivity and meet global quality standards. Companies are venturing into the production of advanced electronic components and sensors, which are integral to the development modules for On-Board Diagnostic Device (OBD). The auto component industry is looking to invest around USD 6.5-7 Billion over the next five years on capacity expansion and technology upgradation with the demand expected to remain robust over the period.

As a responsible industry, in order to lessen its impact on the environment and secure long-term success, the Indian auto component sector placed an increased emphasis on sustainability. Through programs like recycling, circularity and waste reduction, the sector is advancing towards sustainable mobility. In response to rising environmental concerns, Indian manufacturers are investing in research and development to produce environmentally friendly components. Sustainability has become increasingly important to the transportation industry as a result of worldwide trends toward cleaner and greener transportation options.

**Indian Automotive Lighting Industry Scenario**

The India automotive lighting market is poised for significant growth and transformation between 2023 and 2030, driven by a combination of technological advancements, regulatory initiatives, and consumer preferences. The surge in demand for luxury cars and SUVs, coupled with advancements in adaptive

lighting technology, is fueling significant growth within the automotive lighting sector. This expansion is expected to be further propelled by stringent safety regulations mandated by governments. Moreover, the rising global sales of automobiles are poised to contribute to the industry’s upward trajectory. Factors such as population growth and heightened consumer preferences are also acting as catalysts, further stimulating growth in the automotive lighting industry. The Indian Automotive LED lighting market size is estimated at USD 0.59 Billion in 2024 and is anticipated to reach USD 1.16 Billion by 2030, clocking in a CAGR of 11.85% during the forecast period (2024-2030).

**Major Sectorial Demand Drivers**

**Rising Urbanization:** An estimated 600 Million people are expected to be living in urban centers by 2030, which equals 1.5x of the current USA population. The rapid urbanization trend is projected to drive the growth of the automotive sector.

**Growing Workforce:** More people are anticipated to join the workforce at the same time, the increase mostly dominated by women as their participation is predicted to increase by 10% which is expected to add USD 770 Billion to India’s GDP by 2025. The increasing participation of women and youth is projected to boost mobility.

## Annexure - A (Contd.)

**Government Reforms:** The government had introduced the Automotive Mission Plan and the National Electric Mobility Mission Plan (NEMMP) and other initiatives to achieve two objectives to catalyze long-term growth in the industry and lessen emissions and dependence on oil. In the Automotive Mission Plan 2026, the government and the industry has set a target to expand revenues by three times to reach USD 300 Billion, and exports seven times to attain USD 80 Billion. It is expected that the sector could account for 60 Million additional jobs directly and indirectly, which could lead to superior manufacturing competitiveness and lower emissions.

**FAME III:** As India gears up for the next phase of the electric vehicle subsidy scheme, FAME-III, the focus on building charging infrastructure has become a crucial aspect for sustainable growth in the electric vehicles market. The government allocated ₹ 500 Crore outlay in the scheme which will primarily focus on electric two-wheelers (more than 60%) and electric three-wheelers.

**India as a Manufacturing Hub:** India ranked second in the 2021 Index and has overtaken the US as the global manufacturing destination. India's success to emerge as a global manufacturing hub is expected to drive the demand of automotive cars.

**LED Technology:** LED technology is poised to experience the fastest-growth rate during the projected period, primarily due to its numerous technical advantages over conventional lighting technology. These benefits include reduced power consumption, improved visibility and safety, increased durability, enhanced design flexibility for superior aesthetics, and environmentally friendly attributes, among others. Additionally, government regulations have played a pivotal role in driving the adoption of LEDs in automobiles.

**Technological Upgradations:** In response to the increasing demand for advanced vehicles, automotive lighting companies are innovating new lighting solutions to replace outdated standard lights. Drivers are increasingly seeking the latest advancements in car lighting not only for improved safety but also for enhanced aesthetics and functionality beyond mere illumination of the road ahead. Emerging technologies in the market include Laser Light Technology, Bendable Headlights with LED and Organic Light Emitting Diodes (OLED).

### SWOT Analysis of the Automotive Industry

#### Strengths

**Dynamic Industry Evolution:** The automotive sector continuously evolves, offering enhanced lifestyles,

employment prospects, and travel options. Its significant contribution to growth and development is expected to persist, with growing demand projected in the foreseeable future.

**Ongoing Innovation:** Automotive companies prioritize research and development, particularly in electric vehicles and renewable energy sources like solar and wind, propelling the industry toward its next phase of growth.

**Global Manufacturing Presence:** Strategic establishment of manufacturing facilities in Asian countries such as India and China enables companies to manage costs, tap into abundant resources and efficiently access emerging markets.

#### Weaknesses

**Consumer Empowerment:** Shifting the automotive market from demand-driven to supply-driven dynamics has empowered consumers with extensive choices and bargaining power.

**Regulatory Hurdles:** Government regulations, including excise duty, regional entry restrictions, and fuel price volatility, present significant obstacles to the industry's expansion.

**High Turnover Rates:** The automotive sector grapples with higher employee turnover compared to other industries, making talent acquisition and retention challenging amid stiff competition.

#### Opportunities

**Enhanced Fuel Efficiency:** Opportunities lie in optimizing fuel-driven combustion engines and implementing cost-efficient programs, especially in emerging markets where demand for fuel-efficient vehicles is on the rise.

**Evolving Consumer Preferences:** Changes in consumer demand, regulatory safety standards, and fuel economy requirements, coupled with data availability, will propel industry growth.

**Market Expansion Ventures:** Exploring new markets in Asia, BRIC nations, and emerging economies presents promising prospects for increased vehicle demand, with ample expansion opportunities on the horizon.

#### Threats

**Intense Competitive Landscape:** The presence of numerous industry players fosters intense competition, posing challenges for new entrants seeking market footholds.

**Economic Volatility:** Macroeconomic factors such as uncertainty, recession, and unemployment pose sustained challenges to the automotive sector.

**Fuel Price Fluctuations:** Variations in fuel prices remain a critical factor influencing consumer segment growth, exacerbated by governmental regulations on alternative fuels like CNG and shell gas.

## Annexure - A (Contd.)

### Emerging Trends In The Automotive Sector

#### Localization in a higher gear

Supported by government initiatives, the automotive industry has embarked on several endeavors to localize non-critical components and establish electronics assembly and design centers within the country. The government's Production Linked Incentive (PLI) scheme has facilitated the entry of numerous global companies into the country, advancing the objective of localization. With a positive outlook for FY 2024-25, there is an opportunity to further emphasize the importance of localization.

#### Mobility solutions, green tech and safety

As organizations accelerate innovation in the automotive industry, significant transformations are on the horizon. Connected and shared mobility, enhanced customer experiences, electrification, and alternative green powertrains are poised to drive the most impactful changes. The growing prominence of electronic components and software, coupled with advancements in autonomous driving and shared mobility, has further propelled these trends forward.

Although electrification has made notable strides in two-wheelers and three-wheelers, its adoption is still in its nascent stages compared to other countries. To bridge this gap, both the government and private sector are heavily investing resources to develop the value chain. The construction of numerous factories indicates the rapid pace at which these trends will be embraced in the near future. Vehicle manufacturers across all segments in India are also prioritizing sustainability and climate goals, aiming to reduce the industry's carbon footprint through investments in green technologies like biofuels and hydrogen fuel cells. Moreover, the industry is poised for continued rapid growth and transformation, with technology playing a pivotal role.

Trends such as increased adoption of the Internet of Things (IoT), integration of more safety features, and the rise of online marketplaces are set to shape the future of the Indian automotive industry. Car manufacturers in India are increasingly embracing advanced driver assistance systems (ADAS), enhancing road safety and preventing accidents and fatalities. This shift is driven by rising demand for safer vehicles, government initiatives promoting road safety, and the availability of more affordable ADAS technology.

#### Collaborations for competition

The automotive industry's future lies in collaborations. To remain competitive in the automotive sector, automakers need to evolve their organizations, infrastructure, and value chains. This means expanding tie-ups with players from non-automotive sectors to achieve their goals and remain competitive.

### Company Overview

Lumax Industries Limited (referred to as 'Lumax', 'LIL', or 'the Company'), is a prominent player in the automotive lighting industry, offering high-quality lighting solutions for both four-wheelers and two-wheelers. The Company, part of the Lumax - DK Jain Group, has a rich history dating back to 1945 and has established itself as a leading manufacturer and supplier of automotive components in India. With a firm commitment to customer satisfaction, Lumax has experienced steady growth by consistently delivering superior lighting products.

Lumax operates 12 state-of-the-art manufacturing facilities across 6 states in India, strategically positioned near major OEM manufacturing locations. These ultra-modern facilities, including its associate company, SL Lumax, ensure best-in-class production and timely delivery of high-quality automotive lighting solutions to meet the demands of the market. The Company aims to further expand its existing facilities at the newly inaugurated Chakan plant as well as the Sanand plant in Gujarat. The Company's diverse product portfolio includes premium lighting solutions with LED lights and conventional lights such as headlamps, tail lamps, fog lamps, and other lighting components, as well as auxiliary lamps. Besides, Lumax manufactures electronic components for various vehicles, including four-wheelers, two-wheelers, commercial vehicles, and tractors in the Farm Equipment Segment (FES).

### Operational and Financial Overview

#### Standalone

On standalone basis, the revenue from contracts with customers during FY 2023-24 stood at ₹ 2,63,659.47 Lakhs as compared to ₹ 2,31,952.34 Lakhs in the last year registering a growth of 13.67%.

For FY 2023-24, the profit before exceptional items and income tax stood at ₹ 12,608.50 Lakhs as compared to ₹ 11,287.45 Lakhs in the last year witnessing an increase of 11.70%. The Profit before Tax (PBT) after exceptional items stood at ₹ 12,608.50 Lakhs as compared to ₹ 10,743.62 Lakhs in the last year, registering an increase of 17.36%. The Profit after Tax (PAT) stood at ₹ 8,607.74 Lakhs as compared to ₹ 7,063.59 Lakhs in the last year, registering an increase of 21.86%. The Total Comprehensive Income increased to ₹ 8,401.57 Lakhs as against ₹ 7,131.92 Lakhs in the last year, registering an increase of 17.80%. The Basic and Diluted Earnings per Share stood at ₹ 92.08, registering an increase of 21.85%.

#### Consolidated

For FY 2023-24 on consolidated basis, the Profit after Tax (PAT) stood at ₹ 11,101.83 Lakhs as compared to ₹ 10,308.02 Lakhs, registering an increase of 7.70%. **Risk Management**

Lumax is committed to proactively identifying potential business risks and implementing effective measures to mitigate them. The Company conducts thorough risk management activities to minimize the impact of potential threats and safeguard the continued success and sustainability of its business operations.

Type of Risk	Risk Impact	Mitigation Strategy
Economic Risk	Economic fluctuations pose the risk of disrupting Lumax's day-to-day operations or hindering its business expansion initiatives.	Lumax has proactively assessed the business environment and undertook measures to address potential disruptions to its operations or business expansion plans.
Client Concentration Risk	Possessing a small pool of customers might affect the level of revenue risk held by the portfolio.	The Company mitigates the risk to a large extent by its strong business share with its key client OEMs that have robust market positions in their respective segments.
Refinancing Risk	The Company's financial position might be affected due to its inability to refinance a loan in order to repay a current debt.	Lumax mitigates refinancing risk to some extent through healthy financial flexibility and access to financial markets, healthy relationships with its suppliers, moderate debt repayment obligations and most of its plants being free of any charge.
Liquidity Risk	Inadequate cash or credit lines to meet the operational and financial commitments might affect the Company's financial position.	The Company's liquidity position remains substantial backed by healthy cash flows from operations and availability of unutilized working capital limits.

## Annexure - A (Contd.)

Type of Risk	Risk Impact	Mitigation Strategy
Competition Risk	Intense competition within the automotive industry might lead to potential adverse effects on the Company's market share, margin profile, and return on capital employed.	As a frontrunner in the industry, the Company harnesses its technological prowess, strategic partnerships, customer relations, and innovative solutions to mitigate this risk.
Technology Risk	Presently, the automotive industry is experiencing a profound transformation propelled by the adoption of Industry 4.0 and the ongoing digitization of the entire value chain. These emerging developments bring inherent risks that demand careful attention and mitigation strategies.	Lumax remains proactive in embracing new technologies and offerings to enhance efficiency and fortify its market position. By placing a premium on innovation and staying at the forefront of industry trends, the Company aims to mitigate this risk.
Regulatory Risk	The automotive industry faces stringent regulatory scrutiny, especially concerning safety and environmental standards. Failure to comply with these regulations can result in substantial fines, damage to reputation, and legal liabilities.	Lumax has established a robust compliance mechanism and deployed a software-based compliance tool to identify regulatory requirements and monitor them regularly. The Company also maintains open communication with regulators to stay abreast of any changes in regulatory mandates.
Procurement Risk	Any unfavorable fluctuations in market prices or disruptions in the supply chain, including the availability of raw materials, have the potential to affect Lumax's financial standing and earnings.	Lumax acknowledges these risks and takes proactive measures to mitigate them, including closely monitoring market prices, strengthening its supplier base, implementing contingency plans and placing a greater emphasis on localization.

### Human Resources

Lumax places a strong emphasis on its human resources, recognizing them as invaluable assets that play an integral part in the Company's growth and success. The Company's focus on human resources is twofold: creating an engaging work environment and enhancing productivity. The Company is committed to creating an inclusive work environment that welcomes diversity and promotes work-life balance. Through its employee-centric approach, the Company strives to create a secure and stimulating workplace environment that fosters productivity. Lumax invests in its employees by enhancing their capabilities, refining their expertise, and nurturing their leadership skills. To achieve this, Lumax offers relevant learning and development programs focused on effective personal productivity for senior management, which have been well received.

The Company values employee diversity and seeks to strengthen its corporate capabilities accordingly. Shop floor employees undergo a one-month training at Gurukul before being deployed on the shop floor, ensuring that they are suitably trained. The Company also utilizes IT to enhance the HR function through continuous two-way communication. Lumax's management promotes teamwork and a self-motivating work environment to foster the holistic growth of its employees.

In order to enhance its human capital and attract, nurture, and acknowledge exceptional talent, Lumax has formulated

human resource policies aimed at cultivating a positive work environment. The Company had a total strength of 2,755 employees as of March 31, 2024.

### Internal Control Systems and their Adequacy

Lumax focuses on maintaining robust internal control systems to ensure compliance and operational efficiency. The Company emphasizes the importance of internal controls in its operations, aiming to align with regulatory requirements and best practices. Lumax's internal control framework encompasses various aspects such as risk management, financial reporting, and compliance with regulations. The Company's Risk Management Policy outlines the roles and responsibilities of key stakeholders, including the Board of Directors, Risk Management Committee, Chief Risk Officer, and Risk Owners.

Moreover, Lumax's Risk Management Policy emphasizes the need for continuous improvement in risk assessment and management processes. The Company's commitment to stakeholder value is evident in its proactive approach to identifying and mitigating key business risks. The policy also highlights the importance of regular monitoring, reporting, and evaluation of risks to ensure the sustainability and growth of the organization. Lumax's independent auditors conduct internal audits to ensure accurate recording and reporting. Any discrepancies discovered are promptly reported to management and the Audit Committee for timely resolution.

## Annexure - A (Contd.)

The Company's IT system is designed to safeguard sensitive data and streamline the audit process. Lumax adheres strictly to accounting standards when recording transactions. Additionally, the Management Information System (MIS) enhances real-time reporting and aids in expense control. Any discrepancies between actual and budgeted allocations are promptly identified and rectified to ensure strict compliance.

### **Cautionary Statement**

Statements in the Management Discussion and Analysis Report describing the Company's projections, estimates,

and expectations may be interpreted as 'forward-looking' statements within the meaning of applicable laws and regulations. Actual results could differ from those expressed or implied. Important factors that could make a difference to the Company's operations include economic conditions affecting demand/supply, price conditions in the domestic and international markets in which the Company operates, changes in Government regulations, tax laws, and other statutes. The Company assumes no responsibility to publicly amend, modify, or revise any 'forward-looking' statements, based on any subsequent development, information, or events.

[Pursuant to section 204(1) of the Companies Act, 2013 and rule No.9 of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014]

To,  
The Members,  
**Lumax Industries Limited**  
2nd Floor, Harbans Bhawan-II,  
Commercial Complex,  
Nangal Raya, New Delhi-110 046

We were appointed by the Board of Directors of Lumax Industries Limited (hereinafter called the Company) to conduct Secretarial Audit of the Company for the financial year ended March 31, 2024.

We have conducted the Secretarial Audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by the Company. Secretarial Audit was conducted in a manner that provided us with a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing our opinion thereon.

#### Management's Responsibility for Secretarial Compliances

The Company's management is responsible for preparation and maintenance of secretarial records and for devising proper systems to ensure compliance with the provisions of applicable laws and regulations.

#### Auditors Responsibility

Our responsibility is to express an opinion on these secretarial records, standards and procedures followed by the Company with respect to secretarial compliances.

We believe that audit evidence and information obtained from the Company's management is adequate and appropriate for us to provide a basis for our opinion.

We have followed the audit practices and processes as were appropriate to obtain reasonable assurance about the correctness of the contents of the secretarial records. The verification was done on test basis to ensure that correct facts are reflected in secretarial records. We believe that the processes and practices, we followed provide a reasonable basis for our opinion.

The secretarial audit report is neither an assurance to the future viability of the Company nor of the efficacy or effectiveness with which the management has conducted the affairs of the Company.

#### Opinion

We have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company

## ANNEXURE - G

### Conservation of Energy, Technology Absorption and Foreign Exchange Earnings and Outgo

(Pursuant to Section 134(3)(m) of the Act read with Rule 8 of Companies (Accounts) Rules, 2014 for the year ended March 31, 2024)

#### (A) CONSERVATION OF ENERGY

The Company is committed towards the implementation of Energy conservation practices in an efficient and responsible manner to reduce waste and save resources by Source graining, Conversion by Technology and Reduction of consumption by Energy efficient projects. We are achieving it through various methods such as using energy-efficient appliances, reducing unnecessary energy usage, and promoting renewable energy sources.

The benefits of energy conservation include lower energy bills, reduced **greenhouse gas emissions**, and **preservation of natural resources**. Energy conservation is an important strategy for **addressing climate change** and reducing dependence on non-renewable energy sources. This indeed help us in the lesser **dependence on non-renewable energy sources**, which are finite and subject to price fluctuations. Promoting renewable energy sources and reducing waste is also ensuring us a more stable and secure energy supply.

Energy management is becoming an increasingly important aspect of **corporate social responsibility**. By managing energy use and promoting sustainability, organizations can demonstrate their commitment to environmental stewardship and social responsibility.

#### i. Some of the key Steps taken and their impact on conservation of energy are as below:

The Company is also working on Energy conservation activities for its plants and controlling the usage of power consumption through its different initiative. Some areas are highlighted below where the Company has taken the Initiatives to reduce the energy consumption .

##### 1. Reduction of power consumption in Chiller network system

- Reduction of Return water temperature of chiller plant via Line modification.
- Replacement of inefficient chiller system with energy efficient chiller System.
- Insulation of chilled water pipe line and chilled water tank so as to reduce energy consumption of chiller.

##### 2. Optimization of Compressed Air usage in Plants

- Training to maintenance Team for **awareness program for controlling Air leakage losses** and implementation of air leakage register.
- Creation of SOP for identification of **Air Leakage Test and FAD Test** for compressor efficiency calculation.
- Reduction in **Generation pressure** of compressor by arresting air leakage points.
- Installation of **Flow Control System** for compressor switching and Modulation of pressure as per need.
- Replacement of **Pneumatic Tools with Electrical Tools**.
- Replacement of old **Dryer with Energy Efficient Dryer**.

##### 3. Optimizing the Performance of Pumping system

- Replacement of higher capacity pump with energy efficient Pump.
- Use of **VFD to optimize the Pump Performance**.
- Modification of process pump pipe network to reduce the friction loss and improve efficiency.

##### 4. Controlling the Thermal Losses in Different Machine

- Insulation of Hopper to control Thermal losses in Injection Moulding Machine.
- Insulation paint on oven with high surface temperature.

##### 5. Optimization of Cooling Tower

- Replacement of Cooling tower Fan blade i.e. change of blade from Aluminium to FRP.
- Power Saving by interlocking Cooling Tower fan speed temperature control sensor.
- Cooling Tower Performance Assessment (change of Old Pump with New Pump).

## Annexure - G (Contd.)

**6. Power Saving in Motor system**

- Replacement of conventional motors with Energy Efficient motors (IE3 & IE4 class).
- Replacement of higher capacity motors with lower capacity motors.
- Implementation of VFD on motor with variable load to reduce Energy consumption.

**7. Power Saving from Technology Change**

- Replacement of Old conventional mica band heaters with IR heater in injection moulding machine.
- Replacement of conventional fan to BLDC fan.
- Use of EC motor in place of induction motor which is used in Air Washer.
- Conversion of Hydraulic motor to servo motor.

**8. Plans Formulated for Implementation of Renewable Energy****8.1 Installation of Solar Roof top panels**

a) The organization has installed solar roof top panels to harness Solar Energy at following locations:

Sl. No.	Plant	Capacity (kW)	Mode of Implementation
1	Sanand	250	Capex
2	Bawal	1,050	Capex & Opex
3	Dharuhera	713	Opex
4	Pantnagar	526	Opex
5	Chakan	602	Opex
6	SMT Bawal	499	Opex
	<b>Total</b>	<b>3,640</b>	

b) The organization also focus on utilizing the Solar Park model to fulfill the excess demand

Sl. No.	Plant	Capacity (kW)	Mode of Power
1	Bangalore	5,000	Group Captive
2	Chakan	3,000	Group Captive
	<b>Total</b>	<b>8,000</b>	

Total **approximately 3.64 MW** of solar roof top panels & use of **Solar Park Capacity of 8 MW** from External power producing company for harnessing the solar energy, wind energy and solar farm to run its plant to satisfy the current requirement. Use of Green Power also helps us in mitigating the effect of greenhouse emission to some extent.

**8.2 Use of Green Power to Mitigate our Demand of Energy**

The Company is in discussion with various power producers who are physically present in group captive mode and have set up/under final stage of completion of their captive plant for renewable energy for Haryana, Karnataka and Gujarat region that will help to reduce the energy cost along with reduction of the carbon footprint.

**a. Energy Management System (EnMS) ISO- 50001**

Lumax has advanced its energy management efforts by implementing the EnMS ISO-50001 System at its Bawal and Pantnagar locations. The company now plans to pursue additional certifications for its other facilities. This certification will enable the plants to monitor their energy consumption more effectively and support ongoing improvements in reducing energy usage.

**b. Implementation of Online Energy Monitoring System – Way Forward**

Metering and Sustenance of Energy data is a primary requirement which can be tracked and monitored easily via Online monitoring system as it captures the real time data to carry out pain area for energy usage.

Further the Company is planning to inter-link Plant Energy Data with Corporate Dashboard for easy monitoring.

## Annexure - G (Contd.)

### **(B) Technology absorption:**

#### **(i) The efforts made towards technology absorption**

- a) In house design of charging indicator grille lamp for EV application.
- b) In house development of best in class ultra High homogeneity DRL/position/turn indicator.
- c) Localized ADB (Matrix) projector module.
- d) In house developed "hidden until lit" DRL (India first / Lumax first)
- e) Modular / Standard Light Engines for low-cost LED application.
- f) In house compact / Low Profile LED reflector Headlamp (Lumax first / India First).
- g) Tail Lamp with 3D Crystal effect for 2W application (Lumax 1st time).
- h) CAN and LIN based controls for front/rear lighting animation.
- i) In house software for Person to Vehicle communications for EV application.
- j) Compact LED headlamp for Tractor Industry (Industry first).
- k) In house developed fully sealed bi-functional halogen projector for Farm Equipment Segment (Lumax first).
- l) In house developed High Beam Booster with thick lens (Lumax first).
- m) In house design of LED Winker Lamp with very small size for 2W (Single Chip LED).
- n) In house design of Projector Head lamp to meet India/ Europe/ USA Market requirements.( First time in Tractor Industry).
- o) In house micro controller based design & embedded software development.
- p) Bi-Functional LED Projector for 2W application (1st Time in Lumax).
- q) Implementation of standardized light engines for low cost LED Headlamp (1st time in Lumax).
- r) In-house developed image projection (Lumax first / India First).
- s) In-house developed Interior and mood lighting.

#### **(ii) The benefits derived like product improvement, cost reduction, product development or import substitution:**

- a. Self-Reliance Technology – Lower engineering cost without reliance on engineering in higher cost regions. Improved customer responsiveness. Higher engineering efficiency and reaction to customer requirements.
- b. Self-Reliance in Technology - The Design team aligned with customer right from the concept stage to provide end to end solution. This move of the Company turned it into a System Provider from Product Supplier.
- c. Company Implemented Core COC Organization Structure led by Pool of experts in Core Mechanical, Optics, Electronics & Standardization for Improvements in Product Design & Development.
- d. Company through its Wholly Owned Subsidiary namely Lumax Industries Czech s.r.o. helps in bringing advance Lighting Technologies to India at Affordable cost.
- e. Launch of new proprietary optical design software that allows for more efficient and accurate optical design. Software performs optical surface creation, ray tracing and beam analyzer to meet legal and customer requirements.
- f. New optical software tool to allow for dynamic homogeneity and lit evaluation, eliminating the need for expensive prototypes.
- g. The Engineers of the Company are being trained in Stanley Japan which shall prove to be beneficial for customer as well for our country with respect to localization of design as well as technology transfer in long run.
- h. Stanley, Japan continues to provide extensive support in in-house design and development activities and under its leadership two senior designers are stationed at Company. This has enabled to provide prompt technical solution to customers for their immediate needs.

## Annexure - G (Contd.)

**(iii) In case of Imported Technology (imported during last three years reckoned from the beginning of the Financial Year) :**

a	<b>Technology Imported</b>	Mono Projector Unit for Head lamp
b	<b>Year of Import</b>	2020-21
c	<b>Weather the technology been fully absorbed</b>	Absorbed in 4 wheeler Head Lamps
d	<b>If not fully absorbed, areas where absorption has not taken place, and the reason thereof</b>	This technology has the potential for being used in future models of 4 wheeler Head Lamps.

During the Financial Year 2021-22 and 2022-23, the Company has not imported any Technology.

**(iv) Research and Development (R & D)**

The adoption of new innovative lighting technology continues to accelerate in India and Lumax has responded with the increased investment and focus on leading the way to allow this trend to continue. Key element is to further develop the technical competency in India, to maximize the amount of development that can occur in the country. This allows Lumax to be not only a cost effective supplier of choice, but also provide its customers with a wide range of innovative solutions to choose from.

Lumax presently has 2 development centers in India viz. Pune and Gurugram, and one development center in Taiwan. To further strengthen its R&D capabilities, the Company has set up the Lumax European Technology Centre through its Wholly Owned Subsidiary namely Lumax Industries Czech s.r.o.

A new office for Gurugram was set-up to allow teams to work in a modern environment for innovation. A similar office will be opened in Pune, and the office in Czech Republic will be expanded.

**a. Specific areas in which R & D carried out by the Company.**

- Capacity & Competency Enhancement in Core COC Engineering areas like (Optics, CAE, Core Mechanical & Electronics).
- Charging Indicator Animation Lamp.
- Dedicated team for the development of projector modules specific to the Indian Market.
- Ultra compact LED Headlamp modules with 15mm height.
- Matrix / ADB headlamp modules, including drivers and controls.
- Designing of BI-LED & Mono Functional Low Cost Sealed Projector 2W & 4W.
- Innovative Signaling Feature (Welcome & Good Bye).
- Innovative Signaling Feature With 3D Holographic effect.
- Next Generation O-LED Signaling Option.
- Static & Dynamic Logo Projection System as Styling/Safety features.
- Lit Logo.
- Interior and mood lighting.
- Image / logo projection and courtesy lights

**b. Benefits derived as a result of the above R&D**

- Complete in house designing of LED Lighting Systems for Automotive applications as a Journey towards self reliance.
- Integration of New & Advance Technology in Automotive Lighting System (Welcome & Good Bye, 3D Holographic Effects, Lit Logo, Static/Dynamic Projection System etc. in India).
- New Interior Lighting Applications.
- High efficiency and modular solutions for the EV segment.
- Early adoption of lighting innovations., migrating from 4W market to 2W and Tractors.
- Shortened lead times for development
- Cost effective engineering

## Annexure - G (Contd.)

### c. Future plan of action

- Continuous Development towards Capability Enhancements in Core Engineering, Prototyping & Validation capabilities for safe Launches.
- Introduction of High Resolution ADB Solutions.
- Compact and Low Profile Projector modules, including AFS and ADB.
- Innovative 3D Holographic Tail Functions for automotive application.
- Dynamic & Static Projection Logo introduction in India market.
- Work towards OLED or OLED like Tail Function on Lighting Systems.
- As a part of Personalization introduce Custom signature Features.
- Innovative Interior Lighting and Smart Surfaces.
- Ultra compact/efficient projector portfolio for 4W, 2W, and FES.
- Micro Lens Array (MLA) headlamps

### d. The Expenditure incurred on Research and Development (R&D):

(₹ In Lakhs)

Particulars	FY 2023-24	FY 2022-23
(i) Capital	323.71	381.64
(ii) Recurring	6,639.87	5,004.35
<b>Total</b>	<b>6,963.58</b>	<b>5,385.99</b>
(iii) Total R&D Expenditure as a percentage of Total Turnover (%)	2.64%	2.32%

### (C) The Foreign Exchange earned in terms of actual

- i. Inflows during the year is ₹ 31.63 Crores.
- ii. The Foreign Exchange outgo during the year in terms of actual outflows is ₹ 676.15 Crores.

#### Activities relating to exports; initiatives taken to increase exports; development of new export markets for products and services; and export plans

Your Company is continuously striving for growth in business in the export market. During the Year under review, the following export development and promotion measures were taken:

- i. New Full LED Headlamp [with Low Beam only] was developed for new series of Tractor and approved by JD, USA. The mass production supplies for the same commenced during the financial year.
- ii. Discussion on going with US based EV Manufacturer for supply of Small Lamps to the US market.
- iii. On-going discussion with Trucklite for upgradation of Conventional lamps to LED Lamps.
- iv. Engagement with existing Export Customers for increasing the business by offering off the shelf products.
- v. Running high on volumes with Trucklite is investing on duplicate toolings with the Company.
- vi. Engaging with OEM's based out of Central Europe through New Design Center in The Czech Republic

**a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/No). If yes, the coverage of such system?**

Yes, the Company has integrated an Occupational Health and Safety Management System as a vital aspect of its operations. The primary goal is to foster a work environment that prioritizes the health and safety of employees while adhering to principles of environmental sustainability. To achieve this, the Company has established comprehensive mechanisms, including the continuous enhancement of environmental occupational health and safety performance, striving for an incident-free work environment, reducing waste to conserve natural resources, ensuring compliance with legal requirements, proper disposal of waste and pollutants, and promoting innovation to prevent pollution, injury, and illness. Furthermore, the Company is ISO 45001 certified, covering 81.82% of its plants, underscoring its commitment to maintaining the highest standards of occupational health and safety throughout its operations.

**b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?**

The processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity are:

- 1. Hazard Identification and Risk Assessment (HIRA):** This process involves a comprehensive evaluation of the work environment and operational tasks to identify potential hazards that could adversely impact employees, visitors, or the surrounding ecosystem. Each identified hazard is assessed to determine its likelihood and potential consequences. Based on this analysis, targeted actions are developed and implemented to effectively mitigate the associated risks.
- 2. Health and Safety Inspections:** This involves a thorough review of the organization's policies, procedures, and practices concerning environmental management, health, and safety. HSE inspections and audits identify areas for improvement to minimize incident risks

and ensure compliance with regulatory obligations and industry standards. Corrective action plans are formulated based on the findings of these audits.

In its hazard assessments, the Company reviews all routine and non-routine activities to identify significant risks and establish control measures. For routine tasks, the Company utilizes a Safety Audit checklist encompassing 188 points covering various operational areas. For non-routine tasks, such as working at heights and excavation, the Company uses a work permit system and other hazard identification techniques to ensure safety

### Leadership Indicators

**1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board.**

Stakeholder consultations are facilitated by designated personnel, business leaders, and key process heads within the Company. Any feedback and issues raised by stakeholders are escalated to the Board of Directors through relevant Board Committees, including the Audit Committee, Nomination and Remuneration Committee, CSR Committee, Risk Management Committee, and Share Transfer/Stakeholders Relationship Committee.

The Company ensures regular and proactive communication with key stakeholders through conference calls, which offer effective explanation of plans and results. This approach supports the concept of shared prosperity and progress for both the Company and society at large, promoting ongoing engagement and active participation.

**2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes/No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity.**

Yes, stakeholder consultations were conducted to assist in identifying and managing environmental and social topics. The process for consulting with the Board on economic, environmental, and social topics includes:

- Compiling a comprehensive list of all potential stakeholders and ESG-related issues pertinent to the Company and the automobile industry, in collaboration with various departments
- Engaging with different stakeholders and the senior management to gather feedback on these topics
- Incorporating this feedback into the Company's policies and activities to enhance alignment and effectiveness

**3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/ marginalized stakeholder groups.**

To address the concerns of vulnerable and marginalized stakeholder groups, the Company initiates the process by identifying target areas and assessing their needs through surveys, visits, and evaluations to determine whether these needs are project-relevant or aspirational. Following this, a thorough Need Assessment is conducted to identify specific communities that would benefit most from the Company's Corporate Social Responsibility (CSR) interventions.

The Company then collaborates with the local community to finalize projects, ensuring alignment with the identified needs and aspirations. On-ground mobilization strategies are implemented to effectively engage stakeholders and the community in CSR initiatives, ensuring that the projects not only address their concerns but also empower them through active participation. This holistic approach ensures that the Company's actions are inclusive and have a meaningful impact on the most vulnerable groups within the community.

**4. Do you have a focal point (individual/committee) responsible for addressing human rights impacts or issues caused or contributed to by the business? (Yes/No)**

Yes, the Company has a comprehensive Human Rights Policy that provides employees with a clear process for addressing their complaints or grievances with the Human Resource department or Senior Management. The Corporate HR Head is tasked with managing human rights impacts or issues arising from the actions of employees and workers. Furthermore, each Department Head is accountable for addressing human rights concerns or issues within their specific business areas. The senior management regularly reviews the Human Rights Policy to ensure its effectiveness across the organization.

**5. Describe the internal mechanisms in place to redress grievances related to human rights issues.**

The Company is committed to upholding human rights as a core principle of fair and ethical business practices. Internal systems were established to address human rights concerns, including a POSH Policy to prevent and address workplace harassment, a Grievance Redressal Policy to resolve employee concerns, and a Vigil Mechanism/Whistle Blower Policy that allows the reporting of misconduct without fear. Additionally, an Employee App is available that enables employees to easily register and track their grievances.

**6. Number of complaints on the following made by employees and workers:**

**8. Mechanisms to prevent adverse consequences to the complainant in discrimination and harassment cases.**

The Company's core values strictly prohibit any form of retaliation. Employees who report suspected legal or policy violations are protected from adverse consequences. Retaliation against those who report in good faith or assist in investigations is strictly forbidden. The Company upholds principles of confidentiality, sensitivity, non-retaliation, and impartiality in its Grievance Redressal, Whistle Blower, and POSH Policies. All reports and related information are kept confidential and accessible only to authorized personnel. The Company ensures that concerns are addressed sensitively and promptly, conducting thorough and impartial investigations to allow all parties to present relevant facts and evidence.

**9. Do human rights requirements form part of your business agreements and contracts? (Yes/No)**

The Company strives to integrate fundamental human rights into all its business agreements and contracts, both in principle and in practice. Many of these agreements formally include provisions safeguarding these rights. Additionally, the Company regularly reviews and revises these agreements as part of a formal process to ensure ongoing compliance and strengthen its commitment to human rights integration.

**10. Assessments for the year:**

Note: Assessments were conducted Internally by the company.

**11. Provide details of any corrective actions taken or underway to address significant risks/concerns arising from the assessments at Question 10 above.**

In accordance with the Company's corporate practices, any significant risks or concerns identified during assessments are promptly addressed by the relevant Committees, which include both internal and external stakeholders. During FY 2023-24, the assessments referenced in Question 10 did not highlight any significant risks or concerns. Nevertheless, the Company remains fully committed to implementing corrective measures should any issues arise in the future.

**Leadership Indicators**

**1. Details of a business process being modified/introduced as a result of addressing human rights grievances/complaints.**

During the year, there were no notable grievances concerning human rights. As part of its standard procedures, the Company consistently upholds human rights principles through the Code of Conduct and other policies. Regular training sessions are conducted for employees and workers, and policies like the Code of Conduct are periodically updated based on emerging risks and feedback received.

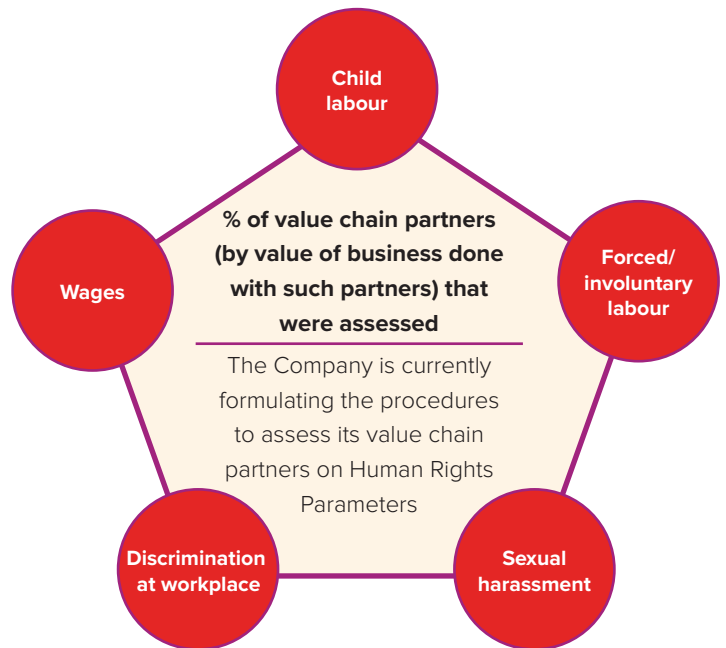

**2. Details of the scope and coverage of any Human rights due diligence conducted.**

The Company consistently initiates efforts to integrate human rights into its business culture across all levels throughout the year.

**3. Is the premise/office of the entity accessible to differently abled visitors, as per the requirements of the Rights of Persons with Disabilities Act, 2016**

Yes, the Company's premises and offices are accessible to differently-abled visitors in accordance with the Rights of Persons with Disabilities Act, 2016. The facilities include wheelchair ramps, braille signage, accessible restrooms, and digital accessibility features to ensure that information and communication technology is available to all and compatible with assistive technology devices.

**4. Details on assessment of value chain partner:**

**5. Provide details of any corrective actions taken or underway to address significant risks/concerns arising from the assessments at Question 4 above.**

Corrective actions will be implemented based on the outcome of the assessments. The Company is committed to addressing the issues (if any) promptly to ensure the highest standards of safety and compliance.

## Principle

06

Businesses should respect and make efforts to protect and restore the environment.

**8. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.**

The Company has implemented a variety of energy-saving projects aimed at increasing efficiency and reducing greenhouse gas emissions across its operations.:

**1. Compressor and Motor Upgrades:**

- Replacing outdated, inefficient compressors and motors with energy efficient models, including IE3, IE4 grade motors and EC motors

**2. Heating and Cooling Enhancements:**

- Installing infrared (IR) heaters and replacing old heaters with energy efficient alternatives such as coil heaters and DP heaters
- Implementing VFD (Variable Frequency Drive) systems on ovens, cooling towers, and conveyors to optimize energy use
- Upgrading to energy-efficient air washers and inverter-based or 5-star rated air conditioner models

**3. Lighting and Electrical Efficiency:**

- Replacing mercury street lights with solar street lights and optimizing indoor lighting using LES (Light Energy Saver) technology.
- Installing motion sensors in washrooms, meeting rooms, and gangways for automatic light control
- Upgrading old ceiling fans to BLDC fans for higher efficiency

**4. Automation and Control Systems:**

- Installing solenoid valves and auto drain valves to reduce air leakage and unnecessary air draw during no-load conditions
- Utilizing real-time power factor correction systems and online energy monitoring systems for better energy management

**5. Air Management:**

- Conducting air leakage identification and implementing counter measures
- Installing cyclic timers and pressure switches on air conditioners to optimize operation
- Adding air pressure vessels to improve air system efficiency

**6. Renewable Energy and Sustainable Practices:**

- Installing rooftop solar plants at existing facilities

**7. Miscellaneous Improvements:**

- Utilizing VFD panels in powder coating booths and STP systems
- Introducing descaling machines for the molding area and metallizing pumping groups
- Installing servo motors in various machines to boost efficiency

**9. Provide details related to waste management by the entity, in the following format:**

**10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.**

The Company acknowledges the critical importance of waste management, a key issue impacting the organization, neighboring communities, and the environment. The core objectives of the waste management strategy are to minimize waste generation, enhance recycling and recovery, and reduce waste disposal. To promote responsible waste management across all facilities, the Company has implemented practices such as source-separated waste collection, waste reuse and recycling, and secure disposal of hazardous waste in collaboration with authorized agencies. Adhering to the '3R' strategy of Reduce, Reuse, and Recycle, the Company remains committed to continuously improving its waste management procedures to align with broader environmental, social, and governance goals.

**11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals/clearances are required, please specify details in the following format:**

**12. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:**

<b>Location of operations/offices</b>	The Company does not operate in or around ecologically sensitive areas where environmental approvals or clearances are required.
<b>Type of operations</b>	
<b>Whether the conditions of environmental approval/clearance are being complied with? (Y/N)If no, the reasons thereof and corrective action taken, if any</b>

2	Water Management	<ul style="list-style-type: none"> <li>ETP &amp; STP capacity enhanced in Maharashtra region plants to optimize the water usage</li> </ul>	Recycle, reuse of waste water for operational and gardening purpose

**5. Does the entity have a business continuity and disaster management plan? Give details in 100 words/web link.**

As part of its business continuity and disaster management strategy, the Company has Emergency Response Plan that addresses 8 types. of emergencies. This plan outlines the procedures to follow in various emergency situations and is applicable across all plants. It is also communicated to all employees through the Employee App. These Emergency Response Plan includes protocols for:

- Fire Emergency
- Earthquake Emergency
- Sewage Outflow Emergency
- Medical Emergency - Death Emergency
- Civil Unrest Emergency
- Food Poisoning Emergency
- Snake Bite Emergency
- Gas Leakage Emergency

**6. Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard.**

The Company found no significant environmental impact from its suppliers. The Company is committed to environmental stewardship throughout the value chain, requiring all suppliers to maintain high environmental standards and encouraging them to promote these principles within their own supply chains

**7. Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts.**

-

Principle

07

Businesses, when engaging in influencing public and regulatory policy, should do so in a manner that is responsible and transparent

Essential Indicators

1. a. **Number of affiliations with trade and industry chambers/associations.**  
The Company is affiliated with 3 trade and industry chambers/associations
- b. **List the top 10 trade and industry chambers/associations (determined based on the total members of such body) the entity is a member of/affiliated to**

Reach of trade and industry chambers/associations (State/National)	National	<b>Name of the trade and industry chambers/associations</b>

Principle

09

Businesses should engage with and provide value to their consumers in a responsible manner

Essential Indicators

1. Describe the mechanisms in place to receive and respond to consumer complaints and feedback.

The organization prioritizes customer complaints and is committed to addressing them promptly and effectively. Customers can submit complaints or feedback through various channels, including Customer Portals and E-mail. Each of the 11 plants follows a structured process for managing these complaints: feedback is received via the designated channels, and a temporary resolution is provided within 24 hours. The organization then conducts root cause analysis, and utilizes quality tools to resolve the issue. A permanent countermeasure is implemented within one week and communicated to the customer to ensure thorough resolution.

2. Turnover of products and/services as a percentage of turnover from all products/service that carry information about our products.

Environmental and social parameters relevant to the product

Safe and responsible usage

Recycling and/or safe disposal

As a percentage to total turnover

Not applicable, as the Company is in B2B business, and the products do not reach end customers directly

3. Number of consumer complaints in respect of the following:

	FY 2023-24 (Current financial year)		Remarks	FY 2022-23 (Previous financial year)		Remarks

4. Details of instances of product recalls on account of safety issues

	Number	Reasons for recall
Voluntary recalls	Nil	-
Forced recalls	Nil	-

**5. Does the entity have a framework/policy on cyber security and risks related to data privacy? (Yes/No) If available, provide a web-link of the policy.**

Yes, the Company has a data privacy policy which is available on the Company's intranet.

**6. Provide details of any corrective actions taken or underway on issues relating to advertising, and delivery of essential services; cyber security and data privacy of customers; re-occurrence of instances of product recalls; penalty/action taken by regulatory authorities on safety of products/services**

The Company has not encountered any complaints, issues, or penalties related to advertising, delivery of essential services, cyber security, data privacy, product recalls, or product/service safety. As a result, corrective actions have not been necessary.

**7. Provide the following information relating to data breaches:**

a. Number of instances of data breaches	Nil
b. Percentage of data breaches involving personally identifiable information of customers	There were no such instances of data breaches identified so far.
c. Impact, if any, of the data breaches	

**Leadership Indicators**

**1. Channels/platforms where information on products and services of the entity can be accessed (provide web link, if available).**

The information on products and services of the entity is made available online on the Company website and social media, can be accessed through below links:

- <https://www.lumaxworld.in/>
- <https://www.youtube.com/c/LumaxWorld>
- <https://www.facebook.com/lumaxworld.in>
- <https://www.linkedin.com/company/lumax-world/>

**2. Steps taken to inform and educate consumers about safe and responsible usage of products and/or services.**

The Company supplies the products directly to the OEMs who further assemble and sell the end products to the end-user customers. Hence, it has a limited role in informing and educating the end-user about the safe and responsible usage of its products.

**3. Mechanisms in place to inform consumers of any risk of disruption/discontinuation of essential services.**

The Company does not directly provide essential services. However, it is committed to minimizing disruptions in its customers' operations and services. Through consistent and proactive client communication its clients, the Company ensures the smooth running of their operations.

**4. Does the entity display product information on the product over and above what is mandated as per local laws? (Yes/no/not applicable)**

Yes

**If yes, provide details in brief.**

Based on customer's requirement certain products carry CE marking

**Did your entity carry out any survey with regard to consumer satisfaction relating to the major products/services of the entity, significant locations of operation of the entity or the entity as a whole? (Yes/No)**

Recognizing the importance of customer satisfaction, the Company actively seek feedback through various channels. This feedback whether direct or indirect, helps identify any grievances, and appropriate corrective measures are designed and implemented accordingly. Additionally, the management team regularly reviews and monitors summaries of customer satisfaction trends to ensure continuous improvement.

## Independent Auditor's Report

### To the Members of Lumax Industries Limited

### Report on the Audit of the Standalone Financial Statements

#### Opinion

We have audited the accompanying standalone financial statements of Lumax Industries Limited ("the Company"), which comprise the Balance sheet as at March 31 2024, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the standalone financial statements, including a summary of material accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, its profit including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

#### Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the standalone Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued

by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements for the financial year ended March 31, 2024. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matter to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the standalone financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the standalone financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying standalone financial statements.

## Independent Auditor's Report (Contd.)

Key audit matter	How our audit addressed the key audit matter
<b>Estimation of accrual of price adjustments related to revenue from sale of goods</b> (as described in Note 52, Note 2.2(K) & Note 29 of the standalone financial statements)	
Revenue from sale of goods is measured by the Company at the transaction price i.e., amount of consideration received/receivable in exchange for transferring promised goods or services to the customers. In determining the transaction price for the sale of products, the Company considers the effects of price adjustments to be passed on from the customers on account of variation in material and other costs. These price adjustments are based on agreed terms, negotiations with customers and various commercial considerations, which involves significant judgements and estimates. The accrual of aforesaid price adjustments is disclosed in note 52 to the financial statements. We have considered accrual of price adjustments as a key audit matter as significant judgement involved in such estimation.	<p>Our audit procedures included the following:</p> <ul style="list-style-type: none"> <li>Assessed the Company accounting policies for revenue recognition including policy for accounting of price adjustments in terms of Ind AS 115.</li> <li>Obtained an understanding of the revenue process and estimation of price adjustments, evaluated the design and implementation of controls relating to accrual of price adjustments and tested the operating effectiveness such controls.</li> <li>Evaluated management's methodology and assumptions used in the estimation of price adjustments as per customer contracts including the relevance and reliability of underlying historical data and developments during the year.</li> <li>Tested completeness and arithmetical accuracy of the data used in the computation of price adjustments.</li> <li>Tested, on a sample basis, debit notes/ credit notes issued, and payments received/ made as per customer contracts/ agreed price negotiations.</li> <li>Performed analytical procedures to identify any unusual trends and identify unusual items for further testing.</li> <li>Assessed adequacy of disclosures in the financial statements</li> </ul>

### Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of Management for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial

performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

## Independent Auditor's Report (Contd.)

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

### Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are

inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure, and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements for the financial year ended March 31, 2024, and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report, to the extent applicable, that:
  - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books

## Annexure '1' referred to in paragraph 1 under the heading "Report on other legal and regulatory requirements" of our report of even date

### Re: Lumax Industries Limited (the Company)

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.
- (B) The Company has maintained proper records showing full particulars of intangibles assets.
- (b) All Property, Plant and Equipment were not physically verified by the management in the current year. However, the Company has regular programme of verifying them once in three years which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets.
- (c) The title deeds of all the immovable properties (other than properties where the Company is the lessee and the lease agreements are duly executed in favour of the lessee) are held in the name of the Company. One lease agreement is not duly executed in the name of the Company, the details of immovable property is as follows.

Description of Property	Gross carrying value (Right of use assets) (In lakhs)	Held in name of	Whether promoter, director or their relative or employee	Period held	Reason for not being held in the name of Company*
Leasehold land	2732.80	Horizon Industrial Parks Private Limited	No	2023-24	The Company is in the process of execute the lease agreement

- (d) The Company has not revalued its Property, Plant and Equipment (including Right of use assets) or intangible assets during the year ended March 31, 2024.
- (e) There are no proceedings initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.
- (ii) (a) The inventory has been physically verified by the management during the year except for inventories lying with third parties and goods in transit. In our opinion, the frequency of verification by the management is reasonable and the coverage and procedure for such verification is appropriate. Inventories lying with third parties have been confirmed by them as at March 31, 2024. Discrepancies of 10% or more in aggregate for each class of inventory were not noticed on such physical verification and in respect of such confirmations.
- (b) As disclosed in note 21 to the financial statements, the Company has been sanctioned working capital limits in excess of Rs. five crores in aggregate from banks and financial institutions during the year on the basis of security of current assets of the Company. Based on the records examined by us in the normal course of audit of the financial statements, the quarterly returns/statements filed by the Company with such banks and financial institutions are in agreement with the books of accounts of the Company.
- (iii) (a) During the year the Company has provided loans or advances in the nature of loans amounting to Rs.131.81 lakhs to its employees, the balance outstanding as at the balance sheet date in respect of these cases is Rs.110.04 lakhs. During the year the Company has not provided loans, advances in the nature of loans, stood guarantee and provided security to companies, firms or Limited Liability Partnerships or any other parties.
- (b) During the year, the investments made and the terms and conditions of the grant of loans or advances in the nature of loan to employees are not prejudicial to the Company's interest. The Company has not provided any guarantees, security, loans and advances in the nature of loans to companies, firms, Limited Liability Partnerships.
- (c) The Company has granted interest free loans or advances in the nature of loans during the year to its employees where the schedule of repayment of principal has been stipulated and the repayment or receipts are regular. The Company has not granted loans or advances in the nature of loans to companies, firms and Limited Liability Partnerships during the year.

Annexure '1' referred to in paragraph 1 under the heading "Report on other legal and regulatory requirements" of our report of even date (Contd.)

- (d) There are no amounts of loans and advances in the nature of loans granted to the employees which are overdue for more than ninety days. The Company has not granted loans or advances in the nature of loans to companies, firms and Limited Liability Partnerships during the year.
- (e) There were no loans or advance in the nature of loan granted to companies, firms, Limited Liability Partnerships or any other parties which was fallen due during the year, that have been renewed or extended or fresh loans granted to settle the overdues of existing loans given to the same parties.
- (f) The Company has not granted any loans or advances in the nature of loans, either repayable on demand or without specifying any terms or period of repayment to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(f) of the Order is not applicable to the Company.
- (iv) The Company has not given any loans, or provided any guarantee or security as specified under Section 185 of the Companies Act, 2013 ("the Act"). In respect of investments made and loan given by the Company, in our opinion the provisions of sections 186 of the Companies Act, 2013 have been complied with by the Company.
- (v) The Company has neither accepted any deposits from the public nor accepted any amounts which are deemed to be deposits within the meaning of sections 73 to 76 of the Companies Act and the rules made thereunder, to the extent applicable. Accordingly, the requirement to report on clause 3(v) of the Order is not applicable to the Company.
- (vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013, related to the manufacture of automobile components, and are of the opinion that prima facie, the specified accounts and records have been made and maintained. ## **Annexure '2' to the independent auditor's report of even date on the standalone financial statements of Lumax Industries Limited**

### **Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls with reference to standalone financial statements of Lumax Industries Limited ("the Company") as of March 31, 2024 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

### **Management's Responsibility for Internal Financial Controls**

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these standalone financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these standalone financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these standalone financial statements and their operating effectiveness. Our audit of internal financial controls with reference to standalone financial statements included obtaining an understanding of internal financial controls with reference to these standalone financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these standalone financial statements.

### **Meaning of Internal Financial Controls with Reference to these Standalone Financial Statements**

A company's internal financial controls with reference to standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to standalone financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Annexure '2' to the independent auditor's report of even date on the standalone financial statements of Lumax Industries Limited (Contd.)

### **Inherent Limitations of Internal Financial Controls with Reference to Standalone Financial Statements**

Because of the inherent limitations of internal financial controls with reference to standalone financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to standalone financial statements to future periods are subject to the risk that the internal financial control with reference to standalone financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Opinion**

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to

standalone financial statements and such internal financial controls with reference to standalone financial statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024

### 1. Corporate information

Lumax Industries Limited ("the Company") is a Public Company domiciled in India and is incorporated under the provisions of the Companies Act applicable in India. Its shares are listed on two recognized stock exchanges in India. The registered office of the Company is located 2nd Floor, Harbans Bhawan-II, Commercial Complex, Nangal Raya, New Delhi- 110046.

The Company is principally engaged in the manufacturing of automotive components. Information on other related party relationships of the Company is provided in Note 41.

The financial statements were authorized for issue in accordance with a resolution of the directors on May 24, 2024.

### 2. Material accounting policies

#### 2.1 Basis of Preparation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the financial statement.

The financial statements have been prepared on a historical cost basis, except for the certain financial assets and liabilities which have been measured at fair value or revalued amount (refer accounting policy regarding financial instruments).

The Company has prepared the financial statements on the basis that it will continue to operate as a going concern.

The Financial Statements are presented in Indian Rupees (₹) and all values are rounded to the nearest Lakhs (₹ 00,000), except wherever otherwise stated.

#### 2.2 Summary of material accounting policies

##### A. Investment in subsidiary and associate

The investment in subsidiary are carried at cost as per Ind AS 27. The Company regardless of the nature of its involvement with an entity (the investee), determines whether it is a parent by assessing whether it controls the investee. The Company controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Thus, the Company controls an investee if and only if it has all the following:

- (a) power over the investee
- (b) exposure, or rights, to variable returns from its involvement with the investee and
- (c) the ability to use its power over the investee to affect the amount of the returns.

An associate is an entity over which the Company has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The considerations made in determining whether significant influence are similar to those necessary to determine control over the subsidiary

Investment in associate is recorded at cost

##### B. Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

##### Assets

An asset is treated as current when it is:

- a) Expected to be realized or intended to be sold or consumed in normal operating cycle
- b) Held primarily for the purpose of trading
- c) Expected to be realized within twelve months after the reporting period, or
- d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

##### Liabilities

A liability is current when:

- (a) It is expected to be settled in normal operating cycle
- (b) It is held primarily for the purpose of trading
- (c) It is due to be settled within twelve months after the reporting period, or
- (d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

### Operating cycle

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

### C. Foreign currencies

#### **Functional and presentational currency**

The Company's financial statements are presented in Indian Rupees (₹) which is also the Company's functional currency.

#### **Transactions and balances**

Transactions in foreign currencies are initially recorded by the Company at the functional currency spot rates at the date the transaction first qualifies for recognition. However, for practical reasons, the Company uses average rate if the average approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognized in statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or profit or loss are also recognized in OCI or profit or loss, respectively).

In determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which the Company initially recognizes the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Company determines the transaction date for each payment or receipt of advance consideration.

### D. Property, plant and equipment

Capital work in progress, property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the property, plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

Items of stores and spares that meet the definition of plant, property and equipment are capitalized at cost and depreciated over their useful life. Otherwise, such items are classified as inventories.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognized.

#### **Depreciation on property, plant and equipment**

Depreciation is calculated on a straight-line basis over the estimated useful lives as estimated by the management which is in line with the Schedule II to the Companies Act, 2013. The Company has used the following useful lives to provide depreciation on its property, plant and equipment which is in line with schedule II:

Assets	Useful Lives estimated by the management (in years)
Factory Building	30
Other Building	60
Office equipments	5
Furniture and fixtures	10
Vehicles	5

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

The management has estimated, supported by independent assessment by professionals, the useful life of the following class of asset, which are higher/different than that indicated in Schedule II.

Assets	Useful Lives estimated by the management (in years)
Plant and equipments	3-21

The residual value of property, plant and equipment is considered at 2%.

Depreciation on additions/ (disposals) is provided on a pro-rata basis i.e. from/ (upto) the date on which asset is ready for use/ (disposed of).

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at the end of each financial year and adjusted prospectively, if appropriate.

#### E. Intangible assets

##### **Recognition and measurement**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

##### **Amortization and useful lives**

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and amortization method of the intangible asset with a useful finite life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the assets are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another assets, as follows:

Intangible Assets	Estimated Useful Life (Years)
Computer Software	Over the estimated economic useful lives ranging from 3.5 to 4 years

An intangible asset is derecognized upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Gain or loss arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

##### **Research and development costs**

Research costs are expensed as incurred. Development expenditures on an individual project are recognized as an intangible asset when the Group can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- Its intention to complete and its ability and intention to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete, and the asset is available for use. It is amortized over the period of expected future benefit. Amortization expense is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. During the period of development, the asset is tested for impairment annually.

#### F. Investment Property

Property that is held for long term rental yields or for capital appreciation or for both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction cost and where applicable borrowing costs. Subsequent to initial recognition, investment property are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure is capitalized to assets carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

Though the Company measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an external independent valuer applying a valuation model as per Ind AS 113 "Fair value measurement".

Investment property are derecognized either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period of recognition.

Transfer of property from investment property to the property, plant and equipment is made when the property is no longer held for long term rental yields or for capital appreciation or both at carrying amount of the property transferred.

### G. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

### H. Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-to-use assets representing the right to use the underlying assets.

#### i. Right-to-use assets

The Company recognizes right-to-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-to-use assets are measured

at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-to-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-to-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets as follows

Leasehold Land-99 years

Solar Panel-15 years

Vehicle-5 years

Building-10-15 years

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-to-use assets are also subject to impairment. Refer to the accounting policies section 'Impairment of non-financial assets'.

#### ii. Lease Liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

### iii. Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

### I. Inventories

Inventories which comprise raw materials,

components, work in progress, finished goods, traded goods, moulds and stores and spares are valued at the lower of cost and net realizable value.

The basis of determining costs for various categories of inventories is as follows:

- **Raw materials, components, stores and spares:** Cost of inventories comprises all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted moving average basis.
- **Work-in-progress and finished goods:** Cost includes direct material plus appropriate share of labor, manufacturing overheads based on normal operating capacity. Cost is determined on a weighted moving average basis.
- **Traded goods:** Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on moving weighted average basis.
- **Moulds:** Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.

Stores and spares which do not meet the definition of Property, plant and equipment are accounted as inventories.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Scraps are valued at net realizable value.

The net realizable value of work-in-progress is determined with reference to the selling prices of related finished goods. Raw materials and other supplies held for use in production of finished goods are not written down below cost, except in cases where material prices have declined, and it is estimated that the cost of the finished goods will exceed its net realizable value. The comparison of cost and net realizable value is made on an item-by-item basis.

### J. Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required,

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units' (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Impairment losses on non-financial asset, including impairment on inventories, are recognized in the statement of profit and loss.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the Company operates, or for the market in which the asset is used.

An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine

the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Intangible assets with indefinite useful lives are tested for impairment annually at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

The Company assesses where climate risks could have a significant impact, such as the introduction of emission-reduction legislation that may increase manufacturing costs. These risks in relation to climate-related matters are included as key assumptions where they materially impact the measure of recoverable amount. These assumptions have been included in the cash-flow forecasts in assessing value-in-use amounts.

### K. Revenue from contracts with customers

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods before transferring them to the customer.

However, Goods and services tax (GST), is not received by the Company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

#### a) Sale of products including moulds

Customers obtain control of goods when the goods are delivered to and have been accepted at their premises. However, few customers accept the goods when goods have been dispatched by the Company.

Invoices are generated at that point in time. Invoices are usually payable within 30-120 days. No discounts are usually provided for goods, but few customers may avail cash

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

discount on prompt payment of the goods. Some contracts permit the customer to return an item. Returned goods are exchanged only for new goods – i.e. no cash refunds are offered.

Revenue arising from the sale of goods (including moulds) is recognized when the customer obtains control of the promised asset, i.e. either at the delivery or dispatch of goods (based on the agreed terms of sale with the respective customers), which is the point in time when the customer has the ability to direct the use of the goods and obtain substantially all of the remaining benefits of the goods.

For contracts that allow the customers to avail the cash discount, the Company estimates the value of discount by applying the 'Most likely amount' method and past experience of the Company.

For contracts that permit the customer to return an item, revenue is recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur.

**b) Sale of services**

Revenue from sale of services is recognized in accordance with the terms of contract when the services are rendered and the related costs are incurred.

**c) Contract balances**

**i) Contract assets**

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognized for the earned consideration that is conditional.

**ii) Trade receivables**

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section financial instruments – initial recognition and measurement.

**iii) Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs under the contract.

**d) Interest Income**

For all debt instruments measured at amortized cost or at fair value through other comprehensive income, interest income is recorded using the Effective Interest Rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instruments or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortized cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected estimated cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit loss. Interest income is included under the head "other income" in the statement of profit and loss.

Interest income on bank deposits and advances to vendors is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head "other income" in the statement of profit and loss.

**e) Dividend Income**

Dividend is recognized when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

**f) Rental Income**

Rental income arising from operating leases are accounted for on a straight-line basis over the lease terms and is included under the head "other income" in the statement of profit & loss.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

### L. Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all the attached conditions will be complied with. When the grant relates to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as government grant. The loan or assistance is initially recognized and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

### M. Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

The Company operates defined benefit plans for its employees, viz., gratuity. The costs of providing benefits under these plans are determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out for each plan using the projected unit credit method.

Actuarial gains and losses for both defined benefit plans are recognized in full in the period in which they occur in the statement of profit and loss.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date. The Company recognizes expected cost of short-term employee benefit as an expense, when an employee renders the related service.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purpose. Such long term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. The Company presents the leave as a current liability in the balance sheet to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognized in profit or loss on the earlier of:

- a) The date of the plan amendment or curtailment, and
- b) The date that the Company recognizes related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognizes the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

- a) Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- b) Net interest expense or income

**N. Provisions****General**

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

**Onerous contracts**

If the Company has a contract that is onerous, the present obligation under the contract is recognized and measured as a provision. However, before a separate provision for an onerous contract is established, the Company recognizes any impairment loss that has occurred on assets dedicated to that contract.

An onerous contract is a contract under which the unavoidable costs (i.e., the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it. The cost of fulfilling a contract comprises the costs that relate directly to the contract (i.e., both incremental costs and an allocation of costs directly related to contract activities).

**Warranty provisions**

The Group provides warranties for general repairs of defects that existed at the time of sale, as required by law. Provisions related to these assurance-type warranties are recognized when the product is sold, or the service is provided to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

**O. Taxes****Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in OCI or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

**Deferred tax**

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of deductible temporary differences associated with investments in subsidiaries and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In assessing the recoverability of deferred tax assets, the Company relies on the same forecast assumptions used elsewhere in the financial statements and in other management reports, which, among other things, reflect the potential impact of climate-related development on the business, such as increased cost of production as a result of measures to reduce carbon emission.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in OCI or in equity). Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

The Company offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future

period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax for the year. The deferred tax asset is recognized for MAT credit available only to the extent that it is probable that the concerned company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset, it is created by way of credit to the statement of profit and loss and shown as part of deferred tax asset. The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent that it is no longer probable that it will pay normal tax during the specified period.

### P. Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

### Q. Earnings per share (EPS)

Basic EPS amounts are calculated by dividing the profit for the year attributable to the shareholders of the Company by the weighted average number of equity shares outstanding as at the end of reporting period.

Diluted EPS amounts are calculated by dividing the profit attributable to the shareholders of the Company by the weighted average number of equity shares outstanding during the year plus the weighted average number of Equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

### R. Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are only disclosed when it is probable that the economic benefits will flow to the entity.

### S. Dividend

The Company recognizes a liability to make cash dividend to equity holders of the Company when the distribution is authorized and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorized when it is approved by the shareholders. A corresponding amount is recognized directly in equity.

### T. Assets held for sale

The Company classifies non-current assets as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the sale expected within one year from the date of classification.

For these purposes, sale transactions include exchanges of non-current assets for other non-current assets when the exchange has commercial substance. The criteria for held for sale classification is regarded met only when the assets is available for immediate sale in its present condition, subject only to terms that are usual and customary for sales of such assets, its sale is highly probable; and it will genuinely be sold, not abandoned. The Company treats sale of the asset to be highly probable when:

- The appropriate level of management is committed to a plan to sell the asset,
- An active program to locate a buyer and complete the plan has been initiated,
- The asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value,
- The sale is expected to qualify for recognition as a completed sale within one year from the date of classification, and

- Actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Non-current assets held for sale to owners and disposal groups are measured at the lower of their carrying amount and the fair value less costs to sell. Assets and liabilities classified as held for sale are presented separately in the balance sheet.

Property, plant and equipment and intangible assets once classified as held for sale to owners are not depreciated or amortized.

### U. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability, or
- (b) In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company's management determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for distribution in discontinued operations.

External valuers are involved for valuation of significant assets and significant liabilities, if any.

At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents, if any.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Quantitative disclosure of fair value measurement hierarchy
- Investment property
- Financial instruments (including those carried at amortized cost)

### V. Financial instruments

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity.

#### Financial Assets

##### Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under Ind AS 115. Refer to the accounting policies in section 'Revenue from contracts with customers'.

In order for a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortized cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

### Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortized cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments, derivatives and equity instruments at fair value through profit and loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)

### Debt Instruments at amortized cost

A financial asset is measured at the amortized cost if both the following conditions are met

- (i) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows and
- (ii) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding

After initial measurement, such financial assets are subsequently measured at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The accretion of EIR is recorded as an income or expense in statement of profit and loss. The losses arising from impairment are recognized in the statement of profit and loss. This category generally applies to trade and other receivables.

### Debt Instruments at fair value through OCI (FVTOCI)

A 'financial asset' is classified as at the FVTOCI if both of the following criteria are met:

- a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b) The asset's contractual cash flows represent SPPI

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. For debt instruments, at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the profit or loss and computed in the same manner as for financial assets measured at amortized cost. The remaining fair value changes are recognized in OCI. Upon derecognition, the cumulative fair value changes recognized in OCI is reclassified from the equity to profit or loss.

### Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the balance sheet at fair value with net changes in fair value recognized in the statement of profit and loss.

This category includes derivative instruments and listed equity investments which the Company had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognized in the statement of profit and loss when the right of payment has been established.

### Equity instruments at fair value through OCI (FVTOCI)

Upon initial recognition, the Company can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under Ind AS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis. Equity instruments which are held for trading and contingent consideration recognized by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the statement of profit and loss when the right of payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Company elected to classify irrevocably its non-listed equity investments under this category.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

### De-recognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognized (i.e. removed from the Company's Balance Sheet) when:

- (i) The contractual rights to receive cash flows from the asset has expired, or
- (ii) The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

### Financial Liabilities

#### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, lease liabilities, loans and borrowings etc.

### Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at amortized cost
- Financial liabilities at fair value through profit and loss (FVTPL)

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ losses are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognized in the statement of profit and loss. The Company has not designated any financial liability as at fair value through profit or loss.

#### Financial liabilities at Amortized cost

##### Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in the profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

statement of profit and loss. This category generally applies to borrowings.

### De-recognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

### Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

### Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognized gains, losses (including impairment gains or losses) or interest.

### W. Impairment of financial assets

In accordance with Ind AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

Financial assets that are debt instruments, and are initially measured at fair value with subsequent measurement at amortized cost e.g., trade and other receivables, security deposits, loan to employees, etc.

The Company follows 'simplified approach' for recognition of impairment loss allowance for trade receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original effective interest rate.

As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historically observed default rates are updated and changes in the forward-looking estimates are analyzed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as an expense in the statement of profit and loss.

### X. Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Company elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

The Company determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

an organized workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

At the acquisition date, the identifiable assets acquired, and the liabilities assumed are recognized at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- Deferred tax assets or liabilities, and the liabilities or assets related to employee benefit arrangements are recognized and measured in accordance with Ind AS 12 Income Tax and Ind AS 19 Employee Benefits respectively.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12.
- Liabilities or equity instruments related to share based payment arrangements of the acquiree or share – based payments arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with Ind AS 102 Share-based Payments at the acquisition date.
- Assets (or disposal groups) that are classified as held for sale in accordance with Ind AS 105 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that Standard.
- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.

When the Company acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic

circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognized in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognized at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 Financial Instruments, is measured at fair value with changes in fair value recognized in profit or loss in accordance with Ind AS 109. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS and shall be recognized in profit or loss. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Company re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognizes the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Company's cash-generating units that are expected to benefit from the combination, irrespective of whether other

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognized in profit or loss. An impairment loss recognized for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Company reports provisional amounts for the items for which the accounting is incomplete.

Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

### 3. New and amended standards

The Ministry of Corporate Affairs has notified Companies (Indian Accounting Standard) Amendment Rules 2023 dated March 23, 2023, to amend the following Ind AS which are effective from April 01, 2023:

#### (i) Definition of Accounting Estimates - Amendments to Ind AS 8

The amendments clarify the distinction between changes in accounting estimates, changes in accounting policies and the correction of errors. It has also been clarified how entities use measurement techniques and inputs to develop accounting estimates.

The amendments had no impact on the Company's standalone financial statements.

#### (ii) Disclosure of Accounting Policies - Amendments to Ind AS 1

The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

The amendments have had an impact on the Company's disclosures of accounting policies, but not on the measurement, recognition or presentation of any items in the Company's financial statements.

#### (iii) Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to Ind AS 12

The amendments narrow the scope of the initial recognition exception under Ind AS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences such as leases.

The Company previously recognized for deferred tax on leases on a net basis. As a result of these amendments, the Company has recognized a separate deferred tax asset in relation to its lease liabilities and a deferred tax liability in relation to its right-of-use assets. Since, these balances qualify for offset as per the requirements of paragraph 74 of Ind AS 12, there is no impact in the balance sheet. There was also no impact on the opening retained earnings as at April 01, 2022.

### 20.1 Nature and purpose of reserves

#### a) Securities premium

Securities premium is used to record the premium on issue of shares. The reserve can be utilised only for limited purposes in accordance with the provisions of the Companies Act, 2013.

#### b) General reserve

Under the erstwhile Companies Act 1956, general reserve was created through an annual transfer of net income at a specified percentage in accordance with applicable regulations. Consequent to introduction of Companies Act 2013, the requirement to mandatorily transfer a specified percentage of the net profit to general reserve has been withdrawn. However, the amount previously transferred to the general reserve can be utilised only in accordance with the specific requirements of Companies Act, 2013.

#### c) Retained earnings

Retained earnings are the profits that the Company has earned till date, less any transfers to general reserve, dividends or other distributions paid to shareholders. Retained earnings include re-measurement loss / (gain) on defined benefit plans, net of taxes that will not be reclassified to Statement of Profit and Loss.

#### d) Capital reserve

The reserve will be utilized in accordance with the provisions of the Companies Act, 2013.

**Note:**

The Company has established a comprehensive system on maintenance of information and documents required by the transfer pricing legislation under section 92-92F of the Income Tax Act, 1961. Since the law requires existence of such information and documentation to be contemporaneous in nature, the Company is in the process of updating the documentation for transactions entered into with the associated enterprises during the financial year and expects such records to be in existence latest by the due date as required under law. The Management is of the opinion that its transactions are at arm's length so that the aforesaid legislation will not have any impact on the financial statements particularly on the amount of income tax expense and that of provision of taxation.

Above amount is inclusive of GST wherever applicable.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

(All amounts are presented in ₹ Lakhs, unless otherwise stated)

### 44 Event after the reporting date

The Board of Directors of the Company has proposed dividend @ 350% i.e. ₹ 35 per equity share of face value of ₹ 10 each (March 31, 2023 @ 270% i.e. ₹ 27 per equity share of face value of ₹ 10 each) which is subject to shareholder's approval in forthcoming annual general meeting.

### 45 Material accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

#### (i) Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

##### a) Operating lease commitments – Company as lessor

The Company has entered into commercial property leases on its investment property portfolio. The Company has determined, based on an valuation of the terms and conditions of the arrangements, such as the lease term not constituting a substantial portion of the economic life of the commercial property, and that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

##### b) Assessment of lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

##### c) Revenue from contracts with customers

The Company applied the following judgments that significantly affect the determination of the amount and timing of revenue from contracts with customers:

- Determining method to estimate variable consideration and assessing the constraint

Certain contracts for the sale of products include a right of price revision on account of change of commodity prices/purchase price that give rise to variable consideration. In estimating the variable consideration, the Company is required to use either the expected value method or the most likely amount method based on which method better predicts the amount of consideration to which it will be entitled.

#### (ii) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

##### a) Property, plant and equipment

The useful lives and residual values of property, plant and equipment are determined by the management based on technical assessment by the management. The Company believes that the derived useful life best represents the period over which the Company expects to use these assets.

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

(All amounts are presented in ₹ Lakhs, unless otherwise stated)

**b) Taxes**

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the wide range of business relationships and the longterm nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective domicile of the companies.

**c) Gratuity benefit**

The cost of defined benefit plans (i.e. Gratuity benefit) is determined using actuarial valuations. An actuarial valuation involves making various assumptions which may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. In determining the appropriate discount rate, management considers the interest rates of long term government bonds with extrapolated maturity corresponding to the expected duration of the defined benefit obligation. The mortality rate is based on publicly available mortality tables for the specific countries. Future salary increases and pension increases are based on expected future inflation rates for the respective countries. Further details about the assumptions used, including a sensitivity analysis, are given in Note 42.

**d) Fair value measurement of financial instrument**

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

**e) Impairment of financial assets**

The impairment provisions of financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

**f) Impairment of non-financial assets**

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use.

The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are also relevant to other intangibles. During the year the Company has done the impairment assessment of non-financial assets and have concluded that there is no impairment in value of non-financial assets as appearing in the financial statements.

Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)  
(All amounts are presented in ₹ Lakhs, unless otherwise stated)

**g) Lease incremental borrowing rate**

The Company cannot readily determine the interest rate implicit in the lease, therefore its incremental borrowing rate (IBR) to measure lease liability. The IBR is the rate of interest that the Company would have to pay to borrow over similar term, and with a similar security, the fund necessary to obtain an asset of a similar value to the Right-to-use assets in as similar economic environments. The IBR therefore effects what the Company “would have to pay” which requires estimates when no observable rates are available or when they need to be adjusted to reflect the term and conditions of the lease. The Company estimates the IBR using observable inputs such as market interest rates when available.

**46 Capital Management**

For the purpose of the Company’s capital management, capital includes issued equity capital, all equity reserves attributable to the equity holders of the Company. The primary objective of the Company’s capital management is to maximise the shareholders’ value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants, if any. To maintain or adjust the capital structure, the Company reviews the fund management at regular intervals and take necessary actions to maintain the requisite capital structure. No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2024 and March 31, 2023.

**Discount rate used in determining fair value**

The interest rate used to discount estimated future cash flows, where applicable, are based on the incremental borrowing rate of borrower which in case of financial liabilities is average market cost of borrowings of the Company and in case of financial asset is the average market rate of similar credit rated instrument. The Company maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

**48 Fair value hierarchy**

All financial instruments for which fair value is recognized or disclosed are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: Valuation techniques for which the lowest level input that has a significant effect on the fair value measurement are observable, either directly or indirectly

Level 3: Valuation techniques for which the lowest level input which has a significant effect on the fair value measurement is not based on observable market data

The following table provides the fair value measurement hierarchy of the Company's assets and liabilities.

- 49 On April 01, 2019, the Company purchased certain assets from Lumax Auto Technologies Limited at a consideration of ₹ 2,245.41 Lakhs, pursuant to which, the Company has setup in-house Electronic facility at Manesar on 1 April 2019 for designing and manufacturing of Electronics Printed Circuit Boards Assembly ('PCB'). The said acquisition was primarily done to optimize cost by indigenization of Printed Circuit Board ('PCB'). The abovementioned purchase of assets has been accounted as Business Combination in accordance with Ind AS 103.

The fair values of assets (i.e. Property, plant and equipment and other intangible assets) acquired amounts to ₹ 1,267.83 Lakhs. Further, Goodwill arising from the acquisition amounts to ₹ 977.58 Lakhs which is attributable to synergies expected to be achieved from integrating PCB into the Company's existing business.

For the purpose of impairment testing, Goodwill is allocated to the Company as a whole since the performance of the Company is monitored at that level for internal management purposes. The recoverable amount of the CGU was based on its value in use and was determined by discounting the future cash flows to be generated from the continuing use of the CGU. These calculations use cash flow projections over a period of five years, based on next year financial budgets estimated by management, with extrapolation for the remaining period, and an average of the range of assumptions as mentioned below.

The key assumptions used in the estimation of value in use were as follows:

## Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)

(All amounts are presented in ₹ Lakhs, unless otherwise stated)

	March 31, 2024	March 31, 2023
Terminal value growth rate	3%	3%
EBITDA growth rate*	15.00%-41.00%	15.00%-17.00%
Discount rate	17.00%	17.00%

\*EBITDA growth rate in 2024-25 is 41% which is higher than normal rate ie 15%, due to New Chakan plant operational for 12 months in 2024-25.

The cash flow projections included specific estimates for five years and a terminal growth rate thereafter. The terminal growth rate and EBITDA margins were determined based on management's estimate. Budgeted EBITDA margin was based on expectations of future outcomes taking into account past experience. The estimation of value in use reflects numerous assumptions that are subject to various risks and uncertainties, including key assumptions regarding expected growth rates and operating margin, expected length and the shape and timing of the subsequent recovery, as well as other key assumptions with respect to matters outside of the Company's control. It requires significant judgments and estimates, and actual results could be materially different than the judgments and estimates used to estimate value in use.

The Company has used the discount rate which is based on the Weighted Average Cost of Capital (WACC) of comparable market participant, adjusted for specific risks. These estimates are likely to differ from future actual results of operations and cash flows. Based on the above, no impairment was identified as at March 31, 2024 and March 31, 2023 as the recoverable value of the CGU exceeded the carrying value. No reasonably possible change in any of the above key assumptions would cause the carrying amount of these CGU to exceed their recoverable amount.

**51 Financial risk management objectives and policies**

The Company's principal financial liabilities comprise of trade and other payables, borrowings, security deposits and payables for property, plant and equipment. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade and other receivables, cash, fixed deposits and security deposits that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by Finance department that advises on financial risks and the appropriate financial risk governance framework for the Company. The Finance department provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. It is the Company's policy that no trading in derivatives for speculative purposes may be undertaken. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarized below.

**A. Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk. Financial instrument effected by market risk include loans and borrowings, deposits, FVTOCI instrument.

The sensitivity analyses in the following sections relate to the position as at March 31, 2024 and March 31, 2023.

The following assumptions have been made in calculating the sensitivity analysis:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at March 31, 2024 and March 31, 2023 including the effect of hedge accounting.

**i) Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's interest bearing financial liabilities includes borrowings with fixed interest rates.

Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)  
(All amounts are presented in ₹ Lakhs, unless otherwise stated)

The Company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

**ii) Foreign currency risk**

Foreign currency risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Company uses derivative to manage market risks. All such transactions are carried out within the guideline as prescribed in the Company's risk management policy.

The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated. The functional currency for the Company is ₹.

**Foreign currency sensitivity**

The following tables demonstrate the sensitivity to a reasonably possible change in foreign exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives.

The impact on profit/loss before tax is as below:

	Year ended March 31, 2024		Year ended March 31, 2023	
	Strengthening	Weakening	Strengthening	Weakening
USD (1% movement)	(166.18)	166.18	(88.05)	88.05

CZK (1% movement)	(16.74)	16.74	1.49	(1.49)
Other currencies	0.29	(0.29)	(0.01)	0.01

**iii) Equity Price Risk**

The Company's listed and non-listed equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Company manages the equity price risk through diversification and by placing limits on individual and total equity instruments. Reports on the equity portfolio are submitted to the Company's senior management on a regular basis. The Company's Board of Directors reviews and approves all equity investment decisions.

At the reporting date, the exposure to listed equity securities at fair value was ₹ 48.08 Lakhs. A decrease of 10% on the NSE market index could have an impact of approximately ₹ 4.81 Lakhs on the profit or loss. An increase of 10% in the value of the listed securities would also impact profit or loss.

**B. Credit risk**

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks, foreign exchange transactions and other financial instruments.

**Trade receivables**

Customer credit risk is managed by the Company subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating. Outstanding customer receivables are regularly monitored.

An impairment analysis is performed at each reporting date on an individual basis for major clients. In addition, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. The maximum exposure to credit risk at the reporting date is the carrying value of financial assets (trade receivable). The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and operate in largely independent markets.

Further, the Company's customer base majorly includes Original Equipment Manufacturers (OEMs), Large Corporates and Tier-1 vendors of OEMs. Based on the past trend of recoverability of outstanding trade receivables, the Company has not incurred material losses on account of bad debts. Hence, no adjustment has been made on account of Expected Credit Loss (ECL).

Notes to the Standalone Financial Statements for the year ended March 31, 2024 (Contd.)  
(All amounts are presented in ₹ Lakhs, unless otherwise stated)

**C. Liquidity risk**

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Company closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including loans from banks at an optimised cost.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditor on separate financial statements and on the other financial information of the subsidiary, associate the aforesaid consolidated financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs of the Group, its associate as at March 31, 2024, their consolidated profit including other comprehensive income, their consolidated cash flows and the consolidated statement of changes in equity for the year ended on that date.

#### Basis for Opinion

We conducted our audit of the consolidated financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described

in the 'Auditor's Responsibilities for the Audit of the Consolidated Financial Statements' section of our report. We are independent of the Group and its associate in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the financial year ended March 31, 2024. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of audit procedures performed by us and by other auditors of components not audited by us, as reported by them in their audit reports furnished to us by the management, including those procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

## Independent Auditor's Report (Contd.)

Key audit matter	How our audit addressed the key audit matter
<b>Estimation of accrual of price adjustments related to revenue from sale of goods</b> (as described in Note 28, Note 2.3(k), and Note 51 of the consolidated financial statements)	
Revenue from sale of goods is measured by the Group at the transaction price i.e., amount of consideration received/ receivable in exchange for transferring promised goods or services to the customers. In determining the transaction price for the sale of products, the Group considers the effects of price adjustments to be passed on from the customers on account of variation in material and other costs. These price adjustments are based on agreed terms, negotiations with customers and various commercial considerations, which involves significant judgement and estimates. The accrual of aforesaid price adjustments is disclosed in note 51 to the financial statements. We have considered accrual of price adjustments as a key audit matter as significant judgement involved in such estimation.	<p>Our audit procedures included the following:</p> <ul style="list-style-type: none"> <li>Assessed the accounting policies for revenue recognition including policy for accounting of price adjustments in terms of Ind AS 115.</li> <li>Obtained an understanding of the revenue process and estimation of price adjustments, evaluated the design and implementation of controls relating to accrual of price adjustments and tested the operating effectiveness such controls.</li> <li>Evaluated management's methodology and assumptions used in the estimation of price adjustments as per customer contracts including the relevance and reliability of underlying historical data and developments during the year.</li> <li>Tested completeness and arithmetical accuracy of the data used in the computation of price adjustments.</li> <li>Tested, on a sample basis, debit notes/ credit notes issued, and payments made/ received as per customer contracts/ agreed price negotiations.</li> <li>Performed analytical procedures to identify any unusual trends and identify unusual items for further testing.</li> <li>Assessed adequacy of disclosures in the financial statements</li> </ul>

**Other Information**

The Holding Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the consolidated financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**Responsibilities of Management for the Consolidated Financial Statements**

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in terms of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance including

other comprehensive income, consolidated cash flows and consolidated statement of changes in equity of the Group including its associate in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. The respective Board of Directors of the companies included in the Group and of its associate are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of Group and its associate and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associate are responsible for assessing

## Independent Auditor's Report (Contd.)

the ability of their respective companies to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those respective Board of Directors of the companies included in the Group and of its associate are also responsible for overseeing the financial reporting process of the Group and its associate.

### **Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based

on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its associate to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and its associate to cease to continue as a going concern.

- Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its associate of which we are the independent auditors and whose financial information we have audited, to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the financial year ended March 31, 2024, and are therefore the key audit matters. We describe these matters

## Independent Auditor's Report (Contd.)

in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Other Matter

- (a) We did not audit the financial statements and other financial information, in respect of one subsidiary, whose financial statements include total assets of ₹ 3,100.96 lakhs as at March 31, 2024, and total revenues of ₹ 3,042.48 lakhs and net cash inflows of ₹ 14.89 lakhs for the year ended on that date. These financial statement and other financial information have been audited by other auditor, which financial statements, other financial information and auditor's report have been furnished to us by the management.
- (b) The consolidated financial statements also include the Group's share of net profit of ₹ 5,811.63 lakhs for the year ended March 31, 2024, as considered in the consolidated financial statements, in respect of one associate whose financial statements, other financial information have been audited by other auditor and whose reports have been furnished to us by the Management.
- (c) Our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of the subsidiary and associate, and our report in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiary and associate, is based solely on the reports of such other auditors.

One subsidiary is located outside India whose financial statements and other financial information have been prepared in accordance with accounting principles generally accepted in the respective country and which have been audited by other auditor under generally accepted auditing standards applicable in the respective country. The Holding Company's management has converted the financial statements of such subsidiary located outside India from accounting principles generally accepted in the respective country to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Holding Company's management. Our opinion in so far as it relates to the balances and affairs of such subsidiary located outside India is based on the report of other auditor and the conversion adjustments prepared by the management of the Holding Company and audited by us.

Our opinion above on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with

respect to our reliance on the work done and the reports of the other auditors and the financial statements and other financial information certified by the Management.

### Report on Other Legal and Regulatory Requirements

## **Annexure ‘2’** to the independent auditor’s report of even date on the consolidated financial statements of Lumax Industries Limited

### **Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)**

In conjunction with our audit of the consolidated Ind AS financial statements of Lumax Industries Limited (hereinafter referred to as the “Holding Company”) as of and for the year ended 31 March 2024, we have audited the internal financial controls with reference to consolidated financial statements of (the Holding Company, subsidiary together referred to as “the Group”) and associate as of March 31, 2024.

### **Management’s Responsibility for Internal Financial Controls**

The respective Board of directors of the Companies included in the Group and its associate which are

companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (“ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the group and its associate policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### **Auditor’s Responsibility**

Our responsibility is to express an opinion on the Holding Company’s internal financial controls with reference to these consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these consolidated financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to consolidated financial statements included obtaining an understanding of internal financial controls with reference to these consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

## Annexure '2' to the independent auditor's report of even date on the consolidated financial statements of Lumax Industries Limited (Contd.)

We believe that the audit evidence we have obtained, and audit evidence obtained by the other auditor in terms of their report referred to in the Other Matter paragraph below is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to consolidated financial statements.

### Meaning of Internal Financial Controls with Reference to these Consolidated Financial Statements

A Company's internal financial controls with reference to consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial controls with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls with Reference to Consolidated Financial Statements

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial control with reference to

consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, the group and its associate, which are Company's incorporated in India, have maintained, in all material respects, adequate internal financial controls with reference to consolidated financial statements and such internal financial controls with reference to consolidated financial statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

### Other Matters

Our report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls with reference to consolidated Ind AS financial statements of the Holding Company, in so far as it relates to one associate which is company incorporated in India, is based on the corresponding report of the auditor of associate incorporated in India. Further in case of subsidiary incorporated outside India, report on the adequacy and the operating effectiveness of the internal financial controls over financial reporting is not applicable and accordingly the possible effect of the same on our reporting has not been considered.

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024

### 1. Corporate information

The Consolidated financial statements comprise financial statements of Lumax Industries Limited (the Holding Group), its subsidiary (collectively, the Group) and associate for the year ended March 31, 2024. The Holding Group is a Public Group domiciled in India and is incorporated under the provisions of the Companies Act applicable in India. Its shares are listed on two recognized stock exchanges in India. The registered office of the Group is located 2nd Floor, Harbans Bhawan-II, Commercial Complex, Nangal Raya, New Delhi- 110046.

The Group is principally engaged in the manufacturing of automotive components. Information on the Group's structure is provided in Note 40.

The financial statements were authorized for issue in accordance with a resolution of the directors on May 24, 2024.

### 2. Material accounting policies

This note provided a list of the material accounting policies adopted in the preparation of these Indian Accounting standard (IND AS) financial statements.

These policies have been consistently applied to all the years except where newly issued accounting standard is initially adopted.

#### 2.1 Basis of Preparation

The consolidated financial statements of the Group have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the financial statement.

The consolidated financial statements have been prepared on a historical cost basis, except for the certain financial assets and liabilities which have been measured at fair value or revalued amount (refer accounting policy regarding financial instruments).

The Group has prepared the financial statements on the basis that it will continue to operate as a going concern.

The Financial Statements are presented in Indian Rupees (₹) and all values are rounded to the nearest Lakhs (₹ 00,000), except wherever otherwise stated.

#### 2.2 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Holding Group, its subsidiary and associate as at March 31, 2024. Control is achieved when the Group is exposed, or has rights, to variable

returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- a Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- b Exposure, or rights, to variable returns from its involvement with the investee, and
- c The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- a The contractual arrangement with the other vote holders of the investee
- b Rights arising from other contractual arrangements
- c The Group's voting rights and potential voting rights
- d The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent Group, i.e., year ended on March 31, 2024.

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

### Consolidation procedure:

- (a) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognized in the consolidated financial statements at the acquisition date.
- (b) Offset (eliminate) the carrying amount of the parent's investment in subsidiary and the parent's portion of equity of subsidiary. Business combinations policy explains how to account for any related goodwill.
- (c) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognized in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

### 2.3 Summary of material accounting policies

#### A. Investment in subsidiary and associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The Group's investments in its associate are accounted for using the equity method. Under the equity method, the investment in an associate is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit and loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there

has been a change recognized directly in the equity of the associate, the Group recognizes its share of any changes, when applicable, in the statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

The investment in subsidiary are carried at cost as per Ind AS 27. The Group regardless of the nature of its involvement with an entity (the investee), determines whether it is a parent by assessing whether it controls the investee. The Group controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Thus, the Group controls an investee if and only if it has all the following:

- (a) power over the investee
- (b) exposure, or rights, to variable returns from its involvement with the investee and
- (c) the ability to use its power over the investee to affect the amount of the returns.

The considerations made in determining whether significant influence are similar to those necessary to determine control over the subsidiary.

#### B. Current versus non-current classification

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

##### Assets

An asset is treated as current when it is:

- a) Expected to be realized or intended to be sold or consumed in normal operating cycle
- b) Held primarily for the purpose of trading
- c) Expected to be realized within twelve months after the reporting period, or
- d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

##### Liabilities

A liability is current when:

- (a) It is expected to be settled in normal operating cycle
- (b) It is held primarily for the purpose of trading

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

- (c) It is due to be settled within twelve months after the reporting period, or
- (d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

### **Operating cycle**

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. The Group has identified twelve months as its operating cycle.

## **C. Foreign currencies**

### **Functional and presentational currency**

The Group's financial statements are presented in Indian Rupees (₹) which is also the Group's functional currency.

### **Transactions and balances**

Transactions in foreign currencies are initially recorded by the Group at the functional currency spot rates at the date the transaction first qualifies for recognition. However, for practical reasons, the Group uses average rate if the average approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Exchange differences arising on settlement or translation of monetary items are recognized in statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or profit or loss are also recognized in OCI or profit or loss, respectively).

In determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to

advance consideration, the date of the transaction is the date on which the Group initially recognizes the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of advance consideration.

On consolidation, the assets and liabilities of foreign operations are translated into ₹ at the rate of exchange prevailing at the reporting date and their statements of profit and loss are translated at exchange rates prevailing at the dates of the transactions. For practical reasons, the group uses an average rate to translate income and expense items, if the average rate approximates the exchange rates at the dates of the transactions. The exchange differences arising on translation for consolidation are recognized in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is recognized in profit and loss.

## **D. Property, plant and equipment**

Capital work in progress, property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the property, plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

Items of stores and spares that meet the definition of plant, property and equipment are capitalized at cost and depreciated over their useful life. Otherwise, such items are classified as inventories.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

(calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognized.

**Depreciation on property, plant and equipment**

Depreciation is calculated on a straight-line basis over the estimated useful lives as estimated by the management which is in line with the Schedule II to the Companies Act, 2013. The Group has used the following useful lives to provide depreciation on its property, plant and equipment which is in line with schedule II:

Assets	Useful Lives estimated by the management (in years)
Factory Building	30
Other Building	60
Office equipments	5
Furniture and fixtures	10
Vehicles	5

The management has estimated, supported by independent assessment by professionals, the useful life of the following class of asset, which are higher/different than that indicated in Schedule II.

Assets	Useful Lives estimated by the management (in years)
Plant and equipment	3-21

The residual value of property, plant and equipment is considered at 2%.

Depreciation on additions/ (disposals) is provided on a pro-rata basis i.e. from / (upto) the date on which asset is ready for use/ (disposed of).

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at the end of each financial year and adjusted prospectively, if appropriate. In particular, the Group considers the impact of health, safety and environment legislation in its assessment of expected useful lives and estimated residual values.

**E. Intangible assets****Recognition and measurement**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the statement of profit

and loss in the year in which the expenditure is incurred.

**Amortization and useful lives**

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and amortization method of the intangible asset with a useful finite life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the assets are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another assets, as follows:

Intangible Assets	Estimated Useful Life (Years)
Computer Software	Over the estimated economic useful lives ranging from 3.5 to 4 years

An intangible asset is derecognized upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Gain or loss arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

**Research and development costs**

Research costs are expensed as incurred. Development expenditures on an individual project are recognized as an intangible asset when the Group can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- Its intention to complete and its ability and intention to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete, and the asset is available for use. It is amortized over the period of expected future benefit. Amortization expense is recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. During the period of development, the asset is tested for impairment annually.

### F. Investment Property

Property that is held for long term rental yields or for capital appreciation or for both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction cost and where applicable borrowing costs. Subsequent to initial recognition, investment property are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure is capitalized to assets carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably.

Though the Group measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an external independent valuer applying a valuation model as per Ind AS 113 "Fair value measurement".

Investment property are derecognized either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period of recognition.

Transfer of property from investment property to the property, plant and equipment is made when the property is no longer held for long term rental yields or for capital appreciation or both at carrying amount of the property transferred.

### G. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized

as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

### H. Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-to-use assets representing the right to use the underlying assets.

#### i. Right-to-use assets

The Group recognizes right-to-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-to-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-to-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-to-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets as follows

Leasehold Land-99 years

Solar Panel-15 years

Vehicle-5 years

Building-10-15 years

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-to-use assets are also subject to impairment. Refer to the accounting policies section 'Impairment of non-financial assets'.

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

**ii. Lease Liabilities**

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

**iii. Short-term leases and leases of low-value assets**

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

**Group as a lessor**

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Group to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

**I. Inventories**

Inventories which comprise raw materials, components, work in progress, finished goods, traded goods, moulds and stores and spares are valued at the lower of cost and net realizable value.

The basis of determining costs for various categories of inventories is as follows:

- **Raw materials, components, stores and spares:** Cost of inventories comprises all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted moving average basis.
- **Work-in-progress and finished goods:** Cost includes direct material plus appropriate share of labour, manufacturing overheads based on normal operating capacity. Cost is determined on a weighted moving average basis.
- **Traded goods:** Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on moving weighted average basis.
- **Moulds:** Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

Stores and spares which do not meet the definition of Property, plant and equipment are accounted as inventories.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Scraps are valued at net realizable value.

The net realizable value of work-in-progress is determined with reference to the selling prices of related finished goods. Raw materials and other supplies held for use in production of finished goods are not written down below cost, except in cases where material prices have declined, and it is estimated that the cost of the finished goods will exceed its net realizable value. The comparison of cost and net realizable value is made on an item-by-item basis.

### J. Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units' (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Impairment losses on non-financial asset, including impairment on inventories, are recognized in the statement of profit and loss.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Group extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the Group operates, or for the market in which the asset is used.

An assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Intangible assets with indefinite useful lives are tested for impairment annually at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

The Group assesses where climate risks could have a significant impact, such as the introduction of emission-reduction legislation that may increase manufacturing costs. These risks in relation to climate-related matters are included as key assumptions where they materially impact the measure of recoverable amount. These assumptions have been included in the cash-flow forecasts in assessing value-in-use amounts.

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

**K. Revenue from contracts with customers**

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods before transferring them to the customer.

However, Goods and services tax (GST), is not received by the Group on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

**a) Sale of products including moulds**

Customers obtain control of goods when the goods are delivered to and have been accepted at their premises. However, few customers accept the goods when goods have been dispatched by the Group.

Invoices are generated at that point in time. Invoices are usually payable within 30-120 days. No discounts are usually provided for goods, but few customers may avail cash discount on prompt payment of the goods. Some contracts permit the customer to return an item. Returned goods are exchanged only for new goods – i.e. no cash refunds are offered.

Revenue arising from the sale of goods (including moulds) is recognized when the customer obtains control of the promised asset, i.e. either at the delivery or dispatch of goods (based on the agreed terms of sale with the respective customers), which is the point in time when the customer has the ability to direct the use of the goods and obtain substantially all of the remaining benefits of the goods.

For contracts that allow the customers to avail the cash discount, the Group estimates the value of discount by applying the 'Most likely amount' method and past experience of the Group.

For contracts that permit the customer to return an item, revenue is recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur.

**b) Sale of services**

Revenue from sale of services is recognized in accordance with the terms of contract when the services are rendered and the related costs are incurred.

**c) Contract balances****i) Contract assets**

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognized for the earned consideration that is conditional.

**ii) Trade receivables**

A receivable represents the Group's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section financial instruments – initial recognition and measurement.

**iii) Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Group performs under the contract.

**d) Interest Income**

For all debt instruments measured at amortized cost or at fair value through other comprehensive income, interest income is recorded using the Effective Interest Rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instruments or a shorter period, where appropriate, to the gross carrying amount of

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

the financial asset or to the amortized cost of a financial liability. When calculating the effective interest rate, the Group estimates the expected estimated cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit loss. Interest income is included under the head “other income” in the statement of profit and loss.

Interest income on bank deposits and advances to vendors is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head “other income” in the statement of profit and loss.

### e) Dividend Income

Dividend is recognized when the Group’s right to receive the payment is established, which is generally when shareholders approve the dividend.

### f) Rental Income

Rental income arising from operating leases are accounted for on a straight-line basis over the lease terms and is included under the head “other income” in the statement of profit & loss.

## L. Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all the attached conditions will be complied with. When the grant relates to an expense item, it is recognized as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognized as income in equal amounts over the expected useful life of the related asset.

When the Group receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as government grant. The loan or assistance is initially recognized and measured at fair value and the government grant is measured

as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

## M. Retirement and other employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

The Group operates defined benefit plans for its employees, viz., gratuity. The costs of providing benefits under these plans are determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out for each plan using the projected unit credit method. Actuarial gains and losses for both defined benefit plans are recognized in full in the period in which they occur in the statement of profit and loss.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date. The Group recognizes expected cost of short-term employee benefit as an expense, when an employee renders the related service.

The Group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purpose. Such long term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. The Group presents the leave as a current liability in the balance sheet to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where the Group

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognized in profit or loss on the earlier of:

- a) The date of the plan amendment or curtailment, and
- b) The date that the Group recognizes related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognizes the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- a) Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- b) Net interest expense or income

## N. Provisions

### General

A provision is recognized when the Group has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

### Onerous contracts

If the Group has a contract that is onerous, the present obligation under the contract is recognized

and measured as a provision. However, before a separate provision for an onerous contract is established, the Group recognizes any impairment loss that has occurred on assets dedicated to that contract.

An onerous contract is a contract under which the unavoidable costs (i.e., the costs that the Group cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it. The cost of fulfilling a contract comprises the costs that relate directly to the contract (i.e., both incremental costs and an allocation of costs directly related to contract activities).

### Warranty provisions

The Group provides warranties for general repairs of defects that existed at the time of sale, as required by law. Provisions related to these assurance-type warranties are recognized when the product is sold, or the service is provided to the customer. Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

## O. Taxes

### Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in OCI or in equity). Current tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

### Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In assessing the recoverability of deferred tax assets, the Group relies on the same forecast assumptions used elsewhere in the financial statements and in other management reports, which, among other things, reflect the potential impact of climate-related development on the business, such as increased cost of production as a result of measures to reduce carbon emission.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss (either in OCI or in equity). Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

The Group offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

“Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax for the year. The deferred tax asset is recognized for MAT credit available only to the extent that it is probable that the concerned Group will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Group recognizes MAT credit as an asset, it is created by way of credit to the statement of profit and loss and shown as part of deferred tax asset. The Group reviews the “MAT credit entitlement” asset at each reporting date and writes down the asset to the extent that it is no longer probable that it will pay normal tax during the specified period.”

### P. Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

**Q. Earnings per share (EPS)**

Basic EPS amounts are calculated by dividing the profit for the year attributable to the shareholders of the Group by the weighted average number of equity shares outstanding as at the end of reporting period.

Diluted EPS amounts are calculated by dividing the profit attributable to the shareholders of the Group by the weighted average number of equity shares outstanding during the year plus the weighted average number of Equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

**R. Contingent liabilities and contingent assets**

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Group does not recognize a contingent liability but discloses its existence in the financial statements

Contingent assets are only disclosed when it is probable that the economic benefits will flow to the entity.

**S. Dividend**

The Group recognizes a liability to make cash dividend to equity holders of the Group when the distribution is authorized and the distribution is no longer at the discretion of the Group. As per the corporate laws in India, a distribution is authorized when it is approved by the shareholders. A corresponding amount is recognized directly in equity.

**T. Assets held for sale**

The Group classifies non-current assets as held for sale if their carrying amounts will be recovered principally through a sale rather than through

continuing use. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the sale expected within one year from the date of classification.

For these purposes, sale transactions include exchanges of non-current assets for other non-current assets when the exchange has commercial substance. The criteria for held for sale classification is regarded met only when the assets is available for immediate sale in its present condition, subject only to terms that are usual and customary for sales of such assets, its sale is highly probable; and it will genuinely be sold, not abandoned. The Group treats sale of the asset to be highly probable when:

- The appropriate level of management is committed to a plan to sell the asset,
- An active programme to locate a buyer and complete the plan has been initiated,
- The asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value,
- The sale is expected to qualify for recognition as a completed sale within one year from the date of classification, and
- Actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Non-current assets held for sale to owners and disposal groups are measured at the lower of their carrying amount and the fair value less costs to sell. Assets and liabilities classified as held for sale are presented separately in the balance sheet.

Property, plant and equipment and intangible assets once classified as held for sale to owners are not depreciated or amortized.

**U. Fair value measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability, or
- (b) In the absence of a principal market, in the most advantageous market for the asset or liability

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's management determines the policies and procedures for both recurring fair value measurement, such as derivative instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for distribution in discontinued operations.

External valuers are involved for valuation of significant assets and significant liabilities, if any.

At each reporting date, the management analyses the movements in the values of assets and liabilities

which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents, if any.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Quantitative disclosure of fair value measurement hierarchy
- Investment property
- Financial instruments (including those carried at amortized cost).

### V. Financial instruments

A financial instrument is a contract that gives rise to a financial asset for one entity and a financial liability or equity instrument for another entity.

#### Financial Assets

##### *Initial recognition and measurement*

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under Ind AS 115. Refer to the accounting policies in section 'Revenue from contracts with customers'.

In order for a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortized cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

### Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortized cost.
- Debt instruments at fair value through other comprehensive income (FVTOCI).
- Debt instruments, derivatives and equity instruments at fair value through profit and loss (FVTPL).
- Equity instruments measured at fair value through other comprehensive income (FVTOCI).

### Debt instruments at amortized cost

A financial assets is measured at the amortized cost if both the following conditions are met

- (i) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows and
- (ii) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding

After initial measurement, such financial assets are subsequently measured at amortized cost using the

EIR method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The accretion of EIR is recorded as an income or expense in statement of profit and loss. The losses arising from impairment are recognized in the statement of profit and loss. This category generally applies to trade and other receivables.

### Debt instruments at fair value through OCI (FVTOCI)

A 'financial asset' is classified as at the FVTOCI if both of the following criteria are met:

- a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b) The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. For debt instruments, at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the profit or loss and computed in the same manner as for financial assets measured at amortized cost. The remaining fair value changes are recognized in OCI. Upon derecognition, the cumulative fair value changes recognized in OCI is reclassified from the equity to profit or loss.

### Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the balance sheet at fair value with net changes in fair value recognized in the statement of profit and loss.

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognized in the statement of profit and loss when the right of payment has been established.

### Equity instruments at fair value through OCI (FVTOCI)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under Ind AS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

Equity instruments which are held for trading and contingent consideration recognized by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the statement of profit and loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Group elected to classify irrevocably its non-listed equity investments under this category.

### De-recognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognized (i.e. removed from the Group's Balance Sheet) when:

- (i) The contractual rights to receive cash flows from the asset has expired, or
- (ii) The Group has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the

asset and the maximum amount of consideration that the Group could be required to repay.

### Financial Liabilities

#### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, lease liabilities, loans and borrowings etc.

#### Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at amortized cost
- Financial liabilities at fair value through profit and loss (FVTPL)

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ losses are not subsequently transferred to P&L. However, the Group may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognized in the statement of profit and loss. The Group has not designated any financial

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

liability as at fair value through profit or loss.

#### **Financial liabilities at Amortized cost**

##### **Loans and borrowings**

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in the profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss. This category generally applies to borrowings.

##### **De-recognition**

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

##### **Offsetting of financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

##### **Reclassification of financial assets**

The Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Group senior management determines change in the business model as a result of external or internal changes which are significant to the Group's operations. Such changes are evident to external parties. A change in the business model occurs when the Group either begins or ceases to perform an activity that is

significant to its operations. If the Group reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Group does not restate any previously recognized gains, losses (including impairment gains or losses) or interest.

#### **W. Impairment of financial assets**

In accordance with Ind AS 109, the Group applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

Financial assets that are debt instruments, and are initially measured at fair value with subsequent measurement at amortized cost e.g., trade and other receivables, security deposits, loan to employees, etc.

The Group follows 'simplified approach' for recognition of impairment loss allowance for trade receivables.

The application of simplified approach does not require the Group to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original effective interest rate.

As a practical expedient, the Group uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historically observed default rates are updated and changes in the forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as an expense in the statement of profit and loss.

#### **X. Business Combination and Goodwill**

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination,

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organized workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

At the acquisition date, the identifiable assets acquired, and the liabilities assumed are recognized at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- Deferred tax assets or liabilities, and the liabilities or assets related to employee benefit arrangements are recognized and measured in accordance with Ind AS 12 Income Tax and Ind AS 19 Employee Benefits respectively.
- Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12.
- Liabilities or equity instruments related to share based payment arrangements of the acquiree or share – based payments arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with Ind AS 102 Share-based Payments at the acquisition date.
- Assets (or disposal groups) that are classified as held for sale in accordance with Ind AS 105 Non-current Assets Held for Sale and Discontinued Operations are measured in

accordance with that Standard.

- Reacquired rights are measured at a value determined on the basis of the remaining contractual term of the related contract. Such valuation does not consider potential renewal of the reacquired right.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognized in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognized at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 Financial Instruments, is measured at fair value with changes in fair value recognized in profit or loss in accordance with Ind AS 109. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS and shall be recognized in profit or loss. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

recognizes the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognized in profit or loss. An impairment loss recognized for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete.

Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

### 3. New and amended standards

The Ministry of Corporate Affairs has notified Companies (Indian Accounting Standard) Amendment Rules 2023 dated March 23, 2023, to amend the following Ind AS which are effective from April 01, 2023:

#### (i) Definition of Accounting Estimates - Amendments to Ind AS 8

The amendments clarify the distinction between changes in accounting estimates, changes in accounting policies and the correction of errors. It has also been clarified how entities use measurement techniques and inputs to develop accounting estimates.

The amendments had no impact on the Group's consolidated financial statements.

#### (ii) Disclosure of Accounting Policies - Amendments to Ind AS 1

The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

The amendments have had an impact on the Group's disclosures of accounting policies, but not on the measurement, recognition or presentation of any items in the Group's financial statements.

#### (iii) Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to Ind AS 12

The amendments narrow the scope of the initial recognition exception under Ind AS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences such as leases.

The Group previously recognized for deferred tax on leases on a net basis. As a result of these amendments, the Group has recognized a separate deferred tax asset in relation to its lease liabilities and a deferred tax liability in relation to its right-of-use assets. Since, these balances qualify for offset as per the requirements of paragraph 74 of Ind AS 12, there is no impact in the balance sheet. There was also no impact on the opening retained earnings as at April 01, 2022.

**19.1 Nature and purpose of reserves**

**a) Securities premium**

Securities premium is used to record the premium on issue of shares. The reserve can be utilized only for limited purposes in accordance with the provisions of the Companies Act, 2013.

**b) General reserve**

Under the erstwhile Companies Act 1956, general reserve was created through an annual transfer of net income at a specified percentage in accordance with applicable regulations. Consequent to introduction of Companies Act 2013, the requirement to mandatorily transfer a specified percentage of the net profit to general reserve has been withdrawn. However, the amount previously transferred to the general reserve can be utilized only in accordance with the specific requirements of Companies Act, 2013.

**c) Retained Earnings**

Retained earnings are the profits that the Group has earned till date, less any transfers to general reserve, dividends or other distributions paid to shareholders. Retained earnings include re-measurement loss / (gain) on defined benefit plans, net of taxes that will not be reclassified to Statement of Profit and Loss.

**d) Capital reserve**

The reserve will be utilized in accordance with the provisions of the Companies Act, 2013.

**Note:**

The Company has established a comprehensive system on maintenance of information and documents required by the transfer pricing legislation under section 92-92F of the Income Tax Act, 1961. Since the law requires existence of such information and documentation to be contemporaneous in nature, the Company is in the process of updating the documentation for transactions entered into with the associated enterprises during the financial year and expects such records to be in existence latest by the due date as required under law. The Management is of the opinion that its transactions are at arm's length so that the aforesaid legislation will not have any impact on the financial statements particularly on the amount of income tax expense and that of provision of taxation.

Above amount is inclusive of GST wherever applicable.

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

(All amounts are presented in ₹ Lakhs, unless otherwise stated)

### 44 Event after the reporting date

The Board of Directors of the Holding Company has proposed dividend @ 350% i.e. ₹ 35 per equity share of face value of ₹ 10 each (March 31, 2023 @ 270% i.e. ₹ 27 per equity share of face value of ₹ 10 each) which is subject to shareholder's approval in forthcoming annual general meeting.

### 45 Significant accounting judgements, estimates and assumptions

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

#### (i) Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements:

##### a) Operating lease commitments – Group as lessor

The Group has entered into commercial property leases on its investment property portfolio. The Group has determined, based on an valuation of the terms and conditions of the arrangements, such as the lease term not constituting a substantial portion of the economic life of the commercial property, and that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

##### b) Assessment of lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

##### c) Revenue from contracts with customers

The Group applied the following judgments that significantly affect the determination of the amount and timing of revenue from contracts with customers:

- Determining method to estimate variable consideration and assessing the constraint

Certain contracts for the sale of products include a right of price revision on account of change of commodity prices/purchase price that give rise to variable consideration. In estimating the variable consideration, the Group is required to use either the expected value method or the most likely amount method based on which method better predicts the amount of consideration to which it will be entitled.

#### (ii) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

##### a) Property, plant and equipment

The useful lives and residual values of property, plant and equipment are determined by the management based on technical assessment by the management. The Group believes that the derived useful life best represents the period over which the Group expects to use these assets.

##### b) Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the wide range of business relationships and the longterm nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded.

Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)  
(All amounts are presented in ₹ Lakhs, unless otherwise stated)

The Group establishes provisions, based on reasonable estimates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective domicile of the companies.

**c) Gratuity benefit**

The cost of defined benefit plans (i.e. Gratuity benefit) is determined using actuarial valuations. An actuarial valuation involves making various assumptions which may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. In determining the appropriate discount rate, management considers the interest rates of long term government bonds with extrapolated maturity corresponding to the expected duration of the defined benefit obligation. The mortality rate is based on publicly available mortality tables for the specific countries. Future salary increases and pension increases are based on expected future inflation rates for the respective countries. Further details about the assumptions used, including a sensitivity analysis, are given in Note 41.

**d) Fair value measurement of financial instrument**

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

**e) Impairment of financial assets**

The impairment provisions of financial assets are based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

**f) Impairment of non-financial assets**

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use.

The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are also relevant to other intangibles. During the year the Group has done the impairment assessment of non-financial assets and have concluded that there is no impairment in value of non-financial assets as appearing in the financial statements.

**g) Lease incremental borrowing rate**

The Group cannot readily determine the interest rate implicit in the lease, therefore its incremental borrowing rate (IBR) to measure lease liability. The IBR is the rate of interest that the Group would have to pay to borrow over similar term, and with a similar security, the fund necessary to obtain an asset of a similar value to the Right-to-use assets in as similar economic environments. The IBR therefore effects what the Group "would have to pay" which requires estimates when no observable rates are available or when they need to be adjusted to reflect the term and conditions of the lease. The Group estimates the IBR using observable inputs such as market interest rates when available.

#### 46 Capital Management

For the purpose of the Group's capital management, capital includes issued equity capital, all equity reserves attributable to the equity holders of the Group. The primary objective of the Group's capital management is to maximise the shareholders' value.

The Group manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants, if any. To maintain or adjust the capital structure, the Group reviews the fund management at regular intervals and take necessary actions to maintain the requisite capital structure. No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2024 and March 31, 2023.

**Discount rate used in determining fair value**

The interest rate used to discount estimated future cash flows, where applicable, are based on the incremental borrowing rate of borrower which in case of financial liabilities is average market cost of borrowings of the Group and in case of financial asset is the average market rate of similar credit rated instrument. The Group maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

**48 Fair value hierarchy**

All financial instruments for which fair value is recognized or disclosed are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: Valuation techniques for which the lowest level input that has a significant effect on the fair value measurement are observable, either directly or indirectly.

Level 3: Valuation techniques for which the lowest level input which has a significant effect on the fair value measurement is not based on observable market data.

The following table provides the fair value measurement hierarchy of the Group's assets and liabilities.

49 On April 01, 2019, the Holding Company purchased certain assets from Lumax Auto Technologies Limited at a consideration of ₹ 2,245.41 Lakhs, pursuant to which, the Company has setup in-house Electronic facility at Manesar on April 01, 2019 for designing and manufacturing of Electronics Printed Circuit Boards Assembly ('PCB'). The said acquisition was primarily done to optimize cost by indigenization of Printed Circuit Board ('PCB'). The abovementioned purchase of assets has been accounted as Business Combination in accordance with Ind AS 103.

The fair values of assets (i.e. Property, plant and equipment and other intangible assets) acquired amounts to ₹ 1,267.83 Lakhs. Further, Goodwill arising from the acquisition amounts to ₹ 977.58 Lakhs which is attributable to synergies expected to be achieved from integrating PCB into the Company's existing business.

For the purpose of impairment testing, Goodwill is allocated to the Holding Company as a whole since the performance of the Holding Company is monitored at that level for internal management purposes. The recoverable amount of the CGU was based on its value in use and was determined by discounting the future cash flows to be generated from the continuing use

## Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)

(All amounts are presented in ₹ Lakhs, unless otherwise stated)

of the CGU. These calculations use cash flow projections over a period of five years, based on next year financial budgets estimated by management, with extrapolation for the remaining period, and an average of the range of assumptions as mentioned below.

The key assumptions used in the estimation of value in use were as follows:

	March 31, 2024	March 31, 2023
Terminal value growth rate	3%	3%
EBITDA growth rate	15.00%-41.00%	15.00%-17.00%
Discount rate	17.00%	17.00%

\*EBITDA growth rate in 2024-25 is 41% which is higher than normal rate ie 15%, due to New Chakan plant operational for 12 months in 2024-25.

The cash flow projections included specific estimates for five years and a terminal growth rate thereafter. The terminal growth rate and EBITDA margins were determined based on management's estimate. Budgeted EBITDA margin was based on expectations of future outcomes taking into account past experience. The estimation of value in use reflects numerous assumptions that are subject to various risks and uncertainties, including key assumptions regarding expected growth rates and operating margin, expected length and the shape and timing of the subsequent recovery, as well as other key assumptions with respect to matters outside of the Group's control. It requires significant judgments and estimates, and actual results could be materially different than the judgments and estimates used to estimate value in use.

The Group has used the discount rate which is based on the Weighted Average Cost of Capital (WACC) of comparable market participant, adjusted for specific risks. These estimates are likely to differ from future actual results of operations and cash flows. Based on the above, no impairment was identified as at March 31, 2024 and March 31, 2023 as the recoverable value of the CGU exceeded the carrying value. No reasonably possible change in any of the above key assumptions would cause the carrying amount of these CGU to exceed their recoverable amount.

### 50 Financial risk management objectives and policies

The Group principal financial liabilities comprise of trade and other payables, borrowings, security deposits and payables for property, plant and equipment. The main purpose of these financial liabilities is to finance the Company's operations. The Group's principal financial assets include trade and other receivables, cash, fixed deposits and security deposits that derive directly from its operations.

The Group is exposed to market risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Group's senior management is supported by Finance department that advises on financial risks and the appropriate financial risk governance framework for the Company. The Finance department provides assurance to the Group's senior management that the Group's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Group's policies and risk objectives. It is the Group's policy that no trading in derivatives for speculative purposes may be undertaken. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

#### A. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk. Financial instrument effected by market risk include loans and borrowings, deposits, FVTOCI instrument.

The sensitivity analyses in the following sections relate to the position as at March 31, 2024 and March 31, 2023.

The following assumptions have been made in calculating the sensitivity analysis:

The sensitivity of the relevant profit or loss item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at March 31, 2024 and March 31, 2023 including the effect of hedge accounting.

##### i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's interest bearing financial liabilities includes borrowings with fixed interest rates.

Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)  
(All amounts are presented in ₹ Lakhs, unless otherwise stated)

The Group's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

**ii) Foreign currency risk**

Foreign currency risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Group uses derivative to manage market risks. All such transactions are carried out within the guideline as prescribed in the Group's risk management policy.

The Group is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated. The functional currency for the Company is INR.

**Foreign currency sensitivity**

The following tables demonstrate the sensitivity to a reasonably possible change in foreign exchange rates, with all other variables held constant. The impact on the Group's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives.

Notes to the Consolidated Financial Statements for the year ended March 31, 2024 (Contd.)  
(All amounts are presented in ₹ Lakhs, unless otherwise stated)

### iii) Equity Price Risk

The Group's listed and non-listed equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Group manages the equity price risk through diversification and by placing limits on individual and total equity instruments. Reports on the equity portfolio are submitted to the Group's senior management on a regular basis. The Group's Board of Directors reviews and approves all equity investment decisions.

At the reporting date, the exposure to listed equity securities at fair value was ₹ 48.08 Lakhs. A decrease of 10% on the NSE market index could have an impact of approximately ₹ 4.81 Lakhs on the profit or loss. An increase of 10% in the value of the listed securities would also impact profit or loss.

### B. Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks, foreign exchange transactions and other financial instruments.

#### Trade receivables

Customer credit risk is managed by the Company subject to the Group's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating. Outstanding customer receivables are regularly monitored.

An impairment analysis is performed at each reporting date on an individual basis for major clients. In addition, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. The maximum exposure to credit risk at the reporting date is the carrying value of financial assets (trade receivable). The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and operate in largely independent markets.

Further, the Group's customer base majorly includes Original Equipment Manufacturers (OEMs), Large Corporates and Tier-1 vendors of OEMs. Based on the past trend of recoverability of outstanding trade receivables, the Group has not incurred material losses on account of bad debts. Hence, no adjustment has been made on account of Expected Credit Loss (ECL).

### C. Liquidity risk

Liquidity risk is the risk that the Group may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Group's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Group closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including loans from banks at an optimised cost.

The table below summarises the maturity profile of the Group financial liabilities based on contractual undiscounted payments:

### **Item No. 10**

The Company is engaged in manufacturing of automotive lighting products. The annual consolidated turnover of the

Company for the year ended March 31, 2024 was ₹ 2,636.59 Crore.

As a part of its business activities, the Company has entered into / will enter into transactions / contracts / agreements / arrangements with its related parties in terms of Regulation 2(1)(zc)(i) of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations"). All transactions with such related parties of the Company are / will be at arm's length and in the ordinary course of business.

The Company has a well-defined governance process for the related party transactions undertaken by it. These transactions are independently reviewed by a firm of Chartered Accountants for arms' length consideration and compared with the benchmarks available for similar type of transactions and these analyses are presented to the Audit Committee on quarterly basis.

Further, all related party transactions are undertaken after obtaining approval of the Audit Committee. Presently 2/3rd of the members of the Audit Committee of the Company comprises of independent directors and as required by Listing Regulations, the non-independent members of the Audit Committee do not participate in the discussions on the item with respect to approval of related party transactions. All related party transactions are unanimously approved by the Audit Committee after satisfying itself that the related party transactions are at arms' length and in the ordinary course of business. The Audit Committee of the Company reviews on a quarterly basis, the details of all related party transactions entered into by the Company during the previous quarter, pursuant to its approvals.

Regulation 23 of the Listing Regulations provides that shareholders' approval should be obtained for the related party transactions which in a financial year, exceed the lower of (i) ₹ 1,000 Crore; or (ii) 10% of the annual consolidated turnover of the listed entity as per the last audited financial statements of the listed entity.

Lumax Auto Technologies Limited ("LATL") is a 'Related Party' within the meaning of Section 2(76) of the Companies Act, 2013 and Regulation 23 of the Listing Regulations and the Company has entered into certain transactions for purchase/sale of raw materials, finished goods, availing / rendering of services etc. and further proposes to undertake transactions as to sale, purchase, transfer or receipt of products, goods, materials, components, consumables, capital goods, assets or availing or rendering of services, Rent/Leasing Transactions & Rent Deposits, Reimbursement of Expenses, Royalty etc.

Lumax Ancillary Limited (LAL) is another Related Party within the meaning of Section 2(76) of the Act and Regulation 23 of the Listing Regulations and the Company has entered

## Notes for AGM Notice: (Contd.)

into certain transactions for purchase/sale of raw materials, finished goods, availing/rendering of services etc. and further proposes to undertake transactions as to sale, purchase, transfer or receipt of products, goods, materials, components, consumables, capital goods, assets or availing or rendering of services, rent/leasing transactions etc.

The members may further note that a Scheme for merger of LAL with LATL has already been filed with the Hon'ble National Company Law Board (NCLT) and the appointed date for the said merger is April 01, 2024. It is expected that the said scheme will be approved by the Hon'ble NCLT on or before

March 31, 2025 and in that event no separate financials of LAL will be made for the financial year 2024-25, hence the transactions of the Company with LAL will also be considered as transactions with LATL for the financial year 2024-25.

The Company has already obtained the omnibus approval from the Audit Committee for the transactions with LATL and LAL for an amount of upto ₹ 400 Crores and ₹ 221.40 Crores, respectively for the Financial Year 2024-25. Accordingly, your approval is being sought for a consolidated amount of ₹ 625 Crores.

## Notes for AGM Notice: (Contd.)

### COMMUNICATION ON TAX DEDUCTION AT SOURCE (TDS) ON DIVIDEND DISTRIBUTION

Members may note that the Income-tax Act, 1961, ("the IT Act") as amended by the Finance Act, 2020, mandates that Dividend paid or distributed by a company after April 01, 2020 shall be taxable in the hands of members. The Company shall therefore be required to deduct tax at source ("TDS") at the time of making the payment of dividend. In order to enable us to determine the appropriate TDS rate as applicable, members are requested to submit relevant documents, as specified in the below paragraphs, in accordance with the provisions of the IT Act.

**For resident shareholders,** taxes shall be deducted at source under Section 194 of the IT Act as follows:

- Members having valid Permanent Account Number ("PAN"): 10% or as notified by the Government of India if he is not a specified person to be checked by Company based on Valid PAN provided by the member
- Members not having PAN / valid PAN: 20% or as notified by the Government of India
- Further the Finance Act, 2021 inserted section 206AB in the Income-tax Act 1961 (hereinafter referred to as "the Act") which takes effect from 1st day of July, 2021
- This section mandate tax deduction at higher rate in case of certain non-filers (specified persons) with respect to tax deductions twice the prescribed rate or 5%, whichever is higher. Specified person means a person who satisfies both the following conditions:
  - (i) he/she has not furnished the return of income for the assessment year relevant to the previous year immediately preceding the financial year in which tax is required to be deducted/collected. The previous year to be counted is required to be the one whose return filing date under sub-section (l) of section 139 has expired.
  - (ii) Aggregate of tax deducted at source and tax collected at source is rupees fifty thousand or more in said immediate previous year.

However, no tax shall be deducted on the dividend payable to a resident individual if the total dividend paid by the Company during the financial year 2024-25 does not exceed ₹ 5,000 and also in cases where members provide Form 15G / Form 15H (Form 15H is applicable to individuals aged 60 years or more) subject to conditions specified in the IT Act. Resident shareholders may also submit any other document as prescribed under the IT Act to claim a lower / nil withholding tax. PAN is mandatory for members providing Form 15G / 15H or any other document as mentioned above.

**For non-resident shareholders,** taxes are required to be withheld in accordance with the provisions of Section 195 and other applicable sections of the IT Act, at the rates in force. The withholding tax shall be at the rate of 20% (plus applicable surcharge and cess) or as notified by the Government of India on the amount of dividend payable. However, as per Section 90 of the IT Act, non-resident shareholders have the option to be governed by the provisions of the Double Tax Avoidance Agreement ("DTAA"), read with Multilateral Instrument ("MLI") between India and the country of tax residence of the member, if they are more beneficial to them. For this purpose, i.e. to avail the benefits under the DTAA read with MLI, non-resident shareholders will have to provide the following:

- Copy of the PAN card allotted by the Indian income tax authorities duly attested by the member or details as prescribed under rule 37BC of Income-tax Rules, 1962
- Copy of Tax Residency Certificate (TRC) for financial year 2024-25 obtained from the revenue authorities of the country of tax residence, duly attested by member
- Form 10F filed electronically on the Indian Income Tax web portal pursuant to Notification no. 03/2022 dated July 16, 2022 and a subsequent notification dated December 12, 2022 issued by the Central Board of Direct Taxes (CBDT), as required under the Income-tax Act, 1961
- Self-declaration by the member of having no permanent establishment in India in accordance with the applicable tax treaty
- Self-declaration of beneficial ownership by the non-resident shareholder
- Any other documents as prescribed under the IT Act for lower withholding of taxes if applicable, duly attested by the member

In case of Foreign Institutional Investors / Foreign Portfolio Investors, tax will be deducted under Section 196D of the IT Act @ 20% (plus applicable surcharge and cess) or the rate provided in relevant DTAA, read with MLI, whichever is more beneficial, subject to the submission of the above documents.
