## PRESS RELEASE

**Kalyani Group Introduces RC 0912 Rolling Chassis at IDEX Abu Dhabi:  
Showcasing Engineering Excellence for the World**

**Abu Dhabi, 18th February, 2025** – Kalyani Strategic Systems Limited (KSSL), a wholly-owned defence subsidiary of Bharat Forge introduced the **RC 0912**, a **versatile military-grade specialist rolling chassis**, at the prestigious **IDEX Abu Dhabi** platform. Furthering KSSL's commitment to develop in-house innovation and providing world-class, high-performance defence mobility solutions, the RC 0912 is engineered for unmatched performance, durability, and customization.

The **RC 0912 Rolling Chassis** provides a solid foundation for mission-critical vehicles built to seamlessly adapt to a multitude of applications that the dynamic defence environment demands. It features a highly customizable design, allowing it to be tailored to meet specific operational requirements and supports various body styles and specialized vehicle configurations, making it a truly multi-purpose solution. Built with heavy-duty materials, it is engineered to withstand extreme conditions while carrying heavy payloads. A flexible wheelbase accommodates different body lengths, with an advanced independent suspension system which enhances ride stability, manoeuvrability, and comfort across diverse terrains. These make the RC 0912 a cutting-edge solution tailored to meet the needs of defence forces worldwide.

Speaking at IDEX Abu Dhabi, Mr. Amit Kalyani Vice-Chairman & Joint MD, Bharat Forge Ltd. emphasized: "The RC 0912 Rolling Chassis showcases KSSL's expertise in integrating cutting-edge technology with durability and capacity. With a focus on competitiveness and speed to market, we rapidly respond to evolving customer needs, delivering next-generation defense solutions."

It can be deployed for a wide range of defence and tactical applications, as a reconnaissance and surveillance vehicle; an ambulance or medical evacuation unit; a mounted gun system; a utility vehicle, shop van, or a logistics support vehicle. Other configurations include single and double cab load carriers, armoured troop carriers, mortar deployment platforms, hard and soft top configurations, water bowsers, and fuel tankers.

The highlight of this product is its robust build and the flexibility of design which allows for seamless adaptation to mission-specific requirements thus serving as a cost-effective alternative to fully custom-built chassis. Additionally, its scalability makes it ideal for both low- and high-volume production, catering to global defense market demands.

As KSSL continues to push the boundaries of indigenous defence capabilities, the RC 0912 Rolling Chassis stands as a testament to the company's engineering prowess and strategic vision.

**About Kalyani Strategic Systems Limited:**

KSSL (a wholly owned subsidiary of Bharat Forge Limited), a pioneer in the Indian defence industry with a strong research-and-development focus, has developed a number of indigenous weapon platforms, off-road protected mobility solutions and high-technology military products. It is already exporting its in-house designed and developed artillery systems, munitions, and mobility solutions globally.

### About Bharat Forge

Bharat Forge Limited (BFL), a Pune-based Indian multinational, is a technology driven global leader in providing high performance, innovative safety critical components and solutions for several sectors including automotive, power, oil and gas, construction & mining, rail, marine, defence and aerospace. BFL has global manufacturing footprint with presence across five countries, with the largest repository of metallurgical knowledge and offers full service supply capability to its geographically dispersed marquee customers from concept to product design, engineering, manufacturing, testing and validation.
