Dear Sir,

Sub: Corporate Announcement - **Solix Common Data Platform Achieves Oracle Validated Integration with Oracle E-Business Suite -** reg.
Ref: Our Scrip Code: 501421.

With reference to the subject cited above, please find enclosed public news item to be posted at the Corporate Announcement Section of the BSE website and disseminate the same.

This is for your kind information and records.

Thanking you,

Yours truly
for **Technvision Ventures Ltd.,**

Diddiga Santosh Kumar
Company Secretary & Compliance Officer

Encl: As Above.

Solix Common Data Platform Achieves Oracle Validated Integration with Oracle E-Business Suite

Integration will enable enterprises to archive their Oracle E-Business Suite data using pre-built archiving templates

August 30, 2019 — Santa Clara, Calif. — Solix Technologies, Inc. (www.solix.com), a Gold level member of Oracle PartnerNetwork (OPN) and leading provider of enterprise archiving and big data applications, today announced it has achieved Oracle Validated Integration of the Solix Common Data Platform (CDP) 2.5 with Oracle E-Business Suite 12.2.7.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. The Solix Common Data Platform (CDP) helps enterprises organize, manage, and process all of their structured, semi-structured, and unstructured enterprise data. The Solix CDP integration with Oracle E-Business Suite provides enterprise archiving and database archiving capabilities, enabling organizations to archive legacy Oracle E-Business Suite data. Archived data is structured into tiers based on its age, increasing operational efficiencies while retaining transparent end user access to the archived data. The Solix CDP provides pre-built archiving templates for over 50 of the most common Oracle E-Business Suite modules.

"Solix CDP provides a powerful suite of data-driven tools for organizations to archive legacy Oracle E-Business Suite data, while still providing access to the data through the Oracle application," said *John Ottman, Executive Chairman at Solix Technologies, Inc.* *"Achieving Oracle Validated Integration gives our customers confidence that the integration between the Solix CDP and Oracle E-Business Suite is functionally sound and performs as tested,"* said *David Hicks, vice president, Worldwide ISV Cloud Business Development, Oracle. "For solutions deployed on-premises, in the cloud, or both, Oracle Validated Integration applies a rigorous technical review and test process that helps to reduce deployment risk and improves the user experience of the partner's integrated offering."*

The Solix CDP is cloud-ready software. Key capabilities include:

- Object Workbench: Uniform data collection of structured and unstructured data, ETL and metadata repository.
- Data Governance Workbench: Sensitive data discovery, data masking and encryption, role based access control, retention management, ILM, GDPR, PHI, PCI and FISMA compliance frameworks
- Analyst Workbench: Data preparation, data visualization, search, business intelligence and analytics
- Test Data Management: Create intelligently sized database subsets, not clones, to reduce test data storage requirements by up to 80 percent
- Enterprise archiving and data lake: Real-time data hub architecture for scalable processing with low cost bulk data storage
- CDP API 1.0: Certified API support for Solix App Store solutions
- Object storage support

ABOUT TECHNVISION VENTURES LIMITED

TechNVision Ventures Limited is pioneer in creating next generation enterprise software business. We innovate, incubate new ideas and foster entrepreneurship in the emerging areas of technology, Solix Technologies Inc., is an affiliate of TechNVision Ventures Limited.

ABOUT ORACLE VALIDATED INTEGRATION

Oracle Validated Integration, available through the Oracle PartnerNetwork (OPN), gives customers confidence that the integration of a complementary partner software product with an Oracle "on-premises" Application has been validated and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations and partners who successfully complete the program are authorized to use the "Oracle Validated Integration" logo. For more information, please visit Oracle.com at https://solutions.oracle.com/scwar/scr/AboutPartners/validated-integration/index.html

ABOUT ORACLE PARTNERNETWORK

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit http://www.oracle.com/partners.
