--	--

Dear Sir / Madam,

Re: Bank of Baroda – Credit Rating - Disclosure under Regulation 30 of SEBI (LODR), 2015.

We advise that India Ratings has released rating on Bank's Basel III Tier 2 Bonds as “IND AAA / Stable” and affirms all existing ratings. Please find enclosed press release published by India Ratings in this regard.

We request you to take note of the above pursuant to Regulation 30 of SEBI (LODR) Regulations, 2015 and upload the information on your website.

Yours faithfully,

P K Agarwal
Company Secretary

India Ratings Assigns Bank of Baroda's Basel III Tier 2 Bonds 'IND AAA'/Stable; Affirms Existing Ratings

Nov 08, 2024 | Public Sector Bank

India Ratings and Research (Ind-Ra) has taken the following rating actions on Bank of Baroda (BOB) and its debt instruments:

Details of Instruments

Instrument Type	ISIN	Date of Issuance	Coupon Rate (%)	Maturity Date	Size of Issue (billion)	Rating assigned along with Outlook/Watch	Rating Action
Long-Term Issuer Rating	-	-	-	-	-	IND AAA/Stable	Affirmed
Certificate of deposits (CDs)	-	-	-	1-365 days	INR600	IND A1+	Affirmed
Basel III Tier 2 bond#	-	-	-	-	INR85.43	IND AAA/Stable	Affirmed
Basel III Tier 2 bond#	-	-	-	-	INR35.00	IND AAA/Stable	Assigned
Basel III additional tier-1(AT1) bonds#	-	-	-	-	INR110	IND AA+/Stable	Affirmed
Infrastructure and Affordable Housing Bonds#	-	-	-	-	INR210	IND AAA/Stable	Affirmed
Fixed deposit	-	-	-	-	-	IND AAA/Stable	Affirmed

#Details in Annexure

Analytical Approach

Ind-Ra continues to take fully consolidate BOB's subsidiaries while arriving at the ratings, because of a similar nature of operations.

Detailed Rationale of the Rating Action

The ratings continue to reflect BOB's high-systemic importance to the government of India (GoI; 63.97% stake as of September 2024), and hence, a high probability of support from the GoI, if required. The ratings also reflect BOB's large franchise with a pan-India and relatively large international presence, strong capitalisation, and superior liquidity and asset quality metrics, which are better than comparable public sector banks (PSBs).

For AT1 instruments, the agency considers the discretionary component, coupon omission risk and the write-down/conversion risk as key parameters to arrive at the rating. The agency recognises the unique going-concern loss

absorption features that these bonds carry and differentiates them from the bank's senior debt, factoring in a higher probability of an ultimate loss for investors in these bonds.

List of Key Rating Drivers

Strengths

- High Systemic Importance - Large Pan-India Franchise
- Strong capital buffers well placed to support near-term credit growth plans
- High provision coverage ratio (PCR) provides comfort
- Stability in operational metrics - key monitorable

Weaknesses

- Decline in low-cost liability franchise at higher end of peer group

Detailed Description of Key Rating Drivers

High Systemic Importance - Large Pan-India Franchise: BOB's systemic importance is reflected by its total deposit and net advances market share of about 6.4% and 6.5% at FYE24, respectively, (FYE23: 6.7% and 6.9%; FY22: 6.5% and 6.7%), making it the third-largest public sector bank (PSB) in terms of deposit and the second largest PSB in terms of net advances. The bank also had a network of about 8,243 branches, 11,033 ATMs and cash recyclers, and a large customer base of about 173 million at FYE24. BOB continues to hold a high systemic importance for the GoI, resulting in a high probability of ordinary and extraordinary support from the GoI, if required.

Strong Capital Buffers Well Placed to Support Near-term Credit Growth Plans: BOB is among the better-capitalised PSBs, with a common equity tier-I (CET-I) ratio of 12.67% in 2QFY25 (FY24: 12.54%, FY23: 12.24%), tier-1 of 14.18% (14.07%,13.99%) and a total capital adequacy ratio of 16.26% (16.31%, 16.24%). The agency believes BOB's current capital buffers, along with its operating profits, the run-rate for which has also improved over the past few quarters, and the ability to raise funds from the equity markets, provide it the adequate leeway to target a credit growth rate of 11%-12% yoy in FY25 and absorb higher-than-expected credit costs.

High PCR Provides Comfort: BOB maintained a PCR of 76.3% in 2QFY25 (FY24: 77.3%; FY23: 77.2%), at the higher end of the PSB peer group (excluding technical write-offs). BOB also carried 100% PCR against its exposures to the National Company Law Tribunal (NCLT)-1 and -2 lists, respectively, and 99% against the overall NCLT exposure at end-2QFY25. Its gross non-performing assets (NPAs) and net NPAs stood at 2.50% and 0.60%, respectively, at end-2QFY25 (FY24: 2.92% and 0.68%, FY23: 3.79% and 0.89%, respectively). The management has guided credit costs of around 0.75% in FY25, higher than 0.61% reported in FY24. The management has further guided that in case of the credit costs trending lower than the management's expectations, the bank is likely to create floating provisions, which are likely to be utilised when the movement to the expected credit loss model comes into play, subject to regulatory approvals. With this, the return on assets is likely to be maintained at around 1.1% in FY25 (1HFY25: 1.2%), slightly lower than return of assets of 1.17% in FY24 (FY23: 1.03%, FY22: 0.60%). The agency believes while the quantum of special mention accounts (SMA; SMA1 and SMA2; outstanding of INR50 million and higher) remains subdued, slippages from the COVID-19 restructuring pool and micro, small and medium enterprises are likely to result in continuing slippages.

The incremental addition to the portfolio continues to be in better-rated categories with the share of standard domestic advances with a rating of 'A' and above with outstanding above INR500 million at 92% in 2QFY25 (2QFY24: 89%). However, the agency remains cautious with respect to BOB's significant exposure to the non-banking financial companies (NBFC) sector (13.85% of gross domestic advances) as any regulatory change with respect to a higher provisioning requirement for the exposure to the NBFC sector is also likely to impact the provisioning expectation for BOB. From a rating mix perspective, in 2QFY25, 98.4% of the NBFC portfolio was rated 'A' and above and 68.96% of the portfolio was rated 'AAA'.

Stability in Operational Metrics - Key Monitorable: Directionally, BOB's operating metrics have been improving since its amalgamation with Dena Bank and Vijaya Bank; however, there has been a fair amount of volatility on a quarterly basis, some of which can be attributed to the impact of the COVID-19 pandemic. The profitability over the quarters has been volatile, primarily on account of BOB's provisioning requirements and movement in treasury income. The agency believes BOB's ability to further capitalise on its strategy to increase its retail exposure, improve its low-cost CASA franchise further, maintain a stable margin and strengthen its fee income generation, while increasing digital adoption, will be key to demonstrate a through-the-cycle stable performance.

Decline in Low-cost Liability Franchise at Higher End of Peer Group: The bank's current account and saving account (CASA) deposit ratio declined to 36.99% in 2QFY25 (FY24: 38.76%; FY23: 39.47%). The agency believes competitive intensity among banks will remain high in the near term as banks compete to accrete these low-cost deposits. BOB's domestic current account balances increased 14.9% yoy in 2QFY25 (FY24: 1.7%), with the savings account balances growing 5.7% yoy (6.2%), leading to 7.2% yoy growth in overall domestic deposits. However, with 21.2% yoy growth international deposits, its overall deposits growth stood at 9.1% yoy in 2QFY25 (FY24: 10.2%). Consequently, the cost of deposits increased 20bp yoy to 5.12% in 2QFY25 (FY24: 5.06%). The tightening of liquidity conditions and an uptick in the system credit offtake are likely to result in heightened competition between banks for garnering CASA deposits. Therefore, an improvement in BOB's CASA franchise will be a strong reflection of its sustainable low-cost liability franchise. The bulk deposits (INR30 million and above) accounted for 16.36% of BOB's term deposits in 2QFY25 (2QFY24: 17.42%), indicating its loan growth appetite where it is targeting to grow, at least in line with system credit growth, possibly higher.

Liquidity

Superior: At 1QFY25, BOB maintained an overall funding gap of 6.8% in the cumulative one-year bucket as a percentage of the total assets. As estimated by the agency previously, this gap, which was a result of the weak liquidity position of Vijaya Bank and Dena Bank with large asset funding gaps in the short-term buckets, has been declining progressively. Ind-Ra expects these gaps to minimise further over the next few quarters. BOB maintains 22.4% of its total assets in balances with the RBI and in government securities to meet its short-term funding requirements. BOB also had a comfortable average consolidated liquidity coverage ratio of 123.7 in 2QFY25 (FY24: 120.6%, FY23: 145.78%, FY22: 152.36%), significantly above the regulatory requirement of 100%.

Rating Sensitivities

Positive: Not applicable

Negative: BOB's Basel III Tier 2 bond ratings have been equated to its Long-Term Issuer Rating, which could change if, in Ind-Ra's opinion, there is a change in the Gov's support stance for PSBs or there is material drop in the banks' systemic importance, which could, among other things, reflect in a material decline in BOB's market share or loss of deposit franchise.

The notching of the AT1 bonds could be widened from its anchor ratings if Ind-Ra believes that there is a dilution in the government's support stance towards hybrid instruments of PSBs or any delay in the timeliness of extending this support. This could reflect among other things in capital buffers continuing to be close to the regulatory levels. Ind-Ra also expects that for banks with weaker unsupported profiles, the capital buffers would be higher; if not, it could reflect in wider notching from the Long-Term Issuer Rating. These capital buffers could be important as the banks' ability to service the instrument could be impaired in the event of the bank making losses and/or if the capital levels are lower than the regulatory minimum levels.

Any Other Information

RBI's Regulatory Ban Removed in May 2024: The RBI, in a [press release](#) during October 2023, citing material supervisory concerns regarding lapses in internal audit, has directed BOB to suspend onboarding of new customers through its mobile application, Bob World. Furthermore, as of 3QFY24, around 28% of the fixed deposit/recurring deposits were booked through Bob World, however, transactions through internet banking, tab banking and branch
