Products & Services

PFS offers various investment and financing products/solutions to infrastructure and power projects, the details are illustrated in the graphic below:

Debt Financing

PFS provides debt finance in the form of Long Term Loan, Short Term Loan as well as Bridge Financing to the projects in the entire energy value chain i.e. from power generation projects to transmission and distribution projects, fuel sources and to the related infrastructure. In addition, it also provides **mezzanine finance, last mile finance, equity financing, structured loans, gap financing etc.** There are various factors considered for the debt assistance to any particular project/ borrowing company viz. market conditions, regulatory requirements, risk and reward from the projects etc.

PFS team assists companies in structuring and raising debt and mezzanine capital tailored to their needs. Leveraging on its long term relationships with Banks and Financial Institutions and its experience in executing structured and vanilla debt transactions, PFS handholds companies in structuring and raising capital, which is optimal in terms of cost and structure. With an in-house core team of professionals with sectoral as well cross-functional knowledge, PFS helps its clients to become competitive, effective and successful.

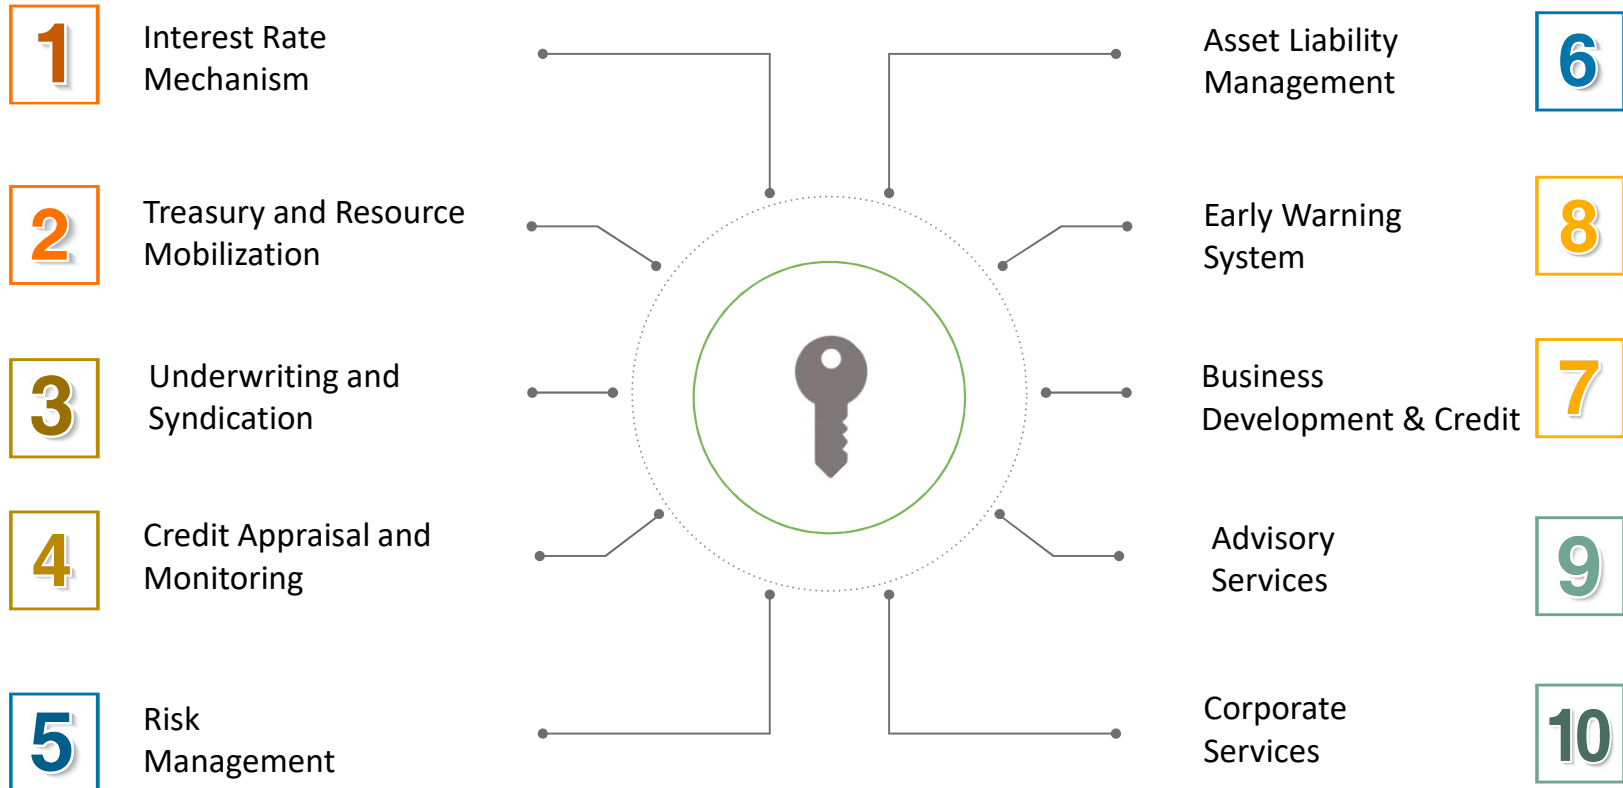

Fee Based Services

Advisory Services

PFS provides advisory services to the various infrastructure, renewable energy, energy efficiency projects and other projects for helping in efficient installation of these projects. The advisory services are focused in the areas of finance and in the areas which lie at the intersection of finance and the energy sector.
