- Waste prevention
- Reusing waste
- Recycling waste
- Responsible disposal of waste

Furthermore at Company level, we use a hierarchy of waste reduction to implement the concepts of the circular economy, covering the aspects of Recover, Reduce, Reuse & Recycle including the following areas:

- Recovering resources as much as possible
- Reducing usage of natural resources and materials
- Reusing waste wherever practicable
- Recycling materials whenever possible

With respect to hazardous wastes, these are managed in accordance with the applicable Regulations (State Pollution Control Board (SPCB)/Central Pollution Control Board (CPCB) Rules and Guidelines). As per these Regulations, all of these items are handled, delivered, recycled, stored and disposed of through licenced agencies. Further, proper records are being maintained for all types of hazardous waste and its movement.

With respect to non-hazardous wastes, over the period, the Company has devised specific solutions to handle and dispose of non-hazardous waste in the most efficient available mechanism. These solutions require either no or very low investment, to achieve advancement both commercially and environmentally. For example, to eliminate the need for wood pallets for delivering the products, we have started using the recycled cardboard boxes as a filler for packaging material. Use of reusable pallets and recycling programmes for paper and plastic are some of the other initiatives.
