Revision total hip replacement surgery performed at Sivam Hospital

Chennai, Aug 15: Sivam Hospital successfully performed a revision total hip replacement surgery on an 82-year-old woman, who was admitted to the hospital with complaints of left hip pain and inability to walk for the past six months. After diagnosis, doctors found that her hip implants are loosened and extensive osteolysis in the acetabulum and proximal femur.

The patient Chithra underwent her initial hip replacement surgery 13 years ago after a hip fracture. Doctors gave her an uncemented hip replacement, that creates a permanent bond between the implant and the skeleton without cement. Physician and cardiologist examined the patient and found her fit to undergo the surgery. Revision total hip replacement surgery was carried out by a group of orthopaedic surgeons

Senior Joint Replacement Surgeon said, "There was extensive black debris due to metallosis and soft tissue scarring. Uncemented implants were used for the acetabulum and cemented implant was used for the femur. She is recovering well from the surgery."

under the leadership of Dr. V. Sivakumar, Senior Joint Replacement Surgeon. The surgery was successful and was done within 4 hours. The patient is now undergoing regular physio exercises for one month to back to her normal routine life.
