Management commentary

Rajesh Khakhar
Chairperson and Whole-Time Director

"We are pleased to see such an amazing response to our IPO. We thank all the shareholders for reposing their faith in us. We welcome our new shareholders & congratulate all stakeholders for the successful listing.

Q3FY25 ended on a strong note, achieving revenues of INR 617 Mn with a YoY growth of 29%. The company saw healthy double-digit growth across all business segments, with Aligners leading the pack, followed by Laboratory and other businesses. The adjusted EBITDA (including profit share of kids-e-Dental LLP) stood at INR 108 Mn while PAT stood at INR 48 Mn. We are expecting to close the current financial year with revenue of around INR 2,400 Mn with PAT margin of 13% to 15%..

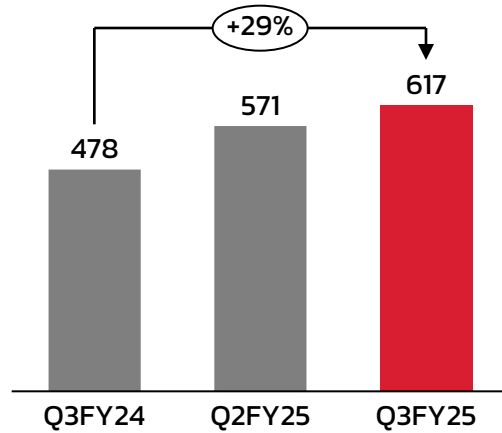

From an industry perspective, there are several tailwinds, including growing awareness of oral healthcare, cosmetic dental procedures, and under-penetration of dental care, backed by technological advancements, that are expected to drive growth over a long-term period. Further, these industry tailwinds will be complemented by increasing outsourcing trends from global players, thereby putting us on a strong footing.

Today, Laxmi Dental has established a leadership position in this space with a comprehensive portfolio of products catering to overall dental care requirements. This enables us to capture a large pie of this sizeable and growing market by deepening our existing dental network as well as adding new customers in various geographies. Over the next 3-5 years we expect to continue on this trajectory and grow at CAGR of 20 to 25%."

Increased adoption of digital dentistry enabling reduced turnaround time and costs

Increasing usage of Intraoral Scanners (IOS):

Advantages of digital impressions over analog:

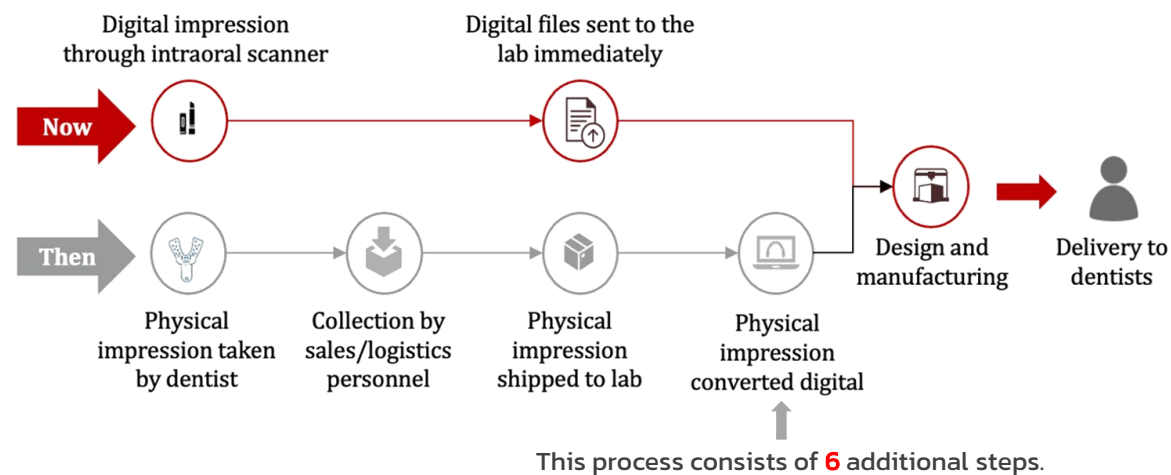

- ✓ Requires less than a minute of dentist's time
- ✓ Saves logistic costs
- ✓ Reduces turnaround time and remake rate by 50%

Laxmi Dental has employed more than 160 intraoral scanners in India

- ✓ Launched iScanPro, branded intraoral scanners for Dental Network to optimize workflow
- ✓ Digital impressions are instantly transmitted to dental laboratory

Digital impressions eliminates one way logistics and reduces redundant steps, ensuring quick turnover

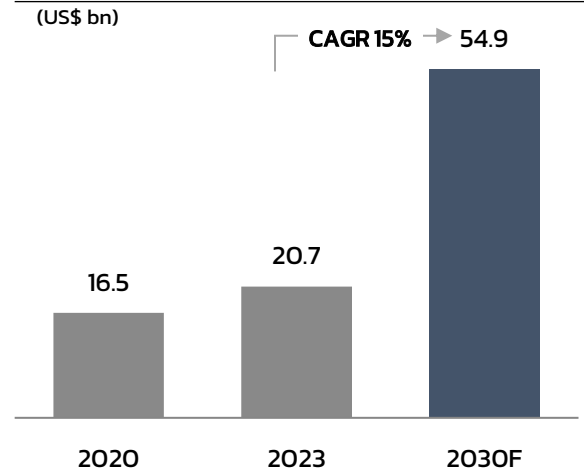

Laxmi Dental's digital units penetration¹

Key growth drivers for adoption of clear aligners in India

1. Prevalence of malocclusion in India is higher than the US (75% vs. 67%)
2. Penetration of orthodontic and the clear aligner treatment is very low in India compared to the US (<15% vs. 30%)
3. Growing emphasis of dental aesthetics
4. Rising disposable income & propensity to spend
5. Huge pool of general dentists (3 lakh) catering to Orthodontic needs (7,700)
6. Increased utilization of intraoral scanners
