If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Annual financial results or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Annual Financial Results.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Note - 1. Significant accounting policies

1.1 Basis of preparation of financial statements

The financial statements of the company have been prepared under the historical cost convention, in accordance with generally accepted accounting principles in India (Indian GAAP) on an accrual basis. The company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounts) Rules, 2014, and the relevant provisions of the Companies Act, 2013, to the extent applicable and the guidance notes, standards issued by the Institute of Chartered Accountants of India. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard required a change in the accounting policy hitherto in use.

1.2 Use Of Estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

1.3 Fixed Assets, Intangible assets and capital work in progress

Fixed assets are stated at cost, after reducing accumulated depreciation and impairment up to the date of the Balance Sheet. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition of construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use. Capital work in progress includes the cost of fixed assets that are not yet ready for their intended use. Intangible assets, if any, are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortization and impairment.

1.4 Depreciation

Depreciation on fixed assets is determined based on the estimated useful life of the assets using the written down value method as prescribed under the schedule II to the Companies Act, 2013. Individual assets costing less than Rs. 5000.00 or less are depreciated within a year of acquisition. Depreciation on assets purchased/sold during the period is proportionately charged. Leasehold land is amortized on a straight line basis over the period of lease. Intangible assets, if any, are amortized over their useful life on a straight line method.

1.5 **Employee benefits**

Short Term benefits are recognized as an expense at the undiscounted amount in the statement of Profit and Loss of the year in which related service is rendered. Retirement benefits in form of gratuity, leave encashment etc. will be accounted for on accrual basis. The company has not incurred any liabilities in this respect till the end of the year. However, there is no liability accrued in this respect as on the end of the financial year.

1.6 **Government grants**

Grants and subsidies from the government are recognized when there is reasonable assurance that (i) the company will comply with the conditions attached to them, and (ii) the grant/subsidy will be received.

When the grants or subsidy related to revenue, it is recognized as income on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs, which they are intended to compensate. Where the grant relates to an asset, it is recognized as deferred income and released to income in equal amounts over the expected useful life of the related asset. Government grants of the nature of promoters' contribution are credited to capital reserve and treated as a part of the shareholders' fund.

1.7 **Investments**

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long term investments. Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

1.8 **Inventories**

All trading goods are valued at lower of cost and net realizable value. Cost of inventories is determined on first in first out basis. Scrap is valued at net realizable value. Net realizable value is the estimated selling price in the ordinary course of business.

1.9 Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer, usually on delivery of the goods. The company collects sales taxes and value added taxes (VAT) on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from the revenue.

Income from Job work/Services

Revenue from Job work/ Services is recognized when the contractual obligation is fulfilled and goods/services are delivered to the contractee.

Interest

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable rate of interest. Interest income is included under the head "Other Income" in the statement of profit and loss.

1.10 Income Taxes

Tax expenses comprise current and deferred tax. Current Income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act, 1961. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred Income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidences that they can be realized against future taxable profits. Deferred tax assets are reviewed at each reporting date.

Minimum Alternate Tax paid in a year is charged to the statement of profit and loss as current tax. The company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the company recognizes MAT credit as an asset in accordance with the guidance note on accounting for credit available in respect of minimum alternate tax under the income tax act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The company reviews the "MAT credit entitlement" at each reporting date.

1.11 Provisions and contingent liabilities

The company recognizes a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a present obligation that cannot be estimated reliably or a possible or present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

1.12 Earning Per Share

Earning per share are calculated by dividing the net profit or loss after taxes for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. For the purpose of calculating, diluted earnings per share, the net profit/ (loss) for the year attributable to equity shareholders and weighted average number of shares outstanding during the year are adjusted for the effects of dilutive potential equity shares.

1.13 Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

- (a) Provident Fund
- (b) State Defined Contribution Plan - Employer's contribution to Employees State Insurance

Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid e.g., under short-term cash bonus, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

The Provident fund and the state Defined Contribution Plan are operated by the Regional Provident Fund Commissioner as Applicable for all eligible employees under the schemes/. The company is required to contribute a specified percentage of payroll cost to the retirement benefit schemes to fund the benefits. These funds are recognised by the Income Tax Authorities.

The Company has recognised the following amounts in the statement of Profit & Loss

31 Segment Information

The Company has determined its operating segment as Printing Consumables, based on the information reported to the Managing Director of the company in accordance with the requirements of Accounting Standard 108 - "Operating Segment Reporting", notified under the Companies (Indian Accounting Standards) Rules, 2015.

32 Operating leases as a Lessee

32.1 Ind AS 116 (corresponding to IFRS 16) is under consideration of the National Advisory Committee on Accounting Standards (NACAS). Ind AS 116 is effective for accounting periods beginning on or after from 1 April 2019. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. Prior to Ind AS 116, Ind AS 17 required classifying leases as finance lease and operating lease

32.2 The company's significant leasing arrangements are in respect of operating premises, stores & godown. Leases in which a significant portion of the risks and rewards of ownership are not transferred to the company as lessee are classified as operating leases. Rental expenses made under operating leases (net of any incentives received from the lessor) are charged to profit or loss over the period of the lease on straight line basis. Where the rentals are structured solely to increase in line with expected general inflation to compensate for lessor's expected inflationary cost increase, such increases are recognized in the year in which such cost/benefits accrue. The leasing agreements with expiry due ranging between 3 months to four years are generally renewable by mutual consent on agreed terms. The aggregate lease rentals payable are charged as rent including lease rentals.

32.3 At the date of commencement of the lease, the Company recognizes a right-of-use (ROU) asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of 12 months or less (short-term leases) and low-value leases. For these short-term and low-value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

32.4 Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities include these options when it is reasonably certain that they will be exercised. ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses. ROU assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

32.5 The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are re-measured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option. Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

32.6 During the financial year 2023-24, the management conducted an assessment of its lease agreement. Upon evaluation, it was determined that the recognition criteria under the Indian Accounting Standards (Ind AS 116) were not satisfied. As a result, the company has derecognised the Right-of-Use (ROU) assets and the corresponding lease liabilities simultaneously. This derecognition reflects the company's adherence to the applicable accounting standards and ensures the accuracy of its financial statements.
