1. Adani completed acquisition of Holcim's India cement business consisting of Ambuja Cements Limited and ACC Limited on September 15, 2022

2. EBITDA reduction on account of one-off impact of fall in edible oil prices in Q2 FY2023. The higher priced inventory procured prior to price fall resulted in higher COGS in Q3 FY2023

# Adani Portfolio: Credit Highlights

- Adani Portfolio companies operate in utility and infrastructure businesses with more than 81% of EBITDA being generated from core infrastructure businesses providing assured & consistent cash flow generation.
- The platform has a strong asset base which has been built over three decades that supports the resilient critical infrastructure and guarantees best-in-class asset performance over the entire life cycle.
- No material refinancing risk and near-term liquidity requirement as there is no near-term significant debt maturity.
- Rating affirmation from international and domestic rating agencies signifies the underlying credit quality with adequate financial profile – many businesses have underlying rating of BBB but it remains constrained by sovereign rating.

### Moody's: Baa3 (Sovereign Equivalent)

The affirmation of APSEZ's issuer ratings considers the company's strong market position as the largest port developer and operator in India by cargo volume and its strong liquidity and financial profile. The stable outlook on the ratings reflects Moody's expectation that APSEZ would continue to generate relatively steady cash flow over the next 12-18 months and would be able to realign its capital spending plans in the event of a liquidity squeeze.

### S&P: BBB- with negative outlook

We believe the Adani companies we rate have long-established infrastructure assets with strong fundamentals and cash flows. This rating action does not impact the rated debt issued by Adani International Container Terminal Pte. Ltd. (BBB-/Stable). These debts are fully secured and have cash flow waterfalls that prioritize operating expenditure and debt service over distributions. Given the ring-fenced assets, in our view the structure of these financings currently sufficiently protects investors.

### Fitch: BBB- (Sovereign Equivalent)

We continue to assess APSEZ's underlying credit profile at 'BBB'. APSEZ's underlying credit profile reflects its status as India's largest commercial port operator, with best-in-class operational efficiency.

### Moody's : Baa3 with negative outlook

The affirmation of ATSOL's senior secured bond ratings reflects the company's close credit linkage with its wholly-owned parent, Adani Transmission Limited (ATL), owing to the parental guarantee provided by ATL over the rated bonds and the event of default provisions linked to ATL's solvency. ATL's credit profile, in turn, reflects the predictable revenue from its diversified portfolio of quality regulated or contracted transmission and distribution assets, as well as the group's aggressive growth strategy and the incremental debt required to fund its capital spending.

## Debt Maturity Profile as on 31 Dec 2022 (INR Cr)

Cash and cash equivalents<sup>1</sup>: 3,486 cr  
Run rate EBITDA<sup>2</sup>: 5,989 cr

Key Assumptions for Debt Maturity Profile for ATL:

1. Go-to-market facility of INR 9,628 cr due in FY26 (which includes undrawn amount of INR 6,633 cr), assumed to be refinanced with amortising debt till FY53
2. Debt maturity profile also includes repayment of currently undrawn amount of INR 546 cr for under construction transmission asset (Warora-Kurnool Transmission Ltd)

### Fitch: BBB- (Sovereign Equivalent)

ATL's business profile is supported by the company's regulated asset base, payment pooling mechanism for transmission assets.

## Business Updates

- ATGL has added 48 new CNG stations in Q3FY23 taking total **CNG stations to 382**
- PNG connections increased to **6.56 lakh households**. PNG industrial & commercial connections increased to **6,290**
- 32 EV charging points installed across multiple strategic locations
- CNG volume increased 30% Y-o-Y due to increase in consumption and network expansion. PNG volume has decreased by 11% Y-o-Y due to gas curtailment by suppliers considering high prices
- Steel pipeline network increased to 10,585 inch-km, with 423 inch-km pipe laid in Q3FY23.

- Increase of geographic spread with contribution of New Geographical Areas (GAs) in volume mix to 21% in 9MFY23 from 16% in FY22
- **Gas sourcing:** ATGL continued its effort to have efficient gas sourcing to reduce the impact of volatility in gas price as follows:
  - Sourcing Volumes through IGX and Bilateral trades
  - Short term contracts helped in improving the gas cost by taking benefit of falling prices

## Domestic Ratings

**ICRA : AA- / Stable**

The rating reaffirmation for Adani Total Gas Limited (ATGL) considers its promoters' strong profile with equal holding (37.4%) by Total Energies SE (Total; rated A1(Stable)/P1 by Moody's) through Total Holdings SAS and the Adani family. ICRA expects ATGL to have significant operational synergies with Total over the long-term. As Total is among the leading liquefied natural gas (LNG) players in the world, ATGL can benefit from a favourable long-term LNG sourcing tie-up for its operations.

### Moody's: Ba3 with negative outlook

The affirmation of AGEL's senior secured bond rating reflects its predictable cash flow backed by long-term power purchase agreements (PPAs), its large and diversified portfolio of solar and wind generation projects, and its very high financial leverage.

### S&P Ratings

This rating action does not impact the rated debt issued by Adani Green Energy Ltd. Restricted Group 2 (BB+/Stable) and Parampujya Solar Energy Private Ltd. Restricted Group (BB-/Stable). These debts are fully secured and have cash flow waterfalls that prioritize operating expenditure and debt service over distributions. Given the ring-fenced assets, in our view the structure of these financings currently sufficiently protects investors.

### India Ratings : A+ / stable

Assets under Adani Green Energy Limited ('IND A+/Stable') are competitively bid with long-term offtake agreements providing adequate cash flow visibility.

## Adani Portfolio - Credit Note

### A. Executive Summary

This note outlines the key credit aspects of Adani portfolio companies with following key summary-

- Adani Portfolio companies operate in utility and infrastructure businesses with more than 81% of EBITDA being generated from core infrastructure businesses providing assured & consistent cash flow generation.
- The platform has a strong asset base which has been built over three decades that supports the resilient critical infrastructure and guarantees best-in-class asset performance over the entire life cycle.
- No material refinancing risk and near-term liquidity requirement as there is no near-term significant debt maturity.
- Rating affirmation from international and domestic rating agencies signifies the underlying credit quality with adequate financial profile - many businesses have underlying rating of BBB but it remains constrained by sovereign rating.

## B. Leverage halved - consistent deleveraging since last 9 years

Adani Portfolio companies have a track record of successfully executing marquee large-scale projects in the infrastructure and utility space.

While doing so, the companies have consistently delivered, with a strong cash-flow generation profile, underpinned by the long-term contractual framework for the projects, as well as a robust asset base.

The portfolio level Net Debt to RR EBITDA ratio has decreased from 7.6x in FY2013 to 3.2x in FY2022 (refer Chart A). In the same period, RR EBITDA has grown at a CAGR of 22%, whereas the debt has grown only at 11% CAGR.

Chart A: Net Debt / RR EBITDA

Note: The above chart of portfolio is prior to acquisition of Cement Business and represents the financial years; RR EBITDA: Run-rate EBITDA considers annualized EBITDA considering annualized EBITDA for assets commissioned during the year

### Latest Rating Excerpts:

#### **Moody's: Baa3 (Sovereign Equivalent)**

*The affirmation of APSEZ's issuer ratings considers the company's strong market position as the largest port developer and operator in India by cargo volume and its strong liquidity and financial profile. The stable outlook on the ratings reflects Moody's expectation that APSEZ would continue to generate relatively steady cash flow over the next 12-18 months and would be able to realign its capital spending plans in the event of a liquidity squeeze.*

### **Moody’s : Ba3 with negative outlook**

*“The affirmation of AGEL's senior secured bond rating reflects its predictable cash flow backed by long-term power purchase agreements (PPAs), its large and diversified portfolio of solar and wind generation projects, and its very high financial leverage.*

*The change in the outlook to negative on AGEL considers the company's large capital spending program and dependence on sponsor support, potentially in the form of subordinated debt or shareholder loans, which will likely be less certain in the current environment. The negative outlook also factors in the company's significant refinancing needs of around \$2.7 billion in fiscal year ending March 2025 (fiscal 2025) and limited headroom in its credit metrics to manage any material increase in funding costs.”*
