# 26. Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, and approach to adapt or mitigate the risk along with its financial implications, as per the following format

- Identifying the universe of relevant ESG topics: This was done based on discussions with internal stakeholders, peer review and benchmarking, sector scans, media reports and secondary sources that provided a pool of sustainability topics. These were further analyzed and evaluated for consideration at a strategic level. Adherence to crucial issues as per different standards and frameworks was also ensured.
- Detailing the stakeholder engagement methodology: We had sent detailed questionnaires to various stakeholder groups that were identified. Our external stakeholders included Customers, Shareholders and Vendors/Suppliers. Our internal stakeholders consisted of our employees and management team. While for other stakeholders we have done desktop research to incorporate their priorities.
- Data collection: We used online surveys to collect data and information from stakeholders to prioritize the list of identified ESG topics. Diverse responses were captured to understand the length and breadth of all possible issues. The designing of the questionnaire was done with the objective of bringing out the key issues, risks and opportunities from the stakeholders' point of view and then mapping it for the material issues. In addition to the survey, we conducted in-depth discussions with a subset of stakeholders to gain a comprehensive understanding of their primary concerns.
- Discussion with the management team, CSR & ESG Committee and the Board: the outcome of the exercise was discussed with the leadership to arrive at the key focus areas keeping in view, their relevance to stakeholders and business, as well as their impact on sustainability development.

|-----------|---|---|---|--|---|
| 1         | Water Scarcity and<br>Pollution               | Risk  | India faces significant water scarcity and pollution challenges, impacting both environmental sustainability and operational continuity for manufacturing industries like footwear.                 | Relaxo has reduced its water consumption through efficient measures, actively conducts water conservation projects across its operations, and is in the process of implementing Zero Liquid Discharge (ZLD) systems in all plants, ensuring treated water reuse in non-potable operations. | Initially, there may be capital investments required for upgrading equipment and implementing conservation measures. However, in the long term, reduced water consumption and potential regulatory compliance benefits can lead to positive financial outcomes.   |
| 2         | Carbon Emissions<br>and Climate Change        | Risk  | Increasing awareness and regulations related to carbon emissions and climate change pose risks to operations, supply chains, and market acceptance.   | Company has already begun the work on reducing emissions – Conversion of biomass-based boiler to PNG-based boilers; Transitioned to Servo Motors; Installation of VFDs on Motors; Installed Dust Collector; CFC to LED; Retro fitment of DGs to dual fuel mode.                            | Initial investments in technology upgrades and process changes may have upfront costs. However, reduced energy consumption, regulatory compliance, and enhanced brand value as a sustainable company can result in positive financial outcomes over time.   |
| 3         | Product Safety and<br>Quality Assurance       | Opportunity   | Ensuring product safety and quality is critical for customer satisfaction, regulatory compliance, and market competitiveness.   | The company ensures Product Safety & Quality assurance by Implementing stringent quality control measures, conducting regular product testing and certification including BIS Certification, and investing in research and development for innovative and sustainable materials.           | Costs associated with quality assurance and R&D investments may be incurred initially. However, enhanced customer trust, reduced recall risks, and market differentiation can lead to positive financial outcomes.  |
| 4         | Community<br>Engagement and<br>Social Impact  | Opportunity   | Engaging with local communities, supporting social causes, and investing in community development initiatives can enhance brand reputation, foster positive relationships, and create shared value. | The company has initiated projects aimed at creating long-term positive impacts on people's lives, focusing on key areas such as "Education & Skill Development," "Health" and "Environment Conservation."   | Costs associated with community projects and partnerships may be incurred. However, improved brand image, increased customer loyalty, and access to new markets can lead to positive financial outcomes and long-term sustainability.   |
| 5         | Energy Management<br>and Renewable<br>Sources | Opportunity   | Rising energy costs, dependence on fossil fuels, and environmental concerns necessitate a shift towards sustainable energy practices and renewable sources.   | The company has begun investing in energy-efficient technologies, adopting renewable energy sources for manufacturing facilities, optimizing energy consumption through smart systems and controls, and obtaining energy certifications or accreditations.                                 | Initial investments in renewable energy infrastructure and technology upgrades may be required. However, reduced energy costs, potential incentives or subsidies for renewable energy adoption, and enhanced brand reputation as a sustainable company can result in positive financial outcomes over time. |

| S.<br>No. | Material issue<br>identified                         | Indicate<br>whether risk<br>or opportunity<br>(R/O) | Rationale for<br>identifying the risk/<br>opportunity   | In case of risk, approach to<br>adapt or mitigate  | Financial implications of<br>the risk or opportunity<br>(Indicate positive or<br>negative implications)   |
|-----------|--|---|---|--|---|
| 6         | Digital<br>Transformation and<br>Technology Adoption | Opportunity   | Rapid advancements in digital technologies offer opportunities to enhance operational efficiency, product innovation, customer engagement, and supply chain visibility.               | Embracing digital transformation initiatives such as implementing data analytics and leveraging e-commerce platforms for sales and marketing and integrating smart technologies for real-time monitoring and decision-making.  | Initial investments in digital infrastructure, software solutions, and employee training may be required. However, improved productivity, cost savings from streamlined processes, enhanced customer experiences, and competitive advantages in the market can lead to positive financial outcomes and business growth. |
| 7         | Cybersecurity  | Risk  | Access to sensitive data by miscreants and loss of data integrity.  | Strong information security architecture deployed covering gateway and end points and rigour of implementation with access points exercised within the company using ISO 27001:2013 Framework.   | Negative. Weak cybersecurity in the company can have significant financial implications, including costs related to data breaches, loss of intellectual property, operational disruptions, legal fees, and damage to reputation and brand image.  |
| 8         | Occupational Health and Safety                       | Risk  | Failure to ensure health and safety could result in reduced availability of manpower, reduced employee morale, or even threaten the viability of operations in worst -case scenarios. | Relaxo realises the importance of the well-being and safety of its employees and is actively engaged in Identifying, comprehensively understanding, and implementing measures to control and eliminate risks associated with workplace hazards. This includes developing an automation and mechanization plan aimed at phasing out highrisk manual activities. Also, formulating a robust policy on Occupational Health & Safety to ensure the well-being and safety of all employees. | Negative. Failure to ensure health and safety could result in increased costs, damage to reputation and brand image.  |

#### **LEADERSHIP INDICATORS**

1. Awareness programmes conducted for value chain partners on any of the principles during the financial year:

The Company is committed to conducting business in an ethical, fair, legally compliant, socially conscious, and environmentally responsible manner. This belief extends to our valued Business Partners, as they play an integral role in our ecosystem and therefore we actively encourage them to embrace responsible corporate citizenship, aligning with our core values.

All agreements, contracts, and purchase orders entered into by Relaxo with our Business Partners affirm their commitment to these fundamental principles. This ensures a shared understanding and commitment to ethical, fair, legal, social, and environmental responsibilities across our business relationships.

As part of our ongoing efforts to promote responsible business practices, we have already initiated a series of discussions with our value chain partners. This initiative aims to deepen understanding and awareness of the importance of ethical conduct, fairness, legal compliance, social responsibility, and environmental stewardship within our business ecosystem.

Through collaborative dialogue and engagement, we seek to foster a culture of responsibility and sustainability throughout our value chain. By working together with our Business Partners, we aim to create positive impacts, not only within our organization but also in the broader community and environment.

# 2. Does the entity have processes in place to avoid/manage conflict of interest involving members of the Board? (Yes/No) If yes, provide details of the same.

Yes, the Company has a robust Code of Conduct specifically tailored for the Board of Directors and Senior Management Personnel.

The Code is intended to maintain the high standards of transparency, business conduct ethics, corporate culture and the values. The Code will also act as a deterrent from unethical doings and to promote ethical values and is the manifestation of the Company's commitment to successful operation of the Company's business in the best interest of the shareholders, creditors, employees and other business associates.

The code is in accordance with the regulatory requirements, and the Directors are obligated to disclose any interests or potential conflicts that may arise in the course of their duties.

These disclosures are included in the Annual Disclosures submitted to the Board, fostering a culture of accountability and transparency.

The Code of Conduct policy is regularly reviewed and updated to reflect evolving governance standards and best practices, reinforcing the Company's commitment to ethical conduct and corporate governance excellence.

The detailed Code of Conduct policy can be accessed through the link provided below:

#### Principle 2

#### Businesses should provide goods and services in a manner that is sustainable and safe

# **ESSENTIAL INDICATORS**

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of products and processes to total R&D and capex investments made by the entity, respectively.

|       | FY 2024 | FY 2023 | Details of improvements in environmental and social impacts |
|-------|---------|---------|---|
| R&D   |         |         |   |
| Capex |         | -       |   |

#### 2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Yes, the Company is dedicated to integrating sustainability practices across its inbound supply chain and remains committed to furthering these efforts. In line with this commitment, the Company prioritizes indigenous sourcing, utilizing locally available raw materials whenever feasible. This not only supports local economies but also reduces the environmental impact associated with transportation.

By prioritizing indigenous sourcing, utilizing sustainable materials, and optimizing transportation logistics, the Company continues to enhance the sustainability profile of its supply chain while aligning with global environmental goals and best practices.

# b. If yes, what percentage of inputs were sourced sustainably?

In order to reduce the carbon footprints due to logistics of input material; we strive to procure the maximum indigenous material from nearby sources which is estimated to ~70-75% of total indigenous sourcing.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

As of now, the Company doesn't have processes in place to reclaim their products.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

#### 10. Health and safety management system:

# a. Whether an occupational health and safety management system has been implemented by the entity? (Yes / No). If yes, the coverage of such system?

Yes, occupational health management system including Environmental Management System confirming to the requirement of standards ISO 45001:2018 and ISO 14001:2015 has been implemented which covers all manufacturing units. The Company believes that providing a safe and healthy work environment is essential for employee well-being, and that implementing best practices in occupational health and safety has a direct impact on overall performance. It aids not only in attracting good talents but also retaining those employees.

# b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?

While regularly implementing steps to enhance employee well-being and healthcare, a proper hazard identification risk management system has been implemented to assure ongoing improvement of the organization's occupational health and safety.

HIRA (Hazard Identification and Risk Assessment) methodology is used for hazard identification and risk assessment including study of MSDS (Material Safety Data Sheet) & Machine manuals, study of machine operation at shop floor, injury records, interaction with machine operators etc.

# c. Whether you have processes for workers to report the work-related hazards and to remove themselves from such risks. (Y/N)

Yes. Safety Committee Meetings, Daily shop floor meetings, interactions with the plant supervisors during their frequent rounds on the shop floor etc., are some of the processes enabling workers to report work-related hazards. Workers have been authorized to stop the machine and report to the immediate supervisor should they notice a work-related hazard.

# d. Do the employees/workers of the entity have access to non-occupational medical and healthcare services? (Yes / No)

Employees have access to non-occupational medical and healthcare facilities through company-arranged medical camps where reputed doctors from different disciplines/hospitals are available for health checkups and consultation including online consultation and awareness sessions. Additionally, every employee of the company and their nominated dependents are either covered through medical insurance or ESI.
