Logistics policy launched to boost India's trade edge

This will lead to faster cargo movement. The ULIP will make all available transport modes visible to stakeholders so that they can take informed decisions.UndertheELOG,ruleswill be simplified. The SIG will monitor all logistics projects regularly and act as a sort of bridge between the government and industry. It will enable stakeholders to raise queries and flag issues so that an inter-ministerial group can find appropriate solutions. A logistics data bank has been developed, which ensures container tracking for export and import. Launched in July, it has already helped track about 50 million containers.

The renewed thrust on reducing logistics costs assumes significance, as the country aims to substantially raise its merchandise exports to \$1 trillion by FY28 from \$422 billion in FY22. According to an Arthur D

Little-CII report, higher logistics cost is causing a competitiveness gap of \$180 billion for India, and this will likely rise to \$500 billion by 2030. According to a 2016 HSBC report, domestic bottlenecks, including high logistics costs, accounted for a half of the slowdown in the country's exports. As per the Economic Survey 2017-18, a 10% decrease in indirect logistics cost could lead to an export growth of 5-8%. The country was ranked 44th in the World Bank's Logistics Performance Index in 2018 (the latest available report). icy will "give the much-needed impetus to India's logistics and warehousing sector in terms of the creation of world-class infrastructure facilities, an e-handbook forwarehousing standards, digitalisation and other new-era technology uses, promotion of multi-modal transport, etc". Anil Verma, ED and president, Godrej & Boyce, said, the policy "is a crucial step for efficient supply-side management and reducing logistic costs to global standards of about 10%". Ketan Kulkarni, CMO at Blue Dart, said the policy has "a special emphasis on streamlining processes for seamless coordination, employment generation and skilling, reduction in logistics cost, and ease of business for corporates, farmers and MSMEs".

Inflation easing but stay cautious: Finmin report

Moreover, lower areas under the summer-sown crops call for deft management of stocks of farm commodities and market prices without unduly jeopardising agricultural exports.

Nevertheless, India's growth has been robust and inflation in control", despite the persistence of these strong external headwinds, it said. A rapid coverage of vaccination and well-calibrated short-term policy measures have skilfully navigated the economy through turbulent times, preparing a strong foundation for years ahead, it added.

7% in August, wholesale price inflation eased about three percentage points to 12.41%. Of course, retail inflation reversed a three-month declining trend to inch up by 29 basis points in August from 6.71% in July.

The contact-intensive services sector, which was hit hard by the pandemic, is likely to drive growth in FY23 building on the release of pent-up demand and near universalisation of vaccination. "A sharply rebounding private consumption backed by soaring consumer sentiments and rising employment will sustain growth in the months ahead,"

Name of the Schemes / Plans / Options

the report said.

The crowding-in of private investment has also been supported by rising budgetary capex of the central government. The capex jumped 35% until August this fiscal from a year before to \$2.3 trillion. "Government's spending on capital expenditure is likely to be sustained as buoyancy in revenue growth is expected to remain undiminished in the balance period of the current year," it said.

The report calls for "vigorous pursuit of asset monetisation at all levels of government", as it will help lower debt stock and hence debt servicing costs."That would cause risk premium to drop and credit rating of India to improve. A virtuous circle would set in as the quality of public expenditure increases in its wake and the private sector enjoys a lower cost of capital," it added.

Foreign brands eyeing festive opening in Indian market

Flipkart announced the inclusion of San Franciscobased contemporary fashion brand Bebe for the Indian market just ahead of its Big Billion Days sale that starts on September 23. Flipkart is also bringing fresh CR7 (Cristiano Ronaldo's brand) products to India.

Sandeep Karwa, vice-president, Flipkart Fashion, said, "The past two years have witnessed a tremendous shift in While retail inflation consumer preferences when it dropped from 7.79% in April to comes to fashion, as it deepens to new niche categories such as athleisure. The Bebe launch comes at an opportune time when people across India, from metros to tier-II regions seek to upgrade their wardrobes for the festive season."

> Talking about international brands they have got in, Abhishek Maloo, senior director, Flipkart Fashion, told FE, "We have strengthened our selection of styles and brands and customers looking for fashion and lifestyle can choose from over thousands of national and international brands. Very recently we introduced Bebe, DeFacto, Anta, Trendyol, Saucony, Brooks

and American Eagle on the platform. We also have homegrown D2Cbrands such as Snitch, Suta, The Label Life, Voylla, Uppercase, etc, on Flipkart."

From the Front Page

Ralph Gindi, owner & COO, Bluestar Alliance, which owns Bebe, added, "Flipkart understands our brand and how to engage the fashion-centric consumers online. We're looking forward to working together to reach the Bebe shopper in this exciting market." Amazon's Great Indian Festi-

val also starts September 23, and

the global giant has an interest-

ing mix of national and interna-

tional brands. Amazon Fashion

India's director and head Saurabh

Srivastava told FE that in terms of fashion, they have seen a spike in demand from international brands across product types, including watches, shoes and travel luggage. "Watches from brands like Fossil, Tommy Hilfiger, French Connection, Michael Kors, Emporio Armani and more are fast gaining popularity amongst customers for their stylish look and feel. In the shoes category, the demand for sportswear seems to be a constant across seasons. Additionally, with the now renewed interest in travel, international brands like Kenneth Cole and American Tourister are catering to the both aesthetic and functional needs of our customers. In beauty, we have skincare, haircare, makeup, fragrances and gift sets curated for this festive season from top international brands such as Bath & BodyWorks,The BodyShop,Innisfree, Kimirica, Elizabeth Arden and more. Within makeup, we have seen increasing demand for face and lip makeup products from brands like Shiseido, DDP Milano and Isa Dora." The company is yet to announce introduction of any new international

festive entry. Offline, too, several international brands have entered the Indian market this year. In early September, lingerie, clothing and beauty retailer Victoria's

Secret opened its first store in Mumbai.TusharVed,president, Apparel Group, which brought the brand to India, shares that two more stores — in Delhi by the year-end and Bengaluru next year — and an eventual online category (after a few years) are in the pipeline. Canadian coffee brand Tim Hortons opened in India in Gurugram and Delhi in August and is likely to expand to other cities. Earlier this year, Reliance announced a strategic partnership with global fresh food and organic coffee chain Pret A Manger to open its stores in India.

Affordable 5G phones to be festive hot picks

Mukesh Ambani's Jio is also collaborating with Google to launch a 5G phone, which will be 'ultra affordable', the businessman had said during the Reliance AGM last month. Although the company has not revealed the launch date of the phone, Jiowill roll out its 5G services in select cities by Diwali, the RIL chairman had said.

Marketplaces, too, are expecting high demand for the category. Amazon is seeing a rise in demand for 5G-enabled smartphones with larger screen sizes and quality displays."We have seen a growing demand across in the price segment of ₹15K-20K while the premium segment has already transitioned to the 5G technology," said Nishant Sardana, director, Amazon India (smartphone & televisions), adding, "The growth in units last year was led by ₹20K-30K and ₹30-50K price segments which saw significant growth YoY, respectively. This was driven by the post-Covid requirement for high-performance smartphones for both work and gaming."

Flipkart, too, is witnessing a similar rise as "5G phones are increasingly gaining popularity amongst consumers who are looking for faster internet speeds, enabling them to do quicker downloads, have a smoother gaming experience, video calling and HD movie watching experience," said Kunal Gupta, senior director, mobiles,

at Flipkart."In the first half of this year, there has been a nearly twotime increase in searches for 5G smartphones on our platform as compared to the same period last year, with nearly 75% of the searches coming from tier- II and beyond cities," he said, adding, "This demand is expected to grow further as we move closer to the festive season and the Big Billion Days."

Speaking on the market segment, Gupta said sales trends indicate that "the demand for 5G smartphones in the ₹10,000-15,000 range has seen nearly 4X growth in the first half of 2022 as against a similar period last year."

The trend is crucial as it not only emerges close to the impending launch of 5G services, but during the festive season too, when the country witnesses a huge rise in sales. As per a recent report by Redseer, the ecommerce platforms' festive sales are expected to touch \$11.8 billion in gross merchandise value (GMV). "Mobiles and electronics category to remain broadly strong and key during the festive sales driven by better deals and new launches during the festive sales," the report said.

One Plus is optimistic that its entire 5G-enabled product portfoliowill perform well during the festive season."Moreover, we will also have lucrative offers across our product portfolio," the com-

pany spokesperson said. Xiaomi, too, is "optimistic about the upcoming festive season and preparations are in full swing to ensure utmost customer delight". "Like every year, we plan to offer attractive schemes, discounts, scratch cards, coupons, cashback, exchange offers, and financing options across our product portfolio to encourage consumers to own a device of their choice," said Anuj Sharma, chief marketing officer of Xiaomi India.

So with phone makers gaining big with 5G, are were staring at an end of 4G phones in India? The answer is no, according to Xiaomi's Sharma. "While we continue to offer best-in-class 5G devices across all feasible price points, we cannot discount the fact that 4G will continue to coexist with 5G for some time to come," he said. "We are expectingacomplete rollout of 5G services across all touchpoints in

That, coupled with the lowering of 5G chipset prices in India soon, will further boost 5G penetration," he added. As telcos gear up for

5G launch, sector shows progress

While the scenario looks bright on 4G and wireless sides, the same is not true on the wire line broadband front. If with 761 million 4G subscribers, the country's mobile broadband penetration is 68% of the total 1,142 million mobile phone subscribers, wireline broadband penetration is among the lowest worldwide, with only 27 million of 300 million households have ing a wireline broadband connection. This is largely because India went the wireless way, even for voice calls, two decades ago. This resulted in inadequate wireline infrastructure across the country. However, analysts concur that the wireline broad band will also get a boost as 5G services deepen.

As reported earlier, Jio and Bharti Airtel are not looking at higher tariffs for 5G services during the initial period of the launch in metro cities by Diwali. Low penetration of 5G-enabled handsets and some technical limitations arising out of the inability of a bulk of these handsets in supporting certain spectrum bands are the key reasons cited by company executives for such a move.

Instead of coming out with new 5G packs priced higher than the current 4G packs, the two players are likely to upgrade users of certain tariff plans to 5G. This can be done easily as no change of SIM card is required to upgrade subscribers from 4G to 5G, as was the case in the migration from 3G to 4G. Further, since the service providers would be able to make out from their networks which subscribers are on 5G-enabled phones, direct messages can be sent to them regarding their upgrade at no extra cost.

Company executives said since data usage of 5G users would rise substantially, it would translate into higher Arpu for the operators without any tariff hike.
