# JSW Energy to acquire O2 Power for ₹12,468 cr

FE BUREAU  
New Delhi, December 27

JSW NEO ENERGY, a wholly owned subsidiary of JSW Energy, on Friday signed a definitive agreement to acquire 4.7 gigawatt (GW) from O2 Power for a total enterprise value of ₹12,468 crore.

The transaction entails acquisition of O2 Power Midco Holdings and O2 Energy SG and is subject to approval of the Competition Commission of India (CCI) and other customary approvals standard to a transaction of this size, the company said.

O2 Power is a renewable energy platform with a capacity of 4.7 GW where 2.26 GW will be operational by June 2025. 1.46 GW is currently under construction, and an additional 974 MW are in the pipeline, all scheduled for commissioning by June 2027.

"The platform has a blended average tariff of ₹3.37/KWh with remaining

## POWER PACT

- O2 Power is a renewable energy platform with a capacity of 4.7 GW
- It has a blended average tariff of ₹3.37/KWh with remaining life of ~23 years
- The deal is expected to increase the firm's locked-in generation capacity by 23%, from 20.02 GW to 24.71 GW

life of ~23 years. The capacities are spread across seven resource-rich states of India," the company said.

The acquisition is expected to increase the company's locked-in generation capacity by 23%, from 20.02 GW to 24.71 GW.

"We are thrilled to announce the acquisition of O2 Power's 4.7 GW renewable energy platform which is JSW Energy's largest acquisition since inception. This landmark acquisition strengthens our positioning as a leading player in India's energy sector. These

high-quality assets strengthen our operational footprint across key resource-rich states," said Sharad Mahendra, joint managing director and CEO of JSW Energy.

Commenting on the deal, Parag Sharma, CEO of O2 Power, said, "This marks the beginning of the next phase for O2 Power. We had started with the vision to build a RE platform with a strong portfolio, and have been successful in delivering the targets we had set out with. In the days ahead, as we evolve, it will be our endeavour to continue build-

ing value for all our stakeholders, both external and internal, and ensure that we significantly contribute to India's renewable energy goals."

PWC was the transaction advisor to the company, while Khaitan & Co and Herbert Smith were the legal advisors. KPMG carried out financial and tax due diligence and Wind Guard carried out the technical due diligence.

"The acquisition of O2 Power's renewable energy platform is significantly value accretive to the shareholders of JSW Energy. This is a very attractive acquisition - both from 'Build vs Buy' trade off as well as from a quality and value perspective when compared to all acquisitions in this space over recent times, and is consistent with our long track record of being prudent in capital allocation and focusing on high cash returns projects above our hurdle rate of mid-teen Equity IRR," said Pritesh Vinay, Director (Finance) and CFO of JSW Energy.

# Households spend marginally more on food items in 2023-24

FROM THE FRONT PAGE

CONSEQUENTLY, THE SHARE of non-food items in rural areas' MPCE has declined to 52.96% in 2023-24 from 53.62% in 2022-23; and in urban areas to 60.32% from 60.83%.

Meanwhile, the survey showed that the urban-rural gap in MPCE has declined to 71% in 2022-23 from 84% in 2011-12. It has further come down to 70% in 2023-24 that "confirms sustained momentum of consumption growth in rural areas", the statistics ministry said in a release.

"Increased spending on food items by households is a direct consequence of high food inflation," said Indranil Pan, chief economist, Yes Bank. "But less spending on discretionary items also shows a decline in consumption, partly due to low real-wage growth this year," Pan added.

Former Reserve Bank of India (RBI) governor Shaktikanta Das had stated in the latest MPC minutes that lower inflation will enhance disposable income with households and increase their purchasing power. "Such an approach would support consumption and investment demand," he said.

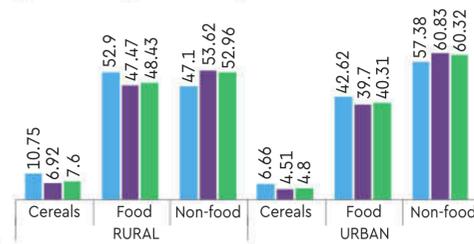

In August 2023-July 2024, the reference period of the HCES 2023-24, food inflation averaged 8.3% against 6% in the same period of last year, whereas CPI inflation during the period averaged 5.1% against 6.1% in August 2022-July 2023.

The survey revealed that, in nominal prices, the average MPCE (without imputation) in 2023-24 increases by about 10% in rural areas to ₹4,247 and 8% in urban areas to ₹7,078 from the level of 2022-23.

The HCES 2023-24 was conducted by the National Statistical Office (NSO) from August

Share of consumption of cereals & food items (in %)  
■ HCES 2011-12 ■ HCES 2022-23 ■ HCES 2023-24

2023 to July 2024. It was followed by the HCES 2022-23, which was conducted after a gap of 11 years.

The HCES 2022-23 is going to be used to constitute the new Consumer Price Index (CPI) series, which is likely to be introduced in February 2026, sources say. The base year of the new CPI series will be updated to 2024 from 2012 at present.

According to sources, the government may reduce the weight of the "food and beverages" group by a little over 5 percentage points (pps) in the new CPI series. In the extant one, the group carries a weight of 45.86%. The weight of Consumer Food Price Index (CFPI), presently 39.06%, is also likely to reduce by a similar degree.

FE had reported in September that according to preliminary analysis, "HCES 2023-24 results are largely similar to the one of 2022-23", citing a senior official.

Sources say the HCES 2023-24 was conducted for two reasons: checking robustness of the methodology adopted to conduct the 2022-23 survey; and ensuring that the previous survey results were not influenced by pent-up demand.

Among the key findings of

HCES 2022-23 was that monthly per capita consumption "more than doubled" in the 11 years to 2022-23 - it grew by roughly 1.5 times from 2011-12. During the period, the urban-rural gap continued to narrow - down 13 percentage points - and food's share in the consumption basket continued to drop (from 53% to 47%). A sharp fall in cereals' share in the consumption basket - from 10.7% to 6.9% in rural India - was also found.

In 2023-24, the consumption inequality, both in rural and urban areas, too, declined from 2022-23. The Gini coefficient has declined to 0.24 in 2023-24 from 0.27 in 2022-23 for rural areas, and to 0.28 from 0.31 for urban areas.

In the case of rural areas, while consumption spending rose 22.1% on year in 2023-24 for the lowest 0-5% of the households, spending of the top 95-100% shrank by 3.5%. In the case of urban areas, consumption spending of the poorest households rose 18.7% on year, while the richest witnessed a 2.5% decline.

The survey showed that "beverages, refreshments and processed food" continue to have the major share in 2023-

24 in the food items basket of the rural and urban households. And "conveyance, clothing, bedding & footwear, miscellaneous goods & entertainment and durable goods" have a major share in non-food expenditure.

The estimates of MPCE of 2023-24 are based on the data collected from 261,953 households (154,357 in rural areas and 107,596 in urban areas) across the country.

Among the states, the MPCE is the highest in Sikkim (rural - ₹9,377 and urban - ₹13,927) and it is the lowest in Chhattisgarh (rural - ₹2,739 and urban - ₹4,927). Among the UTs, MPCE is the highest in Chandigarh (rural - ₹8,857 and urban - ₹13,425), whereas it is the lowest in Dadra and Nagar Haveli and Daman and Diu (₹4,311) and Jammu and Kashmir (₹6,327) in rural and urban areas, respectively.

The rural-urban difference in the average MPCE among the states is the highest in Meghalaya (104%) followed by Jharkhand (83%) and Chhattisgarh (80%), the data showed. Also, the average MPCE in 9 out of 18 major states is higher than the all-India average MPCE in both rural and urban areas, it showed.

# VinFast to make India debut next month

RAGHAV AGGARWAL  
New Delhi, December 27

VIETNAMESE ELECTRONIC VEHICLE manufacturer VinFast will unveil its range of models for the Indian market for the first time next month at the Bharat Mobility Expo 2025.

The website of the event lists the company as one of the exhibitors at the Auto Expo Motor Show 2025 in Bharat Mandapam.

The expo is scheduled to be held between January 17 and 22. This would make VinFast the second all-electric manufacturer to enter the Indian market after BYD.

According to industry

sources, the company is expected to unveil its VF e34, which will compete with Hyundai's Creta and Maruti Suzuki's eVitara. This model is already in sale in the international market.

Other models that are expected to be revealed include VinFast VF7, VinFast VF8, and VinFast VF6.

With this, the company is expected to announce its expansion plans and showroom details.

In January, the company had signed a memorandum of understanding with the Tamil Nadu government to set up a manufacturing facility. The company would bring in completely knocked-down (CKD) parts of the EVs and assemble them at the plant.

The plant's initial capacity is 50,000 units per year, but once completed, it is expected to produce 150,000 units annually. The plant is expected to start production by mid-2025 and also assemble EVs for export.

# Ola Electric CTO, CMO quit

NARAYANAN V  
Chennai, December 27

OLA ELECTRIC'S CHIEF technology officer (CTO), Suvonil Chatterjee, and chief marketing officer (CMO), Anshul Khandelwal, have resigned, delivering another blow to the company that is grappling with declining sales and eroding market share.

Informed sources confirmed their exits and added that the company is in the process of identifying replacements for the two top executives.

Chatterjee, considered a pivotal figure in the company, joined the Ola Group in 2017 as head of design after a stint at Flipkart. In 2021, he transitioned to Ola Electric as chief technology and product officer, overseeing product and software development.

# Hero Moto, Harley-Davidson to develop a new motorcycle

HERO MOTOCORP AND Harley-Davidson will extend their collaboration to include the development and manufacture of a new motorcycle which will be the second product of the joint venture.

Hero MotoCorp, the country's largest two-wheeler maker, joined hands with US-based cruiser maker Harley-Davidson Motor Company in 2020.

The two companies rolled out their first jointly developed product, the X440, in 2023 at ₹2.29 lakh to compete against

the Royal Enfield range of motorcycles.

"The company has extended its partnership with Harley-Davidson Motor Company in order to expand the Harley-Davidson X440 into new variants as well as to develop a new motorcycle," the Delhi-based company informed the stock exchanges on Friday.

The scope of business operations of the agreement involves development of new motorcycles and contract manufacturing. FE BUREAU
