Notes to the financial statements

1. Significant accounting policies

The accounting policies set out below have been applied consistently to the periods presented in these financial statements.

1.1 Basis of preparation of financial statements

These financial statements have been prepared under historical cost convention from books of accounts maintained on an accrual basis (unless otherwise stated hereinafter) in conformity with accounting principles generally accepted in India and comply with the Accounting Standards issued by the Institute of Chartered Accountants of India and referred to Sec 129 & 133 of the Companies Act, 2013, of India. The accounting policies applied by the company are consistent with those used in previous year.

1.2 Use of estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses and the disclosure of contingent liabilities on the date of financial statements. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Any revision to accounting estimates is recognised prospectively in current and future periods.

1.3 Fixed assets

Fixed assets are stated at acquisition cost less accumulated depreciation/amortisation and accumulated impairment, if any. All direct costs are capitalised including freight, duties, taxes and expenses incidental to acquisition and installation of fixed assets. Subsequent expenditures related to an item of fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Tangible assets

The useful lives of the assets are based on technical estimates approved by the Management, and are lower than or same as the useful lives prescribed under Schedule II to the Companies Act, 2013 in order to reflect the period over which depreciable assets are expected to be used by the Company. Depreciation is provided on a prorata basis on the straight line method based on the estimated useful lives of the assets.

1.4 Inventories

Inventories are valued at lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs.

1.5 Investments

Investments that are readily realisable and are intended to be held for not more than one year from the date, on which such investments are made, are classified as current investments. All other investments are classified as long term investments. Long-term investments are valued at cost. The Company provides for diminution in the value of investments, other than temporary in nature as determined for each investment individually. Current investments are valued at the lower of cost and fair value as on the date of the Balance Sheet.

1.6 Revenue recognition

Revenue from sale of goods in the course of ordinary activities is recognised when property in the goods or all significant risks and rewards of their ownership are transferred to the customer and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of the goods and regarding collection. The amount recognised as revenue is exclusive of sales tax, Goods and Service Tax (GST) and is net of returns, trade discounts and quantity discounts.

Interest Income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

1.7 Provisions

A provision is recognized when an enterprise has a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions, other than employee's benefits, are not discounted to their present value and are determined based on management estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates.

1.8 Taxation

Current tax is determined as the amount of tax payable in respect of taxable income for the year using the tax rates and tax laws that have been enacted or substantively enacted at the Balance Sheet date.

Deferred tax is recognised for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognised and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the Company has unabsorbed depreciation or carry forward tax losses, such deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date.

1.9 Previous year figures

Previous year figures have been regrouped/rearranged/reclassified, wherever necessary to confirm to the current year presentation.
