Infosys collaborates with Nihon Chouzai to expand healthcare access in Japan

Develops mobile app, NiCOMS, to help patients access remote consultations and online payments with responsive, user-friendly interface

Tokyo, Japan – June 4, 2024: [Infosys](#) (NSE, BSE, NYSE: INFY), a global leader in next-generation digital services and consulting, today announced its collaboration with [Nihon Chouzai \(TSE\)](#), Japan's leading dispensing pharmacy chain, to expand healthcare access in Japan with enhanced online medication guidance services and payment solutions. As part of this collaboration, Infosys has developed a mobile application, NiCOMS, a pioneering telemedicine service that enables patients to receive remote medication guidance from registered pharmacists, eliminating the need for pharmacy visits.

Nihon Chouzai in collaboration with Infosys launched the web version of NiCOMS in September 2020. With an existing registered userbase of over 1,800,000, the mobile application will now integrate with [OkusuriTechoPlus](#), Nihon Chouzai's digital medication notebook, by merging the account and authentication processes. Infosys adopted an agile approach to develop the NiCOMS mobile app, allowing the company to nimbly adapt to evolving requirements driven by deregulation and COVID-19. The online medication guidance service on NiCOMS allows patients across Japan to receive medication instructions, consultations, and make payments during video calls with pharmacists. The responsive user interface enhances compatibility across a wide range of terminals, operating systems, and browsers, ensuring accessibility for all users and a smooth experience across devices.

Kunihiko Kurihara, Executive Officer, General Manager of IT Department, NIHON CHOUZAI CO., LTD., said, "Our collaboration with Infosys complements our best-in-class solution and gives it a new scale with the pioneering NiCOMS platform and its ability to bring positive experiences to our customers. What started a few years ago with the web version is now further strengthened by Infosys' agility and expertise in digital transformation, which has helped us realize our vision for a one-of-a-kind telemedicine service."

Hideyuki Aoki, Vice President, Country Head – Japan, Infosys, said, "Together with Nihon Chouzai, we are forging the future of digital healthcare in Japan through innovative solutions. This alliance will offer enhanced online medical services and increase access to quality pharmaceutical interventions, with an aim towards making significant impact at scale."

About Nihon Chouzai

Nihon Chouzai is one of the Japan's leading dispensing pharmacy operators with dispensing pharmacies in all prefectures in Japan and approximately 4,000 pharmacists. Since its establishment in 1980, the company has consistently pursued the "Separation of Drug Prescribing and Dispensing Services" to achieve its ideal function and role as a dispensing pharmacy that supports the Japan's health insurance

system, and has aggressively developed its dispensing pharmacy business. In addition to its efforts to promote the use of generic drugs and home medical care, the company has been actively investing in ICT from early on, and is committed to providing high-quality, innovative medical services needed in a hyper-aged society.
