Standard Capital Markets Limited Enters Electric Vehicle Financing Sector to Support EV Battery and Two-Wheeler Loans

11th February 2025
New Delhi

Standard Capital Markets Limited (SCML), a leading player in the financial services industry, is excited to announce its entry into the electric vehicle (EV) financing sector. As part of its expansion strategy, the company will begin offering financing solutions for EV batteries and electric two-wheelers. This move aligns with SCML's commitment to promoting sustainable transportation and supporting the growing EV market.

With a focus on affordability and accessibility, SCML's new financing program is designed to provide convenient loan options for individuals looking to use electric two-wheelers and EV batteries in their day to day life. By offering competitive interest rates and flexible repayment terms, SCML aims to reduce the barriers to EV adoption and contribute to the global shift towards eco-friendly transportation.

“Our move into the EV financing market marks a significant milestone in SCML's growth trajectory,” said Mr. Ram Gopal Jindal, Managing Director of Standard Capital Markets Limited. “We recognize the critical role that electric vehicles will play in reducing carbon emissions and promoting environmental sustainability. As part of our efforts we are planning to deploy INR 1.00 Billion in the phased manner for EV Financing which may later be increased depending upon our leanings. By offering affordable financing solutions, we hope to bring meaningful impact in life of almost 10000 people in first year and hope to make EVs more accessible to a wider audience and encourage the transition to greener mobility.”

The financing program will cover the cost of electric two-wheelers, including scooters and motorcycles, as well as EV swappable batteries, which are often a significant part of the upfront investment for consumers. SCML's loans will be available to individual buyers.

Key benefits of the new financing program include:

Competitive interest rates to make EVs more affordable

Flexible repayment options tailored to the financial needs of customers

Fast and easy approval process, ensuring quick access to funds

Loan terms that cover both EV batteries and two-wheeler purchases

SCML's commitment to sustainable finance is further underscored by its efforts to partner with EV manufacturers and dealerships, as well as local governments and organizations, to support the infrastructure for electric vehicle adoption.

As part of its ongoing efforts to contribute to environmental sustainability, SCML remains dedicated to identifying and investing in innovative solutions that help create a cleaner and more sustainable future.
