Management Commentary:

Commenting on the performance for quarter ended 30th June 2019, Dr. Pawan Singh - Managing Director & CEO said:

“Though there are continuous sectorial issues for the NBFC sector, we continue to focus on improving our yields, structured finance to corporates of good credit standings, rotate our existing assets towards higher yields and to explore new areas for generation of fee based income and advisory services which is being strengthened in the company.

We will continue to grow in renewable sector and sustainable financing in which we are having negligible stress and huge growth opportunities in future. We have also started to tap the growth opportunities in new similar areas of businesses like SBG city gas distribution, annuity based sewage treatment plants, decentralize renewal generation, electrical mobility / charging stations.

While we have overcome the liquidity challenges and our strategy is to diversification of borrowings at lower cost including enhanced borrowings from international and financial institutions taking full advantage of taking full relaxations provided by the government in ECB guidelines. Working toward portfolio with better yields, innovation in structuring the transactions, focus on fee based services and resolution of stuck money in sub-standard assets and the impact of which would be felt in coming quarters. We would be positioning our-self as India’s premier sustainable financing company.”
