Subject: Kwality received its first Biological Product Permission for Manufacturing and Sale of PEGylated-Asparaginase

Kwality Pharmaceutical Ltd. (KPL) is pleased to announce that we have successfully received domestic and export product approvals for the manufacturing and sale of its biological product, **PEGylated-Asparaginase**. This significant milestone underscores our commitment to delivering high-quality therapeutic solutions and marks an important step forward, as it is our first product from the **biologics portfolio** to be commercialized in both domestic and export markets.

L-Asparaginase is an E. coli-derived enzyme primarily used in the treatment of acute lymphoblastic leukemia (ALL). The **PEGylation process** enhances the stability of the molecule and reduces the risk of allergic reactions, thereby improving patient outcomes and treatment efficacy.

Furthermore, Kwality Pharmaceutical Ltd. is actively engaged in discussions with leading domestic B2B companies to offer our PEGylated-Asparaginase on a **CDMO (Contract Development and Manufacturing Organization)** basis. These collaborations aim to leverage our manufacturing expertise, ensuring wider availability of this critical therapy. This approach not only strengthens local partnerships but also enhances patient access across various regions.

The above is for your information and dissemination to the stakeholders.

Thanking You,

For Kwality Pharmaceuticals Limited

Ramesh Arora
Managing Director
