# STRONG REVIVAL OF WIND SECTOR TO RESULT IN SIGNIFICANT MARKET OPPORTUNITIES

---

- ✘ **Higher bidding targets:** GoI's 50GW annual RE bids issue for FY24-28 period includes at least 10GW of wind as part of the target to reach 500GW of non-fossil fuel capacity by 2030
- ✘ **Bidding trajectory for FY24** issued by the MNRE includes **10GW of exclusive wind bids** and 40GW of solar / hybrid / RTC bids
- ✘ **Discontinuation of e-reverse bidding** paves way for single-stage two-envelope closed bids to set up capacity across all 8 windy states
- ✘ Demand arising from **Green Hydrogen** ecosystem (which require 20-25GW of RE RTC capacity per million ton of GH production) and from the **C & I segment** (for their own green commitments) are over and above the 500GW target.
- ✘ **Stimulating Green Financing**
  - ✘ RBI study estimates India's green financing requirement to be at least 2.5% of GDP annually till 2030
  - ✘ 37% increase in IREDA, SECI FY24 budgeted investments at Rs 37,828 crores
  - ✘ RBI's framework for banks to accept green deposits (interest-bearing deposits earmarked for use by banks in green finance projects) to come into effect from Jun'23. It is aimed at developing a green finance ecosystem in India
- ✘ Declaration of trajectory for **Wind RPO** up to 2030 by the GoI
- ✘ 25.4GW of **wind repowering** potential identified by the NIWE
- ✘ **Push towards hybrid, hybrid + storage for RE RTC power**, vs plain vanilla solar auctions conducted earlier
- ✘ Development of **UMREPPs** to provide land and transmission to RE developers on plug and play basis, expediting commissioning
- ✘ Green Energy open access rules 2022 reduced limit of Open Access Transaction has been reduced from 1 MW to 100 kW for green energy and obligates discoms to procure and supply green energy to eligible customers
- ✘ **India's first offshore wind tender** expected to be floated soon; may include viability gap funding (VGF) by the central government. Estimated offshore wind potential off the coast of Tamil Nadu and Gujarat is ~70GW.

*All of the above will lead to significant growth opportunities for Inox Green*

# IGESL – GROWTH STRATEGY GOING FORWARD

---

## A. Organic Growth:

The execution of orders by Inox Wind shall lead to a firm addition to the existing O&M fleet of ~ 3GW.

**Pricing Reset:** Pricing of O & M contracts be it shared services or comprehensive are reset at the time of renewal of O & M contracts to increase profitability further.

## B. Inorganic Growth: Inorganic growth driven by:

Acquisition of the O & M business of the turbines supplied by other OEMs:

- There is as much as ~10 GW of wind generation capacity which is now being maintained by players like distressed OEMs, non OEM aggregators/technocrats who are primarily unorganized and financially weak and majority of this fleet is across retail customers.
- Customers across the board are looking for a switchover to a strong, credible, renowned and **Indian O & M service provider** and we are sweetly placed to capture this opportunity going forward.

Such acquisition will be done by way of a combination of the following:

- A natural shift over of customers on their own;
- Offering customers free O & M services for a certain period;
- Outright acquiring the business from aggregators
