ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive

Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia's war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

In view of the aforementioned defaults, our Company received a business plan from our Promoter, Mark AB Capital Investment LLC, which is a Middle East based company with investments in EPC companies wherein our Promoter offered infusion of ₹ 35,000 lakhs, by way of issue of Equity Shares on a preferential basis by our Company, for a 26.48% stake in our Company. Based on the business plan, our Company presented a resolution plan to the consortium of lenders led by Punjab National Bank, under the Reserve Bank of India (Prudential Framework for Resolution of Stressed Assets) Directions 2019 (the “**Resolution Plan**”). The Resolution Plan provides for infusion of ₹ 35,000 lakhs by our Promoter, change of management of our Company, conversion of debt into Non-Convertible Debentures (“**NCD**”), Compulsorily Convertible Debentures (“**CCD**”) to the tune of ₹ 35,000 lakhs, levy of interest at 9% pa. effective from October 1, 2020, amongst other requirements.

In compliance with the terms of the Resolution Plan our Company has repaid an amount of ₹ 35,000 lakhs to our lenders. Upon implementation of resolution plan there are nil defaults to lenders.

While the ability of the company has considerably increased for serving the loans after implementation of the resolution plan, we cannot assure you that we will be able to fully repay our outstanding loans or that we will not default in repayment of loans to our lenders. On the occurrence of any defaults, our lenders may initiate insolvency petitions against us and demand immediate repayment of loans from our Company, which could adversely affect our business, operations and results of operations.

Our Statutory auditor has included the following remarks in the limited review report dated November 9, 2023 on unaudited consolidated financial results for the six month period ended September 30, 2023:

Emphasis of matters and matters of uncertainties:

Extract from the limited review report dated November 09, 2023 on unaudited consolidated financial results for the six month period ended September 30, 2023:

Basis for Qualified Opinion

- “(i) *The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 33,289.92 Lakhs (September 30, 2022: Rs. 39,679.73 Lakhs) which was recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management’s assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12 on Income taxes, we are unable to comment on the adjustments, if any, on the Statement. (Refer Note 6 of the Statement).*
- (ii) *Non-Current Contract Assets include Rs. 7,351.90 Lakhs (Net of provisions amounting to Rs.926.98 Lakhs) (September 30, 2022: Rs.3,956.02 Lakhs) and Non-Current Trade Receivables include Rs.575.21 Lakhs (Net of provisions amounting to Rs. 82.99 Lakhs) relate to dues on projects which have been stalled due to delays in obtaining approvals from regulatory authorities. We do not have sufficient appropriate audit evidence to corroborate management’s assessment of recoverability of the said amounts. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Assets and Trade Receivables and the impact if any, on account of non-provisioning of the said balances, on the Statement. (Refer Note 3 of the Statement).”*

These qualifications have not been addressed by the Management of the Company in the Statement for the quarter ended September 30, 2023.

Our Statutory auditor has included the following remarks in the examination report to the Restated Financial Statements for the Financial Years ended March 31, 2023, March 31, 2022 and March 31, 2021 and the audit reports for the Financial Years ended March 31, 2023, March 31, 2022 and March 31, 2021:

Extract from the audit report on the audited consolidated financial statements for the year ended March 31, 2023:

Emphasis of Matter

Extract from the audit report on the audited consolidated financial statements for the year ended March 31, 2023:

We draw attention to the following matters in the Notes to the Consolidated financial statements:

- a) Note 42.1(i) of the Consolidated financial statements, which describes the implementation of Resolution Plan entered into with the lenders dated June 22, 2022, wherein interest waiver, and the difference between the carrying amounts of the facilities before restructuring and the fair values of the new facilities has been recognised as income and disclosed under Exceptional items in the statement of profit and loss in accordance with INDAS 109 - Financial Instruments.
- b) Note 42.1(ii) to the Consolidated financial statements, which states that the management has written off an amount of Rs. 5,819.69 Lakhs towards amounts due on account of work performed on a contract entered into with a customer which was subsequently wrongfully terminated before the completion of the contract due to certain issues at the contract site. Legal disputes / arbitration proceedings have been initiated during the period in respect of projects with the customers.

Extract from the audit report on the audited consolidated financial statements for the year ended March 31, 2022:

Material Uncertainty Related to Going Concern:

“We draw attention to Note 4 (e) to the consolidated financial statements, which states that the Company has incurred a net loss of ₹ 26,370.37 Lakhs during the year ended March 31, 2022 and as of that date has accumulated losses aggregating to ₹ 2,15,105.50 Lakhs which has resulted in substantial erosion of its net worth. Further, the COVID-19 pandemic has also impacted the operations resulting in delay of collection relating to project dues. These events or conditions indicates that a material uncertainty exists that may cast significant doubt on the Company’s ability to continue as a going concern. However, having regard to the restructuring plan for borrowings, infusion of additional equity subsequent to the year end and the Management’s plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, future business plans, non-fund based facilities, and realization of trade receivables, the consolidated financial statements of the Company for the year ended March 31, 2022 have been prepared on a going concern basis. Our opinion is not modified in respect of this matter.”

Emphasis of Matter:

“We draw attention to Notes 43 to the Consolidated financial statements which states that the Management has made an assessment of the impact of Covid-19 on the Company’s operations, financial performance and position as at and for the year ended March 31, 2022 and accordingly recognized an impairment loss of ₹ 6,361.26 Lakhs (March 31, 2021: ₹ 1,149.11 Lakhs) on financial assets and contract assets to reflect the business impact arising from the COVID 19 pandemic.”

Extract from the audit report on the consolidated financial statements for the year ended March 31, 2021:

Emphasis of Matter:

“We draw attention to Note 39 to the consolidated financial statements, which fully describes that the Company has made an assessment to recognize an impairment loss of ₹ 1,149.11 Lakhs on financial assets to reflect the business impact and uncertainties arising from the COVID 19 pandemic on the Company’s operations, financial performance and position as at and for the year ended March 31, 2021 (March 31, 2020: INR 2,748.97 Lakhs).”

Extract of the audit report on the consolidated financial statements for the year ended March 31, 2022:

Basis for Qualified Opinion

“(i) The carrying value of Deferred Tax Asset (DTA) include an amount of ₹ 39,645.00 Lakhs (March 31, 2021: ₹ 43,889.00 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management’s assessment on reasonable certainty of future taxable profits, as required by Ind AS 12- Income taxes and considering the current pandemic situation, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 44 of the Consolidated financial statements)”

(ii) Contract Asset (Non-Current) include ₹ 3,956.02 Lakhs (Net of provisions amounting to ₹ 926.98 Lakhs) relating to project dues which is not progressing on account of Statutory delays faced by the Customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, sufficient appropriate audit evidence to corroborate management’s assessment of recoverability of the above said amount is not available. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Asset (Non-Current) and the impact if any, on account of non-provisioning of the said balance on the Consolidated financial statements. (Refer to Note 08 of the Consolidated Financial Statements)”

Extract of the audit report on the consolidated financial statements for the year ended March 31, 2022:

Qualified Opinion on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

“According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Holding Company’s internal financial controls with reference to financial statements as at March 31, 2022:

- a) Provisioning of contract assets which is outstanding for a substantial period of time, which could potentially result in the Company not recognizing a provision for the said assets.
- b) Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize.

A ‘material weakness’ is a deficiency, or a combination of deficiencies, in internal financial control with reference to financial statements, such that there is a reasonable possibility that a material misstatement of the Company’s annual or interim financial statements will not be prevented or detected on a timely basis.

In our opinion, and to the best of our information and according to the explanations given to us, the Holding Company, have in all material respects, maintained adequate internal financial controls with reference to financial statements as of March 31, 2022, based on the internal control with reference to financial statements criteria established by respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (“ICAI”) except for the possible effects of the material weaknesses described above on the achievement of the objectives of the control criteria, the internal financial controls with reference to financial statements of the Holding Company were operating effectively as of March 31, 2022.

We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2022 consolidated financial statements of the Company, and these material weaknesses do not affect our opinion on the consolidated financial statements of the Company.”

Extract of the audit report on the consolidated financial statements for the year ended March 31, 2021:

“(i) Financial Assets Loans (Non-Current) include ₹ 3,201.62 Lakhs (March 31, 2020: ₹ 3,800.40 Lakhs) due from a related party. Sufficient appropriate audit evidence to corroborate management’s assessment of recoverability of the above said amount is not available and the amount is outstanding for more than five years. Further, no provision with respect to the same is made in the books of account as explained in Note 9.2 of the Consolidated Financial Statements. Accordingly, we are unable to comment on the carrying value of above-mentioned Financial Assets Loans amounting to ₹ 3,201.62 Lakhs and the impact if any, on account of non-provisioning of the said balance on the financial statements at present.

(ii) *The carrying value of Deferred Tax Asset (DTA) include an amount of ₹ 43,889.00 Lakhs (March 31, 2020: ₹ 43,520 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management’s assessment on reasonable certainty of future taxable profits, as required by Ind AS 12 on Income Taxes, considering the current pandemic situation, we are unable to ascertain the extent to which the deferred tax asset can be utilized. The impact if any, of the undetermined impairment provision on the financial statements is not ascertainable currently. Refer Note 40 of the Consolidated financial statements.”*

A ‘material weakness’ is a deficiency, or a combination of deficiencies, in internal financial control with reference to financial statements, such that there is a reasonable possibility that a material misstatement of the company’s annual or interim financial statements will not be prevented or detected on a timely basis.

Furthermore, our Company has *vide* a letter dated September 16, 2023 informed the Stock Exchanges that Mark AB Welfare Trust, an entity forming part of Promoter Group has contravened the Company’s Code of Conduct to Regulate, Monitor and Report Trading by Designated Persons and their Immediate Relatives read with Schedule B and Regulation 9 of the SEBI (Prohibition of Insider Trading) Regulations, 2015. Mark AB Welfare Trust undertook a number of transactions involving sale of Equity Shares of our Company during the period when the trading window was closed by our Company without obtaining preclearance. In view of the above, our Company had imposed a penalty of ₹ 10.00 lakhs on Mark AB Welfare Trust on account of violation of code of conduct of our Company as payable to Investor Education Fund and MARK AB Welfare Trust has already remitted the same into the SEBI Investor Education Fund.

In addition to the above, a complaint dated August 25, 2023 was filed by GPE (India) Limited (“**Complainant**”) with the Securities and Exchange Board of India, Ministry of Corporate Affairs, National Stock Exchange of India Limited, BSE Limited and MSKA & Associates alleging that our Company, Twarit Consultancy Services Private Limited and Complainant had entered into a share purchase agreement, to purchase the preference shares of Haldia Coke and Chemicals Private Limited (“**Haldia**”), which were held by the Complainant. However, on account of failure of our Company and Twarit Consultancy Services Private Limited to purchase the preference shares of Haldia, an arbitration was filed under the rules of the Singapore International Arbitration Centre. An award dated January 7, 2021 was passed in favour of the Complainant, directing our Company and Twarit Consultancy Services Private Limited to pay a sum of approximately, INR 1,98,54,10,661. Subsequently, the award was challenged by our Company and Twarit Consultancy Services Private Limited before the Singapore International Commercial Court, which was later dismissed. The Complainant has alleged that our Company has failed to disclose the aforementioned award before the Stock Exchanges under Regulation 30 of the SEBI Listing Regulations. Our Company has replied to the aforementioned complaint *vide* emails dated September 15, 2023, September 22, 2023 and October 5, 2023. Our Company has denied the allegations and has submitted the following responses in its emails: (i) The Complainant is admittedly, not the shareholders or investors of our Company and therefore, the alleged Complaint will not fall within the meaning of ‘investor grievances’; (ii) the complaint relates to an international arbitration award rendered by the Singapore International Arbitration Centre and the enforcement proceedings and appeal proceedings arising therefrom which are presently *sub judice* before the Hon’ble Madras High Court and the Hon’ble Supreme Court as also duly admitted by the Complainants;

and (iii) disclosure obligations are not triggered or attracted in the fact and circumstances of the matter. Incidentally, we are also in the process of preferring our legal challenge to the order dated January 5, 2023 passed by the Hon'ble High Court and as such the matter has not attained finality till date; and (iii) our Company had, from time to time, made due and appropriate disclosures through its Annual Reports and the quarterly Unaudited Financial Reports, as published and uploaded in the Company's website. We had also submitted our Annual Reports and the quarterly Unaudited Financial Reports to the stock exchanges, including NSE, as per extant regulations, which reports, *inter alia*, contain notes in relation to the arbitral award and the ensuing legal proceedings arising therefrom. Thus, there is no merit or substance in the motivated allegations levelled in the Complaint of any non-disclosure, as alleged or at all therein, for reasons of which the impugned Complaint deserves to be ignored and rejected at the threshold itself, in the interests of justice.

In the event any adverse orders are passed against our Company by any competent court directing any settlement of damages, the Company is already indemnified as reported in our Annual Reports and quarterly unaudited financial accounts.

In spite of this if any future adverse regulatory actions are taken against our Company, the same could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

Our Company endeavours to comply with all such obligations/reporting requirements, there may be non-disclosures/delayed/erroneous disclosures and/or any other violations which might have been committed by us, and the same may result into Stock Exchanges and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act and Rules and Regulations made there under and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

5. Our Company has availed a significant amount of loans from our lenders. Any default in repayment of these loans, could significantly impact our business operations, results of operation and financial condition.

There have been instances of defaults in repayment of loans, in the past, our Company and our Promoter, Mark AB Capital Investment LLC, presented a resolution plan to the consortium of lenders led by Punjab National Bank, under the Reserve Bank of India (Prudential Framework for Resolution of Stressed Assets) Directions 2019 (the “**Resolution Plan**”). The Resolution Plan provides for infusion of ₹ 35,000 lakhs by our Promoter, change of management of our Company, conversion of loan into NCD and CCD to the tune of ₹ 35,000 lakhs, levy of interest at 9% pa. effective from October 1, 2020, amongst other requirements. As of date of this Letter of Offer, our Promoter has invested ₹ 35,000 lakhs in our Company by subscribing to 35,00,00,000 of our Company pursuant to a preferential issue of Equity Shares of our Company in accordance with the Resolution Plan. Further our Company has issued and allotted (i) 175,00,000 compulsorily convertible debentures of ₹ 100/- each, to its lenders in lieu of existing debt of our Company with yield, which will be convertible into Equity shares at a future date for an aggregate amount upto ₹ 17,500 lakhs; and (ii) 1,75,00,000 Non-Convertible Debentures of ₹ 100/- each to the lenders in lieu of their existing debt, for an aggregate amount upto ₹ 17,500 lakhs. While the ability of the company has considerably increased for servicing the loans after implementation of the resolution plan, We cannot assure you that our Company would be able to repay their debts, in part of full, or at all. Any failure by our Company to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

6. Our business is working capital intensive. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on our operations.

Our business requires a significant amount of non-fund based working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital

requirements. In many contracts, significant amounts of non-fund based working capital are required to finance the purchase of services and materials, the performance and maintenance and other work on our projects before payment is received from clients. Our non-fund based working capital requirements may increase due to an increase in the size of our operations and the increase in credit period of any of our customers. In addition, we may need to incur additional indebtedness in the future to satisfy our working capital requirements.

The trade receivables and Contract assets as at Six months period ended September 30, 2023 and fiscals ended March 31, 2023, March 31, 2022 and March 31, 2021 were ₹ 1,10,818.30 lakhs, ₹ 1,02,452.60 lakhs, ₹ 1,16,959.22 lakhs, and ₹ 1,22,891.30 lakhs respectively.

In general, we may make provisions for bad debts, based primarily on ageing and other factors such as special circumstances relating to specific clients. There can be no assurance that the payments will be remitted by our clients to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. The bad debts and provisioning for expected credit losses for the six months period ended September 30, 2023 and fiscals ended March 31, 2023, March 31, 2022 and March 31, 2021 were ₹ Nil, ₹ 722 lakhs, ₹ 1,831 lakhs, and ₹ 2,036 lakhs, respectively.

Further, one of the objects of this Issue include funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “*Objects of the Issue*” on page 66. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Our working capital position is therefore also dependent on the financial position of our clients. All of these factors may result in increases in the amount of our receivables and short-term borrowings. Continued increases in working capital requirements may have an adverse effect on our financial condition and results of operations.

7. *We may not be successful in implementing our business strategies effectively or at all.*

The success of our business will depend greatly on our ability to implement our business strategies effectively. Even if we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within the estimated budget, or that we will meet the expectations of targeted clients. We expect the implementation of our strategies to place significant demands on our management and other resources and require us to continue developing and improving our financial, operation and other internal controls. Any inability to manage our business and implement our strategies effectively or at all could have a material adverse effect on our business, financial condition and profitability.

8. *We may not be able to qualify for and win integrated engineering, procurement and construction (“EPC”) and lump-sum turnkey contracts.*

Most of our EPC contracts are obtained through a competitive bidding process. In selecting contractors for major projects, clients generally limit the tender to contractors they have pre-qualified based on several criteria including experience, technological capacity and performance, reputation for quality, safety record, financial strength and size of previous contracts in similar projects, although price competitiveness of the bid is the most important selection criterion. Pre-qualification is key to our winning such major projects. We are currently qualified to bid for projects up to a certain value and therefore may not be able to compete for larger projects. Our ability to bid for and win such major projects is dependent on our ability to show experience of working on such large EPC and lump-sum turnkey contracts and developing strong engineering capabilities and credentials to execute more technically complex projects.

9. *Our order book is relatively concentrated in certain projects.*

There are various risks associated with the execution of large-scale integrated projects. Larger contracts may represent a larger part of our portfolio, increasing the potential volatility of our results and exposure to individual contract risks. Managing large-scale integrated projects may also increase the potential relative size of cost overruns and negatively affect our operating margins.

Our top ten contracts represented 90% of our order book as at September 30, 2023. We define “order book” as anticipated revenues from the uncompleted portions of existing contracts (signed contracts for which all pre-conditions to entry into force have been met, including letters of intent issued by the client prior to execution of final contract) at a certain date. We believe that our contract portfolio will continue to be relatively concentrated. If we do not achieve our expected margins or suffer losses on one or more of these contracts, this could have a material adverse effect on our results of operations and financial condition. Similarly, our top ten customers represented 90% of revenue for the six months period ended September 30, 2023.

10. Our business is dependent on continuing relationships with our clients and strategic partners.

Our business is significantly dependent on EPC projects undertaken by government agencies and private companies. Our top ten clients vary from period to period depending on the completion schedule of projects. Our top ten clients provided 90%, 94%, 95%, and 90% of our total EPC contracts revenue in the three months period ended September 30, 2023, fiscal 2023, 2022 and 2021, respectively. Our business is also dependent on developing and maintaining strategic alliances with international partners. Our business and results of operations will be materially and adversely affected if we are unable to maintain a continuing relationship or pre-qualified status with certain of our key clients and strategic partners.

11. We are exposed to significant construction risks on fixed-price or lump-sum turnkey contracts.

Under the terms and conditions of fixed-price or lump-sum contracts, we generally agree to a fixed-price for providing engineering, procurement and construction services for the part of the project contracted to us or, in the case of turnkey contracts, completed facilities which are delivered in a ready to operate condition, subject, however, to contract variations pursuant to changes in a client’s project requirements. The actual expense to us for executing a fixed-price or lump-sum turnkey contract may vary substantially from the assumptions underlying our bid for various reasons, including:

- unanticipated changes in engineering design of the project;
- unanticipated increases in the cost of equipment, materials or manpower;
- delays associated with the delivery of equipment and materials to the project site;
- unforeseen construction conditions, including inability of the client to obtain requisite environmental and other approvals, resulting in delays and increased costs;
- delays caused by local weather conditions;
- suppliers’ or subcontractors’ failure to perform; and
- delays caused by us.

Unanticipated costs or delays in performing part of a contract, for reasons not attributable to customers, can have compounding effects by increasing costs of performing other parts of the contract. In addition, we may be required to pay liquidated damages to the client for any delays caused by us. These variations and the risks generally inherent to the construction industry may result in our profits being different from those originally estimated and may result in our experiencing reduced profitability or losses on projects. Depending on the size of a project, these variations from estimated contract performance could have a significant effect on our results of operations.

12. We face competition in our business segment.

Even though the competition has reduced in this industry, we still operate in a competitive environment. Our competition varies depending on the size, nature and complexity of the project and the specific industry segment. While service quality, technological capacity and performance, health and safety records and personnel, as well as reputation and experience, are important considerations in client decisions, price is a major factor in most tender awards. The industries in which we compete have been frequently subject to intense price competition. Some of our competitors are larger than us and have greater financial resources and they may also benefit from greater economies of scale and operating efficiencies. There can be no assurance that we can continue to effectively compete with our competitors in the future, and the failure to

compete effectively could have a material adverse effect on our business, financial condition and results of operations. For more information on our competitors in specific industry segments, please see the section titled “*Our Business*” beginning on page 93 of this Letter of Offer.

13. *Our order book may not necessarily indicate future income. Projects included in our order book may be delayed, modified, cancelled or not fully paid for by our clients.*

Our order book does not necessarily indicate future earnings related to the performance of that work. Our order book refers to expected future revenues under signed contracts or contracts where letters of intent have been received. Order book projects represent only business that is considered firm, although cancellations or unanticipated variations or scope or schedule adjustments may occur. Due to changes in project scope and schedule, we cannot predict with certainty when or if our order book will be performed. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to pay amounts owed. We cannot guarantee that the income anticipated in our order book will be realized, or, if realized, will be realized on time or result in profits. Any project cancellations or scope adjustments, which may occur from time to time, could reduce the amount of our order book and the income and profits that we ultimately earn from the contracts. Any delay, cancellation or payment default could have a material adverse effect on our business, results of operation and financial condition.

For some of the contracts in our order book, our clients are obliged to perform or take certain actions, such as acquiring land, securing the right of way, clearing forests, supplying owner supplied material, securing required licenses, authorizations or permits, making advance payments or opening of letters of credit, approving designs, approving supply chain vendors and shifting existing utilities. If a client does not perform these and other actions in a timely manner or at all, and the possibility of such failure is not provided for in the contract, our projects could be delayed, modified or cancelled and as a result, our results of operations could be materially and adversely affected.

14. *We have limited control over the award of new contracts and the timing of client payments, which can cause significant variations in our results of operations and cash flows from period to period.*

As a substantial majority of our income is generated from EPC contracts and the timing of new project awards and their commencement can vary significantly, our results of operations and cash flow may be subject to significant periodic fluctuations. It is generally very difficult to predict whether or when we will receive such awards as these contracts frequently involve a lengthy and complex bidding and selection process which is affected by a number of factors, such as market conditions, governmental approvals and project specific dynamics. As a substantial majority of our income is generated from EPC contracts in our power, captive power and water infrastructure projects businesses, our results of operations and cash flow may fluctuate significantly from quarter to quarter depending on the timing of our contract awards.

We recognize income from our EPC contracts when it satisfies a performance obligation by transferring promised good or service to a customer as a result, even after we are awarded EPC contracts and we have begun providing services, income recognized from such business vary significantly from period to period depending upon how much of the project is completed and the total costs incurred.

15. *Our operations are subject to hazards and other risks and could expose us to material liabilities, loss in revenues and increased expenses.*

Our operations are subject to hazards inherent in providing engineering and construction services, such as risk of equipment failure, work accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage.

We may also be subject to claims resulting from defects arising from engineering, procurement and/or construction services provided by us. Actual or claimed defects in equipment procured and/or construction quality could give rise to claims, liabilities, costs and expenses, relating to loss of life, personal injury, damage to property, damage to equipment and facilities, pollution, inefficient operating processes, loss of production or suspension of operations. Our policy of covering these risks through contractual limitations of liability, indemnities and insurance may not always be effective. In some of the jurisdictions in which we operate, environmental and workers’ compensation liability may be assigned to us as a matter of law. Clients and subcontractors may not have adequate financial resources to meet their indemnity obligations to us. Losses may derive from risks not addressed in our indemnity agreements or insurance policies, or it may no

longer be possible to obtain adequate insurance against some risks on commercially reasonable terms. Failure to effectively cover ourselves against engineering and construction industry risks for any of these reasons could expose us to substantial costs and potentially lead to material losses. Additionally, the occurrence of any of these risks may also adversely affect public perception about our operations and the perception of our suppliers, clients and employees, leading to an adverse effect on our business. These liabilities and costs could have a material adverse effect on our business, results of operations and financial condition.

16. *Our insurance coverage may prove inadequate to satisfy future claims against us, and we may be subject to losses that might not be covered in whole or in part by existing insurance coverage.*

We maintain insurance for a variety of risks, including risks relating to construction, automobile accidents, marine insurance and other similar risks. However, in some cases, we may have not obtained the required or contemplated insurance or such insurance policies may have lapsed prior to the completion of the project. Further, we may not have obtained insurance cover for some of our projects, products or services that do not require us to maintain insurance.

There are various other types of risks and losses for which we are not insured, such as loss of business and environmental liabilities, because they are either uninsurable or not insurable on commercially acceptable terms. We also do not carry any key-man insurance. Should an uninsured loss or a loss in excess of insured limits occur, or our insurers decline to fully compensate us for our losses, we could incur liabilities, lose capital invested in that property or lose the anticipated future income derived from that business or property, while remaining obligated for any indebtedness or other financial obligations related to our business. Any such loss could result in an adverse effect to our financial condition.

17. *We are dependent on technology providers, suppliers, subcontractors and other contractors.*

The quality and efficiency of our technology providers, suppliers, other contracts and sub-contractors have a direct impact on the overall quality of our solutions and the timeliness of their delivery. There is a risk that we may have disputes with our subcontractors arising from, among other things, the quality and timeliness of work performed by the subcontractor, customer concerns about the subcontractor, or our failure to extend existing task orders or issue new task orders under a subcontract. In addition, if any of our subcontractors fail to deliver on a timely basis the agreed-upon supplies and/or perform the agreed-upon services, our ability to fulfil our obligations as a prime contractor may be jeopardized.

In most instances, there is no contractual relationship between our clients and our suppliers or subcontractors. There is no contractual relationship between our clients and our technology providers. Consequently, we would have to seek remedies from our suppliers, sub-contractors or technology providers, as the case may be, should any service or product liability claim be made by our clients against us. Although we generally design and test the technology we use and implement strict quality control measures on projects through the establishment and enforcement of stringent internal rules and regulations, we are subject to such potential claims against us. In case of any such claim against us, even if it is not proven, our reputation may suffer and our business may be materially and adversely affected. In addition, our resources could be strained by any claim which proceeds to litigation irrespective of the merits of our case. We cannot assure you that claims of such nature will not be brought against us, which could have a material adverse effect on our reputation, business and financial performance. Our future revenue and growth prospects could be materially and adversely affected if other contractors eliminate or reduce their subcontracts relationships with us.

18. *We depend on the adequate and timely supply of materials and bought out items at commercially acceptable prices.*

Our business is significantly affected by the availability, cost and quality of the materials and bought out items, which we need to procure for our projects. The prices and supply of materials and bought out items depend on factors not under our control, including domestic and international general economic conditions, competition, availability of quality suppliers, production levels, transportation costs and import duties.

Although we may enter into back-to-back supplier contracts or provide for price contingencies in our contracts to limit our exposure, if, for any reason, our primary suppliers of materials and bought out items should curtail or discontinue their delivery of such materials to us in the quantities we need, provide us with materials and bought out items that do not meet our specifications, or at prices that are not competitive or

not expected by us, our ability to meet our material requirements for our projects could be impaired, our construction schedules could be disrupted and our results of operations and business could suffer.

19. We are dependent on third-party transportation providers for the supply and delivery of our raw materials and bought out items.

We typically use third-party transportation providers for the supply of most of our materials and bought out items to our clients. Some of our materials and bought out items are procured from suppliers with operations located outside of India, including in China, USA and Europe, which increases our transportation costs. Transportation costs have been steadily increasing. Continuing increases in transportation costs may have an adverse effect on our business and results of operations. In addition, transportation strikes by members of truckers' unions and shipping delays have had in the past, and could have in the future, an adverse effect on our receipt of supplies and our ability to deliver our products. Disruptions or other problems related to transportation and deliveries of products to our projects may materially and adversely affect our results of operations.

20. A significant part of our business transactions are with government entities or agencies.

For the six months period ended September 30, 2023, Fiscal 2023, Fiscal 2022 and Fiscal 2021, 100%, 100%, 100% and 100% of our revenue from operating activities, respectively, were derived from government entities or agencies. There may be delays associated with collection of receivables from government owned or controlled entities. Our operations involve significant working capital requirements and delayed collection of our receivables could materially and adversely affect our liquidity and results of operations. In addition, we may be subject to additional regulatory or other scrutiny associated with commercial transactions with government owned or controlled entities and agencies. In addition, for projects of value less than ₹ 1,000 million, government agencies in India may grant "purchase preference" to public sector construction companies whose bid for the project is within 10% of the lowest bidder, and give such public sector enterprises an option to match the lowest bid.

21. We may be unable to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business.

We require certain statutory and regulatory permits and approvals for our business. For example, laws or regulations in some countries, including India, may require us to obtain licenses or permits in order to bid on contracts or otherwise conduct our operations. Some activities related to construction of our projects may be subject to the prior granting of environmental licenses or permits or to prior notification. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure by us to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

22. We have incurred losses in the recent past. Continuous financial losses incurred by us may be perceived adversely by external parties such as clients and bankers, which could affect our reputation, business, financial condition and results of operation and affect our ability to repay the loans availed by our Company.

Our Company has incurred losses in the recent past, the details of which are provided below:

(₹ in lakhs)

Particulars	Six months period ended September 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Profit/(loss) earned by our Company	565.15	(490.38)	(26,370.37)	(17,947.33)

We cannot assure you that with lower profit and lower revenue margin, we would be effectively able to service our debt obligations on time and would not commit any defaults in repayment of loans and the interest involved. Occurrence of any of the aforementioned events would adversely affect our ability to maintain adequate cash flows to meet our working capital requirements and run our business in an effective manner. Further, there can be no assurance that we will not incur losses in any future periods, or that there will not be an adverse effect on our reputation or business as a result of such losses. Such losses incurred by us may be

received adversely by external parties such as customers, bankers, and suppliers, which could affect our reputation.

23. *In addition to the existing indebtedness our Company, may incur further indebtedness during the course of business. We cannot assure that our Company would be able to service the existing and/ or additional indebtedness.*

As on September 30, 2023 the total fund based indebtedness of our Company is ₹ 41,836.20 lakhs, which includes the amount of the loan converted into compulsorily convertible debentures and non-convertible debentures. In addition to the indebtedness for the existing operations of our Company, we may incur further indebtedness during the course of the business. The level of our indebtedness could have several important consequences, including but not limited to the following: (i) a significant portion of our cash flow may be used towards repayment of our existing debt, which will reduce the available cash flow to fund our expenditures and other general corporate requirements; (ii) defaults of payment and other obligations under our financing arrangements may result in an event of default, acceleration of our repayment obligations and enforcement of related security interests over our assets; (iii) a substantial portion of our long term indebtedness is subject to floating rates of interest. Fluctuations in market interest rates may require us to pay higher rates of interest and will also affect the cost of our borrowings; and (iv) our ability to obtain additional financing in the future or renegotiate or refinance our existing indebtedness on terms favourable to us may be limited, which may impact our growth plans. While the ability of the company has considerably increased for serving the loans after implementation of the resolution plan, we cannot assure you that our Company will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Further, there have been instances of defaults in repayment of loans, in the past, our Company and our Promoter, Mark AB Capital Investment LLC, presented a resolution plan to the consortium of lenders led by Punjab National Bank, under the Reserve Bank of India (Prudential Framework for Resolution of Stressed Assets) Directions 2019 (the “**Resolution Plan**”). The Resolution Plan provides for infusion of ₹ 35,000 lakhs by our Promoter, change of management of our Company, conversion of loan into NCD and CCD to the tune of ₹ 35,000 lakhs, levy of interest at 9% pa. effective from October 1, 2020, amongst other requirements. As of date of this Letter of Offer, our Promoter has invested ₹ 35,000 lakhs in our Company by subscribing to 35,00,00,000 equity shares of our Company in accordance with the Resolution Plan. Further our Company has issued and allotted (i) 1,75,00,000 compulsorily convertible debentures of ₹ 100/- each, to its lenders in lieu of existing debt of our Company with yield, which will be convertible into Equity shares at a future date for an aggregate amount upto ₹ 17,500 lakhs; and (ii) 1,75,00,000 Non-Convertible Debentures of ₹ 100/- each to the lenders in lieu of their existing debt, for an aggregate amount upto ₹ 17,500 lakhs. While the ability of the company has considerably increased for serving the loans after implementation of the resolution plan, We cannot assure you that our Company would be able to repay their debts, in part of full, or at all. Any failure by our Company to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

Any failure to service the indebtedness of our Company or comply with the Resolution Plan or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

24. *In the past, there have been instances of delayed or erroneous filing of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC by our Company.*

In the past, there have been certain instances of delay and/or non-filing of statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC by our Company. No show cause

notice in respect to the above has been received by our Company till date and, no penalty or fine has been imposed by any regulatory authority in respect to the same. The occurrence of instances of delayed or erroneous filings in future may impact our results of operations and financial position.

25. *There are outstanding litigations involving our Company, our Promoters and our Subsidiaries which, if determined adversely, may adversely affect our business and financial condition.*

As on the date of this Letter of Offer, our Company, our Promoters and our Subsidiaries are involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, our Promoters and our Subsidiaries, as the case may be, or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

A summary of the pending tax proceedings and other material litigations involving our Company, our Promoters and our Subsidiaries are provided below:

26. *We depend on certain senior managers and key employees and our inability to retain such senior managers and employees or to adequately replace them or hire additional qualified employees could adversely affect our ability to achieve our objectives and business strategy, and thereby have a material adverse effect on our business and financial performance.*

Our operating and execution capability is substantially attributable to the role played by a group of our senior management and key employees. Our future success depends significantly on the full involvement of these key executives and employees and our ability to continue to retain and recruit high-level personnel. We do not carry key man insurance. We may need to offer higher compensation and other benefits to attract and retain key personnel. Our retention efforts include selecting the right people in our hiring process through adequate screening and through hiring individuals with relevant experience, providing opportunities for employees to share knowledge with one another through training sessions and presentations and offering an attractive, competitive salary and benefits package. In addition, we also offer a performance and potential-based career growth plan aimed at retaining talented employees based on performance goals. Our inability to retain such key executives and employees, or, alternatively to adequately replace them or hire qualified

new executives and employees as our business grows, could adversely affect our ability to achieve our objectives and business strategy, and thereby have a material adverse effect on our business, financial condition or results of operations.

27. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

28. We may infringe on the intellectual property rights of others.

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we or our technology providers are infringing upon any existing third-party intellectual property rights which may force us to alter our technologies, obtain additional licenses or significantly cease some portions of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. Regardless of whether such claims that we or our technology providers are infringing patents or other intellectual property rights have any merit, those claims could adversely affect our relationships with current or future clients, result in costly litigation, cause product shipment delays or stoppages, divert management's attention and resources, subject us to significant liabilities, require us to enter into additional royalty or licensing agreements or require us to cease certain activities.

An adverse ruling arising out of any intellectual property dispute could subject us to significant liability for damages, prevent us from using technologies or developing products, or require us to negotiate licenses to disputed rights from third parties. Although patent and intellectual property disputes in the technology area are often settled through licensing or similar arrangements, costs associated with these arrangements may be substantial and could include license fees and ongoing royalties, which could be prohibitively expensive. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. Any of the foregoing could materially and adversely affect our business, results of operations and financial condition.

Some of our Subsidiaries have incurred losses in the past, details of which are as under:

31. Our Promoter, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.

Our Promoter, Directors and Key Managerial Personnel, have interest in our Company to the extent of the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoter, Directors and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details, please see the section titled “Financial Information” at page 113 of this Letter of Offer.

There can be no assurance that our Promoter, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

32. We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.

The details of our contingent liabilities are as follows:

(₹ in lakhs)

33. *Our Company has availed certain unsecured loans, which are recallable in nature.*

As on September 30, 2023, our Company has outstanding long term unsecured loans aggregating to ₹ 900 lakhs, which have been extended by one of the wholly-owned subsidiaries of our Promoter, namely, Mark AB Capital Investment India Private Limited, which are re-payable as a bullet payment on December 31, 2035 at an interest rate of 0.1% per annum. The details of the loans availed has been provided below:

S. No.	Name of the lender	Amount sanctioned (₹ in lakhs)	Principal Amount outstanding as of September 30, 2023 (₹ in lakhs)

Total		900.00	900

In the event, we are unable to repay the aforementioned loan, on the due date, our Company would stand in violation of the arrangement entered into with Mark AB Capital Investment India Private Limited, which could adversely affect our business, financial condition and results of operations.

34. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2023, we have entered into related party transactions with our Promoters, our Subsidiaries relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please see the section titled “*Financial Information*” at page 113 of this Letter of Offer.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

35. *The agreements executed by our Company with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors and third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. A default under this clause will result in the outstanding amounts becoming due and payable immediately. This might have an adverse effect on our cash flows, business, results of operations and financial condition.

36. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past three years and the six months period ended September 30, 2023, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 112 of this Letter of Offer.

37. ***We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “*Industry Overview*” of this Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

38. ***There have been instances of non-payment of statutory dues in the past.***

There have been instances in the past wherein undisputed statutory dues including goods and service tax, provident fund, employees’ state insurance, income-tax, duty of custom, cess have not been regularly deposited by our Company with the appropriate authorities and there have been delays in remittance of dues in the past. However no undisputed amount payable in respect of goods and services tax, provident fund, employees’ state insurance, income-tax, duty of custom, cess and any other statutory dues applicable to it were outstanding, at the year ended March 31, 2023, for a period of more than six months from the date they became payable. Although no show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority, it cannot be assured that there will not be such instances in the future or that our Company will not commit any further delays or defaults in relation to the applicable regulatory requirements, or that any penalty or fine will not be imposed by any regulatory authority in respect to the same.

ISSUE SPECIFIC RISKS

39. ***We will not distribute this Letter of Offer, the Abridged Letter of Offer, Application Form and Rights Entitlement Letter to overseas Shareholders who have not provided an address in India for service of documents.***

In accordance with the SEBI ICDR Regulations and SEBI Master Circular our Company will send, only through email, the Abridged Letter of Offer, the Rights Entitlement Letter, Application Form and other issue material to the email addresses of all the Eligible Equity Shareholders who have provided their Indian addresses to our Company or who are located in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

40. ***SEBI has recently, by way of SEBI Master Circular, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars, and in this Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI Master Circular and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 225 of this Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Master Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form

only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit or credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned / reversed / failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

41. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with the circular SEBI Master Circular, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form. For details, please refer chapter “*Terms of the Issue*” on page 225 of this Letter of Offer.

42. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 225 of this Letter of Offer.

43. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

44. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for

more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

45. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

46. *Investors will be subject to market risks until the Equity Shares credited to the investors demat account are listed and permitted to trade.*

Investors can start trading the Equity Shares allotted to them only after they have been credited to an investor's demat account, are listed and permitted to trade. Since the Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for the Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that the Equity Shares allocated to an investor will be credited to the investor's demat account or that trading in the Equity Shares will commence in a timely manner.

47. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

48. *The trading price of our Equity Shares may be subject to volatility and you may not be able to sell your Equity Shares at or above the Issue Price.*

The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets in general experience a loss of investor confidence, the trading price of our

Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could adversely affect the price of our Equity Shares.

49. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

50. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

51. *Investors will not have the option of getting the allotment of Equity Shares in physical form.*

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see “*Terms of the Issue*” on page 225 of this Letter of Offer. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

52. *There is no guarantee that our Equity Shares will be listed, or continue to be listed, on the Indian stock exchanges in a timely manner, or at all, and prospective investors will not be able to immediately sell their Equity Shares on the Stock Exchange.*

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be applied for or granted until after our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares. Accordingly, there could be a failure or delay in listing our Equity Shares on the Stock Exchange, which would adversely affect your ability to sell our Equity Shares.

53. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

54. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

55. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.*

Our summary statements of assets and liabilities and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity, as per the Financial Statements, have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Master Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

56. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general

and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

57. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

58. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules ("GAAR") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

59. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange's indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

60. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

61. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

62. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

63. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the insurance industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of price points of various input costs and thereby increase our operational cost.

The Taxation Laws (Amendment) Act, 2019, also prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favour

of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate (on gross basis) for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Furthermore, the Government of India announced the Union Budget for Fiscal 2023 (“**Budget 2023**”), pursuant to which the Finance Bill 2023 (defined below) has proposed various amendments. The Finance Bill, 2023 became the Finance Act, 2023 March 31, 2023 and has come into effect with effect from April 1, 2023. We have not fully determined the impact of these recent and proposed laws and regulations on our business.

There can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations in connection with GST. While we are and will comply with the GST rules and regulations, any failure to comply with the same may result in noncompliance with the GST and may adversely affect our business and results of operations. The GoI announced the union budget for fiscal year 2024, following which the Finance Bill, 2023 was introduced in the Lok Sabha on February 1, 2023. The Finance Bill 2023 is yet to receive the assent from the President of India, post which became the Finance Act, 2022 (“**Finance Act 2023**”). We cannot predict whether the amendments made and yet to be notified pursuant to the Finance Act 2023 would have an adverse effect on our business, financial condition, future cash flows and results of operations. Any changes in the Finance Act 2023 or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws that are applicable to our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Letter of Offer, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as “gig workers” and “platform workers” and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

64. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

65. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

Global Industry Outlook

Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in 2023 and 2024 on an annual average basis. Compared with projections in the April 2023 World Economic Outlook, growth has been upgraded by 0.2 percentage point for 2023 with no change for 2024. The forecast for 2023-2024 remains well below the historical (2000-19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms. Advanced Economies continue to drive the decline in growth from 2022-2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging market and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions.

Global headline inflation is set to fall from an annual average of 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024, broadly as projected in April, but above pre-pandemic (2017–19) levels of about 3.5 percent. About three-quarters of the world's economies are expected to see lower annual average headline inflation in 2023. The forecast for 2023 is revised down by 0.2 percentage point, largely on account of subdued inflation in China. The forecast for 2024 has been revised upward by 0.3 percentage point, with the upgrade reflecting higher-than-expected core inflation

The balance of risks to global growth remains tilted downward, but adverse risks have receded since the publication of the April 2023 Outlook WEO. The resolution of US debt ceiling tensions has reduced the risk of disruptive rises in interest rates for sovereign debt, which would have increased pressure on countries already struggling with increased borrowing costs. The quick and strong action authorities took to contain banking sector turbulence in the United States and Switzerland succeeded in reducing the risk of an immediate and broader crisis.

In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

Forces shaping the Outlook

The Global recovery from the COVID -19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions.

The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a “global health emergency.” Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. But forces that hindered growth in 2022 persist. Inflation remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments. As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations

Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post pandemic rotation of consumption back towards services is approaching completion in advanced economies (including in tourism dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter.

For 18 AEs, the sample comprises AUS, CAN, CHE, CZE, DEU, DNK, ESP, FRA, GBR, ISR, ITA, KOR, NOR, NZL, SGP, SWE, TWN, and USA. Economy list uses International Organization for Standardization (ISO) country codes. AEs = advanced economies; EMDEs = emerging market and developing economies.

However, as mobility returns to pre pandemic levels, the scope for further acceleration appears more mind.

At the same time, nonservices sector, including manufacturing, have shown weakness and high frequency indicators for second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geoeconomic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

The fight against inflation continues. Inflation is easing in most countries but remains high, with divergences across economies and inflation measures. Following the buildup of gas inventories in Europe and weaker-than-expected demand in China, energy and food prices have dropped substantially from their 2022 peaks, although food prices remain elevated. Together with the normalization of supply chains, these developments have contributed to a rapid decline in headline inflation in most countries. Core inflation, however, has on average declined more gradually and remains well above most central banks' targets. Its persistence reflects, depending on the particular economy considered, pass-through of past shocks to headline inflation into core inflation, corporate profits remaining high, and tight labor markets with strong wage growth, especially in the context of weak productivity growth that lifts unit labor costs. However, to date, wage-price spirals—wherein prices and wages accelerate together for a sustained period—do not appear to have taken hold in the average advanced economy, and longer-term inflation expectations remain anchored. In response to the persistence of core inflation, major central banks have communicated that they will need to tighten monetary policy further. The Federal Reserve paused rate hikes at its June meeting but signaled further ones ahead, and the Reserve Bank of Australia, Bank of Canada, Bank of England, and European Central Bank have continued to raise rates. At the same time, in some other economies, particularly in East Asia, where mobility curbs during the pandemic restricted demand for services longer than elsewhere, core inflation has remained low. In China, where inflation is well below target, the central bank recently cut policy interest rates. The Bank of Japan has kept interest rates near zero under the quantitative and qualitative monetary easing with yield curve control policy.

Acute stress in the banking sector has receded, but credit availability is tight. Thanks to the authorities' swift reaction, the March 2023 banking scare remained contained and limited to problematic regional banks in the United States and Credit Suisse in Switzerland. Accordingly, since the April 2023 WEO, global financial conditions have eased (Box 1), a sign that financial markets may have become less concerned about risks to financial stability coming from the banking sector. But tight monetary policy continues to put some banks under pressure, both directly (through higher costs of funding) and indirectly (by increasing credit risk). Bank lending surveys in the United States and Europe suggest that banks restricted access to credit considerably in the first quarter of 2023, and they are expected to continue to do so in coming months. Corporate loans have been declining lately, as has commercial real estate lending.

Following a reopening boost, China's recovery is losing steam. Manufacturing activity and consumption of services in China rebounded at the beginning of the year when Chinese authorities abandoned their strict lockdown policies; net exports contributed strongly to sequential growth in February and March as supply chains normalized and firms swiftly put backlogs of orders into production. Nonetheless, continued weakness in the real estate sector is weighing on investment, foreign demand remains weak, and rising and elevated youth unemployment (at 20.8 percent in May 2023) indicates labor market weakness. High-frequency data through June confirm a softening in momentum into the second quarter of 2023.

The Forecast

Growth Bottoming Out

Global growth, is projected to fall from 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024 on an annual average basis. Compared with projections in the April 2023 WEO, growth has been upgraded by 0.2 percentage point for 2023, with no change for 2024. The forecast for 2023–24 remains well below the historical (2000–19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms. Advanced economies continue to drive the decline in growth from 2022 to 2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging market and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions. On a year-over-year basis, global growth bottomed out in the fourth quarter of 2022. However, in some major economies, it is not expected to bottom out before the second half of 2023.

World trade growth is expected to decline from 5.2 percent in 2022 to 2.0 percent in 2023, before rising to 3.7 percent in 2024, well below the 2000–19 average of 4.9 percent. The decline in 2023 reflects not only the path of global demand, but also shifts in its composition toward domestic services, lagged effects of US dollar appreciation—which slows trade owing to the widespread invoicing of products in US dollars—and rising trade barriers.

These forecasts are based on a number of assumptions, including those regarding fuel and nonfuel commodity prices and interest rates. Oil prices rose by 39 percent in 2022 and are projected to fall by about 21 percent in 2023, reflecting the slowdown in global economic activity. Assumptions regarding global interest rates have been revised upward, reflecting actual and signaled policy tightening by major central banks since April. The Federal Reserve and Bank of England are now expected to raise rates by more than assumed in the April 2023 WEO—to a peak of about 5.6 percent in the case of the Federal Reserve—before reducing them in 2024. The European Central Bank is assumed to raise its policy rate to a peak of 3¾ percent in 2023 and to ease gradually in 2024. Moreover, with near-term inflation expectations falling, real interest rates are likely to stay up even after nominal rates start to fall.

For *advanced economies*, the growth slowdown projected for 2023 remains significant: from 2.7 percent in 2022 to 1.5 percent in 2023, with a 0.2 percentage point upward revision from the April 2023 WEO. About 93 percent of advanced economies are projected to have lower growth in 2023, and growth in 2024 among this group of economies is projected to remain at 1.4 percent.

For *emerging market and developing economies*, growth is projected to be broadly stable at 4.0 percent in 2023 and 4.1 percent 2024, with modest revisions of 0.1 percentage point for 2023 and –0.1 percentage point for 2024. However, this stable average masks divergences, with about 61 percent of the economies in this group growing

faster in 2023 and the rest—including low-income countries and three of the five geographic regions described in what follows—growing more slowly.

Core Inflation declining more gradually than Headline Inflation

About three quarters of the world’s economies are expected to see lower annual average headline inflation in 2023. Global headline inflation is set to fall from an annual average of 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024, broadly as projected in April, but above pre-pandemic (2017–19) levels of about 3.5 percent. Monetary policy tightening is expected to gradually dampen inflation, but a central driver of the disinflation projected for 2023 is declining international commodity prices. Differences in the pace of disinflation across countries reflect such factors as different exposures to movements in commodity prices and currencies and different degrees of economic overheating. The forecast for 2023 is revised down by 0.2 percentage point, largely on account of subdued inflation in China. The forecast for 2024 has been revised upward by 0.3 percentage point, with the upgrade reflecting higher-than-expected core inflation.

Core inflation is generally declining more gradually. Globally, it is set to decline from an annual average of 6.5 percent in 2022 to 6.0 percent in 2023 and 4.7 percent in 2024. For advanced economies forecasts has been revised upwards by 0.3 percentage point for 2023 and by 0.4 percentage point for 2024 compared with April 2023 WEO. Global core inflation is revised down by 0.2 percentage point in 2023, reflecting lower-than-expected core inflation in China, and up by 0.4 percentage point in 2024. On an annual average basis, about half of the economies are expected to see no decline in core inflation in 2023, although on a fourth-quarter –over-fourth-quarter basis, about 88% of the economies for which quarterly data are available are projected to see a decline. Overall, inflation is projected to remain above target in 2023 in 96 percent of economies with inflation targets and in 89 percent of those economies in 2024.

Risk to the Outlook

The balance of risks to the global outlook remains tilted to the downside, with scope for lower growth and higher inflation, but adverse risks have receded since the publication of the April 2023 WEO.

Note: Real effective exchange rates are assumed to remain constant at the levels prevailing during May 2, 2023–May 30, 2023. Economies are listed on the basis of economic size. The aggregated quarterly data are seasonally adjusted. WEO = World Economic Outlook.

1/ Difference based on rounded figures for the current and April 2023 WEO forecasts. Countries for which forecasts have been updated relative to April 2023 WEO forecasts account for approximately 90 percent of world GDP measured at purchasing-power-parity weights.

2/ For World Output (Emerging Market and Developing Economies), the quarterly estimates and projections account for approximately 90 percent (80 percent) of annual world (emerging market and developing economies) output at purchasing-power-parity weights.

3/ Excludes the Group of Seven (Canada, France, Germany, Italy, Japan, United Kingdom, United States) and euro area countries.

4/ For India, data and projections are presented on a fiscal year basis, with FY 2022/23 (starting in April 2022) shown in the 2022 column. India's growth projections are 6.6 percent in 2023 and 5.8 percent in 2024 based on calendar year.

5/ Indonesia, Malaysia, Philippines, Singapore, Thailand.

6/ Simple average of growth rates for export and import volumes (goods and services).

7/ Simple average of prices of UK Brent, Dubai Fateh, and West Texas Intermediate crude oil. The average assumed price of oil in US dollars a barrel, based on futures markets (as of June 1, 2023), is \$76.43 in 2023 and \$71.68 in 2024.

8/ Excludes Venezuela.

9/ The inflation rate for the euro area is 5.2% in 2023 and 2.8% in 2024, that for Japan is 3.4% in 2023 and 2.7% in 2024, and that for the United States is 4.4% in 2023 and 2.8% in 2024.

Upside risks—More favourable outcomes for global growth than in the baseline forecast have become increasingly plausible. Core inflation could fall faster than expected—

- from greater-than-expected pass-through of lower energy prices and a compression of profit margins to absorb cost increases, among other possible causes
- and declining job vacancies could play a strong role in easing labor markets, which would reduce the likelihood of unemployment having to rise to curb inflation. Developments along these lines would then reduce the need for monetary policy tightening and allow a softer landing. Scope exists for more favorable surprises to domestic demand around the world, as in the first quarter of 2023. In numerous

economies, consumers have not yet drained the stock of excess savings they accumulated during the pandemic; this could further sustain the recent strength in consumption. Stronger policy support in China than currently envisaged

- particularly through means-tested transfers to households
- could further sustain recovery and generate positive global spillovers. Such developments, however, would increase inflation pressure and necessitate a tighter monetary policy stance.

Downside risks—Despite the recent positive growth surprises, plausible risks continue to be skewed to the downside:

- *Inflation persist:* Tight labor markets and pass-through from past exchange rate depreciation could push up inflation and risk de-anchoring longer-term inflation expectations in a number of economies. The institutional setup of wage setting in some countries could amplify inflation pressures on wages. Moreover, El Niño could bring more extreme temperature increases than expected, exacerbate drought conditions, and raise commodity prices. The war in Ukraine could intensify, further raising food, fuel, and fertilizer prices. The recent suspension of the Black Sea Grain Initiative is a concern in this regard. Such adverse supply shocks might affect countries asymmetrically, implying different dynamics for core inflation and inflation expectations, a divergence in policy responses, and further currency movements
- *Financial Markets reprice:* Financial markets have adjusted their expectations of monetary policy tightening upward since April but still expect less tightening than policymakers have signaled, raising the risk that unfavorable inflation data releases could—as in the first quarter of 2023—trigger a sudden rise in expectations regarding interest rates and falling asset prices. Such movements could further tighten financial conditions and put stress on banks and nonbank financial institutions whose balance sheets remain vulnerable to interest rate risk, especially those highly exposed to commercial real estate. Contagion effects are possible, and a flight to safety, with an attendant appreciation of reserve currencies, would trigger negative ripple effects for global trade and growth.
- *China's recovery underperforms:* Recent developments shift to the downside the distribution of risks surrounding China's growth forecast, with negative potential implications for trading partners in the region and beyond. The principal risks include a deeper-than-expected contraction in the real estate sector in the absence of swift action to restructure property developers, weaker-than-expected consumption in the context of subdued confidence and unintended fiscal tightening in response to lower tax revenues for local government.
- *Debt distress increases:* Global financial conditions have generally eased since the March 2023 episode of banking stress (Box 1), but borrowing costs for emerging market and developing economies remain high, constraining room for priority spending and raising the risk of debt distress. The share of emerging market and developing economies with sovereign credit spreads above 1,000 basis points remained at 25 percent as of June (compared with only 6.8 percent two years ago).
- *Geoeconomic fragmentation deepens:* The ongoing risk that the world economy will separate into blocs amid the war in Ukraine and other geopolitical tensions could intensify, with more restrictions on trade (in particular that in strategic goods, such as critical minerals); cross-border movements of capital, technology, and workers; and international payments. Such developments could contribute to additional volatility in commodity prices and hamper multilateral cooperation on providing global public goods

Indian Economy Overview

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

India's Gross Domestic Production

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Indian Outlook of Construction and Infrastructure Industry

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure and construction development projects.

In order to meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of

infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water& irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Market Size

India plans to spend US\$ 1.4 trillion on infrastructure through 'National Infrastructure Pipeline' in the next five years. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion. India will need to construct 43,000 houses every day until 2022 to achieve the vision of Housing for All by 2022. As of 22 August, 2022, 122.69 lakh houses have been sanctioned, 103.01 lakh houses have been grounded, and 62.21 lakh houses have been completed, under the Pradhan Mantri Awas Yojna scheme (PMAY-Urban).

Hundreds of new cities need to be developed over the next decade. Over the next 10 years, demand for urban freight is predicted to increase by 140%. Final-mile freight transit in Indian cities accounts for 50% of the total logistics expenditures in the country's increasing e-commerce supply chains. India is expected to become the third-largest construction market globally by 2022. Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over FY21-26 driven by spending on water supply, transport and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the 10th five year plan as against 9% in the 11th five year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five year plan, with 40% of the funds coming from the private sector.

Road Ahead

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom as a result of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of Rs. 5,000,000 crore (US\$ 750 billion) for railways infrastructure from 2018-30. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

Under the mission, all villages, Gram Panchayats, Districts, States and Union Territories in India declared themselves "open-defecation free" (ODF) by 2 October 2019, constructing over 100 million toilets in rural India. To ensure that the ODF behaviours are sustained, no one is left behind, and that solid and liquid waste management facilities are accessible, the Mission is moving towards the next Phase II of SBMG i.e., ODF-Plus. ODF Plus activities under Phase II of Swachh Bharat Mission (Grameen) will reinforce ODF behaviours and focus on providing interventions for the safe management of solid and liquid waste in villages.

6) PM Gati Shakti aligned Infra projects – Outlay 1 lakh Cr.

Traditionally, there was lack of coordination between different Departments, for example, once a road was constructed, other agencies dug up the constructed road again for activities like laying of

underground cables, gas pipelines etc. This not only caused great inconvenience but was also a wasteful expenditure. To address this, efforts were made to increase coordination so that all cables, pipelines etc. could be laid simultaneously.

Prime Minister launched PM Gati Shakti - National Master Plan for Multi-modal Connectivity, essentially a digital platform to bring 16 Ministries including Railways and Roadways together for integrated planning and coordinated implementation of infrastructure connectivity projects. The multi-modal connectivity will provide integrated and seamless connectivity for movement of people, goods and services from one mode of transport to another. It will facilitate the last mile connectivity of infrastructure and reduce travel time for people.

To The Board of Directors of SEPC Limited

1. We have reviewed the accompanying statement of unaudited consolidated financial results of SEPC Limited (‘the Holding Company’), its subsidiary, (the Holding Company and its subsidiary together referred to as the ‘Group’) for the quarter and half year ended September 30, 2023 (‘the Statement’), being submitted by the Holding Company pursuant to the requirements of Regulation 33 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended (‘the Regulations’).
2. This Statement, which is the responsibility of the Holding Company’s Management and has been approved by the Holding Company’s Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 ‘Interim Financial Reporting’ prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder (‘Ind AS 34’) and other recognised accounting principles generally accepted in India and is in compliance with the Regulations. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagement (SRE) 2410, ‘Review of Interim Financial Information Performed by the Independent Auditor of the Entity’ issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33 (8) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, to the extent applicable.

4. This Statement includes the results of the Holding Company and the following entity

5. Basis for Qualified Conclusion:

Our audit report on the consolidated financial statements for the year ended March 31, 2023 and our limited review report on the Statement for the quarter ended June 30, 2023 was qualified in respect of the matters stated below:

- i. The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 33,289.92 Lakhs (September 30, 2022: Rs. 39,679.73 Lakhs) which was recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management’s assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12 on Income taxes, we are unable to comment on the adjustments, if any, on the Statement. (Refer Note 6 of the Statement).

- ii. Non-Current Contract Assets include Rs. 7,351.90 Lakhs (Net of provisions amounting to Rs.926.98 Lakhs) (September 30, 2022: Rs.3,956.02 Lakhs) and Non-Current Trade Receivables include Rs.575.21 Lakhs (Net of provisions amounting to Rs. 82.99 Lakhs) relate to dues on projects which have been stalled due to delays in obtaining approvals from regulatory authorities. We do not have sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the said amounts. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Assets and Trade Receivables and the impact if any, on account of non-provisioning of the said balances, on the Statement. (Refer Note 3 of the Statement).

These qualifications have not been addressed by the Management of the Holding Company in the Statement for the period ended September 30, 2023.

6. Based on our review conducted and procedures performed as stated in paragraph 3 above and based on the consideration of the review reports of the other auditor referred to in paragraph 7, with the exception of the matter described in the paragraph 5 and the effect thereon, nothing has come to our attention that causes us to believe that the accompanying Statement prepared in accordance with the recognition and measurement principles laid down in Ind AS 34 and other recognised accounting principles generally accepted in India has not disclosed the information required to be disclosed in terms of the Regulations including the manner in which it is to be disclosed, or that it contains any material misstatement.
7. The Statement includes the interim financial results of subsidiary company (including step down subsidiary) which have not been reviewed by their auditors, whose interim financial results reflect total assets of Rs. 15,574.47 Lakhs as at September 30, 2023 and total revenue of Rs. 65.43 Lakhs and Rs. 65.43 Lakhs, total net profit/(loss) after tax of Rs.22.47 Lakhs and (Rs.2.9 Lakhs) and total comprehensive income / (loss) of Rs. 22.47 Lakhs and (Rs.2.9 Lakhs) for the quarter ended September 30, 2023 and for the period from April 01, 2023 to September 30, 2023, respectively, and cash flows (net) of Rs. 1.61 Lakhs for the period from April 01, 2023 to September 30, 2023, as considered in the Statement. This interim financial results have been furnished to us by the Management and our conclusion on the Statement in so far as it relates to the amounts and disclosures included in respect of the subsidiary is based solely on such management prepared unaudited interim financial results. 5. For the purpose of our examination, we have relied on:

Auditor's report issued by us dated May 25, 2023, June 24, 2022 and June 29, 2021 on the consolidated Ind AS financial statements of the Group as at and for the years ended March 31, 2023, March 31, 2022, and March 31, 2021 as referred in Paragraph 4 above.

- A. The audit report for the year ended March 31, 2023 included the below paragraphs:

(i) **Emphasis of Matter:**

We draw attention to the following matters in the Notes to the consolidated financial statements:

- a) Note 42.1(i) of the consolidated financial statements, which describes the implementation of Resolution Plan entered into with the lenders dated June 22, 2022, wherein interest waiver, and the difference between the carrying amounts of the facilities before restructuring and the fair values of the new facilities has been recognized as income and disclosed under Exceptional items in the statement of profit and loss in accordance with INDAS 109 - Financial Instruments.
- b) Note 42.1(ii) to the consolidated financial statements, which states that the management written off an amount of Rs. 5,819.69 Lakhs towards amounts due on account of work performed on a contract entered into with a customer which was subsequently wrongfully terminated before the completion of the contract due to certain issues at the contract site. Legal disputes / arbitration proceedings have been initiated during the period in respect of projects with the customers.

Our opinion is not modified in respect of these matters.

(ii) **Other Matters:**

We did not audit the financial statements of one subsidiary, whose financial statements reflect total assets of Rs. 15,623.16 Lakhs as at March 31, 2023, total revenues of Rs. 793.85 Lakhs and net cash flows amounting to Rs. 15.13 Lakhs for the year ended on that date, as considered in the consolidated financial statements. The financial statements have been audited by other auditor whose report have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of this subsidiary and our report in terms of sub-section (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiary, is based solely on the reports of the other auditor. The subsidiary is located outside India whose financial statements have been prepared in accordance with accounting principles generally accepted in its country and which have been audited by other auditor under generally accepted auditing standards applicable in its country.

The Holding Company's management has converted the financial statements of the subsidiary located outside India from accounting principles generally accepted in its country to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Holding Company's management.

Our opinion in so far as it relates to the balances and affairs of the subsidiary located outside India is based on the report of other auditor and the conversion adjustments prepared by the management of the Holding Company and audited by us.

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditor and the financial statements certified by the Management.

B. The audit report for the year ended March 31, 2022 included the below paragraphs:

(i) **Material Uncertainty Related to Going Concern:**

We draw attention to Note 4 (e) to the consolidated financial statements, which states that the Company has incurred a net loss of Rs. 26,370.37 Lakhs during the year ended March 31, 2022 and as of that date has accumulated losses aggregating to Rs. 2,15,105.50 Lakhs which has resulted in substantial erosion of its net worth. Further, the COVID-19 pandemic has also impacted the operations resulting in delay of collection relating to project dues. These events or conditions indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. However, as stated in the note, considering the restructuring plan for the borrowings, infusion of additional equity subsequent to the year end by the investor and Management's plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, future business plans, non-fund based facilities, and realisation of trade receivables, the consolidated financial statements of the Company for the year ended March 31, 2022 have been prepared on a going concern basis. Our opinion is not modified in respect of this matter.

(ii) **Emphasis of Matter:**

We draw attention to Note 43 to the Consolidated financial statements which states that the Management has made an assessment of the impact of Covid-19 on the Company's operations, financial performance and position as at and for the year ended March 31, 2022 and accordingly recognised an impairment loss of Rs. 6,361.26 Lakhs (March 31, 2021: Rs. 1,149.11 Lakhs) on financial assets and contract assets to reflect the business impact arising from the COVID 19 pandemic. Our opinion is not modified in respect of this matter.

(iii) **Other Matters:**

7. Basis for Qualified Opinion

A) The audit report on the consolidated financial statements for the year ended March 31, 2023 issued by us, included the below qualifications which have not been adjusted in the Restated Consolidated Financial Information :

- i) The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 33,289.92 Lakhs (March 31, 2022: Rs. 39,645 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12 on Income taxes, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 43B of the consolidated financial statements).
- ii) Contract Assets (Non-Current) include Rs. 7,351.90 Lakhs (Net of provisions amounting to Rs. 926.98 Lakhs) (March 31, 2022: Rs. 3,956.02 Lakhs) and Trade Receivables (Non-Current) include Rs. 575.21 Lakhs (Net of provisions amounting to Rs. 82.99 Lakhs) relating to dues on projects which are not progressing on account of statutory delays faced by the customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, we do not have sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the said amounts.

Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Asset (Non-Current) and Trade Receivables (Non-Current) and the impact if any, on account of non-provisioning of the said balances on the consolidated financial statements. (Refer to Note 8.1 and Note 11.1 of the Consolidated Financial Statements)

B) The audit report on the consolidated financial statements for the year ended March 31, 2022 issued by us, included the below qualifications which have not been adjusted in the Restated Consolidated Financial Information :

- i) The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 39,645.00 Lakhs (March 31, 2021: Rs. 43,889.00 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment on reasonable certainty of future taxable profits, as required by Ind AS 12- Income taxes and considering the current pandemic situation, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 44 of the Consolidated financial statements)

- ii) Contract Asset (Non-Current) include Rs. 3,956.02 Lakhs (Net of provisions amounting to Rs. 926.98 Lakhs) relating to project dues which is not progressing on account of Statutory delays faced by the Customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the above said amount is not available. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Asset (Non-Current) and the impact if any, on account of non-provisioning of the said balance on the Consolidated financial statements. (Refer to Note 08 of the Consolidated Financial Statements)
- C) The audit report for the year ended March 31, 2021 included the below qualifications which have not been adjusted in the Restated Consolidated Financial Information:
- i. Financial Assets Loans (Non-Current) include Rs. 3,201.62 Lakhs (March 31, 2020: Rs. 3,800.40 Lakhs) due from a related party. Sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the above said amount is not available and the amount is outstanding for more than five years. Further, no provision with respect to the same is made in the books of account as explained in Note 9.2 of the Consolidated Financial Statements. Accordingly, we are unable to comment on the carrying value of above-mentioned Financial Assets Loans amounting to Rs. 3,201.62 Lakhs and the impact if any, on account of non-provisioning of the said balance on the financial statements at present.
- ii. The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. Rs. 43,889.00 Lakhs (March 31, 2020: Rs. 43,520 Lakhs) which is recognized on unabsorbed business losses. The Restated Consolidated Financial Information has been compiled by the Management from:

The audited consolidated Ind AS financial statements as at and for the year ended 31 March 2023, 31 March 2022 & 31 March 2021 prepared in accordance with the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Companies Act, 2013, read with Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other relevant provisions of the Act.

(a) Statement of Compliance with Ind AS

The Company's financial statements have been prepared in accordance with the provisions of the Companies Act, 2013 and the Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 and amendments thereof issued by Ministry of Corporate Affairs in exercise of the powers conferred by section 133 of the Companies Act, 2013. In addition, the guidance notes/announcements issued by the Institute of Chartered Accountants of India (ICAI) are also applied except where compliance with other statutory promulgations require a different treatment.

(b) Basis of measurement

The financial statements have been prepared on a historical cost convention on accrual basis, except certain financial assets and liabilities measured at fair value (Refer Accounting Policy No. 2.15 on financial instruments).

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. The normal operating cycle of the entity for Construction contracts is the duration of 2 to 3 years depending on each contract.

(c) Presentation of financial statements

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Schedule III to the Companies Act, 2013 ("the Act"). The statement of cash flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Accounting Standards and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Amounts in the financial statements are presented in Indian Rupees in Lakhs rounded off to two decimal places as permitted by Schedule III to the Companies Act, 2013. Per share data are presented in Indian Rupees to two decimal places.

- (d) **Use of estimates**
The preparation of financial statements in conformity with Ind AS requires the Management to make estimate and assumptions that affect the reported amount of assets and liabilities as at the Balance Sheet date, reported amount of revenue and expenses for the year and disclosures of contingent liabilities as at the Balance Sheet date. The estimates and assumptions used in the accompanying financial statements are based upon the Management's evaluation of the relevant facts and circumstances as at the date of the financial statements. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on a periodic basis. Revisions to accounting estimates include useful lives of property, plant and equipment & intangible assets, allowance for expected credit loss, future obligations in respect of retirement benefit plans, expected cost of completion of contracts, fair value measurement, etc. Difference, if any, between the actual results and estimates is recognised in the period in which the results are known. Refer Note 3 for detailed discussion on estimates and judgments.
- (e) **Interests in Joint Operations**
When the Company has joint control of the arrangement based on contractually determined right to the assets and obligations for liabilities, it recognises such interests as joint operations. Joint control exists when the decisions about the relevant activities require unanimous consent of the parties sharing the control. In respect of its interests in joint operations, the Company recognises its share in assets, liabilities, income and expenses line-by-line in the standalone financial statements of the entity which is party to such joint arrangement which then becomes part of the consolidated financial statements of the Group when the financial statements of the Holding Company and its subsidiaries are combined for consolidation.

2.2 Property, plant and equipment (PPE)

Property, plant and equipment is recognised when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. PPE are stated at original cost net of taxes/duty credits availed, if any less accumulated depreciation and cumulative impairment, if any. PPE acquired on hire purchase basis are recognised at their cash values. Cost includes professional fees related to the acquisition of PPE and for qualifying assets, borrowing costs capitalised in accordance with the company's accounting policy.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to Statement of Profit and Loss during the year in which they are incurred.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets and the cost of assets not put to use before such date are disclosed under 'Capital work-in-progress'.

Depreciation methods, estimated useful lives

The Company depreciates property, plant and equipment over their estimated useful lives using the straight line method. The estimated useful lives of assets are as follows:

Property, plant and equipment	Useful Life
Leasehold improvement*	Lease period or life of asset whichever is lower
Buildings	30 years
Plant & Machinery	2 to 20 years
Furniture and fixtures & Electrical Installations	10 years
Office equipment	5 to 10 years
Computers	
- Servers	6 years
- End user devices such as laptops, desktops	3 years

* Leasehold improvements are amortized over the lease period, which corresponds with the useful lives of the assets.

Based on the technical experts assessment of useful life, certain items of property plant and equipment are being depreciated over useful lives different from the prescribed useful lives under Schedule II to the Companies Act, 2013. Management believes that such estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Depreciation on addition to property plant and equipment is provided on pro-rata basis from the date of acquisition. Depreciation on sale/deduction from property plant and equipment is provided up to the date preceding the date of sale, deduction as the case may be. Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in Statement of Profit and Loss under 'Other Income'.

Depreciation methods, useful lives and residual values are reviewed periodically at each financial year end and adjusted prospectively, as appropriate. Freehold land is not depreciated.

2.3 Intangible Assets

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost, net of tax/duty credits availed, if any less accumulated amortization and cumulative impairment. Administrative and other general overhead expenses that are specifically attributable to the acquisition of intangible assets are allocated and capitalized as part of cost of the intangible asset.

The Company amortized intangible assets over their estimated useful lives using the straight line method. The estimated useful lives of intangible assets are as follows:

Intangible assets	
Technical know how	5 to 10 years
Computer Software	5 years

As at the end of each accounting year, the Company reviews the carrying amounts of its PPE and Intangible Assets to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, the PPE and Intangible Assets are tested for impairment, so as to determine the impairment loss, if any. Goodwill and Intangible Assets with indefinite life are tested for impairment each year.

SEPC Limited

Notes forming part of the Restated Consolidated Financial Statements
(Amount in ₹ lakhs, unless otherwise stated)

2.4 Foreign Currency Transactions

(a) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

(b) Transactions and balances

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. Gains/Losses arising out of fluctuation in foreign exchange rate between the transaction date and settlement date are recognised in the Statement of Profit and Loss.

All monetary assets and liabilities in foreign currencies are restated at the year end at the exchange rate prevailing at the year end and the exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

2.5 Fair value measurement

The Company maintains accounts on accrual basis following the historical cost convention, except for certain financial instruments that are measured at fair value in accordance with Ind AS and certain items of property, plant and equipment that were revalued in earlier years in accordance with the I-GAAP principles. The carrying value of all the items of property, plant and equipment as on date of transition is considered as the deemed cost.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability, or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability accessible to the Company.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. The Company's management determines the policies and procedures for fair value measurement.

Fair value measurements under Ind AS are categorised as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

- ▶ Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the company can access at measurement date;
- ▶ Level 2 inputs are inputs, other than quoted prices included in level 1, that are observable for the asset or liability, either directly or indirectly; and
- ▶ Level 3 inputs are unobservable inputs for the valuation of assets/liabilities

2.6 Revenue Recognition

A. The Company recognises revenue from contracts with customers when it satisfies a performance obligation by transferring promised good or service to a customer. The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Performance obligation is satisfied over time when the transfer of control of asset (good or service) to a customer is done over time and in other cases, performance obligation is satisfied at a point in time. For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring good or service to a customer excluding amounts collected on behalf of a third party. Variable consideration is estimated using the expected value method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and there is no financing component involved in the transaction price. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in Statement of Profit and Loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

1. Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.
2. Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.

B. Revenue from construction contracts/project related activity and contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Fixed price contracts: Contract revenue is recognised only to the extent of cost incurred till such time the outcome of the job cannot be ascertained reliably subject to condition that it is probable the such cost will be recoverable. When the outcome of the contract is ascertained reliably, contract revenue is recognised at cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to date, to the total estimated contracts cost.

The estimated outcome of a contract is considered reliable when all the following conditions are satisfied:

- (i) The amount of revenue can be measured reliably;
- (ii) It is probable that the economic benefits associated with the contract will flow to the company;
- (iii) The stage of completion of the contract at the end of the reporting period can be measured reliably; and
- (iv) The costs incurred or to be incurred in respect of the contract can be measured reliably.

Expected loss, if any, on a contract is recognised as expense in the period in which it is foreseen, irrespective of the stage of completion of the contract.

For contracts where progress billing exceeds the aggregate of contract costs incurred to-date and recognised profits (or recognised losses, as the case may be), the surplus is shown as the amount due to customers. Amounts received before the related work is performed are disclosed in the Balance sheet as a liability towards advance received. Amounts billed for work performed but yet to be paid by the customer are disclosed in the Balance sheet as trade receivables. The amount of retention money due from customers within the next twelve months are classified under other current assets as Trade Receivable.

Revenue from contracts from rendering engineering design services and other services which are directly related to construction of an asset is recognised on the same basis as stated in (B) above.

Other Operational Revenue

Other Operational Revenue represents income earned from activities incidental to the business and is recognized when the right to receive income is established as per the terms of contract.

Other Income

Interest income is recognised on a basis of effective interest method as set out in Ind AS 109, Financial Instruments, and where no significant uncertainty as to measurability or collectability exists.

Dividend income is accounted in the period in which the right to receive the same is established.

Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably.

2.7

Taxes

Tax expense for the year, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the year.

(a)

Current income tax

Current tax assets and liabilities are measured at the amount expected to be recovered or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the year end date. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

The company has not opted to exercise the option under section 115BAA of the income tax 1961, as introduced by the taxation laws (Amendment) ordinance, 2019 and decided to continue with the existing rate of tax for the purpose of deferred tax computation.

(b)

Deferred tax

Deferred income tax is provided in full, using the balance sheet approach, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in financial statements. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the year and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Current and deferred tax is recognized in Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

2.8

Leases

The Indian accounting standard on lease (Ind AS 116) requires entity to determine whether a contract is or contains a lease at inception of the contract. Ind AS 116 requires lessee to recognise a liability to make lease payments and an asset representing the right-of-use asset during the lease term for all leases except for short term leases and leases of low-value assets, if they choose to apply such exemptions

Payments associated with short-term leases and low value assets are recognized as expenses in profit or loss. Short-term leases are leases with a lease term of 12 months or less. At the commencement date, Company recognise a right-of-use asset measured at cost and a lease liability measured at the present value of the lease payments that are not paid at that date. The lease payments shall be discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the lessee shall use the lessee's incremental borrowing rate

The cost of the right-of-use asset comprised of, the amount of the initial measurement of the lease liability, any lease payments made at or before the commencement date, less any lease incentives received

At the commencement date, the lease payments included in the measurement of the lease liability comprise (a) fixed payments less any lease incentives receivable; (b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date (c) amounts expected to be payable by the lessee under residual value guarantees; (d) the exercise price of a purchase option if the lessee is reasonably certain to exercise that option and (e) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

Depreciation on Right-of-use asset is recognised in statement of profit and Loss on a straight line basis over the period of lease and the Company separately recognises interest on lease liability as a component of finance cost in statement of Profit and Loss.

2.9

Exceptional Items

An item of income or expense which by its size, type or incidence requires disclosure in order to improve an understanding of the performance of the company is treated as an exceptional item and the same is disclosed in the notes to accounts.

Impairment of non-financial assets

SEPC Limited

Notes forming part of the Restated Consolidated Financial Statements

(Amount in ₹ lakhs, unless otherwise stated)

The Company assesses at each year end whether there is any objective evidence that a non financial asset or a group of non financial assets is impaired. If any such indication exists, the Company estimates the asset's recoverable amount and the amount of impairment loss.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognized in Statement of Profit and Loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through Statement of Profit and Loss.

The recoverable amount of an asset or cash-generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash in flows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

2.11 Provisions and contingent liabilities

Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date. Where the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under such contract, the present obligation under the contract is recognised and measured as a provision.

2.12 Commitments

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- a) estimated amount of contracts remaining to be executed on capital account and not provided for;
- b) uncalled liability on shares and other Investments partly paid;
- c) funding related commitment to subsidiary, associate and joint venture companies; and
- d) other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.

2.13 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks, cash on hand, cheques in transit and demand deposits with banks.

For the purposes of the cash flow statement, Cash and Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.14 Statement of Cash Flows:

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method, adjusting the net profit for the effects of :

- i. changes during the period in inventories and operating receivables and payables transactions of a non-cash nature;
- ii. non-cash items such as depreciation, provisions, deferred taxes, unrealised foreign currency gains and losses, and undistributed profits of associates; and
- iii. all other items for which the cash effects are investing or financing cash flows.

2.15 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(a) Financial assets

(i) Initial recognition and measurement

At initial recognition, financial asset is measured at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the Statement of Profit and Loss.

(ii) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- a) at amortized cost; or
- b) at fair value through other comprehensive income; or
- c) at fair value through profit or loss.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method (EIR).

Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in Statement of Profit and Loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to Statement of Profit and Loss and recognized in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss. Interest income from these financial assets is included in other income.

The company has currently exercised the irrevocable option to present in Other comprehensive Income, subsequent changes in the Fair value of Equity Instruments. Such an election has been made on Instrument-by- instrument basis. The classification is made on initial recognition and is Irrevocable.

- (iii) **Impairment of financial assets**
In accordance with Ind AS 109, Financial Instruments, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on financial assets that are measured at amortized cost and FVOCI.
For recognition of impairment loss on financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent years, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12 month ECL.
Life time ECLs are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12 month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the year end.
ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider all contractual terms of the financial instrument (including prepayment, extension etc.) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
ECL impairment loss allowance (or reversal) recognized during the year is recognized as income/expense in the statement of profit and loss. In balance sheet, ECL for financial assets measured at amortized cost is presented as an allowance, i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write off criteria, the Company does not reduce impairment allowance from the gross carrying amount.
- (iv) **Derecognition of financial assets**
A financial asset is derecognized only when
a) the rights to receive cash flows from the financial asset is transferred or
b) retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.
Where the financial asset is transferred then in that case financial asset is derecognized only if substantially all risks and rewards of ownership of the financial asset is transferred. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognized.
- (b) **Financial liabilities**
(i) **Initial recognition and measurement**
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss and at amortized cost, as appropriate.
All financial liabilities are recognized initially at fair value and, in the case of borrowings and payables, net of directly attributable transaction costs.
(ii) **Subsequent measurement**
The measurement of financial liabilities depends on their classification, as described below:
Financial liabilities at fair value through profit or loss
Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognized in the Statement of Profit and Loss.
Loans and borrowings
After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in Statement of Profit and Loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the Statement of Profit and Loss.
- (iii) **Derecognition**
A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss as finance costs.
- (c) **Offsetting financial instruments**
Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.
- 2.16 **Employee Benefits**
(a) **Short-term obligations**
Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the year in which the employees render the related service are recognized in respect of employees' services up to the end of the year and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.
(b) **Other long-term employee benefit obligations**
(i) **Defined contribution plan**
Provident Fund: Contribution towards provident fund is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis which are charged to the Statement of Profit and Loss.
Employee's State Insurance Scheme: Contribution towards employees' state insurance scheme is made to the regulatory authorities, where the Company has no further obligations. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made on a monthly basis which are charged to the Statement of Profit and Loss.
(ii) **Defined benefit plans**
Gratuity: The Company provides for gratuity, a defined benefit plan (the 'Gratuity Plan') covering eligible employees in accordance with the Payment of Gratuity Act, 1972. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/gains are recognized in the other comprehensive income in the year in which they arise.

(Amount in ₹ lakhs, unless otherwise stated)

Compensated Absences: Accumulated compensated absences, which are expected to be availed or encashed within 12 months from the end of the year are treated as short term employee benefits. The obligation towards the same is measured at the expected cost of accumulating compensated absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end. Accumulated compensated absences, which are expected to be availed or encashed beyond 12 months from the end of the year end are treated as other long term employee benefits. The Company's liability is actuarially determined (using the Projected Unit Credit method) at the end of each year. Actuarial losses/gains are recognized in the statement of profit and loss in the year in which they arise. Leaves under define benefit plans can be encashed only on discontinuation of service by employee.

The obligation is measured at the present value of the estimated future cash flows using a discount rate based on the market yield on government securities of a maturity period equivalent to the weighted average maturity profile of the defined benefit obligations at the Balance Sheet date.

- 2.17 Contributed equity**
Equity shares are classified as equity share capital. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.
- 2.18 Earnings Per Share**
Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Earnings considered in ascertaining the Company's earnings per share is the net profit or loss for the year after deducting preference dividends and any attributable tax thereto for the year. The weighted average number of equity shares outstanding during the year and for all the years presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.
- 2.19 Inventory- (Contract Work in progress)**
Contract Work in progress are valued at cost or net realisable value, whichever is lower. Cost comprises all direct development expenditure.
- 2.20 Non-Current Assets held for Sale**
Non-current assets are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification. Non-current assets classified as held for sale are measured at lower of their carrying amount and fair value less costs to sell.

3 Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future years.

4 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the year end date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

- (a) **Taxes**
Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.
- (b) **Defined benefit plans (gratuity benefits and leave encashment)**
The cost of the defined benefit plans such as gratuity and leave encashment are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each year end.

The principal assumptions are the discount and salary growth rate. The discount rate is based upon the market yields available on government bonds at the accounting date with a term that matches that of liabilities. Salary increase rate takes into account of inflation, seniority, promotion and other relevant factors on long term basis.
- (c) **Construction Contracts**
Recognizing construction contract revenue requires significant judgement in determining actual work performed and the estimated costs to complete the work, provision for rectification costs, variation claims etc
- (d) **Recognition of deferred tax assets**
The extent to which deferred tax assets can be recognized is based on an assessment of the probability that future taxable income will be available against which the deductible temporary differences and tax loss carryforwards can be utilized. In addition, significant judgment is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

Risks associated with plan provisions

Valuations are based on certain assumptions, which are dynamic in nature and vary over time. As such Company is exposed to various risks as follows:

Investment Risk	The probability or likelihood of occurrence of losses relative to the expected return on any particular investment.
Interest risk	The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability.
Salary Escalation Risk	The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.
Demographic Risk	The Company has used certain mortality and attrition assumptions in valuation of the liability. The Group is exposed to the risk of actual experience turning out to be worse compared to the assumption.

In respect of the plan in India, the most recent actuarial valuation of the present value of the defined benefit obligation were carried out as at March 31, 2023, March 31, 2022, March 31, 2021 by Mr. S. Krishnan, Fellow of the Institute of Actuaries of India. Part B: Non-adjusted items

- Auditor's Comments in the Independent Auditors' Report - Statutory Auditors have made the following comments in their Auditors' Report for Financial Year 2022-23, 2021-22, 2020-21.

Financial Year ended 31 March 2023

- Qualification:
 - The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 33,289.92 Lakhs (March 31, 2022: Rs. 39,645 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12 on Income taxes, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 43B of the consolidated financial statements).
 - Contract Assets (Non-Current) include Rs. 7,351.90 Lakhs (Net of provisions amounting to Rs. 926.98 Lakhs) (March 31, 2022: Rs. 3,956.02 Lakhs) and Trade Receivables (Non-Current) include Rs. 575.21 Lakhs (Net of provisions amounting to Rs. 82.99 Lakhs) relating to dues on projects which are not progressing on account of statutory delays faced by the customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, we do not have sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the said amounts. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Asset (Non-Current) and Trade Receivables (Non-Current) and the impact if any, on account of non-provisioning of the said balances on the consolidated financial statements. (Refer to Note 8.1 and Note 11.1 of the Consolidated Financial Statements)

These matters were also qualified in our report on the consolidated Ind AS financial statements for the year ended March 31, 2022

Qualified Opinion on the Internal Financial Controls under Clause (f) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Company's internal financial controls with reference to consolidated financial statements as at March 31, 2023:

a) Provisioning of expected credit loss against contract assets and receivables which are outstanding for a substantial period of time, which could potentially result in the Company not recognizing a provision for the said assets.

b) Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize for set-off against sufficient taxable profits.

A. 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control with reference to consolidated financial statements, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

In our opinion, and to the best of our information and according to the explanations given to us, the Holding Company, its subsidiary Company, have in all material respects, maintained adequate internal financial controls with reference to consolidated financial statements as of March 31, 2023, based on the internal financial control with reference to consolidated financial statements criteria established by respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI") and except for the possible effects of the material weaknesses described below on the achievement of the objectives of the control criteria, the internal financial controls with reference to consolidated financial statements of the Holding Company were operating effectively as of March 31, 2023.

We have considered the material weaknesses identified and reported below in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2023 consolidated financial statements of the Company, and these material weaknesses have affected our opinion on the consolidated financial statements of the Company for the year ended on that date and we have issued a qualified opinion on the consolidated financial statements

b) Emphasis of Matter:

We draw attention to the following matters in the Notes to the consolidated financial statements:

a) Note 42.1(i) of the consolidated financial statements, which describes the Implementation of Resolution Plan entered into with the lenders dated June 22, 2022, wherein interest waiver, and the difference between the carrying amounts of the facilities before restructuring and the fair values of the new facilities has been recognised as income and disclosed under Exceptional items in the statement of profit and loss in accordance with INDAS 109 - Financial Instruments.

b) Note 42.1(ii) to the consolidated financial statements, which states that the management written off an amount of Rs. 5,819.69 Lakhs towards amounts due on account of work performed on a contract entered into with a customer which was subsequently wrongfully terminated before the completion of the contract due to certain issues at the contract site. Legal disputes / arbitration proceedings have been initiated during the period in respect of projects with the customer.

Our opinion is not modified in respect of these matters.

c) Financial Year ended 31 March 2022

Qualifications:

i) The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 39,645.00 Lakhs (March 31, 2021: Rs. 43,889.00 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment on reasonable certainty of future taxable profits, as required by Ind AS 12- Income taxes and considering the current pandemic situation, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 44 of the consolidated financial statements). This matter was also qualified in our report on the Consolidated financial statements for the year ended March 31, 2021.

ii) Contract Asset (Non-Current) include Rs. 3,956.02 Lakhs (Net of provisions amounting to Rs. 976.98 Lakhs) relating to project dues which is not progressing on account of Statutory delays faced by the Customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the above said amount is not available. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Asset (Non-Current) and the impact if any, on account of non-provisioning of the said balance on the consolidated financial statements. Qualified Opinion on the Internal Financial Controls under Clause (f) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

SEPC Limited
Notes forming part of the Restated Consolidated Financial Statements
(Amount in ₹ lakhs, unless otherwise stated)

According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Holding Company's internal financial controls with reference to financial statements as at March 31, 2022:

- a) Provisioning of contract assets which is outstanding for a substantial period of time, which could potentially result in the Company not recognizing a provision for the said assets.
 - b) Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize.
- A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control with reference to financial statements, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

In our opinion, and to the best of our information and according to the explanations given to us, the Holding Company, have in all material respects, maintained adequate internal financial controls with reference to financial statements as of March 31, 2022, based on the internal control with reference to financial statements criteria established by respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI") except for the possible effects of the material weaknesses described above on the achievement of the objectives of the control criteria, the internal financial controls with reference to financial statements of the Holding Company were operating effectively as of March 31, 2022.

We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2022, consolidated financial statements of the Company, and these material weaknesses do not affect our opinion on the consolidated financial statements of the Company.

SEPC Limited
Notes forming part of the Restated Consolidated Financial Statements

d) Material Uncertainty Related to Going Concern

We draw attention to Note 4 (e) to the standalone financial statements, which states that the Company has incurred a net loss of Rs. 26,370.37 Lakhs during the year ended March 31, 2022, and as of that date has accumulated losses aggregating to Rs. 2,15,105.50 Lakhs which has resulted in substantial erosion of its net worth. Further, the COVID-19 pandemic has also impacted the operations resulting in delay of collection relating to project dues. These events or conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. However, having regard to the restructuring plan for the borrowings, infusion of additional equity subsequent to the year and the Management's plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, future business plans, non-fund based facilities, and realisation of trade receivables, the consolidated financial statements of the Company for the year ended March 31, 2022, have been prepared on a going concern basis. Our opinion is not modified in respect of this matter.

e) Emphasis of Matter:

We draw attention to Notes 43 to the consolidated financial statements which states that the Management has made an assessment of the impact of Covid-19 on the Company's operations, financial performance and position as at and for the year ended March 31, 2022 and accordingly recognised an impairment loss of Rs. 6,361.26 Lakhs (March 31, 2021: Rs. 1,149.11 Lakhs) on financial assets and contract assets to reflect the business impact arising from the COVID 19 pandemic. Our opinion is not modified in respect of this matter.

Financial Year ended 31 March 2021

f) Qualification:

i. Financial Assets Loans (Non-Current) include Rs. 3,201.62 Lakhs (March 31, 2020: Rs. 3,800.40 Lakhs) due from a related party. Sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the above said amount is not available and the amount is outstanding for more than five years. Further, no provision with respect to the same is made in the books of account as explained in Note 9.2 of the Consolidated Financial Statements. Accordingly, we are unable to comment on the carrying value of above-mentioned Financial Assets Loans amounting to Rs. 3,201.62 Lakhs and the impact if any, on account of non-provisioning of the said balance on the financial statements at present.

ii. The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. Rs. 43,889.00 Lakhs (March 31, 2020: Rs. 43,520 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment on reasonable certainty of future taxable profits, as required by Ind AS 12 on Income Taxes, considering the current pandemic situation, we are unable to ascertain the extent to which the deferred tax asset can be utilized. The impact if any, of the undetermined impairment provision on the financial statements is not ascertainable currently. Refer Note-40 of the consolidated financial statements.

Qualified Opinion on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act") :

According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Holding Company's internal financial controls with reference to financial statements as at March 31, 2021:

a) Provisioning of overdue receivables and provisioning of advances which have been outstanding for a period of more than five years, which could potentially result in the Company not recognizing a provision for the said receivables and advances.

B) Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize.

A "material weakness" is a deficiency, or a combination of deficiencies, in internal financial control with reference to financial statements, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

In our opinion, and to the best of our information and according to the explanations given to us, except for the possible effects of the material weakness described above on the achievement of the objectives of the control criteria, the Holding Company have in all material respects, maintained internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as of March 31, 2021, based on the internal control with reference to financial statements criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note.

We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2021 consolidated financial statements of the Company, and the material weaknesses affects our opinion on the consolidated financial statements of the Company.

g) Emphasis of Matter:

We draw attention to Note 39 to the consolidated financial statements, which fully describes that the Company has made an assessment to recognize an impairment loss of Rs. 1,149.11 Lakhs on financial assets to reflect the business impact and uncertainties arising from the COVID 19 pandemic on the Company's operations, financial performance and position as at and for the year ended March 31, 2021 (March 31, 2020: INR 2,748.97 Lakhs). Our opinion is not qualified in respect of this matter.

1. LITIGATION INVOLVING OUR COMPANY

i. Litigation against our Company

1. Criminal Proceedings

- a) Our Company received a notice dated February 21, 2023 from Additional Superintendent of Police (Urban), Durg, Chhattisgarh (“**ASP**”) instructing our Company to appear before the ASP for the purpose of providing statement in relation to an alleged complaint filed by an entity named M/s Starex Minerals Private Limited. Our Company has submitted a reply dated February 24, 2023, requesting for a copy of the impugned complaint along with any document that might have been submitted by M/s Starex Minerals Private Limited. We have not received any further correspondence in this matter.

2. Actions taken by Statutory/Regulatory Authorities

- a) A complaint dated August 25, 2023 was filed by GPE (India) Limited (“**Complainant**”) with the Securities and Exchange Board of India, Ministry of Corporate Affairs, National Stock Exchange of India Limited, BSE Limited and MSKA & Associates alleging that our Company, Twarit Consultancy Services Private Limited and Complainant had entered into a share purchase agreement, to purchase the preference shares of Haldia Coke and Chemicals Private Limited (“**Haldia**”), which were held by the Complainant. However, on account of failure of our Company and Twarit Consultancy Services Private Limited to purchase the preference shares of Haldia, an arbitration was filed under the rules of the Singapore International Arbitration Centre. An award dated January 7, 2021 was passed in favour of the Complainant, directing our Company and Twarit Consultancy Services Private Limited to pay a sum of approximately, INR 1,98,54,10,661. Subsequently, the award was challenged by our Company and Twarit Consultancy Services Private Limited before the Singapore International Commercial Court, which was later dismissed. The Complainant has alleged that our Company has failed to disclose the aforementioned award before the Stock Exchanges under Regulation 30 of the SEBI Listing Regulations. Our Company has replied to the aforementioned complaint *vide* emails dated September 15, 2023, September 22, 2023 and October 5, 2023. Our Company has denied the allegations and has submitted the following responses in its emails: (i) The Complainant is admittedly, not the shareholders or investors of our Company and therefore, the alleged Complaint will not fall within the meaning of ‘investor grievances’; (ii) the complaint relates to an international arbitration award rendered by the Singapore International Arbitration Centre and the enforcement proceedings and appeal proceedings arising therefrom which are presently *sub judice* before the Hon’ble Madras High Court and the Hon’ble Supreme Court as also duly admitted by the Complainants; and (iii) disclosure obligations are not triggered or attracted in the fact and circumstances of the matter. Incidentally, we are also in the process of preferring our legal challenge to the order dated January 5, 2023 passed by the Hon’ble High Court and as such the matter has not attained finality till date; and (iii) our Company had, from time to time, made due and appropriate disclosures through its Annual Reports and the quarterly Unaudited Financial Reports, as published and uploaded in the Company’s website. We had also submitted our Annual Reports and the quarterly Unaudited Financial Reports to the stock exchanges, including NSE, as per extant regulations, which reports, *inter alia*, contain notes in relation to the arbitral award and the ensuing legal proceedings arising therefrom. Thus, there is no merit or substance in the motivated allegations levelled in the Complaint of any non-disclosure, as alleged or at all therein, for reasons of which the impugned Complaint deserves to be ignored and rejected at the threshold itself, in the interests of justice. The above matter is presently pending.
- b) The Regional Provident Fund Commissioner-II, Regional Office – Ambattur had *vide* an order dated October 17, 2023 levied damages of ₹ 15.56 lakhs on our Company for delay in making payment towards provident fund contribution, administrative charges, family pension fund/pension fund and administrative chases for the period between April 2017 to February 2020. Further, additional damages of ₹ 101.34 lakhs were levied on our Company for delay in making payment towards provident fund contribution, administrative charges, family pension fund/pension fund and administrative chases for the period between March 2020 to May 2022. Further, the Regional Provident Fund Commissioner-II, Regional Office – Ambattur has also levied an additional interest of ₹ 70.49 lakhs on our Company.

GPE (INDIA) Limited, GPE JV1 Limited and Gaja Trustee Company Private Limited had invested through preference shares in Haldia Coke and Chemicals Private Limited (“**Haldia**”) in the year 2010. Our Company, TCPL and the Claimants had entered into a share purchase agreement wherein our Company and TCPL had agreed to purchase all preference shares held in Haldia. On account of alleged failure to execute the said agreement, the Claimants initiated Arbitration under the Rules of the Singapore International Arbitration Centre (“SIAC”) as per the provisions of the share purchase agreement. SIAC vide their Order dated January 07, 2021 awarded damages jointly and severally on the Respondents to the tune of ₹ 1,98,54.10 lakhs and a sum of SGD 372,754.79 towards arbitration expenses (the “**Award**”). These are to be paid along with simple interest @ 7.25% pa from July 21, 2017 until the date of payment. The Respondents have already preferred an appeal before the High Court of Republic of Singapore against the award of SIAC and the same is held in favour of the Complainants. The Claimants have filed an execution petition before the Hon’ble Madras High Court for enforcement of the Award under Section 47 of the Arbitration and Conciliation Act, 1996 (“**Arbitration Act**”). The application was allowed by the Court by an order dated January 5, 2023. In view of certain provision in the aforesaid court order dated January 5, 2023, the Claimants were required to obtain approval from the Reserve Bank of India before initiating execution proceedings. Accordingly, the Claimants challenged the said order by filing a special leave petition before the Hon’ble Supreme Court of India. Our Company and TCPL have filed counter-affidavits to the petition and the said matter is pending before the Hon’ble Supreme Court of India. Further, our Company has challenged the order dated January 5, 2023 of the Hon’ble High Court of Madras by filing a Special Leave Petition before the Supreme Court of India.

Sai Sudhir approached Hon’ble High Court of Karnataka, Bangalore in an application under Section 11 of the Arbitration and Conciliation Act 1996 for appointment of an arbitrator by the Court. Pursuant to the said application, Hon’ble High Court of Karnataka, Bangalore has appointed Hon’ble Mr. Justice A.V. Chandrashekar (Retd. Judge, High Court of Karnataka) to be the Sole Arbitrator to fill in the above casual vacancy. The said Sole Arbitrator, Hon’ble Mr. Justice A.V. Chandrashekar is yet to start arbitration proceedings by issuing necessary notice to the parties.
- c) M/s. IDEB Construction Project Limited (“**IDEB**”), the claimant filed a claim amount of ₹ 903 lakhs before the Hon’ble Arbitrator and our Company has filed their counter disputing the claim. The Learned Arbitrator has fixed the fees as ₹15 Lakhs towards his remuneration by the Parties. Our Company feels that the remuneration fixed is on the higher side and has filed an O.P. 876 of 2005 in the High Court of Madras to

terminate the mandate of Arbitrator since the fees charged by him for the proceedings are on the higher side. The petition has been admitted and notice ordered. The said O.P. is pending. In view of the above the arbitration has been stayed.

In view of this no progress in the summary suit.

In the Project, WF was basically responsible for design, drawings, supply of equipment and spares, whereas, the role of SEPC was installation, commissioning and maintenance. While majority of the Project outlay was to the share of WF, the liabilities of the consortium parties under the contract with SAIL (“**Contract**”) was on joint and several basis. While execution of the Project was going on Hi-Sendzimir Mill Housing supplied by WF from abroad, met with a road accident on May 6, 2010 while being carried from Chennai port to Salem in a trailer truck and was damaged. To repair the said damage, WF demanded USD 1.6 Million, whereas SAIL resorted to risk purchase at the costs and risks of the consortium and for recovery of such risk purchase costs, arbitration proceedings under ICC Paris Rules were initiated by constituting an arbitration tribunal comprising of Justice A.K. Patnaik (Retd), (Presiding Arbitrator), Justice R.V. Raveendran (Retd), Co-Arbitrator and Justice S.S. Nijjar (Retd), Co-Arbitrator. The above award was impugned by WF in Salem Court by way of an Application under Section 34 of the Arbitration and Conciliation Act, 1996 and SEPC was challenging the same as Respondent No. 2 in the said Section 34 Application. The petition was disposed off with a direction to file in the Court of jurisdiction which is High Court of New Delhi within three months of the date of receipt of the order. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.
