2. This Statement, which is the responsibility of the Holding Company's Management and approved by the Holding Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the Circular No. CIR/CFD/CMD1/44/2019 dated 29 March 2019 issued by the Securities and Exchange Board of India under Regulation 33(8) of the Listing Regulations, to the extent applicable.

Q1 FY22 revenue and EBITDA growth is partly on account of the low base during the last financial year due to lock down, which makes Q1 FY21 not a comparable quarter. Growth during Q1 FY22 was on account of following:

- Contribution from ECMO and Heart & Lung Transplant program has doubled compared to previous quarter.
- Higher occupancy of COVID patients.
- In addition, Vaccination revenue, RTPCR tests, COVID home care and COVID hotel packages also contributed significantly.

Clinical achievements during the Quarter

During this unprecedented COVID crisis, KIMS rose to the occasion and did exemplary work by saving many lives in tough situations. Few of them are highlighted :

- Asia's largest number of COVID lung transplants : 20 till 30th June

- In anticipation of increasing needs, we acquired additional ECMO machines and it had enormously helped in treating COVID patients effectively. We now have 18 ECMO machines and this is possibly the largest number in a single centre in the country and we treated nearly 50 plus COVID patients on ECMO machines out of which 10 were doctors brought from various parts of the country, who were serving COVID patients.
- Youngest COVID survivor, just a week old, was successfully treated and discharged from our mother and child unit which is a matter of pride and satisfaction.
- India's First known ECMO case of a COVID positive child was successfully treated and discharged.

Alongside COVID cases, we have done significant Non-COVID work:

- A pre-term baby weighing only 1100 grams was successfully discharged after undergoing a heart procedure.
- A Rare Kidney transplant between two non-compatible blood groups was successfully done.
- A 3-month-old baby underwent a rare spine deformity surgery.
- An Infant born with a rare and complex Rh issue was successfully treated.
- Advanced plasma transplantation was performed on a 6-year-old suffering with rare genetic condition

Successful treatment of such critical cases is a matter of great professional satisfaction and speaks volumes about professional expertise and medical infrastructure available with us.

Commenting on the performance, Dr. B. Bhaskara Rao, Managing Director said

"The COVID second wave was its peak during April and May 21. With learnings from the first wave, we implemented several measures like doubling up Oxygen storing tanks to hiring additional manpower especially in Nursing. I am happy to note that our doctors, nurses and admin people displayed the exemplary commitment and went above and beyond the call of duty to serve COVID patients. Despite many challenges like shortage of medicines and medical oxygen, the team laboured on day in and day out.

While critical surgeries like transplants, trauma, etc continued, elective surgeries were impacted. However, we have now seen the OP footfalls coming back to near normal and IP numbers are picking up too significantly. With strong push on Vaccinations by the Government, we are confident that this should come back to near normal soon notwithstanding the sporadic spikes being reported in few parts of the country"
