Jaipur Rajasthan 302013

June 24, 2024

Dear Sir,

Credit rating of bank facilities for Rs.121.99 crore

Please refer to our letter dated May 31, 2024 on the above subject.

- 2. The rationale for the ratings is attached as an **Annexure-I**.
- 3. We request you to peruse the annexed document(s) and offer your comments, if any. We are doing this as a matter of courtesy to our clients and with a view to ensure that no factual inaccuracies have inadvertently crept in. Kindly revert as early as possible. In any case, if we do not hear from you by June 25, 2024, we will proceed on the basis that you have no comments to offer.

If you have any further clarifications, you are welcome to approach us.

Thanking you, Yours faithfully,

nikita.goyal@careedge.in

Annexure I

Rating Rationale

KG Petrochem Limited

Facilities/Instruments	Amount (₹ crore)	Rating¹	Rating Action
Long Term Bank Facilities	22.99 (Reduced from 38.53)	CARE BBB-; Stable	Revised from CARE BBB; Stable
Long Term / Short Term Bank Facilities	83.25 (Enhanced from 73.25)	CARE BBB-; Stable / CARE A3	Revised from CARE BBB; Stable / CARE A3+
Short Term Bank Facilities	15.75	CARE A3	Revised from CARE A3+

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The revision in ratings assigned to the bank facilities of KG Petrochem Limited (KGPL) is on account of continuous decline in operating profitability since past two years ended FY24 (FY refers to April 01 to March 31), resulting in significantly lower than envisaged gross cash accruals and moderation in debt coverage indicators.

The ratings continue to derive strength from the vast experience of the promoters in terry towel business, company's established track record of operations with repeat orders from a reputed clientele, its moderate scale of operations and adequate liquidity despite an elongated operating cycle.

The ratings, however, continue to remain constrained on account of company's leveraged capital structure, slow ramp up of operations in artificial leather business and concentrated customer as well as geographical revenue profile. The ratings are further constrained on account of inherent cyclicality associated with textile industry and vulnerability of profitability to the fluctuation in raw material prices as well as foreign currency exchange rate, though with presence of a prudent hedging mechanism.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Maintenance of Total Operating Income (TOI) above Rs.300 crore along with improvement in operating profitability and Return on Capital Employed (ROCE) each, above 10%, resulting in better gross cash accruals
- Maintenance of overall gearing below unity

Negative factors

- Decline in TOI below Rs.200 crore and/or moderation in PBILDT margin below 7% on a sustained basis
- Moderation in capital structure above 1.20x along with moderation in debt coverage indicators
- Elongation of working capital cycle beyond 180 days on sustained basis.

Analytical approach: Standalone

Outlook: Stable

Stable outlook reflects CARE Ratings Limited's (CARE Ratings') expectations that the company will continue to benefit from vast experience of the promoters in textile industry and sustain its moderate financial risk profile in near to medium term.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications CARE Ratings Limited

Mumbai - 400 022 Phone: +91-22-6754 3456

Detailed description of the key rating drivers:

Experienced promoters in the textile industry

KGPL is promoted by Mr. G. S. Kandoi, a Mechanical Engineer from BITS Pilani having vast business experience of more than five decades. His son and Managing Director, Mr. Manish Singhal, is an IIT graduate and has an industry experience of more than two decades.

Apart from the executive directors, the Board of Directors also consist of four independent directors as well as experienced professionals at various levels.

Established track record of operations

KGPL operates in two segments, i.e., manufacturing of terry towels/made ups & artificial leather and as a consignment stockist of GAIL (India) Limited for polymers for Rajasthan region. It has established operations of more than two decades in the terry towels & made ups segment, which contributed more than ~75% of its TOI over the past three years ended FY24.

Moderate scale of operations though with significant moderation in profitability

KGPL's TOI remained moderate at Rs.334.35 crore in FY24 (Rs.306.32 cr. In FY23). It grew by 9% y-o-y due to increase in sales volume of terry towels with recovery in export demand from Q4FY24 onwards. Sales for the artificial leather segment however declined from Rs.66.18 cr. in FY23 to Rs.44.60 cr.

Operating margin of the company has witnessed continuous moderation over last two years ended FY24 to 6.48% (9.60% in FY23 and 12.04% in FY22), due to volatile input prices (cotton yarn and dyes & Chemicals) and constrained sales realizations owing to a slowdown in export market. Furthermore, though the terry towel segment witnessed improvement in sales and profitability in Q4FY24, the overall profitability remained subdued owing to continued losses in the artificial leather segment. With this, company registered gross cash accruals (GCA) of Rs.13.87 crore, which stood significantly lower than the GCA of 30 crore registered in FY22. CARE also notes significant deviation in the GCA as against envisaged during the last review.

For FY25, company is expected to register moderate growth in TOI alongwith some improvement in operating margin owing to recovery in terry towel demand and correction in raw material prices. However, considering the significant moderation in profitability vis-a-vis previous years, extent of this recovery shall remain crucial from credit perspective.

Company had concluded capex for manufacturing bedsheets in FY23, though, no major revenue has been registered from this segment in FY24 due to slowdown in demand. Revenue from the same is also envisaged to increase from Q2FY25 inwards, as indicated by the management.

Concentrated customer and geographical revenue profile though reputed clientele base

KGPL's terry towel and made-ups business is almost entirely dependent on the export market i.e., primarily to USA and partially to Chile, South America. During FY24, KGPL generated ~76% of TOI from exports (69% of TOI in FY23). In addition, the customer profile of KGPL is highly concentrated with top -10 customers forming ~68% of TOI (63% of TOI in FY22) in FY24. Customer profile of KGPL includes reputed retail chains such as Walmart Inc., Jay Franco & Sons etc. which reduces the counterparty credit risk to an extent. Also, company has an established relationship with these clients which enables repeat business from them, while it has also commenced sales to other regions to improve customer diversification.

Nevertheless, any change in customer preference and/or political instability or economic slowdown in the major export markets could impact the operations of KGPL.

Leveraged capital structure and moderation in debt coverage indicators

The capital structure of KGPL remained moderately leveraged with overall gearing of 0.93x as on March 31, 2024 (P.Y. 0.96x). The Total Outside Liabilities / Net worth ratio continued to remain high at 1.39x in FY24 (1.51x in FY23).

The debt coverage indicators of since last two years deteriorated since last two years owing to lower profitability, and stood moderate marked by total debt to GCA of 8.71x (4.50x times in FY22) and PBILDT interest coverage at 2.73 times (5.39 times in FY22) in FY24.

Return indicators also moderated significantly, as indicated by a Return on Capital Employed (RoCE) of around 6-8% registered in past two years ended FY24, vis-a-vis a RoCE of 12-13% registered in recent past.

CARE Ratings Limited

Phone: +91-22-6754 3456

Continued subdued performance of the artificial leather business

KGPL started manufacturing of artificial leather from second half of FY19, however over the last four - five years, the ramp up of operations of this segment remained subdued due to initial teething issues as well as subdued demand from end-user industries i.e., mainly footwear and automobile. This apart, the segment also faces intense competition from low-cost products. Sales of artificial leather declined from Rs.66.18 cr. in FY23 to Rs.44.60 cr. in FY24 which resulted in higher losses during the year.. As articulated by the management, company has increased its focus on exports and on the automobile sector and has added few new customers in current year to ramp up operations in this segment, which shall remain crucial for company's business operations.

Susceptibility of profitability to volatile raw material prices and forex fluctuation though the latter is largely mitigated through prudent hedging mechanism

The prices of raw cotton are volatile in nature and depend upon factors like area under production, yield for the year, international demand supply scenario, export quota decided by the government and inventory carry forward from the previous year. Also, the production of cotton in India is dependent upon the vagaries of the monsoon. Accordingly, any sharp adverse fluctuations in cotton prices may affect the profitability of KGPL.

Further, KGPL earns large part of its revenue from exports, which exposes its profitability to volatility in forex rates. However, majority of forex risk is mitigated as KGPL hedges entire forex exposure through forward contracts.

Inherent cyclicality associated with textile industry, albeit stable demand prospects

Textile industry is a cyclical industry and closely follows the macroeconomic business cycles. Furthermore, the industry is highly competitive and fragmented in nature with presence of large established players as well as numerous small players.

Global demand for home textiles was impacted in FY23 and FY24 with slowdown in sales of key US retailers. However, some traction has been witnessed in Q4FY24 with recovery in demand and moderation in cotton prices.

Overall, long-term demand outlook is expected to remain stable driven by factors such as increasing urbanization, changing lifestyle and growing fashion trends.

Liquidity: Adequate

The company has an adequate liquidity, marked by positive (though moderated) cash flow from operations of Rs.23.64 crore registered in FY24 (Rs.38.03 cr. in FY24) and sufficient cushion in GCA vs repayments. Utilization of fund-based working capital limits however remained high at 86% for past 12 months ended April 2024 due to moderation in profitability and a long operating cycle.

The business operations of KGPL are working capital intensive in nature marked by elongated operating cycle of 155 days in FY24 (162 days in FY23). KGPL needs to maintain sufficient inventory to meet demand resulting in inventory period of 80 to 110 days. Furthermore, KGPL offers credit period of \sim 60-100 days to its customers.

While KGPL's customer profile includes reputed players from large retail chains which reduces the risk of delayed collection to an extent, there has been delayed recovery in one of its major customers.

As on March 31, 2024, KGPL had debtors of Rs.24.01 cr. o/s for more than 6 months, of which around Rs.11 cr were from artificial leather & consignment stockist segments, while remaining were from one of the clients in the terry towel segment. As articulated by the management, company has entered into an agreement with this client in which the latter is likely to pay the older dues alongwith the new business, on advance basis.

With low profits and sizeable debt repayment obligations of around Rs.18 cr. in FY24 apart from routine capex, company's liquidity was aided by infusion of unsecured loans by promoters.

For FY25-FY26, annual scheduled repayments are relatively lower in the range of Rs.3-10 cr. which are expected to be met from cash accruals. Also, company has been sanctioned additional working capital limits of Rs.10 cr. in February 2024, thus aiding its liquidity. Nevertheless, given the working capital-intensive operations, recovery in profitability and realisation of long-pending dues shall remain crucial for company's liquidity profile.

(This follows our brief rationale for the company published on June 04, 2024)

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
