Threshold to Prepare Road DPRs may be Hiked to ₹5L/km

Vogima Seth

New Delhi: The government plans to set a threshold of ₹5 lakh per km for awarding detailed project report (DPR) contracts to road consultants, as against the average of ₹1 lakh per km, as it moves from least cost to fixed cost model, said a senior government official.

The move is aimed at improving the quality of DPRs to bring them on a par with international standards and avoiding project delays, the official told ET on condition of anonymity.

The road transport and highways ministry has sought views from stakeholders on the proposed changes and will firm up new rules for DPRs soon, according to people in the know.

"The need for a minimum base

Road to Efficiency

Plans afoot to fix threshold for awarding DPR contracts

Min price could be fixed at ₹5 lakh/km | Currently, average cost is ₹1 lakh/km

WILL HELP IMPROVE QUALITY OF DPR, ROAD CONSTRUCTION

price, below which will not award contracts, has arisen as bidders quote bare minimum price to get the contract but eventually make poor quality DPRs which leads to project delays and cost overrun," the official said.

The base price has been arrived at after taking into consideration global norms on salaries of good quality human resources and related factors, the official said, adding, "While a final decision is yet to be taken, we hope keeping a threshold will fetch us good quality DPRs."

The government believes the delay in project execution is because of inadequacy and poor quality in the project preparation stage which in turn leads to modification in the scope of work, variation and time and cost overrun.

While the fivefold cost escalation in DPRs, if agreed upon, would mean an additional burden on the exchequer, the government believes the benefits of quality DPRs and the savings made thereof will outweigh the additional cost burden.

"The projects will not be inordinately delayed. So while there will be savings on the cost overrun, we will also save significantly on the civil cost of maintenance and repair of poor quality roads because of poor DPR standards are much higher and quality-cum-cost based process is followed, instead of awarding the contract to the lowest bidder as is the case in India.

The other changes under consideration include relaxation on bank guarantees, awarding contracts on market determined prices.

Plans afoot to Push Green H2 for 24x7 Clean Energy: Singh

Our Bureau

New Delhi: The Ministry of New and Renewable Energy is working on a strategy to promote use of green hydrogen for providing round-the-clock renewable energy. Power and renewable energy minister R K Singh chaired a meeting on Tuesday for utilisation of green hydrogen in conjunction with solar and wind energy.

The policy mechanisms being considered include one based on the 'contract for difference' (CFD) methodology, which is based on the difference between the market price and an agreed "strike price", the government said on Wednesday.

Representatives from NTPC, Central Electricity Commission, and Solar Energy Corporation of India, were also present in the ministry.

Potential options for using green hydrogen as a storage medium for supporting round-the-clock power and peak power demand were discussed along with providing government support for such projects.

India's National Green Hydrogen Mission aims for at least 5 million metric tonnes of annual production capacity by 2030 with renewable energy as the source.

STICKING TO STANCE AT UPCOMING 13TH MINISTERIAL CONFERENCE

India to Oppose Taking Up Non-trade Issues at WTO

Feels protectionist trade barriers shouldn't be erected in guise of sustainable development and can be discussed at separate fora

Our Bureau

New Delhi: India will stick to its stance and oppose any negotiation mandate on non-trade issues such as environment, gender and micro, small and medium enterprises (MSMEs) at the upcoming 13th ministerial conference of the World Trade Organization (WTO), officials said.

New Delhi is of the view that protectionist trade barriers should not be erected in the guise of sustainable development and there are different multilateral fora such as the United Nations where these issues can be discussed.

"Issues like environment and labour are non-trade issues. These are non-negotiable at WTO. We

Trade Winds

- ▶ **EU, US want** formal WTO talks on MSME, investment, gender, labour, environment
- ▶ **Non-trade issues** have trade implications, says India

- ▶ **Unilateral measures** like CBAM can't be discussed at WTO
- ▶ **Investment facilitation** not in WTO mandate
- ▶ **All eyes on US, EU** diverse positions on agri issues

SANJEEV

are sticking to that stand," said an official. "These are not trade issues but they have trade implications."

The official added that India is against linking issues such as MSMEs and gender with trade. WTO's MC13 will be held from February 26 to 29 in Abu Dhabi and

developed nations are pushing to begin formal talks on such non-trade issues.

On the inclusion of issues related to economic empowerment of women at the WTO talks, the official said India believes that this is a social and domestic matter, and there are specialised conventions of

the UN to discuss these.

"So, we will not agree to any work programme; we will agree to discussions to promote sustainable development but our rights and obligations should not be impacted," the official said.

The final agenda of the MC13 is expected to be finalised in the Ge-

neral Council meeting of the WTO next week in Geneva.

Officials also said that India is likely to oppose any negotiations on investments in the WTO as these fall outside the mandate of the global trade body and cannot be deliberated in formal meetings.

"It will be a tightrope for India," said the official.

China, along with 100 other countries, is pushing for a Joint Initiative on Investment Facilitation for Development (IFD). As per the official, India is watchful of the different positions of the EU and the US on issues related to agriculture, especially market access.

CARBON TAX

Another official said that India is engaging with the EU to deal with

the Carbon Border Adjustment Mechanism (CBAM) and also preparing the domestic industry to comply with the norms.

New Delhi is considering whether the tax can be collected in rupees and not euros, which can be used to help domestic industry comply with the norms.

"We are engaging with the EU to find out how we can comply with that and how our industry and trade do not suffer from this tax," the official said.

The CBAM and deforestation laws are examples of dragging environmental issues into trade matters but the CBAM cannot be discussed at the ministerial, according to the official.

India and the EU are bilaterally discussing the issue.

AFTER TWO DECADES...

India, Lanka Jt Panel Meet to Take Grid Connectivity Ahead

Meeting likely this month to discuss green energy too: Lanka minister

Shilpa Samant

Goa: India and Sri Lanka's joint working committee on the power sector will likely meet this month to further discuss grid interconnectivity and renewable energy collaboration, the island country's power and energy minister Kanchana Wijesekera told ET.

The two countries have been planning to connect their grid to trade power for almost two decades, but the deliberations have picked up pace in the last few years amid green energy ambitions of the countries.

Technical reports are already being discussed with the officials from India's Central Electricity Authority (CEA), Power Grid Corporation of India Ltd and the Ceylon Electricity Board (CEB), ET had reported earlier.

The grid connection will likely be in a joint venture with Power Grid Corporation of India.

Technical feasibility studies have been done and a joint consultant for investment decisions will be appointed for the grid connection, Wijesekera, who is in the country to attend the ongoing India Energy Week, said.

"Investment decisions are yet to be made for which we want to appoint consultants. The consultants will be appointed from both ends. I would say a common consulting firm to un-

derstand the financial requirements and agree on the investment, and how the investment is going to take place," he said.

Discussions will also take place on ongoing projects, especially the solar energy project, where India's NTPC Ltd is in partnership with the Ceylon Electricity Board. Power purchase agreements on the first phase of the 130-MW power project could be signed soon, he said.

OFFSHORE WIND

The Sri Lankan government is assessing the potential the country has in the offshore wind segment after which it will invite an expression of interest, where it wants Indian companies to participate.

There are companies that have shown interest, including Indian companies, Wijesekera said.

Feasibility studies for offshore wind energy are on because the potential that Colombo may have would far exceed its requirements and it's going to be a surplus, he said.

NOTICE TO SHAREHOLDERS

Sub: Transfer of equity shares of the Company to Investor Education and Protection Fund (IEPF) Authority.

This Notice is published pursuant to the provisions of the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, as amended from time to time ("the Rules").

The Rules, amongst other matters, contain provisions for transfer of shares, in respect of which dividend remains unclaimed for seven consecutive years or more, in the name of the Investor Education and Protection Fund (IEPF) Authority.

Adhering to the various requirements set out in the Rules, the Company has, so far, transferred in favour of IEPF Authority, on respective due dates, all shares in respect of which Final dividend for the financial year 2015-16 or before had remained unclaimed for a period of seven consecutive years or more. The Company has now, vide its letter dated 01.02.2024 communicated individually, the concerned shareholders whose shares are liable to be transferred in favour of IEPF Authority in April, 2024 for taking appropriate action and submitting requisite documents to claim unclaimed dividend amount(s) before it is credited to IEPF account. Shareholders are requested to forward the requisite documents as mentioned in said communication to the Company's Registrar and Share Transfer Agent to claim the unclaimed dividend amount(s) on or before 09.03.2024. The list of shareholders whose shares are liable for transfer in favour of IEPF Authority is displayed on the website of the Company at <https://www.powergrid.in/en/details-shareholders>.

In case the Company does not receive any communication from the concerned shareholders by 09.03.2024, the Company, with a view to comply with the requirements set out in the Rules, shall be transferring the said unpaid dividend amount(s) and related shares to IEPF without further notice. Please note that upon such transfer, shareholders can claim the transferred shares along with the dividend from IEPF Authority as per the Rules available at www.iepf.gov.in.

Pursuant to Regulation 40(1) of SEBI (Listing Obligations and Disclosure Requirement) Regulations, 2015, requests for effecting transfer of securities shall not be processed unless the securities are held in the dematerialized form with a depository. Hence, shareholders are requested to dematerialize their physical holding. Those shareholders whose folio(s) do not have complete details relating to their PAN and Bank Account, or where there is any change in the bank account details provided earlier, have to compulsorily furnish the details to RTA/ Company for registration/update.

For any information/clarification on this matter, concerned shareholders may write to the Company at investors@powergrid.in or contact the Company's Registrar & Share Transfer Agents M/s KFin Technologies Ltd. Unit: Power Grid Corporation of India Limited, Selenium Tower-B, Plot. 31-32, Gachibowli, Financial District, Nanakramguda, Hyderabad-500032.
