Alibaba offloads 3.1 per cent stake in Paytm at ₹536.95 a share

BUSY COUNTER. Acquisition of 12 lakh shares on Thursday lifts fintech firm's total buyback to 68.92 lakh shares

Our Bureau Mumbai

Alibaba Group sold a 3.1-per cent stake in One97 Communications (owner of Paytm brand) worth ₹1,000 crore through a block deal on Thursday. Alibaba, which held a 6.26-per cent stake in Paytm as of September-end, sold the stake at ₹536.95 apiece, according to Reuters. The stock on Thursday closed 6.4 per cent lower at ₹542.25 on the BSE.

In November 2022, Softbank Group Corp sold a 4.5-per cent stake in the e-payments firm worth \$200 million.

Leading investors, the likes of Warren Buffet and Masayoshi Son, who had made pre-IPO investments in these companies, have been exiting after the lock-in period ended last year. Rules require a one-year lock-in period for anchor investors, when these companies got listed.

'A WELCOME EXIT' Avinash Gorakshakar, Head - Research, Profitmart Securities, said, "Alibaba selling shares in Paytm could be good news for shareholders, as it reflects that Chinese shareholding is reducing in the company. This would benefit them in FDI and as the company is already on the path to profitability, this will further allay investor concerns."

IN EXIT MODE. Alibaba sold One97 Communications' shares worth ₹1,000 crore on Thursday

He added, "Alibaba seems to be on the exit move from India as it has sold shares in its major investments like BigBasket, Zomato and Paytm. This is a positive for

shareholders, as it clears many regulatory paths."

MOP-UP OF SHARES Meanwhile in a notification, the company said that it has

bought back 12 lakh shares at ₹544.59 a share on Thursday. Including Thursday's deal, the company has, so far, bought back 68.92 lakh shares.

Last December, the board of the new-age fintech company had approved buyback of shares worth ₹850 crore through open market purchase. It had decided to buy the shares at a maximum price of ₹810. The buyback window, which opened on December 21, 2022, will close on June 19.

At the maximum buyback price and size, the maximum number of equity shares that would be bought back will be around 1.05 crore shares, the company had then said.

Regulator allows AIFs to participate in CDS deals

Press Trust of India New Delhi

SEBI on Thursday allowed alternative investment funds (AIFs) to participate in the Credit Default Swaps (CDS) market as protection buyers and sellers in a bid to facilitate deepening of the domestic corporate bond segment.

The new norms, which will come into force with immediate effect, allow business entities to hedge risks associated with the bonds market.

CONDITION APPLIED

Under the new norm, Category-I and Category-II AIFs can buy CDS on underlying investment in debt securities only for hedging, while Category-III AIFs can purchase CDS for hedging or otherwise, within permissible leverage, SEBI said. With regard to selling, Category-II

and Category-III AIFs may sell CDS by earmarking unencumbered government bonds or Treasury bills equal to the amount of the CDS' exposure. Such earmarked securities may also be used for maintaining applicable margin requirements for the CDS exposure.

Exposure to CDS undertaken in this manner will not tantamount to leverage. "Total exposure to an investee company, including exposure through CDS, shall be within the limit of applicable concentration norm as specified in AIF Regulations," SEBI said.

Category-I and -II AIFs would not borrow funds directly or indirectly and engage in leverage except for meeting temporary funding requirements for not more than 30 days, not more than four occasions in a year and not more than 10 per cent of the investable funds.

MFs can switch from active to passive ELSS

Our Bureau Mumbai

SEBI has allowed mutual funds (MFs) with actively managed tax-saving Equity Linked Saving Scheme (ELSS) to launch the same scheme in passive mode provided they stop inflows into the existing scheme.

In order to develop the low-cost passive funds, SEBI allowed MFs to launch passively managed open-ended ELSS scheme last May. However, the response from MFs had been poor.

NORMS FOR CHANGE Following this, SEBI, in a letter to the Association of Mutual Funds in India, laid down the

procedure for launching passive ELSS scheme for MFs with the existing active ELSS. MFs have to stop fresh flow into the existing actively managed ELSS scheme after issuing an advertisement on the proposed change and the benefit of such a move.

All the Systematic Investment Plan and Systematic

Transfer Plan into the existing actively managed ELSS should also be stopped after a proper notice to the investors, said SEBI.

Subject to the three-year lock-in period, investors in the existing ELSS scheme should be allowed to redeem their units, it added.

Fund houses can file fresh papers with SEBI for launching passive ELSS scheme.

MFs should also inform investors that if they do not exist from actively managed ELSS scheme in three years after stoppage of fresh inflows, their investment will be managed as passive fund, said SEBI.

After three years, MF has to file papers with SEBI informing the closure of actively managed ELSS scheme.

The asset under management of actively managed ELSS scheme has increased 5 per cent to ₹1.55-lakh crore in December from ₹1.47-lakh crore in January. Currently, there are 42 actively managed ELSS schemes.

INVESTORS TO BENEFIT Mahesh Shukla, CEO and Founder, PayMe, said the passive ELSS scheme will benefit investors as it has the shortest lock-in period compared to other tax-efficient products.

Along with the tax benefit, a lower expense ratio is something wherein investors will get direct benefit and save more money besides opening up fresh opportunity for the MF industry to attract more inflows, he said.

Investor anxiety keeps Sensex, Nifty down for third day in a row

Press Trust of India Mumbai

Benchmark stock indices Sensex and Nifty declined for a third straight day on Thursday as investors turned cautious ahead of release of key inflation and industrial production data. Sensex lost 789 points, while Nifty declined 243 points to trade below the 18,000 level in three sessions to Thursday.

In a choppy trade, BSE Sensex declined by 147.47 points to settle at 59,958.03 as 15 of its constituents ended with losses. During the day, it declined 473.18 points to

59,632.32. NSE Nifty fell 37.50 points to close at 17,858.20.

VOLATILITY CONTINUES From the Sensex pack, Reliance Industries, Axis Bank, Tata Motors, Kotak Mahindra Bank, Bharti Airtel, Asian

Paints and ITC were among the laggards.

UltraTech Cement, L&T, HCL Technologies and HDFC were among the winners. Infosys, which declared its results after market hours, rose 0.62 per cent.

"The domestic market continued to remain volatile as investors eagerly awaited the earnings of other IT majors after a cautious warning from TCS. Uncertainties over upcoming inflation numbers at home and the US kept the domestic market unstable, even as western peers stayed optimistic," said Vinod Nair, Head of Research at Geojit Financial Services.

TODAY'S PICK.

Mahindra CIE (₹356.7): BUY

Akhil Nallamuthu bi. research bureau

The stock of Mahindra CIE Automotive closed above the resistance band of ₹350-352 on Thursday, opening up the door for further rally. The hourly chart shows an ascending triangle breakout, indicating bullish continuation and we expect the stock to rally on Friday as well. However, there might be a minor corrective move on Friday's early trade, probably to ₹352 from Thursday's close of ₹356.7. Traders can buy the stock for intraday trade if the price corrects to ₹352 with

stop-loss at ₹346. Book profits when the price hits ₹365. That said, do not enter if the stock opens the session below ₹346. Note: The recommendations are based on technical analysis. There is a risk of loss in trading

BROKER'S CALL.

GUJARAT GAS (BUY)

Target: ₹679

CMP: ₹466.80

The onset of Russia-Ukraine conflict brewed an unavoidable storm for Gujarat Gas with spot LNG price spiraling to \$34.5/mmbtu in H1-FY23 from \$23.4/mmbtu in FY22. Brent also surged to \$107/bbl in H1-FY23, thereby escalating costs for Gujarat Gas' long-term, crude-linked contracts. The storm intensified further as Morbi's ceramic cluster was shut down for a month in Q2-FY23, thus severely impacting industrial volumes. As a result, PNG price rose to ₹63/scm by May 2022, before dipping to ₹46/scm currently. Higher prices forced consumers, especially at Morbi, to switch to cheaper alternatives such as propane and LPG. However, the storm now seems to be running out of steam with spot LNG prices declining 48 per cent from its peak. Gujarat Gas has a RoCE of about 25 per cent. We expect an FCF generation of about ₹1,700 crore over FY23-24. The company is likely to turn net cash in FY23, despite capex plans of ₹2,000 crore over FY23-24.
