Note:

The above is an extracts of the detailed format of Financial Results filed with the Stock Exchange under Regulation 33 of the SEBI (LODR) Regulations, 2015. The salf result has been reviewed by the Auth Committee and approved by the Board of Directors at their meeting held on 14th February, 2025. The full format of the Quarterly and Nine monthly Financial Results is available on the websites of the Stock Exchange, i.e. www.beshidu.com and on the Company's website www.sheshilpfinfaproprocests.com. The same can be accessed by scarning QR code provided below.

Ajit Jain Chairman & Managing Director

GNFC announces Q3 PAT Rs. 158 crores and 9-Month PAT Rs. 375 crores for the financial year 2024-25.

ndhinagar, 14th February, 2025, a meeting of the Board to consider and approve the Unaudited Financial Results for Q-3 / Nine months FY 2024-25.

On a quarter-over-quarter (Q-o-Q) basis, improved chemical volumes and lower input costs led to margin expansion.

Performance within the chemical segment was mixed.
TDI and TGU experienced positive momentum, while positive momentum, while Aniline and Ethyl Acetate faced a highly competitive

market.
Complex fertilizer volumes
increased during the quarter.
Pipeline inventory (sales
awaiting DBT subsidy
processing) decreased by
more than 50%, reducing
working capital
requirements.

Other income, comprising interest income and write-backs of liabilities and provisions, contributed positively to the results.

The fertilizer segment demonstrated reduced losses both Q-o-Q and year-over-year (Y-o-Y), driven by lower

input costs for complex fertilizer and fixed cost reductions. This improvement was partially offset by higher energy norms for Urea production. input costs for

Y-o-Y comparison for the 9-month period is not directly comparable due to planned annual turnarounds at the Bharuch facility last year and the Dahei facility this year.

Fertilizer losses decreased primarily due to lower fixed costs and increased volumes of straight fertilizers.

Projects under execution Coal-Based Steam & Power Plant, TDI-II Dahej (CCPP): Will bring down the steam cost & overall TDI operating cost. Ammonia Expansion: Increase reliability of existing ammonia loop along with some energy-saving.

saving.

Weak Nitric Acid (WNA-III):
This will strengthen the
company's market share.
With the Dahej Complex now
operating at full capacity and
no planned turnaround at the
Bharuch operations, the
company anticipates stronger
performance in the fourth
quarter of FY2024-25.

Note:

The above is an extracts of the detailed format of Financial Results filed with the Stock Exchange under Regulation 33 of the SEBI (LODR) Regulations, 2015. The salf result has been reviewed by the Auditor Committee and approved by the Board of Directors at their meeting held on 14th February, 2025. The full format of the Quarterly and Nine monthly Financial Results is available on the velocities of the Stock Exchange, i.e. www.besheld.com and on the Company's webshele www.shashifulfraprojects.com. The same can be accessed by scanning QR code provides below.

Ajit Jain Chairman & Managing Director

GNFC announces Q3 PAT Rs. 158 crores and 9-Month PAT Rs. 375 crores for the financial year 2024-25.

ndhinagar, 14th February, 2025, a meeting of the Board to consider and approve the Unaudited Financial Results for Q-3 / Nine months FY 2024-25.

On a quarter-over-quarter (Q-o-Q) basis, improved chemical volumes and lower input costs led to margin expansion.

expansion.

Performance within the chemical segment was mixed.

TDI and TGU experienced positive momentum, while Aniline and Ethyl Acetate faced a highly competitive

market.
Complex fertilizer volumes
increased during the quarter.
Pipeline inventory (sales
awaiting DBT subsidy
processing) decreased by
more than 50%, reducing
working capital
requirements.

other income, comprising interest income and write-backs of liabilities and provisions, contributed provisions, contrib positively to the results.

The fertilizer segment demonstrated reduced losses both Q-o-Q and year-over-year (Y-o-Y), driven by lower

input costs for complex fertilizer and fixed cost reductions. This improvement was partially offset by higher energy norms for Urea production.

Y-o-Y comparison for the 9-month period is not directly comparable due to planned annual turnarounds at the Bharuch facility last year and the Dahej facility this year.

Fertilizer losses decreased primarily due to lower fixed costs and increased volumes of straight fertilizers.

Projects under execution Coal-Based Steam & Power Plant, TDI-II Dahej (CCPP): Will bring down the steam cost & overall TDI operating cost. Ammonia Expansion: Increas reliability of existing ammoni loop along with some energy saving.

saving.

Weak Nitric Acid (WNA-III):
This will strengthen the
company's market share.
With the Dahej Complex now
operating at full capacity and
no planned turnaround at the
Bharuch operations, the
company anticipates stronger
performance in the fourth
quarter of FY2024-25.
