Our ERM framework includes bi-annual risk assessments to identify and mitigate environmental risks, prioritizing sustainability and managing our environmental impact towards a greener future.

Commitment to Sustainability through Renewable Energy

We prioritize sustainability in our operations by supporting stakeholders in areas such as renewable energy and sustainable production. We procure power from renewable energy solution companies and source our energy consumption from renewable sources, including windmills.

Tree plantation

We have implemented a tree plantation initiative to preserve the environment for a sustainable future. We have distributed over 30,000 saplings to people living near our factories and adopted a One-for-One model, planting trees in all our factories and giving saplings to all our employees.

Eco-Friendly Production Process

We follow a chemical-free 2200 KLD biological oxidation process and have adopted best techniques like installing a water preheater, dust collector, and water treatment plant to minimize its environmental impact. We are committed to implement environmentally responsible practices and continuously improve processes to reduce the environmental footprint..
