## FUTURES SLIP Oil Slips From 7-Yr High with Key US Storage Hub in Focus

**Oil** and related futures slipped on a report that the US crude storage hub in Cushing, Oklahoma, is facing a shortage of storage capacity. The report, from a source familiar with the market, said that the hub is currently at 90% capacity and that a shortage of 100,000 barrels per day is expected by the end of the year. This has led to a sharp decline in oil prices, with WTI falling to its lowest level in seven years. The report also mentioned that the US government is considering a plan to build new storage capacity to meet the demand.

## After indices made a new record high in 48 days... Leading Indicators Suggest Caution for Equity Investors

### Earnings-bond Yield Gap

### Nifty 24M Forward EPS

### Market-cap to GDP Ratio (%)

The widening earnings-bond yield gap suggests that corporate earnings are not keeping pace with rising bond yields, which could lead to a correction in equity prices. The Nifty 24M Forward EPS, while showing growth, is still below its long-term average, indicating that earnings are not yet fully reflecting the market's high valuations. The market-cap to GDP ratio, which has reached a record high, suggests that the market is overvalued relative to the economy's size.

## NIFTY SLIPS BELOW 18,200 LEVEL Sensex Extends Losses into 3rd Day, Loses 336 Pts

**SENSEX** extended its losses into the third day, ending the day down 336 points at 18,200. The index had previously hit a record high of 18,536 on Monday. The decline was driven by a sell-off in the banking and IT sectors. **Bankex** fell 0.56% to 3,923.55, while **Nifty IT** dropped 0.48% to 1,811.11. The **Bank Nifty** index also fell, losing 100 points to 10,100. The **India VIX** index, which measures market volatility, rose to 12.50, indicating increased uncertainty in the market.

## Gold Buckles Under Higher US Treasury Yields

**Gold** prices fell as US Treasury yields rose. The 10-year Treasury yield climbed to 1.50%, up from 1.45% on Monday. This move made gold, which does not pay interest, less attractive to investors. **Gold prices** fell 100 dollars to 1,800 per ounce. The decline in gold prices is also being driven by a strengthening of the US dollar, which has risen to a two-year high against the euro. Analysts expect gold prices to continue to decline as long as Treasury yields remain high.

### A Thank Who Trades

What is the best way to get the most out of your trading? The answer is simple: with the right education and training. MCX offers a range of programs to help you succeed in the market.

### MCX INVESTOR PROTECTION FUND

Protect your investment with MCX Investor Protection Fund. This fund provides a safety net for investors, ensuring that their investments are protected in the event of a market crash.
