Business Verticals

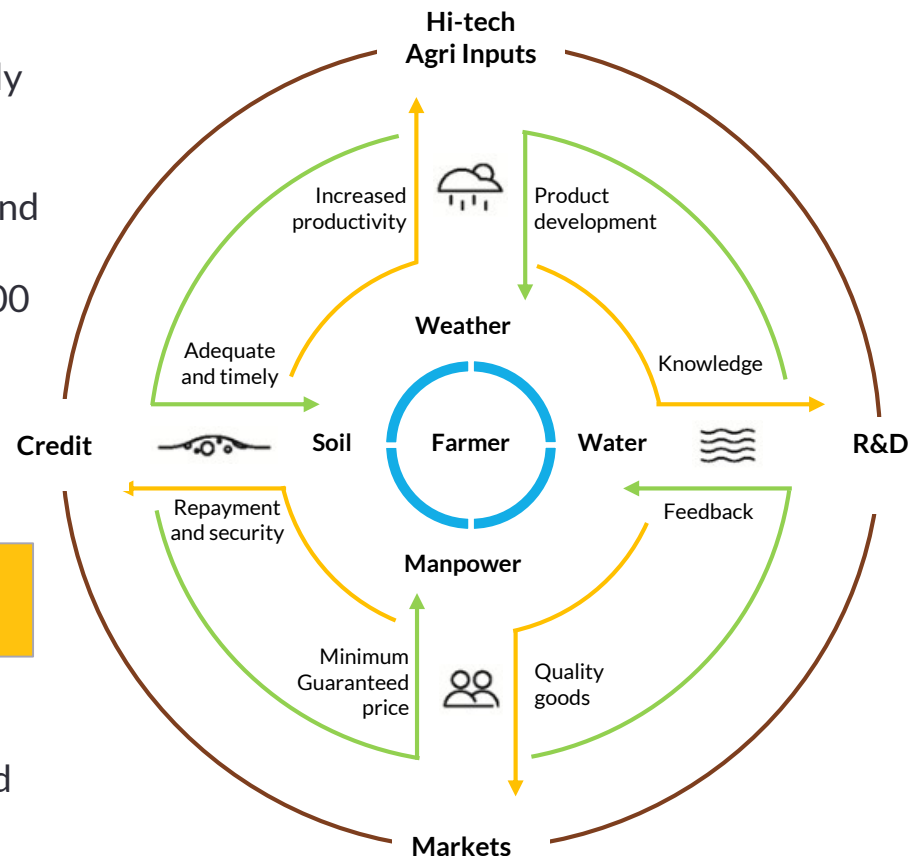

Well diversified business, technologically advanced product range and state of the art manufacturing facilities keeps us at the heart of customer needs

Hi-Tech Agri

- ▶ Drip & Sprinkler Systems, Precision Farming Advisory including green & poly houses
- ▶ Large Tissue Culture plant capacity for Banana, Pomegranate, Sweet Orange and others
- ▶ Wide distribution presence – over 4,000 dealers / distributors
- ▶ World class manufacturing facilities
- ▶ Solution based approach
- ▶ Strong in-house R&D base

Agro Processing

- ▶ Fruit pulps, concentrates, vegetable dehydrations, spice processing, etc.
- ▶ Global leaders in Mango processing and Onion dehydration
- ▶ Catering to top global food companies
- ▶ Manufacturing in India, UK, USA and Turkey

Plastic

- ▶ PVC Pipes, fittings, Polyethylene Pipes Turnkey Projects, PVC Sheets
- ▶ Catering to Agricultural, Industrial & Infrastructural customer base
- ▶ Manufacturing primarily in India
- ▶ Forayed into urban markets by introducing plumbing systems
- ▶ Plastic Sheet manufacturing business in USA & UK to serve local customers

Others

- ▶ Solar Thermal Products, Solar Photovoltaic Grid & Off-Grid Products
- ▶ Solar Power generation investments to reduce cost of power
- ▶ Agri R&D activities

Future growth areas...

- The company continue to focus on retail business and supply contracts which will help to improve working capital cycle.
- The company is working to increase its dealers network in states like UP, WB and North East to have a better growth in retail business.
- The company continue to innovate and introduce new products in waste water, non- pressure drainage, sewerage handling s for higher efficiency, large filters for agriculture applications.
- Another area identified for growth is plumbing business mainly CPVC and UPVC pipes and pipe fittings where the Company is having marginal presence.
- Along with Banana few more other tissue culture plants like pomegranate, coffee will help to have pull factor for MIS/SIS business. The company has increased tissue culture capacity to meet growing demand. Focus is also on papaya and onion seedling under Hi Tech plant factory business.

Management Commentary

“Leave this world better than you found it.” – Bhavarlal H Jain

The Company’s strategy to focus on retail business by reducing project business is helping to achieve better growth, cash flow and profitability without any additional working capital support.

As per IMD report overall rainfall for monsoon season 2023 was 94% of its long period average and it was spread reasonably well across India. Historically, 2QFY24 is softer in terms of sales revenue due to rainy season and lower activity. However, the Company witnessed 33% growth in revenue and 45% growth in EBITDA on YoY basis with better demand in Plastic business coupled with good demand under JJM, gaining market share in MIS, Pipes, TC and also food business in India and abroad.

Strong volume growth in domestic business and good performance across subsidiaries helped the Company to post 26% growth in Revenue and 56% growth in EBITDA on Consolidated basis during 2QFY24 on YoY basis.

The Company is committed to reduce its overall debt, improving working capital cycle in terms of DSO and margins while managing the growth. The Company continues to focus on its product innovation, sustainable environmental solution to farmers and retail business by expanding its dealers network across India. We expect continued positive momentum in the second half of the current fiscal.
