**(g) Rationale and benefits of the Scheme as perceived by the board of directors of the Company:**

- (A) The Amalgamation would be in the best interest of the Companies and their respective shareholders, employees, creditors and other stakeholders as the Amalgamation is expected to:
  - (i) result in an Amalgamated Company that is expected to have improved financial strength. Particularly, the Companies believe the combined business will augment industry-leading revenue growth and profitability. Further, the Companies expect that their combined balance sheet will provide diverse strategic options and flexibility arising from cost efficiencies and synergies such as optimization of sales, general and administration (SG&A) costs, consolidation of delivery operations (domestic and overseas) and of overseas entities / branches.
  - (ii) enable the combined business to derive benefits by way of creating more opportunity for growth in customer relationships/ value creation through enhanced attention to brand building, including the corporate brand, develop stronger relationships across its partner ecosystem, using the augmented intellectual capital and stronger implementation capabilities resulting from the Amalgamation.
  - (iii) enable the combined business to cross-sell and up-sell opportunities as part of one combined business, achieve a higher number of active clients, cater to a wider customer base and diversify their combined revenue profile with reduced concentration risks.
  - (iv) help the combined business exploit the complementary capabilities of both Companies. Particularly, it gives the combined business the opportunity to consolidate its position in the banking, financial services and insurance (BFSI) vertical, enhance scale in high-growth verticals like high-tech and consumer packaged goods, retail and expand into new verticals (such as travel, transport and hospitality).
  - (v) significantly enhance scale for the combined business and bridge the gap between the Companies and their peers. With this enhanced scale, the Amalgamated Company should be able to bid for larger deals and also drive a cohesive “go to market” strategy across the globe.
- (B) Accordingly, the Scheme is expected to be in the best interests of the Applicant Company and its respective shareholders, and creditors.

**10 Rationale of the Scheme:**

10.1 The Amalgamation would be in the best interest of the Companies and their respective shareholders, employees, creditors and other stakeholders as the Amalgamation is expected to:

- (a) result in an Amalgamated Company that is expected to have improved financial strength. Particularly, the Companies believe the combined business will augment industry-leading revenue growth and profitability. Further, the Companies expect that their combined balance sheet will provide diverse strategic options and flexibility arising from cost efficiencies and synergies such as optimization of sales, general and administration (SG&A) costs, consolidation of delivery operations (domestic and overseas) and of overseas entities / branches.
- (b) enable the combined business to derive benefits by way of creating more opportunity for growth in customer relationships/value creation through enhanced attention to brand building, including the corporate brand, develop stronger relationships across its partner ecosystem, using the augmented intellectual capital and stronger implementation capabilities resulting from the Amalgamation.
- (c) enable the combined business to cross-sell and up-sell opportunities as part of one combined business, achieve a higher number of active clients, cater to a wider customer base and diversify their combined revenue profile with reduced concentration risks.
- (d) help the combined business exploit the complimentary capabilities of both Companies. Particularly, it gives the combined business the opportunity to consolidate its position in the banking, financial services and insurance (BFSI) vertical, enhance scale in high-growth verticals like high-tech and consumer packaged goods, retail and expand into new verticals (such as travel, transport and hospitality).
- (e) significantly enhance scale for the combined business and bridge the gap between the Companies and their peers. With this enhanced scale, the Amalgamated Company should be able to bid for larger deals and also drive a cohesive “go to market” strategy across the globe.

10.2 This Scheme provides for the following:

- (a) the amalgamation of the Amalgamating Company with the Amalgamated Company and consequent dissolution of the Amalgamating Company without winding up, the consequent issue of fully paid-up equity shares by the Amalgamated Company to the shareholders of the Amalgamating Company in accordance with the Share Exchange Ratio (*as defined hereinafter*) (“Amalgamation”); and

30	Gujarat High Court ("GHC")	L&T vs State of Gujarat & Others	Superintendent of Stamps, Gandhinagar has issued a notice for deficit stamp duty under Section 33 of the Indian Stamp Act, 1899 in relation to SEZ units in Vadodara. L&T has contended that under Section 51 of the Land Acquisition Act, no stamp duty is required.  Despite the above, stamp duty department has imposed Rs. 1,20,00,000/- of duty and Rs. 1,20,00,000/- of penalty. Out of Rs 2,40,00,000/-, L&T was asked by CCRA and High Court to pay Rs. 60,00,000/- with Rs. 60,00,000/- Corporate Guarantee.  As three SEZ units wanted to exit out of SEZ, SEZ developer applied for decrease in SEZ area (partial denotification). As a part of that process, SEZ developer is required to refund various exemptions availed, one of them is stamp duty on land. Industries commissioner granted in-principle approval for decrease in SEZ area subject to no due certificate from Industries Commissioner, Commercial Tax dept. & Stamp duty dept. Stamp duty dept. demanded stamp duty on land acquired in 2002 and also stamp duty on leased premises to SEZ units as they applied for exit from SEZ. While passing order on 23 <sup>rd</sup> October 2015, stamp duty dept. inflicted equivalent penalty and hence, the same was challenged before the GHC by Special Civil Application no. 20564/2015, whereby GHC relegated the matter to statutory authority CCRA and as per further directions issued, SEZ Developer deposited 25% (Rs. 30,21,163/-principal) while filing appeal/revision before CCRA plus deposited (Rs. 30,21,163/-principal) with Industries Commissioner and deposited secured 50% (Rs. 60,42,325/-principal) by way of Corporate Guarantee in favour of CCRA. CCRA also passed an order dated 26 <sup>th</sup> August 2016 against L&T SEZ developer and three units in revision / appeal, which is now challenged before GHC granting stay on recovery of penalty and coercive action. The Interim relief is extended.	Rs. 30,21,163/-	The Stay Order is still operational. Rs. 90,00,000/- were deposited with the Registry. As per procedure, Counsel for the Respondent filed an application seeking permission to withdraw amount deposited in the registry.  Respondents have to furnish Bank Guarantee of the equivalent value prior to withdrawing of the amount.

### APPROACH FOR RECOMMENDATION OF FAIR EQUITY SHARE EXCHANGE RATIO

The Scheme contemplates the merger of Mindtree into LTI. Arriving at the fair equity share exchange ratio for the Proposed Amalgamation of Mindtree into LTI would require determining the relative value of equity shares of Mindtree and LTI. These values are to be determined independently, but on a relative basis for the Valuation Subjects, without considering the effect of the Proposed Amalgamation.

Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for mergers and our reasonable judgment, in an independent and bona fide manner.

The valuation approach adopted by EY and GT is given in Annexure 1A and 1B respectively (Annexure 1A and 1B together referred to as Annexures).

### BASIS OF FAIR EQUITY SHARE EXCHANGE RATIO

The fair equity share exchange ratio has been arrived at on the basis of a relative equity valuation of Valuation Subjects based on the various approaches / methods explained in the Annexures and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of the Valuation Subjects, having regard to information base, key underlying assumptions and limitations. Though different values have been arrived at under each of the methodologies as mentioned in the Annexures, for the purposes of recommending a fair equity share exchange ratio it is necessary to arrive at a single value for each of the Valuation Subjects. For this purpose, it is necessary to give appropriate weights to the values arrived at under each methodology.

While we have provided our recommendation of the Fair Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Fair Equity Share Exchange Ratio. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

We have independently applied approaches / methods discussed in the Annexures, as considered appropriate, and arrived at the relative value per share of the Companies. To arrive at the consensus on the fair equity share exchange ratio for the Proposed Amalgamation, suitable minor adjustments / rounding off have been done.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, we recommend the following fair equity share exchange ratio for the Proposed Amalgamation of Mindtree into LTI:

73 (Seventy three) equity shares of LTI of INR 1/- each fully paid up for every 100 (Hundred) equity shares of Mindtree of INR 10/- each fully paid up.

It should be noted that we have not examined any other matter including economic rationale for the Proposed Amalgamation per se or accounting, legal or tax matters involved in the Proposed Amalgamation.

### Annexure 1A- Approach to Valuation – EY

There are primarily three approaches in valuation (viz., Cost/Asset Approach, Market Approach and Income Approach). For any valuation, all the approaches may not be relevant and therefore will not give a fair estimate of value. Hence, the approach most suitable for that specific business / company must be applied in the valuation exercise, based on the experience and common practices adopted by valuers.

According to IVS 104 “Fair Value is the estimated amount for which an asset or liability should exchange on the Valuation Date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion”.

We have adapted internationally accepted valuation standards and approaches in delivering our valuation conclusion. There are several principal valuation approaches under International Valuation Standard of which we have considered only those approaches to the extent, it is applicable and relevant.

The various approaches generally adopted in valuation are as under:

1. Cost/Asset Approach: Net Asset Value Method
2. Income Approach: Discounted Cash Flows (DCF) Method
3. Market Approach: Comparable Companies Market Multiple Method, Comparable Transactions Method and Market Price Method

We have used the Market Approach (i.e., Market Price Method and Market Multiples Method) and Income Approach (i.e., DCF method) for valuation of both the Companies

Fair valuation of the Companies factors various intangible assets whether or not recorded in the financials of the respective companies.

**Cost/ Asset Approach – Net Asset Value (NAV) method:** Under this approach, the net asset value method is considered, which is based on the underlying net assets and liabilities. Cost approach is not considered suitable for IT Companies since it does not capture the earnings potential or value of intangibles in the business. Hence, in the present valuation analysis, we have not considered NAV method.

**Income Approach - Discounted Cash Flow (DCF) method:** Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm. Such DCF analysis involves determining the following:

- *Estimating future free cash flows:*

Free cash flows are the cash flows expected to be generated by the company that are available to the providers of the company's capital – both debt and equity.

- *Appropriate discount rate to be applied to cash flows i.e., the cost of capital:*

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

We have used this method for valuation. The financial forecasts have been prepared using publicly available information on the two companies and on the sector, consensus of analyst forecasts as compiled by financial information providers, suitable extrapolations, and other qualitative factors.

**Market Approach - Multiples method:** Under this method, one attempts to measure the value of the shares / business of a company by applying the derived market multiple based on market quotations of public / listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company / business. This valuation is based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances. In the present valuation analysis, we have considered relative PE multiples for arriving at the value per equity share of the Companies.

**Market Approach - Market Price (MP) method:** Under this method, the value of shares of a company is determined by taking the average of the market capitalization of the equity shares of such companies as quoted on a recognized stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price.

The equity shares of Companies are listed on NSE and BSE and are traded frequently. In these circumstances the share prices observed on NSE over a reasonable period have been considered for arriving at the value per equity share of the Companies under the Market Price method. For arriving at the market price, we have considered prices over appropriate period up to 05 May 2022. We have also considered relative target prices indicated by various analysts tracking the companies and the sector

**Fair Valuation:**

We have arrived at the fair value of equity shares of both Companies by applying below mentioned weights to the value derived under various methods.

**The computation of fair equity share exchange ratio for Amalgamation of Mindtree into LTI by EY is tabulated below:**

Valuation Approach	Mindtree (A)		LTI (B)	
	Value per Share of Mindtree (INR)	Weight	Value per Share of LTI (INR)	Weight

### **Annexure 1B- Approach to Valuation - GT**

We have given due cognizance to the International Valuation Standards (“IVS”) for the purpose of arriving at the valuation of the Companies. The valuation base considered is Fair Value. The IVS defines Fair Value as the “estimated amount for which an asset or liability should exchange on the Valuation Date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion”.

As discussed below, there are several commonly used and accepted methods for carrying out the valuation under the three principal approaches, which have been considered in the present case, to the extent relevant and applicable, including:

- a) Cost/Asset Approach – Net Asset Value Method
- b) Income Approach – Discounted Cash Flow Method
- c) Market Approach:
  - i. Market Price Method
  - ii. Comparable Companies Multiple Method.

#### **Net Asset Value (“NAV”) Method**

The asset-based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This valuation approach is mainly used in case where the firm is to be liquidated i.e., it does not meet the “going concern” criteria or in case where the assets base dominates earnings capability.

The Scheme of Arrangement would normally be proceeded with, on the assumption that the companies being part of the amalgamation process are going concerns and an actual realization of their operating assets is not contemplated. Hence, we have not considered the NAV method to value the Companies.

#### **Discounted Cash Flow (“DCF”) Method**

The DCF method values the asset by discounting the cash flows expected to be generated by the asset for the explicit forecast period and also the perpetuity value (or terminal value) in case of assets with indefinite life.

Using the DCF analysis involves determining the following:

- a) Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company’s capital – both debt and equity.
- b) Appropriate discount rate to be applied to cash flows i.e., the cost of capital:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

Since the Companies are listed on Stock Exchanges, the information related to future financial performances is price sensitive and not made available to us. We have used the analysts forecast for the two companies available with some of the subscribed databases to determine value under the DCF method for valuation of the Companies.

**Market Price (“MP”) Method**

The market price of an equity share as quoted on stock exchanges is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

The equity shares of Companies are listed on NSE and BSE and are traded frequently. In these circumstances the share prices observed on NSE over a reasonable period have been considered for arriving at the value per equity share of the Companies under the Market Price method. For arriving at the market price, we have considered the volume weighted average price on NSE, over a reasonable period prior to the relevant date as 05 May 2022, the last working day immediately prior to the date of announcement of the Proposed Amalgamation.

**Comparable Companies Multiple (“CCM”) Method**

Under this method, value of the equity shares of a company/ business undertaking is arrived at by using multiples derived from valuations of comparable companies traded on active market. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

In the present valuation analysis, we carried out research on comparable companies for Mindtree and LTI, listed on Indian Stock exchanges and having similar operations. The Select multiples have been applied for determining the value per share of the Companies under this method.

**Fair Valuation:**

We have arrived at the fair value of equity shares of both Companies by applying below mentioned weights to the value derived under various methods.

**The computation of fair equity share exchange ratio for Amalgamation of Mindtree into LTI by GT is tabulated below:**

Valuation Approach	Mindtree (A)		LTI (B)	
	Value per Share of Mindtree (INR)	Weight	Value per Share of LTI (INR)	Weight
Cost Approach*	NA	NA	NA	NA
Income Approach – DCF Method (i)	4,064.9	20%	5,407.5	20%
Market Approach				
Market Price method (ii)	3,919.7	40%	5,687.2	40%
Comparable Companies Multiples method (iii)	3,489.7	40%	4,562.9	40%
Relative Value per Share (Weighted Average of (i),(ii) and (iii))	<b>3,776.7</b>		<b>5,181.5</b>	
<b>Fair Equity Share Exchange Ratio (A/B) (Rounded)</b>	<b>0.73</b>			

NA = Not Applied / Not Applicable

\*As mentioned earlier, the Cost/Asset approach is not used in the present case, since both the Companies i.e., LTI & Mindtree, are going concerns and hence an actual realization of their operating assets is not contemplated.

**10 Rationale of the Scheme:**

10.1 The Amalgamation would be in the best interest of the Companies and their respective shareholders, employees, creditors and other stakeholders as the Amalgamation is expected to:

- (a) result in an Amalgamated Company that is expected to have improved financial strength. Particularly, the Companies believe the combined business will augment industry-leading revenue growth and profitability. Further, the Companies expect that their combined balance sheet will provide diverse strategic options and flexibility arising from cost efficiencies and synergies such as optimization of sales, general and administration (SG&A) costs, consolidation of delivery operations (domestic and overseas) and of overseas entities / branches.
- (b) enable the combined business to derive benefits by way of creating more opportunity for growth in customer relationships/value creation through enhanced attention to brand building, including the corporate brand, develop stronger relationships across its partner ecosystem, using the augmented intellectual capital and stronger implementation capabilities resulting from the Amalgamation.
- (c) enable the combined business to cross-sell and up-sell opportunities as part of one combined business, achieve a higher number of active clients, cater to a wider customer base and diversify their combined revenue profile with reduced concentration risks.
- (d) help the combined business exploit the complimentary capabilities of both Companies. Particularly, it gives the combined business the opportunity to consolidate its position in the banking, financial services and insurance (BFSI) vertical, enhance scale in high-growth verticals like high-tech and consumer packaged goods, retail and expand into new verticals (such as travel, transport and hospitality).
- (e) significantly enhance scale for the combined business and bridge the gap between the Companies and their peers. With this enhanced scale, the Amalgamated Company should be able to bid for larger deals and also drive a cohesive “go to market” strategy across the globe.

10.2 This Scheme provides for the following:

- (a) the amalgamation of the Amalgamating Company with the Amalgamated Company and consequent dissolution of the Amalgamating Company without winding up, the consequent issue of fully paid-up equity shares by the Amalgamated Company to the shareholders of the Amalgamating Company in accordance with the Share Exchange Ratio (*as defined hereinafter*) (“Amalgamation”); and

- 4.1. ### APPROACH FOR RECOMMENDATION OF FAIR EQUITY SHARE EXCHANGE RATIO

The Scheme contemplates the merger of Mindtree into LTI. Arriving at the fair equity share exchange ratio for the Proposed Amalgamation of Mindtree into LTI would require determining the relative value of equity shares of Mindtree and LTI. These values are to be determined independently, but on a relative basis for the Valuation Subjects, without considering the effect of the Proposed Amalgamation.

Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for mergers and our reasonable judgment, in an independent and bona fide manner.

The valuation approach adopted by EY and GT is given in Annexure 1A and 1B respectively (Annexure 1A and 1B together referred to as Annexures).

### BASIS OF FAIR EQUITY SHARE EXCHANGE RATIO

The fair equity share exchange ratio has been arrived at on the basis of a relative equity valuation of Valuation Subjects based on the various approaches / methods explained in the Annexures and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of the Valuation Subjects, having regard to information base, key underlying assumptions and limitations. Though different values have been arrived at under each of the methodologies as mentioned in the Annexures, for the purposes of recommending a fair equity share exchange ratio it is necessary to arrive at a single value for each of the Valuation Subjects. For this purpose, it is necessary to give appropriate weights to the values arrived at under each methodology.

While we have provided our recommendation of the Fair Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Fair Equity Share Exchange Ratio. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

We have independently applied approaches / methods discussed in the Annexures, as considered appropriate, and arrived at the relative value per share of the Companies. To arrive at the consensus on the fair equity share exchange ratio for the Proposed Amalgamation, suitable minor adjustments / rounding off have been done.

*[Handwritten signature]*

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, we recommend the following fair equity share exchange ratio for the Proposed Amalgamation of Mindtree into LTI:

73 (Seventy three) equity shares of LTI of INR 1/- each fully paid up for every 100 (Hundred) equity shares of Mindtree of INR 10/- each fully paid up.

It should be noted that we have not examined any other matter including economic rationale for the Proposed Amalgamation per se or accounting, legal or tax matters involved in the Proposed Amalgamation.

### Annexure 1A- Approach to Valuation – EY

There are primarily three approaches in valuation (viz., Cost/Asset Approach, Market Approach and Income Approach). For any valuation, all the approaches may not be relevant and therefore will not give a fair estimate of value. Hence, the approach most suitable for that specific business / company must be applied in the valuation exercise, based on the experience and common practices adopted by valuers.

According to IVS 104 “Fair Value is the estimated amount for which an asset or liability should exchange on the Valuation Date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion”.

We have adapted internationally accepted valuation standards and approaches in delivering our valuation conclusion. There are several principal valuation approaches under International Valuation Standard of which we have considered only those approaches to the extent, it is applicable and relevant.

The various approaches generally adopted in valuation are as under:

1. Cost/Asset Approach: Net Asset Value Method
2. Income Approach: Discounted Cash Flows (DCF) Method
3. Market Approach: Comparable Companies Market Multiple Method, Comparable Transactions Method and Market Price Method

We have used the Market Approach (i.e., Market Price Method and Market Multiples Method) and Income Approach (i.e., DCF method) for valuation of both the Companies

Fair valuation of the Companies factors various intangible assets whether or not recorded in the financials of the respective companies.

**Cost/ Asset Approach – Net Asset Value (NAV) method:** Under this approach, the net asset value method is considered, which is based on the underlying net assets and liabilities. Cost approach is not considered suitable for IT Companies since it does not capture the earnings potential or value of intangibles in the business. Hence, in the present valuation analysis, we have not considered NAV method.

**Income Approach - Discounted Cash Flow (DCF) method:** Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm. Such DCF analysis involves determining the following:

- *Estimating future free cash flows:*

Free cash flows are the cash flows expected to be generated by the company that are available to the providers of the company's capital – both debt and equity.

- *Appropriate discount rate to be applied to cash flows i.e., the cost of capital:*

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

We have used this method for valuation. The financial forecasts have been prepared using publicly available information on the two companies and on the sector, consensus of analyst forecasts as compiled by financial information providers, suitable extrapolations, and other qualitative factors.

**Market Approach - Multiples method:** Under this method, one attempts to measure the value of the shares / business of a company by applying the derived market multiple based on market quotations of public / listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company / business. This valuation is based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances. In the present valuation analysis, we have considered relative PE multiples for arriving at the value per equity share of the Companies.

**Market Approach - Market Price (MP) method:** Under this method, the value of shares of a company is determined by taking the average of the market capitalization of the equity shares of such companies as quoted on a recognized stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price.

The equity shares of Companies are listed on NSE and BSE and are traded frequently. In these circumstances the share prices observed on NSE over a reasonable period have been considered for arriving at the value per equity share of the Companies under the Market Price method. For arriving at the market price, we have considered prices over appropriate period up to 05 May 2022. We have also considered relative target prices indicated by various analysts tracking the companies and the sector

**Fair Valuation:**

We have arrived at the fair value of equity shares of both Companies by applying below mentioned weights to the value derived under various methods.

**The computation of fair equity share exchange ratio for Amalgamation of Mindtree into LTI by EY is tabulated below:**

Valuation Approach	Mindtree (A)		LTI (B)	
	Value per Share of Mindtree (INR)	Weight	Value per Share of LTI (INR)	Weight

### **Annexure 1B- Approach to Valuation - GT**

We have given due cognizance to the International Valuation Standards (“IVS”) for the purpose of arriving at the valuation of the Companies. The valuation base considered is Fair Value. The IVS defines Fair Value as the “estimated amount for which an asset or liability should exchange on the Valuation Date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion”.

As discussed below, there are several commonly used and accepted methods for carrying out the valuation under the three principal approaches, which have been considered in the present case, to the extent relevant and applicable, including:

- a) Cost/Asset Approach – Net Asset Value Method
- b) Income Approach – Discounted Cash Flow Method
- c) Market Approach:
  - i. Market Price Method
  - ii. Comparable Companies Multiple Method.

#### **Net Asset Value (“NAV”) Method**

The asset-based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This valuation approach is mainly used in case where the firm is to be liquidated i.e., it does not meet the “going concern” criteria or in case where the assets base dominates earnings capability.

The Scheme of Arrangement would normally be proceeded with, on the assumption that the companies being part of the amalgamation process are going concerns and an actual realization of their operating assets is not contemplated. Hence, we have not considered the NAV method to value the Companies.

#### **Discounted Cash Flow (“DCF”) Method**

The DCF method values the asset by discounting the cash flows expected to be generated by the asset for the explicit forecast period and also the perpetuity value (or terminal value) in case of assets with indefinite life.

Using the DCF analysis involves determining the following:

- a) Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company’s capital – both debt and equity.
- b) Appropriate discount rate to be applied to cash flows i.e., the cost of capital:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

Since the Companies are listed on Stock Exchanges, the information related to future financial performances is price sensitive and not made available to us. We have used the analysts forecast for the two companies available with some of the subscribed databases to determine value under the DCF method for valuation of the Companies.

**Market Price (“MP”) Method**

The market price of an equity share as quoted on stock exchanges is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

The equity shares of Companies are listed on NSE and BSE and are traded frequently. In these circumstances the share prices observed on NSE over a reasonable period have been considered for arriving at the value per equity share of the Companies under the Market Price method. For arriving at the market price, we have considered the volume weighted average price on NSE, over a reasonable period prior to the relevant date as 05 May 2022, the last working day immediately prior to the date of announcement of the Proposed Amalgamation.

**Comparable Companies Multiple (“CCM”) Method**

Under this method, value of the equity shares of a company/ business undertaking is arrived at by using multiples derived from valuations of comparable companies traded on active market. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

In the present valuation analysis, we carried out research on comparable companies for Mindtree and LTI, listed on Indian Stock exchanges and having similar operations. The Select multiples have been applied for determining the value per share of the Companies under this method.

**Fair Valuation:**

We have arrived at the fair value of equity shares of both Companies by applying below mentioned weights to the value derived under various methods.

**The computation of fair equity share exchange ratio for Amalgamation of Mindtree into LTI by GT is tabulated below:**

Valuation Approach	Mindtree (A)		LTI (B)	
	Value per Share of Mindtree (INR)	Weight	Value per Share of LTI (INR)	Weight
Cost Approach*	NA	NA	NA	NA
Income Approach – DCF Method (i)	4,064.9	20%	5,407.5	20%
Market Approach				
Market Price method (ii)	3,919.7	40%	5,687.2	40%
Comparable Companies Multiples method (iii)	3,489.7	40%	4,562.9	40%
Relative Value per Share (Weighted Average of (i),(ii) and (iii))	<b>3,776.7</b>		<b>5,181.5</b>	
<b>Fair Equity Share Exchange Ratio (A/B) (Rounded)</b>	<b>0.73</b>			

NA = Not Applied / Not Applicable

\*As mentioned earlier, the Cost/Asset approach is not used in the present case, since both the Companies i.e., LTI & Mindtree, are going concerns and hence an actual realization of their operating assets is not contemplated.
