Management Commentary & **Business Outlook**

“Gravita has **performed extremely well in 9MFY25** and is progressing strongly to achieve its VISION 2028 of expanding capacities in existing and new verticals, having volume CAGR and profitability growth of 25%+ & 35%+ resp., ROIC 25%+, value added products 50%+ and non-lead business 30%+.

I am pleased to share that Gravita has **successfully raised Rs. 1,000 crore** through QIP. These funds will be strategically utilized to drive the company’s vision of becoming a global leader and one of the most valuable companies in the recycling industry.

Coming to **Q3FY25 performance**, Gravita achieved significant growth across key metrics, with volumes, revenues, EBITDA, and PAT increasing by 33%, 31%, 14%, and 29%, on YoY basis respectively. Proportion of Value-added products and availability of domestic scrap continues to increase. Gravita is well-positioned for growth due to its strategic focus on ambitious capex and capacity expansion, global operations, and an integrated supply chain. The company benefits from stringent regulatory compliance, operational excellence, and a focus on high-margin products. Proactive risk mitigation through hedging, an experienced management team, and strong stakeholder support further bolster its growth prospects.

Risk Mitigation by **BACK-TO-BACK HEDGING** mechanism

- To mitigate the risk of commodity prices fluctuation from June. 2016
 - Metal equivalent of the scrap bought, is sold on the same day
 - Pricing against Customer contracts – Natural Hedging
 - Forward Contracts on LME Exchange for balance quantity - till final sale to customer
 - Core inventory was not part of back-to-back hedging
- Gravita started **hedging of core inventory** also in June 2019 by taking a forward contact on LME Exchange.
- June 2019 onwards Gravita is enjoys stable margins and is not affected by the commodity price fluctuations

Improving **MARKET DYNAMICS IN RECYCLING** - Paradigm Shift

Shift from **INFORMAL TO FORMAL**

With redefining of Battery Waste Management Rules (BWMR) , Extended producers responsibility (EPR) and stricter implementation of GST, the scrap availability for formal recycling sector has increased and is further expected to grow.

Informal Lead recycling trend in India

Gravita having Pan India presence and association with OEM's will benefit the most from this shift
