24. Overview of the entity’s material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	Content veracity	 Opportunity	Lapses in the quality and veracity of news content have a negative impact on society at large. The weaponisation of fake news perversely impacts mass psychology and can also threaten democratic values. Against this backdrop, we, as a media company, are deeply invested in delivering correct and comprehensive news to our customers. We see this as not only an opportunity but also an obligation towards society.	NA	Our viewers are increasingly resonating with our attempts to be the source of truth in an otherwise noisy environment. This fortifies our brand perception and ensures strong audience metrics. Resultantly, we see positive financial implications from this opportunity.
2.	Social impact	 Opportunity	The Company believes in respect for all, justice for all. The starting point of good journalism is respect — for individuals and institutions. The Company stands up for what is right and demands justice for all citizens, especially for the weakest among us.	NA	Strong editorial standards and practices help us establish a distinct brand identity and a leadership position in the market.
3	Talent management	 Risk	Talent is the key differentiator in the success of any organisation, however, for a media organisation, dependence on people for success is disproportionate. Also, with technology driving the rapid evolution of the content production and consumption patterns, the need for continuous upskilling is paramount for success.	The Company is executing multiple initiatives to attract and retain talent. The Company is taking several initiatives to build an ‘Employee Brand’ to attract good talent. The Company identifies the need for upgrading the skills of employees and organises various in- house and external training sessions. The Company has partnered with various online learning platforms like LinkedIn learning, Coursera, etc. and provides unlimited access to over 16K online tutorials to its employees.	The availability of top talent remains scarce, and if the Company is unable to attract people who are domain experts, it might hamper its chances of success. Further, the pace of technological evolution makes it challenging to continuously upgrade the skills of employees, which might lead to gaps in the organisation’s skill matrix.

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
4	Diversity and inclusion	 Opportunity	A diverse workforce has a direct and disproportionate impact on improving productivity and business performance.	NA	A workplace, teeming with people from diverse backgrounds, genders, sexual orientations, and geographies allows for an improved flow of ideas, innovation, awareness, and creativity, thereby leading to balanced decision-making, higher output, and enhanced reputation as well.
5.	Data protection	 Risk	Protection of user data is crucial to earning consumer trust and preventing the misuse of data by unscrupulous elements.	The Company has a robust mechanism to safeguard user data. Also, the Company sensitises its employees on a regular basis on various cyber security issues.	Any incident of data breach or cyber security attack can harm the Company's competitive advantage and can make it vulnerable to legal action.
6	Business ethics, integrity and transparency	 Risk	Ethics and integrity have always been the key values to acquire stakeholder trust, and establish a strong reputation. These elements are essential for the Company in order to sustain in the long-term. Any deviation from ethical standards can cause business instability.	The Company has the requisite policies, and it imparts training to equip employees with the required understanding and knowledge to conduct business ethically and prevent, identify, and respond to violations. The Company has rolled out Whistle-Blower Policy and Anti-Bribery and Anti-Corruption Policy, under which complaints can be made to the Ethics and Compliance Task Force without any fear of retaliation.	Non-adherence might lead to difficulties in dealing with concerns of ethics, non-compliance, and violations of the Company's principles. The same may cause damage to corporate reputation.
7	Regulatory issues and compliance	 Risk	It is crucial for the Company to maintain regulatory compliance to foster confidence among its stakeholders' groups and to ensure that its operations are compliant with applicable laws in order to prevent legal violations.	The risk of non-compliance within the Company is mitigated by a robust compliance management framework. The Company has adopted a digitally enabled, comprehensive compliance management framework. Effective control and efficient oversight by the senior management is ensured by cascading the responsibility matrix till the last performer of the activity.	Non-adherence to regulatory requirements can undermine stakeholder trust, damage reputation, and disrupt business.
