Unraveling the Future Series - Part 2 of 3

Optical Connectivity Growth Strategy Explained

Join Us On

📅 13th December 2021 ⌚ 17:00 - 18:00 PM

We are delighted to welcome you to **STLescope- Unraveling the Future Series Part - 2 of 3**.

We are clearly in a multi-year, global network build cycle driven by three key investments in 5G densification, FTTx penetration and network modernisation efforts globally. Owing to this, the demand for OFC, fibre deployment, and optical interconnect will surge in the next few years.

STL had anticipated this megatrend and has been working consistently to open up the path for nonlinear growth in future networks. We have been developing capabilities spanning **optical, system integration, and virtualized access**.

We have outlined three strategic levers to drive our future ambitions:

- **Grow** optical business
- **Globalise** system integration
- **Build** disruptive, open-source Access Solutions

Optical Connectivity is a strategic business lever for STL that entirely focuses on the development of end-to-end solutions for enabling digital transformation at the edge.

Come join us for an engaging discussion exploring STL's remarkable Optical Connectivity business journey that would shape the future growth in the networking space. We look forward to meeting you at the virtual event.

Mihir Modi
CFO, STL

Paul Atkinson
CEO, Optical Connectivity, STL
