Decoding the golden opportunity this festive season

BY TEJI MANDI

To many, the stock market is an alien subject. For most people, gold and fixed deposits remain the best investment options. In fact, India's consumption of gold is so massive that during January-March this year, it increased by 37% to 140 tonnes as compared to last year.

Gold Bond Then?

SGBs are issued by the RBI at a discount to the current market price for a holding period of eight years. But there is a catch. SGBs cannot be cashed immediately. It's not as liquid as digital gold. However, it comes with two big benefits - 2.5% interest/annum and tax-free status. Since it's a low-risk investment, investing in these bonds is considered to be safe because it's a regulated product and gold prices are always expected to go up in the long term. Passive investors who are not willing to take risks opt for SGBs

Digital Gold Hype

A decade back, digital gold didn't exist in the market and today, it is the flavour of the season. After fintech companies, traditional jewellers like Tanishq and Kalyan Jewellers are also planning to enter the digital gold space. So, what is it? Digital gold is a tool that allows you to buy and sell pure gold in digital form at current market values. It isn't a deposit or a financial product. The gold you purchase is backed by actual gold and housed in a certified depository in your name. You may then exchange your digital gold for coins, bars, and jewellery at any moment and have it delivered to you. All you have to do now is pay making charges. Digital gold seems to be much handier for the high-tech generation for its sheer security and no-storage hassle, and hence the hype.

What's Sovereign

Which One Is Better For This Season?

Gold is the most desired asset that holds emotional and social value. If you are looking at it from an investment perspective, then digital gold is a good option, for the short term. If one wants to own it and make profits in the long term, then SGBs is the one for you. Depending on the time horizon, need and risk appetite, one can choose either of the gold assets. The important point to note here is to hold it because it diversifies your portfolio. Since it also acts as a hedge against inflation and is a stable investment option, it gives us higher profits.

MARKET WATCH

SENSEX 61143.33 -206.93 NIFTY 18211.00 -57.40

Markets end in red on weak Asian cues; banking stocks hit

The benchmark indices ended the day's session on a negative note after a positive start and strong buying interest witnessed in PSU Banking Stocks with Nifty PSU Banks closing 2.05 percent up and Nifty 50 ending 0.31 percent down. The Banknifty corrected more than 300 points or 0.85 percent to close at 40,874.35 levels during the day.

Sensex was down 206.93 points or 0.34 percent at 61,143.33. The Nifty was down 57.40 points or 0.31 percent at 18,211.00. About 1,672 shares have advanced, 1,378 shares declined, and 109 shares are unchanged.

On the sectoral front, Nifty IT, PSUBANK and PHARMA were leading for the day while MET-AL, AUTO and ENERGY have shown profit booking. Stocks like, ASIAN-PAINTS, UPL, DIVIS-LAB & INFOSYS were the top performers while AXISBANK, BAJFINANCE, ONGC were the prime laggards.

Asian Paints, UPL, Divis Labs, Infosys and Cipla were among the major Nifty gainers. Losers included Axis Bank, Bajaj Finance, ONGC, Tata Motors and Bajaj Finserv.

Gaurav Udani, CEO & Founder, ThincRedBU Securities, said, "Since the last few trading sessions, Nifty has been making lower highs and lower lows, which is a bearish sign. Nifty closed negative by 100 points at 18,170 after taking resistance at 18,340. Nifty has support in 17,980 - 18,020 range and resistance in 18,320-18,340 range. Traders are

advised to be cautious in long positions and maintain strict stoploss."

Sachin Gupta, AVP, Research, Choice Broking said, "Technically, the Index has been trading in a bullish trend with Higher Highs and Higher Lows formation that suggests a bullish strength for the long term. On a four hourly chart, the index has traded above the Horizontal Line, which indicates a further support zone. Furthermore, the index has been trading with a positive crossover of 9*21 Moving Average, which can be considered a Bullish Crossover which shows a Bullish movement in the counter. At present, the Index has immediate support at 18,000 levels while resistance comes at 18,380 levels."

Nagaraj Shetti, Technical Research Analyst, HDFC Securities, said, "The short term trend of Nifty remains choppy and the attempt of upside bounce from the support is lacking its strength. A sustainable move only above 18300-18350 is likely to open further upside for the market ahead. Further weakness from here could find the next lower support at 18K levels."

Sahaj Agrawal, Head of Research-Derivatives at Kotak Securities said, "Nifty traded with a positive bias for the medium term and is expected to test 18,700-19,000 levels. Since we are closer to medium-term targets advise leverage and aggression moderation for a long time. Support on the downside is seen at 17,800-levels with buying on aggressive corrections advisable."
