Corporate Presentation

The background is a deep red color with a complex, abstract pattern of concentric, swirling lines that create a sense of depth and movement, resembling a tunnel or a vortex.

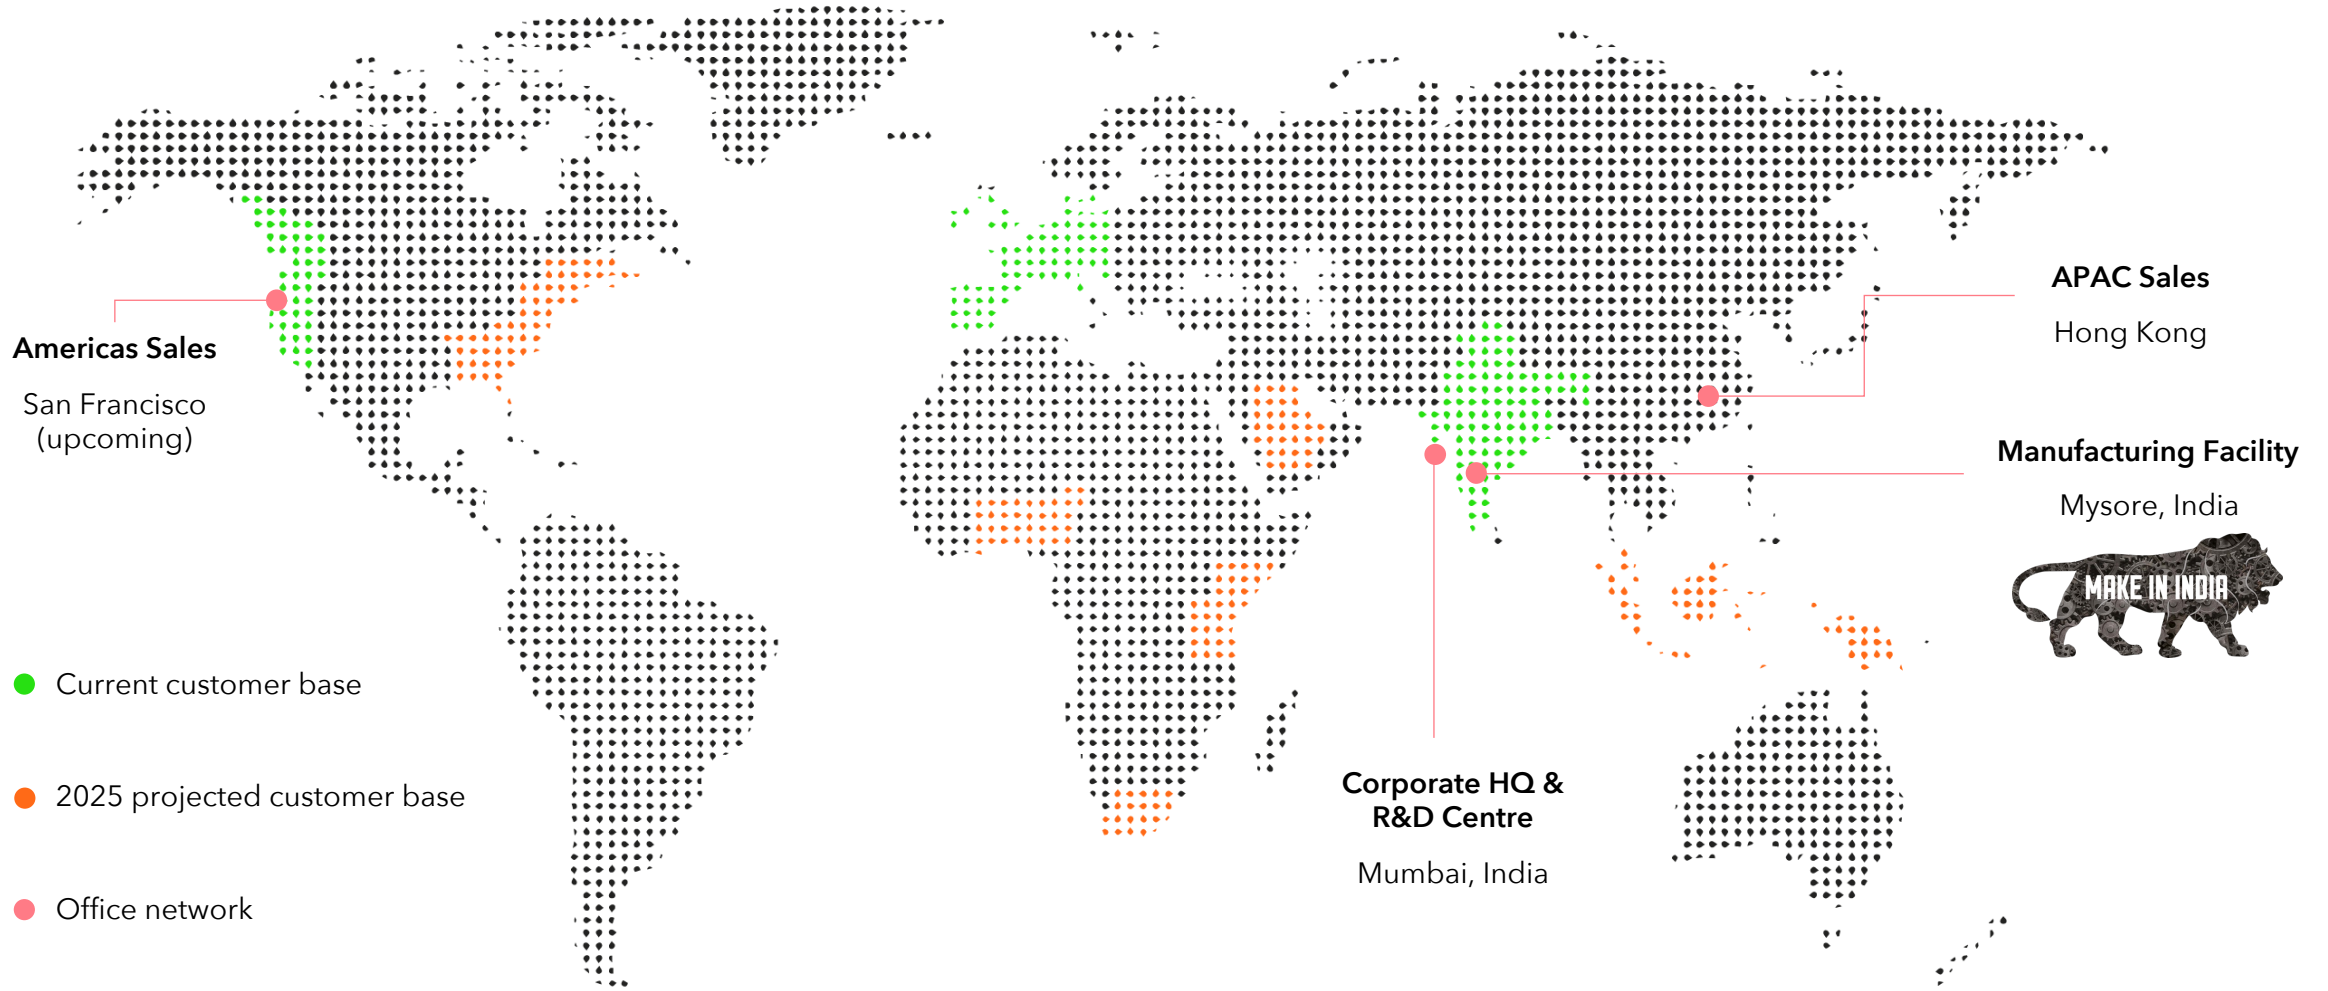

Who are we?

CWD at a glance

- India's leading Internet of Things (IoT) design house mainly servicing Consumer Electronics and Enterprise Solutions.
- CWD designs, develops and manufactures fully integrated products and solutions in-house thus optimizing costs as well as minimizing our customers' go-to-market launch time.
- All products that are designed and developed in the company are integrated with AI/ML and primarily focused on advanced short & long range radio technologies like NFC, Bluetooth Low Energy, Wi-Fi, 4G, 5G LTE, NB-IOT, CAT M1 etc.
- Established in 2016 and publicly listed on Bombay Stock Exchange in 2021. Ticker: CWD (BSE)

Partner Ecosystem: Tier-A Chipset Suppliers

Bluetooth® Low Energy (BLE)

Nordic Semi is currently the global market share leader in BLE chip supply and holds >39%¹ of all new registered BLE designs worldwide. CWD is their first recognized design partner in India with all our modules based on Nordic's high-quality chipsets.

¹Nordic's 2023 Full Year Report

LoRaWAN®

Semtech's chipsets currently power >90% of LoRa® based products globally. There are over 300mn² LoRa® devices deployed worldwide, and we are proud to partner with Semtech for our LoRa® modules and products.

²Semtech's website

Cellular-IoT

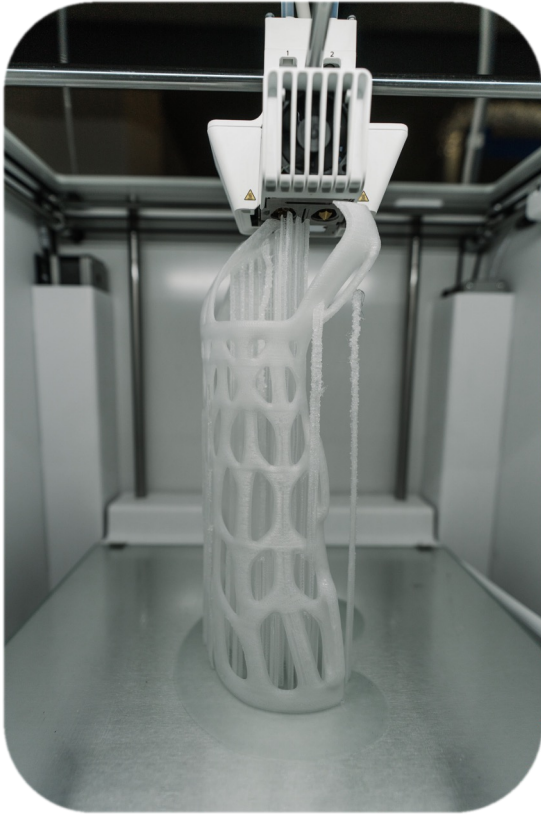

MediaTek dominates the global smartphone application processor market with a 40% share. MediaTek's share in the 5G smartphone chipset market rose to 29.2% in Q1 2024. This growth reflects a substantial increase in shipments, reaching 53 million units in Q1 2024, marking a 53% year-over-year increase.

Saving Lives by Preventing Vaccine Loss

The problem

> 50%

Improper Storage

Over 50% of global vaccines are wasted due to lack of temperature control, improper transport and storage conditions

1.5 Mn

Lives lost per year

19.7 Mn

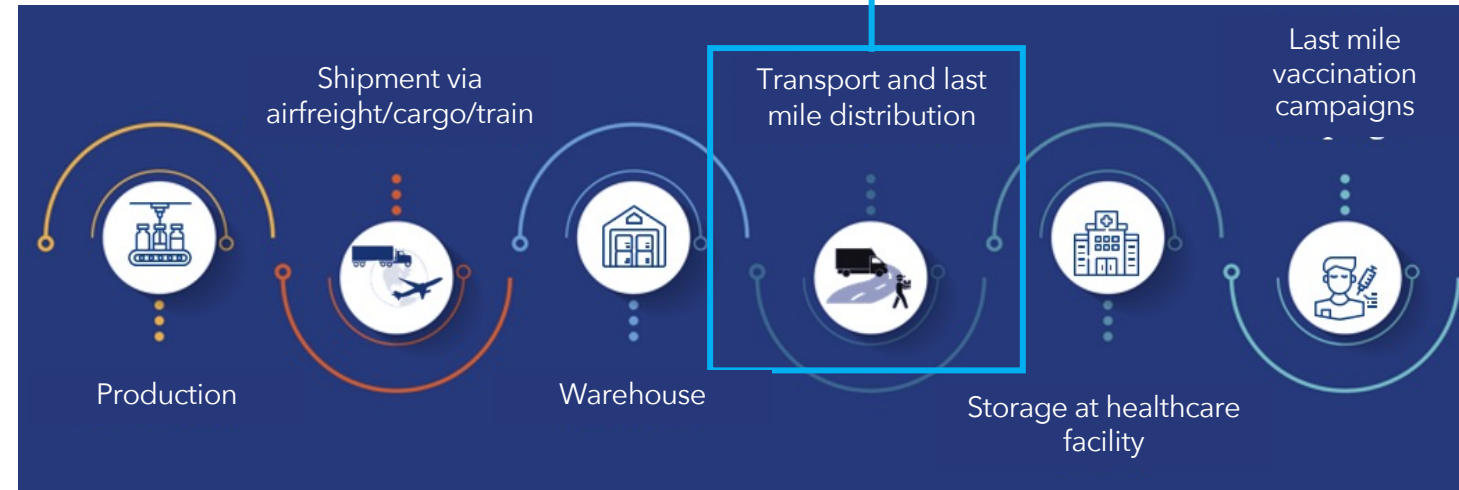

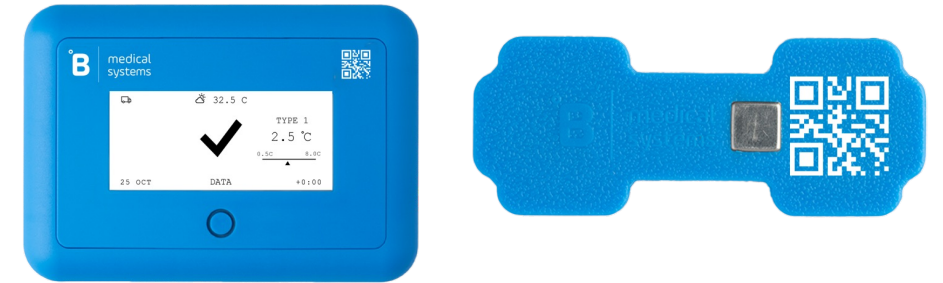

Under-immunized per year

GT Mini ensures end-to-end monitoring of all temperature-sensitive specimens

CWD's solution for B Medical

GT Mini addresses accessibility and transportation challenges especially for last mile delivery by providing internal & external temperature information during the **last mile transportation and the intra hub transportation**

- **Safeguards the efficacy** and **potency** of vaccines
- **Alerts the users** of any anomalies to enable quick corrective measures
- **Easily readable** display
- **Mobile application** connected via BLE to the display
- **Web application** for government officials and healthcare executives

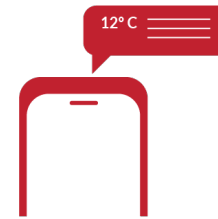

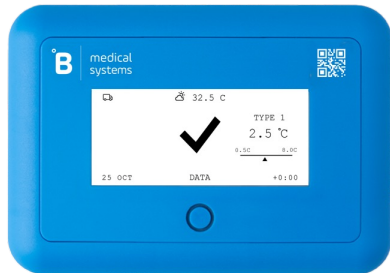

Saving Lives by Preventing Vaccine Loss

CWD'S GT Mini solution has now enabled wireless temperature monitoring for the UN, UNICEF, Nigerian Ministry of Health as well as the State Governments of Gujarat and Karnataka.

>500,000
units

130+
countries

Real-time temperature breach alerts allowing for immediate action to prevent vaccine inventory loss

End-to-end data visibility via an analytics dashboard. Accessible from anywhere in the world.

Complete data encryption and security in line with global and domestic regulations

Customer Projects

Health Monitoring and Virtual Fencing

- CWD's Cattle Tracker monitors the health and safety of cows via AI and ML algorithms notifying farmers about any health checkups and medical requirements prior to the animal becoming unwell.
- Integration with Jio Platforms that provides farmers and authorities with complete data visibility along with other subscription-based services

Real-time health monitoring:
Tracking of activity, rumination
and other animal vitals

Calving & abnormal
behaviour alerts for timely
medical help

Support for tag management,
animal breeding and health
management

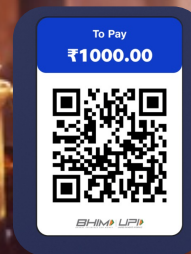

End-to-end data visibility and
actionable insights available
for farmers
