Datamatics Achieves UK Government-Backed Cyber Essentials Certifications, Enhancing Cybersecurity and Providing Greater Protection for Customers

2nd December 2024, Mumbai: Datamatics, a global Digital Technologies, Operations, and Experiences Company, announced today that it has acquired Cyber Essentials and Cyber Essentials Plus certifications. These industry-leading certifications, backed by the UK Government's National Cyber Security Centre (NCSC), validate Datamatics' commitment to cybersecurity and further enhance the company's ability to deliver secure, reliable services to its customers globally.

The Cyber Essentials and Cyber Essentials Plus certification schemes are UK Government-backed programs designed to help Enterprises safeguard against the most common cyber threats. Techforce Cyber, an independent third-party auditor, conducted the audit, which involved a detailed technical assessment to ensure the company's defences are robust and effective against a range of cyber-attack scenarios.

Key Highlights of the Certification:

- **Comprehensive Security Assessment:** The certification process involved over 100 questions covering five key control areas: Firewalls, Secure Configuration, Security Update Management, User Access Control, and Malware Protection.
- **Global Coverage:** The certification scope includes Datamatics' network operations in the United Kingdom and India, ensuring cybersecurity practices are consistently applied across regions.
- **Increased Client Confidence:** By achieving both Cyber Essentials and Cyber Essentials Plus, Datamatics strengthens its position as a trusted partner committed to safeguarding clients' sensitive information and maintaining business continuity.

On this occasion, Rahul Kanodia, Vice Chairman and CEO of Datamatics, expressed, "Achieving the Cyber Essentials and Cyber Essentials Plus certifications is a significant milestone in our journey to uphold the highest standards of cybersecurity. It highlights our commitment to safeguard customer data while maintaining the highest cybersecurity standards across our global operations."

Gopal Ranjan, Global Head Quality and DPO of Datamatics expressed, "I am pleased that Datamatics has achieved the Cyber Essentials and Cyber Essentials Plus certifications. This recognition follows a rigorous assessment by Techforce Cyber, evaluating more than 100 technical controls to ensure we meet stringent cybersecurity

standards. It underscores our dedication to protecting client data and reinforces the trust of our customers to deliver secure, dependable solutions.”

Datamatics also became an early global recipient of the ISO 42001:2023 certification, recognizing our commitment to implementing the Artificial Intelligence Management System (AIMS) framework. This demonstrates our ongoing dedication to maintaining the highest quality and security standards for our customers.
