Dear Sir/Madam,

Sub: Investor Presentation- Q2-2023-24

With reference to the captioned subject, we send herewith Investor Presentation of the Unaudited Standalone Financial Results of the Company for the quarter and half year ended 30th September, 2023 pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Please take the same on your record.

Thanking you,

Yours faithfully,

For Transformers and Rectifiers (India) Limited

**Rakesh Kiri
Company Secretary**

Encl.: As above

T & R is one of the leading manufacturers of a wide range of transformers globally. Today T & R is second largest Transformer manufacturing company based on Capacity in India. It has capability to develop world class power, distribution, furnace and specialty transformers with world class infrastructure at three plants around the city of Ahmedabad (Gujarat, India). T & R is managed by a highly skilled and experienced team of approximately 1200 employees, who consistently ensure that each and every activity factors in an adherence to high quality benchmarks established by the organisation.

Topics to Cover

- ❑ TRIL at a Glance
- ❑ Drivers that transcended TRIL's growth story over the years
- ❑ Financial Performance
- ❑ Key Strengths and Business Growth Strategy
- ❑ Industry Outlook

TRIL at a Glance

Transformers & Rectifiers (India) Limited (TRIL) - At a glance

- First-generation company started by Mr. Jitendra Mamtora, a bachelor's in electrical engineering, running successfully for over 4 decades under the leadership of Mr. Jitendra Mamtora, Chairman and Mr. Satyen Mamtora, Managing Director of TRIL
- Most preferred Indian Brand, known for manufacturing High Voltage Transformers viz. 220 kV 400 kV, 765 kV, 1200 kV indigenously
- Manufactures entire range of transformers viz. Power, Distribution, Furnace, Rectifier Transformers & Shunt Reactors, creating a unique positioning for itself in the transformer industry
- Supported by backward integrated manufacturing facilities housed in Gujarat
- International presence in 25+ countries
- An only Indian company who has the capability to manufacture Green Energy Transformers

Drivers that
transcended
TRIL's growth
story over the
years

Strong In-House Capabilities and Collaboration led to Growth over the years

Incorporated TRIL and began manufacturing upto 110 kV class transformers at Changodar plant

- Strategic alliance with ZTR Ukraine for 765 kV Transformer
- Technology License agreement with Fuji Electric Co. Ltd. for 400 & 765 kV class reactor and generator transformers

- Manufactured Green Transformers and reactors (up to 400 kV) using natural ester fluid
- Executed maiden order for 400 kV Generator Transformers,
- Successfully type tested OIP bushings upto 145 kV

1980-1993

1994-2000

2007-2010

2011-2015

2016-2017

2018-2022

2023

Mr. Jitendra Mamtara, began his journey from repairing to manufacturing 33 kV class transformer

- Listed on NSE & BSE raising ₹ 139 crore at price of ₹ 465/share.
- Commissioned greenfield project at Moraiya in 2010

- Successfully commissioned 1150 kV transformer
- Developed and manufactured Electric Arc Furnace transformer upto 132 MVA

- Raised ₹ 120 crore by way of preferential issue on private placement basis in October 2023
- Only Indian transformer company having NABL accredited lab for electricals steel testing

Industry leader in manufacturing wide range of high voltage Transformers

Power Transformer

Upto 1200 kV class

Manufactures a range from medium to ultra-high voltage (1200 kV AC) and from small (5 MVA) to very large power ratings (500 MVA)

Furnace Transformer

220MVA/101KA

Manufactures a wide range of furnace duty transformers including Arc Furnace including 250 MVA rating

Rectifier Transformer

Up to 160 kA DC

Manufactures a wide range of Rectifier application transformers. Market leader in India

Distribution Transformer

500 kVA & Above

Manufactures Distribution Transformers up to 10 MVA / 33 kV Voltage class. Primary focus on industrial customers

Shunt Reactors

Up to 765 kA

Manufactures Shunt and Series Reactors upto 135 MVA, 400 kV Three phase and 110 MVA, 765 kV Single phase.

Design excellence led to Business Model more skewed towards High Voltage Transformers

Upto 220 kV is a competitive segment with presence of unorganized private players

Above 220 kV: Over the years, TRIL excelled in manufacturing higher voltage transformers supported by technocrat promoter and his strong hold in design, product customization, etc. enabled TRIL develop a competitive position in this segment

Products Manufactured

- ❑ Large Power Transformers up to 500 MVA 1200 kV voltage class
- ❑ Reactors up to 765 kV Class
- ❑ Generator transformers up to 500 MVA 765 KV voltage class
- ❑ Large ratings of furnace duty transformers (> 100 MVA)

- ❑ Medium Power Transformers up to 160MVA, 220KV voltage class
- ❑ Transformers for Renewable sector
- ❑ Furnace transformer up to 100 MVA rating
- ❑ Transformers for rectifier application and traction duty for railways

- ❑ Upto 10 MVA 66 KV voltage class rating including distribution transformers from 500 KVA to 5 MVA

Backward Integration help achieve Operational Efficiency

Products manufactured in-house by TRIL include:

Radiators upto **765 KV**

Transformer Tanks Fabrication upto **765 KV**

OIP Bushings upto **245 KV** and CTs upto **765 KV**

In total they comprise between **10%-15%** of the total RM requirement

Benefits of being Backward Integrated:

Guarantees reliable and uninterrupted supplies

Quality controls remain in order

Ensures timely delivery

Generates cost advantage

In-house products retain intellectual property

Supplying to Esteemed Customers in Domestic market; Presence in 25+ Countries Globally

Domestic Customers

T&R Presence

- ❑ **Asia** : India, Bangladesh, Nepal, Bhutan, Srilanka, Phillippines, Saudi Arabia, UAE, Oman, Kazakhstan, Azerbaijan, Iran
- ❑ **Europe** : United Kingdon, Belgium, Italy
- ❑ **Oceania** : Australia, Fuji
- ❑ **North America** : USA, Canada, Puerto Rico, Mexico, Ecuador
- ❑ **South America** : Uruguay
- ❑ **Africa** : South Africa, Kenya, Tanzania, Ethiopia, Uganda, Zambia, Zimbabwe, Congo, Ghana, Nigeria, Togo, Benin, Lesotho

International Presence

Technocrat Promoters supported by Qualified and Professional Senior Management

Mr. Jitendra Mamtora

Chairman

- ❑ A Bachelor's in Electrical Engineering. After working as an engineer in east India, he moved to Gujarat and set out on his entrepreneurship journey
- ❑ 40+ years of experience in dealing with power utilities across India
- ❑ He is an executive council member of IEEMA and have been nominated as the Chairman of IEEMA since 2007
- ❑ He is also a member of CII and FICCI

Mr. Satyen Mamtora

Managing Director

- ❑ Diploma in Electrical Engineering from Uxbridge College of Engineering, London, UK
- ❑ 20+ years of association with TRIL
- ❑ He spearheads production, marketing division and has played a key role in consolidating the organisation's presence in the power utilities segment across the country
- ❑ He has also played an aggressive role in strategizing and putting in place a global marketing plan which has successfully ensured TRIL's presence in African, Asian and South American geographies.
- ❑ He is a lifetime member of IEEMA

Technocrat Promoters supported by Qualified and Professional Senior Management

Chanchal Rajora
CFO & Advisor to the Board

- A Chartered Accountant (CA) with nearly 2.5 decades of work-ex in Corporate Finance, Fund Raising, Financial Planning, M&A, Credit & Risk Management, BD, PR, etc
- His out of the box thinking has helped him manage organizations at senior levels, define strategies and action plans for various organizations
- His business relationship skills, decision making ability, international exposure, knowledge of Infrastructure, Capital Goods, Power Industry and Financial Market will be instrumental in carving growth story at TRIL

Ashwani Sharma
VP Marketing

- B.E in Electrical Engineering from Punjab University
- 25+ years of experience in Business Development & Marketing, Business Forecasting, etc
- 10+ years of association with TRIL
- He has played a pivotal role in the company in streamlining the tendering process, developing transformers business over the years.

Niki Ghumra
Head Fabrication & Production

- Diploma in Mechanical Engineering from P.E.S polytechnic, Bangalore
- 18+ years of experience in heading Fabrication unit
- 15 years of association with TRIL
- He has played an important role in managing manufacturing operations, driving operational excellence programs, profitability improvement initiatives and people management

Anirudh Jhala
GM Tech & Quality Assurance

- B.E in Electrical Engineering from L.E Collage, Morbi
- 18+ years of experience in Testing, Design, Product Development, Process Control, etc
- 18 years of association with TRIL
- He has played a pivotal role in institutionalizing licensed technology for 765kV transformers and 400/765kV Shunt Reactors and development of UHV 1200 kV class Transformers
- Contributed about 33 technical papers in national/international seminars magazines

“ To consolidate our national and international presence as a leading transformer manufacturer and maintain a sustainable growth rate over the long-term.”

Mr. Satyen Mamtora

MD
TRANSFORMERS AND RECTIFIERS
(INDIA) LIMITED

Management Comments on the Quarter

- ❑ In October 2023, the company successfully raised ₹ 120 crore by the way of preferential issue on private placement basis to a renowned investor. This infusion brings comfort and confidence on the prospects of the company and in the medium term provides capital support to ensure smooth operations
- ❑ GETCO has begun releasing payments from 3rd week of October in tranches, thereby expecting reduction in receivables to a larger extent in H2FY24
- ❑ During the quarter, the company received new orders worth ₹ 314 crore taking orders on hand to ₹ 2,145 crore as on 30 September 2023, growth of 23% YoY basis.
- ❑ During the quarter, revenue from operations was at ₹ 254 crore, a de-growth by 22% from ₹ 324 crore in Q2FY23. The decline in revenue was on account of:
 - Non-receipt of dispatch instruction from few customers because of non availability of their inspection team
 - The company experienced short-term mismatch in working capital that caused delay in execution of certain jobs. Post infusion of funds, we are certain to streamline the operations during Q3FY24
- ❑ During the quarter, EBIDTA margin was at 8.2% as compared to 9.9% in Q2FY23

Future Business Prospects and Outlook

- As on Q2FY23, the unexecuted order book was at ₹ 2,145 crore
- Tenders and inquiries for domestic market of value ₹ 2,741 crore are under negotiation or bidding stage
- Export orders of value ₹ 994 crore are under various stages of negotiations
- The transformers industry is flushed with orders and demand outlook is positive with end use in various industries viz. Railways, Renewables, Green Energy, Power, etc
- In the current industry landscape, TRIL is positioned advantageously and expects to participate in the growth story of transformers

“
To emerge as a preferred solution provider for quality transformers
”

Mr. Jitendra Mamtora

Chairman
TRANSFORMERS AND RECTIFIERS
(INDIA) LIMITED

Key Strengths and Business Growth Strategy

Key Strengths

Integrated manufacturing facility

- Over the years, TRIL has continually moved up the value chain by developing expertise in designing and manufacturing transformers from 5kV up to 1,200kV class
- To optimize the operations, company has continually undertaken backward integration, manufacturing key components in-house to support quality, timely delivery, cost-effective access to critical raw material components that has enabled TRIL to achieve operational efficiency over the years
- Installation of new machines (oven) has helped reduce cycle time to manufacture transformers

Indigenous transformer manufacturer

- A well-known Indian Brand since 1994, known for manufacturing high voltage transformers indigenously
- Design, engineering capabilities developed indigenously enabled the company to achieve customization and cater to niche segments of transformer manufacturing
- The company evolved and achieved manufacturing prowess due to technical know-how of technocrat promoters supported by strong team

Preferred supplier to Utilities and long-standing relationship with Industrial Customers

- Unique distinction of being approved by utilities for power transformers up to 765 kV class without any external technological support
- Manufacturing higher voltage transformer is a space dominated by limited players due to technical expertise, design, customization involved which has led to entry barriers

Wide Product Portfolio and Significant Order Wins

- Manufacturer of entire range of transformers viz. power generation, T&D, industrial, specialized transformers; having a market share of 22-25% in Power transformers
- One of the first manufacturer of V-Connect & Scott-Connect railway application transformers
- The only transformer manufacturer in Green Hydrogen Energy application
- One of the largest manufacturers of furnace transformers; recent orders for manufacturing Arc Furnace duty transformer which were earlier imported
- Export orders for one of the largest Electric Arc Furnace Transformer (220MVA). TRIL will be 3rd company in the world to manufacture this kind of transformer

Uptick in capex cycle and government policies lights up power sector

- Pent up demand from the industrial expansions backed by pickup in capex is leading to higher consumption of power in India leading to improved OB of transformer manufacturers
- Railways: With higher roll out of fast speed trains, metro's, freight corridors, TRIL is at an advantageous position to contribute to the demand
- Green Energy: For transmitting energy from solar parks to the grid higher voltage transformers are required where TRIL has necessary facility and capabilities
- Replacement demand expected from Steel mills using glass furnaces will transition to Arc furnace transformer because of pollution regulations
- Due to elongated industry downturn, many players are either out of business or consolidated, Chinese players exited which has in-turn benefitted TRIL

Industry outlook

Opportunities in the Transformer Industry

The transformer market is poised for significant growth, particularly as federal investments in the development and implementation of renewable sources of energy increase, underpinning the ongoing support to create better and more efficient electricity infrastructure.

Several key market trends are expected to continue driving growth, including aging electrical infrastructure, grid hardening and modernization initiatives, expanding renewable distributed energy, and increasing demand from high-growth sectors, among many others.

Electric Grid by the Numbers

2+ Thousand
Photovoltaic
Generating Facilities

642+ Thousand
Miles of High-Voltage
Transmission Lines

4.6B+
Total Kilowatt-Hours
2021 Energy Output

70+ Thousand

Currently in Use

50+ Thousand
EV Charging Stations

Transformers are critical infrastructure; connect every power source throughout the grid

Industry Outlook : Power Sector

India's Installed Power Generation Capacity (GW)

India's Installed Power Generation Capacity in FY23 (GW)

- ❑ Over the last 9 years, significant strides have been made in enhancing power generation capacity, expanding access to electricity, promoting renewable energy, and implementing innovative policies
- ❑ India is currently the third-largest generator of electricity in the world, with an installed generation capacity of more than 416 GW as of March 31, 2023.

Industry Outlook : Renewables

Installed Renewable Energy¹ Capacity (GW) - February 2023

Installed Renewable Capacity Breakup (GW) - February 2023

- ❑ Installed renewable generation capacity posted a CAGR of 14.58% between FY16 and FY23
- ❑ The country plans to reach 450 GW of installed renewable energy capacity by 2030, with 280 GW (over 60%) expected from solar power
- ❑ The ambitious target of 450 GW will provide investment opportunities worth US\$ 221 billion by 2030

Transformer Demand Drivers

Export Opportunities

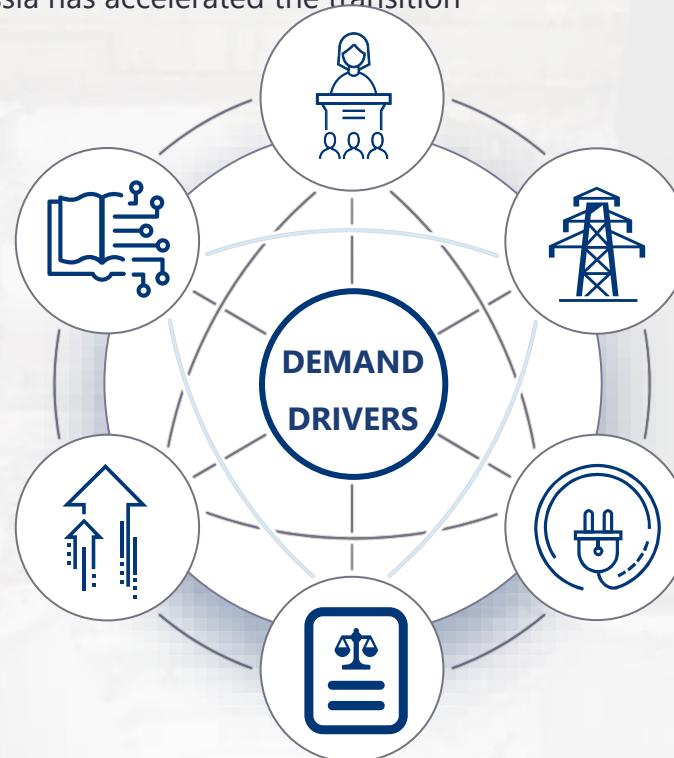

India is being a preferred transformer supplier for US, Europe markets and on-going tensions in Ukraine & Russia has accelerated the transition

Aging Infrastructure

Aging transformers and related T&D infrastructure are anticipated to receive meaningful equipment upgrades while undergoing significant revitalization and modernization to minimize outages and prevent high-cost grid failures.

High-Growth End Markets viz. Renewables

Strong demand from high-growth end markets, such as technology and data centers, EV charging networks, and renewable energy will place additional stress on grid capacity and resiliency, and require new, modern transformers.

Railways

Indian Railways moving towards high speed trains had led to increased demand of transformers from 66 kV to 133 kV. Further, demand anticipated from freight corridors, metros, etc.

Grid Resiliency

Extreme weather, natural disasters, and growing national security concerns after recent attacks on substation transformers have resulted in an increasing emphasis on grid resiliency and durability, all while customers express decreasing tolerance for outages.

Supply Chain Disruption

Global supply chains have experienced significant disruptions in recent years driven by the compounding effects of increasing demand and decreasing materials supply, which was exacerbated following Russia's invasion of Ukraine

Safe Harbor

This presentation has been prepared by Transformers and Rectifiers (India) Limited solely to provide information about the Company to its stakeholders.

No representation or warranty, express or implied is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of such information or opinions contained herein.
