BUSINESS RESPONSIBILITY AND SUSTAINABILITY REPORT 2024

26. Overview of the entity's material responsible business conduct issues.

Mphasis carried out its initial all-inclusive materiality assessment to determine our material ESG aspects in FY21. The primary objective of this assessment was to recognize how the determined ESG aspects impact our business and our stakeholders and vice versa. We have identified and assigned KPIs against the high-priority material aspect to enhance our business operations/performance, and stakeholder engagement and strengthened our ESG strategy. Double Materiality assessment is planned to be conducted for this FY 24-25.

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	The rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Data privacy/ Cyber / IT System Security and Resilience	Risk	<ul style="list-style-type: none"> Being a leading IT services provider, Mphasis is expected to implement policies, systems, and practices to secure and protect data and build resilience against cyber-attacks as the IT services sector is a highly targeted sector year after year. Additionally, India ranked fifth on the list of countries most hit by cyberattacks according to a 2022 report by Surfshark, a Netherlands-based VPN company. Improper data and systems management can have a major reputational impact on Mphasis, as employees and other stakeholders lose trust in the Company's ability to safeguard sensitive information. Additionally, data breaches can have significant financial impacts. IBM's Cost of a Data Breach report (2021) estimates that the average total cost of a data breach increased by 10%, from US\$3.86 million to USD 4.24 Million, the highest average total cost in the 17-year history of this report. 	<ul style="list-style-type: none"> Data Privacy Officer (DPO) is appointed and will address queries, when required, with regards to the "Data Subject Access Requests (DSAR)", "stakeholder grievances" and "breaches" etc. in context to personal data. Data Privacy Office conducts internal audits at least annually and facilitates Audits conducted by external bodies to validate the effectiveness of the data privacy controls deployed. Annual training is made available to all the employees to raise awareness on safeguarding their information and company-wide security / privacy practices. 	<p>Negative:</p> <p>Mphasis has access to sensitive data, such as personal information of stakeholders, customer data etc. Poor data security management could thus result in legal and reputational risks for Mphasis in addition to being a breach of trust imposed by the data owners in Mphasis.</p>

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	The rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
2	Business ethics	Risk and Opportunity	<p>It is important for businesses to be transparent, accountable, and ethical to build trust with stakeholders.</p> <p>By adhering to ethical principles, IT companies can protect customer data and privacy, treat employees and other stakeholders fairly, be transparent in their business operations and management, and promote overall innovations and social responsibility.</p>	<ul style="list-style-type: none"> The Board of Directors along with the Chief Ethics and Compliance Officer provides oversight and promotes responsible governance practices across the Company. The Board Committees ensure adherence to the highest standards of corporate governance by setting internal policies on responsible business conduct which has been effective. Such policies include CoBC, Anti-bribery and Anti-corruption Policy, Anti-Slavery Policy, and the Whistleblower Policy. The Company whistle-blower mechanism enables all our stakeholders to report any suspicious eventualities that come to their attention, by writing to whistleblower@mphasis.com. Written complaints can also be dropped into the whistle-blower drop box present at the company's location. 	<p>Positive: Companies that prioritize ESG and ethical practices may experience cost savings through increased efficiency, reduced risk, and improved reputation. Moreover, companies that incorporate ethical practices in their business strategies may be more likely to identify new business opportunities, thereby driving long-term growth and value creation.</p> <p>Negative: Likelihood of costly litigation, fines, and reputational damage.</p>
3	Customer centricity/satisfaction	Risk and Opportunity	<ul style="list-style-type: none"> The transparency, accuracy, and comprehensibility of marketing statements, / service descriptions, service terms and processes play an important role in the relationship between customers and companies. Customers should have access to accurate and adequate information to make an informed purchasing decision. In the case of Mphasis, this is linked to the disclosure of reliable information regarding the services 	<p>The company has a well-defined process to proactively measure the levels of customer satisfaction and obtain feedback from various perspectives, including, the satisfaction of the customer with the present work, growth of the account, and innovative and cost-effective solutions offered by the Company.</p>	<p>Positive: Customer satisfaction and loyalty have a significant positive influence on the Company's profitability. Improved customer satisfaction can also lead to better business opportunities and growth.</p>

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	The rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
				The CSAT surveys are conducted half yearly with both Operational and Strategic stakeholders of the customer. For a CSAT score less than 4.5, the service improvement plan is established by the delivery team, and actions are agreed upon with the customer and tracked to closure. CSAT Score is measured on a scale of 1 to 5. The CSAT scores are closely monitored by the Company Board.	Negative: Consumers can lose trust in Mphasis's reliability to provide proposed quality services, which can lead to loss of business opportunities.
4	Protection of human rights	Risk	<p>Mphasis operates in multiple geographies across the globe, and it is our responsibility to protect core human rights in the communities in which we operate.</p> <p>Additionally, human rights issues may pose a business risk to tech/IT companies. In 2011, the United Nations Human Rights Council (UNHRC) passed the Guiding Principles on Business and Human Rights (UNGPs) which recognize the role of the state and businesses in protecting human rights, which is widely followed by businesses globally and Mphasis recognizes its role in protecting human rights and identifies it as a potential material aspect to the company.</p> <p>Tech/IT companies have been battling controversies on issues such as censorship, data protection, digital security, and protection against surveillance amongst others. Additionally, child labour, forced labour, modern slavery etc. are increasingly drawing attention globally.</p>	<p>Our publicly available <u>CoBC</u>, <u>Anti-bribery and Anti-corruption Policy</u> and <u>Anti-Slavery Policy</u> encourage our people to conduct business lawfully, ethically and in the best interest of Mphasis. These policies explicitly forbid violations of human rights. Mphasis takes responsibility to address workplace issues such as working hours, child labor, forced labor, non-discrimination, health and safety, and the environment.</p> <p>Mphasis has a grievance redressal mechanism related to the policy/policies to address stakeholders' grievances related to the policies and the human rights issues.</p>	Negative: Human rights violations can be a business risk, and employee risk and conversely, a good record on human rights can also be a competitive advantage. Any accusation of a violation of rights is seen as a breach of trust and erodes customer confidence in the company. Additionally, this could have potential financial impacts on the company and brand reputation.

5	Climate Change	Risk and Opportunity	<p>Climate change increases the risk of extreme weather events across India (ranked 7th on Climate Risk Index). These events could disrupt operations, damage infrastructure, and affect Mphasis' supply chains. Rising temperature could also result in higher energy costs for cooling data centers, central to the company's operations.</p> <p>However, climate change also provides opportunities for Mphasis to innovate, and offer climate/carbon-linked solutions to its customers. Such offerings not only help combat climate change but also open new markets and revenue streams for the company. Embracing climate positive practices can enhance relationships with environmentally conscious stakeholders and help establish the company as a leader in the green IT sector.</p>	<p>Some of the steps taken by Mphasis to address the risks posed by Climate Change include:</p> <ul style="list-style-type: none"> - Increasing share of renewable energy in energy mix - Inventorization of GHG emissions (Scope 1, Scope 2, Scope 3 (partly)) - Commitment to achieve 'Carbon Neutrality' by 2030 through 5% energy reduction YoY and 1% Carbon Footprint reduction YoY - Release of Climate Whitepaper, aligned with TCFD requirements - The use of energy-efficient equipment and adoption of energy saving initiatives at all Mphasis facilities. 	<p>Negative: Extreme weather events can potentially damage Mphasis infrastructure and cause disruptions to operations and the company's supply chain. These could affect Mphasis' ability to carry out its services, impacting the company's revenue and assets..</p> <p>Positive: Development of solutions that address climate change issues could potentially help Mphasis enter new markets and augment revenue streams.</p> <p>The adoption of climate change adaptation measures like the use of renewable energy and GHG reduction initiatives helps Mphasis future-proof its business and safeguards the company from financial risks associated with the climate transition.</p>

Leadership Indicators

1. Does the entity extend any life insurance or any compensatory package in the event of death of (A) Employees (Y/N) (B) Workers (Y/N)

(A) Employee - Yes

(B) Workers - Yes

For employees and workers (permanent only), Term Insurance is provided with the additional option to purchase voluntary term life insurance from vendor also. For Covid 19 related deaths, a Care policy was in place to provide compensation to family members.

2. Provide the measures undertaken by the entity to ensure that statutory dues have been deducted and deposited by the value chain partners.

The Company confirms that its supply chain partners have abided by the necessary legal and regulatory requirements by managing and submitting statutory dues. Mphasis mandates that its partners comply with the company's ethical guidelines, principles of business responsibility, and core values. When Mphasis issues a purchase order, the vendor is paid the amount plus GST, which is then the vendor's responsibility to remit to the government. The Mphasis Tax team oversees this procedure, as the company is not entitled to claim the GST amount from the government until the vendor has completed the deposit.

Furthermore, contractors are required to ensure compliance with local laws. Proof and declarations of statutory dues payments must be presented at the time invoices are submitted. Additionally, all contractors providing manpower to Mphasis are required to undergo a quarterly review to ensure compliance with relevant labor laws.

BUSINESS RESPONSIBILITY AND SUSTAINABILITY REPORT 2024

Principle 4: Businesses should respect the interests of and be responsive to all its stakeholders.

Essential Indicators

1. Describe the processes for identifying key stakeholder groups of the entity.

Key stakeholders, including employees, society, suppliers, clients & partners, investors, shareholders, regulators, and policymakers, are identified based on their direct impact on our operations. Through a materiality assessment process conducted in FY21, we categorized stakeholders according to international standards like GRI and domestic guidelines such as NGBRC principles. Factors such as impact, diversity, influence, urgency, and legitimacy were considered to prioritize engagement with principal stakeholders. We maintain ongoing communication with these stakeholders through various channels to foster trust-based relationships. This engagement aids in identifying significant ESG themes, guiding our strategic decisions, goal setting, and reporting priorities.

2. List stakeholder groups identified as key for your entity and the frequency of engagement with each stakeholder group.

Stakeholder group	Whether identified as vulnerable & marginalized group (Yes/No)	Channels of communication (Email, SMS, Newspaper, Pamphlets, Advertisement, Community meetings, Notice board, Website), Other	Frequency of engagement (Annually/ half-yearly/ quarterly/ others – please specify)	Purpose and scope of engagement including key topics and concerns raised during such engagement

Leadership Indicators

1. Provide the processes for consultation between stakeholders and the board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the board.

We prioritize active engagement with stakeholders to address their needs and concerns responsibly. Regular communication ensures effective dissemination of ESG topics, and feedback is promptly relayed to the board for consideration. Integrating stakeholder input into strategic decisions reflects our commitment to sustainability and societal impact.

2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes/No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into the policies and activities of the entity.

Yes, a materiality assessment involving key stakeholders—leadership, customers, investors, and suppliers—was conducted to identify Mphasis' significant ESG issues. Detailed information is available on our website and in the ESG report. The selection of material topics was data-driven and consultative, prioritized based on their impact on stakeholders and our business.

3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/ marginalized stakeholder groups.

CSR initiatives at Mphasis are implemented through the F1 Foundation (an independent registered public trust), which works for socially excluded and economically disadvantaged groups. There are no vulnerable/marginalized groups among our other stakeholder groups.

4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency or reduce impact due to emissions/effluent discharge/waste generated, please provide details of the same as well as the outcome of such initiatives.

S. No	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Replacement of old PAC with energy-efficient new PAC.	The new PACs are energy efficient and fitted with electronic commutator fans for the efficient discharge of cold air. The refrigerants R410A are eco-friendly. The compressors are inverter-based scroll compressors.	There is an annual saving of 25% of energy consumed on a monthly average
2	All the UPS in the new fit-out interiors are energy efficient.	The energy efficiency of the UPS is 98%	There is a saving of 15 to 20% on energy monthly
3	The facilities are installed with VAV controllers	The VAVs ensure the flow of the chill air zone-wise in accordance with the set temperature automatically	There is a saving of 18 to 20% on energy consumption monthly
4	Occupancy sensors for lighting	Occupancy sensors for lighting across the workstation area ensure automatically that the lights are turned-on when employees occupy the workstations zone wise	There is a saving of 10% of lighting energy monthly
5	LED light fixtures	LED light fixtures are installed across all the facilities replacing the CFL light fixtures.	There is an energy saving of 35 to 40% achieved monthly.
6	Shredded paper and waste cardboard sent to ITC for recycling	Paper waste	Receive stationary items in return with appreciation certificate
7	49% of total energy consumption is from renewable sources	Wind energy	Reduction in GHG emission
8	HVAC - VRV type which are highly energy efficient with state-of-art technology	The HVAC systems are of and deploy refrigerant R407c and R410a which are environment friendly and do not deplete Ozone layer.	The HVAC systems are also provided with CO2 level monitoring sensors to ensure the quality of Air in the work area.
9	Electrical - Prismatic light diffuser for the LED fixtures	Which is highly energy efficient with the permissible color index and Lux level. These light fittings are controlled by daylight/occupancy sensors to ensure power saving.	The Energy Management System software (EMS) analyze the pattern of energy consumption which help to take necessary action to improve the energy efficiency and optimization at the floor.
