M/s. Bombay Stock Exchange Limited,
Phiroze Jhejeebhoy Towers,
Dalal Street,
Mumbai- 400 001

Dear Sir,

Sub: Intimation pursuant to Regulation 47 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Notice for Board Meeting to consider, approve and take on record the unaudited financial results (Both Standalone and Consolidated) for the six months and Second quarter ended 30/09/2021

Pursuant to Regulation 47 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we have published the notice of the Board Meeting scheduled to be held on 10th November 2021 to consider, approve and take on record the unaudited financial results (Both Standalone and Consolidated) for the six months and Second quarter ended 30th September 2021 in one English language national daily and in one daily newspaper published in the language, where the registered office of the company is situated.

Kindly take the same on records.

Thanking you,

Yours faithfully,

For Munoth Communication Limited

Jiral Jain
Company Secretary

IT matters

Businesses prefer hybrid cloud as dominant IT architecture

Threat of cyber-attacks looms large in new rat race

Managing cloud operations across environments from a single pane of glass is important or extremely important for 78 per cent of the respondents in India for successful digital initiatives. Despite escalating cyber-attacks, a third of global and Indian respondents do not have security as their top priority. According to the results of IBM's new global study on cloud transformation there has been a drastic shift in business needs as only three per cent of respondents reported using a single private or public cloud in 2021, down from 29 per cent in 2019 establishing hybrid cloud as the dominant IT architecture.

The global study, conducted by IBM Institute for Business Value (IBV) in cooperation with Oxford Economics, surveyed almost 7,200 C-suite executives across 28 industries and 47 countries including 287 executives from India. The findings indicate that the cloud market has entered the hybrid, multicloud era and concerns around vendor lock-in, security, compliance and interoperability remain paramount. The study found: Cyber threats are at an all-time high. Infrastructure complexity is creating cracked doors that cybercriminals are exploiting.

Yet, surprisingly more than a third of respondents did not indicate improving cybersecurity and reducing

security risks are among their largest business and IT investments.

At the same time, 80 per cent of global & Indian respondents said data security being embedded throughout the cloud architecture is important or extremely important, in most cases, to successful digital initiatives.

Security concerns posed as a significant obstacle to improving business performance in some, most or all parts of their cloud estate for 54 per cent of respondents in India.

Companies are denouncing vendor lock in and require interoperability and portability between environments. Nearly 79 per cent of global respondents and 71 per cent of Indian respondents said workloads being completely portable with no vendor lock-in? is important or extremely important to the success of their digital initiatives.

Nearly 69 per cent of global respondents and 68 per cent of Indian respondents said vendor lock-in is a significant obstacle to improving business performance in most or all parts of their cloud estate.

While in India, 63 per cent of respondents said lack of interoperability among clouds is a significant obstacle to improving business performance in some,

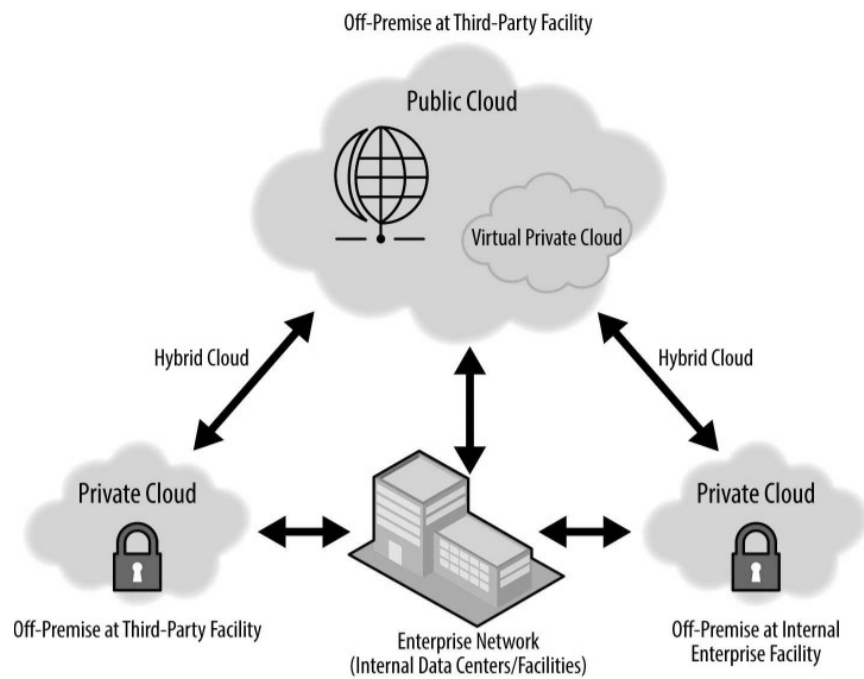

most or all parts of their cloud estate.

Nearly 64 per cent of respondents in India said workloads being completely portable, where developers can build, run and move workloads across private and public clouds, is important or extremely important for the success of their digital initiatives.

In India, 74 per cent of the respondents highlighted that the ability to run governance and compliance tools across multiple clouds is important or extremely important to the success of their digital initiatives.

"In the beginning of their cloud journey, many companies dabbled with several different clouds that created complexity and disconnected piece parts, potentially opening them up to major security threats," said Howard Boville, Head of IBM Cloud Platform. Today's findings reiterate that security, governance and compliance tools must run across multiple clouds and be embedded throughout hybrid cloud architectures from the onset for digital transformations to be successful.

Sandip Patel, Managing Director, IBM India said, "As organisations progress on their journey to the cloud, adopting Hybrid, multicloud has become essential and is a clear winner in the race to become

the dominant architecture for enterprise cloud estates in India. We are witnessing Indian organisations experience enterprise-scale improvements by harnessing the power of a hybrid cloud architecture to digitise their existing products and services, enhance customer experience, increase business resiliency and reduce security risks."

The study revealed that enterprises need to assess how they use the cloud in terms of adoption, velocity, migration, speed, and cost savings opportunity. Other recommendations include: Focus on security and privacy - determine where your critical workloads reside and scrutinize who and what has access to them. Regularly test that security controls and privacy policies are being adhered to, but also that improperly configured assets and software vulnerabilities are being promptly addressed. Additionally, another recent study by the IBM Institute for Business Value, 'Unlock the business value of hybrid cloud' further revealed that: The revenue impact of cloud investments for Indian companies can be amplified up to 13 times when orchestrated as an end-to-end reinvention of the enterprise.

Hackathon for Indians to launch decentralised apps

Polygon, India's biggest crypto project and one of the most adopted blockchains in the world, has announced BUIDL IT 2k21 Hackathon in collaboration with Devfolio.

India's largest and fastest-growing community of builders. BUIDL IT 2k21, India's first Polygon-native hackathon, aims to promote Web3 technology and culture among budding Indian developers. This initiative is exclusively catered to the Indian ecosystem. BUIDL IT is the perfect platform for Indian developers, entrepreneurs, artists, and students alike to begin their Blockchain & Web3 journey and showcase their innovative ideas & projects on a grand scale.

"We are excited to announce Polygon BUIDL IT 2k21 hackathon in collaboration with Devfolio. BUIDL IT is an exclusively created platform for the Indian ecosystem. We look forward to supporting a new wave of builders in their decentralized Web3 development. We hope this hackathon will encourage and empower Indian developers, entrepreneurs, artists, and students to embark on their journey to a more civil internet where users control their data and privacy," Sandeep Nailwal, Co-Founder, Polygon, said. "We are thrilled to be collaborating with Polygon to host BUIDL IT, India's biggest Web3 hackathon. Devfolio's mission has always been to help build a thriving community of builders who enjoy making things. We want to take this a step further by enabling students, entrepreneurs, and developers to kickstart their Web3 journey while also interacting with a stellar lineup of speakers and having the opportunity to win prizes worth more than \$100,000," explained Denver D'Souza, Chief of Staff, Devfolio. One can participate in the BUIDL IT Hackathon whether they're a veteran or new to Web3. This hackathon is an opportunity for participants to upgrade their skills to build and contribute to the Web3 ecosystem. Participants can compete for a chance to win prizes worth more than \$100,000.

KLA opens advanced AI lab in IIT Madras

KLA Corporation recently announced the opening of two important facilities in Chennai, India, supporting the company's investment in innovative research and talent development. KLA's Artificial Intelligence-Advanced Computing Lab (AI-ACL) operated in partnership with the Indian Institute of Technology Madras (IIT-M) will serve as a centre of excellence for AI-focused research and development. In addition, a new office space in Chennai expands KLA's existing business operations as the company continues to grow and hire from the region. KLA develops industry-leading equipment and services that enable innovation throughout the electronics industry.

KLA, a Fortune 500 company with more than 12,000 global employees, is a leading supplier of process control and process enabling solutions for the global semiconductor and electronics industry. At KLA India, engineers, data scientists and problem-solvers design solutions that improve the performance of KLA's process control products and

facilitate customer success. KLA's new state-of-the-art, high-tech research and development center serves as a cultural and collaboration hub for the engineering teams.

"KLA is at the forefront of using AI technology in our process control systems to identify and isolate critical issues in chip manufacturing," stated Ahmad Khan, president, semiconductor process control at KLA. "To expand the reach of AI in our products and develop the next generation of AI innovations, we created our new AI-ACL research facility. Our researchers and engineers at AI-ACL join the AI experts at our AI Modeling and Center of Excellence in Michigan to form a global team committed to advancing the boundaries of AI, software, image processing and physics modeling." Officiating over the opening of both facilities, Prof. Bhaskar Ramamurthy, Director of IIT Madras said, "KLA and IIT Madras have been collaborating for over 15 years. We look forward to an expanded collaboration with

KLA in AI, advanced parallel computing, and quantum computing research for applications in the semiconductor inspection and metrology domain. The IIT Madras Research Park ecosystem is a perfect enabler for such an industry with academic collaboration that is bringing together our resident experts, top student researchers and industry's best minds. I also congratulate KLA on the grand opening of its new office in RMZ Millenia-II today."

Beyond expanding business in India, KLA prioritises making a positive impact on the local community. In May, KLA created a \$550,000 India pandemic relief fund to aid healthcare facilities in procuring critically-needed equipment in the fight against COVID-19. The donation also supports a long-term investment to expand ICU capacity in regional hospitals and better address the needs of under-privileged communities.

AgreeYa gets Best in Asia Award for virtual workplace

AgreeYa Solutions recently announced that it had won the Asia's Best Employer Brand Awards 2021, the world's premier business awards programme. These prestigious awards recognize the best organizations with distinguished and outstanding talent and HR practices.

AgreeYa has been hailed as Asia's Best Employer Brand Awards for Managing Health at Work for their remarkable and unique approach towards nurturing its employees' mental and physical health. Another category AgreeYa were termed winner for is Asia's Best Employer Brand for transitioning to virtual workplace-the HR lens. This achievement is a direct consequence of the AgreeYa's commitment and efforts towards building an exceptional work-from-home infrastructure by making the best use of digital technology and governance.

Speaking on the occasion, Arindam Ray Chaudhari, COO, AgreeYa Solutions said, "We are extremely elated to be recognized by Asia's Best Employer Brand Awards."
