Kindly take the same on record.

**Yours Faithfully,  
For Adani Power Limited**

**Deepak S Pandya  
Company Secretary**

Encl.: As above

## Media Note

# Adani Power gets B score for fulfilling climate & water security commitments - A substantial improvement over the previous year's CDP score

### EDITOR'S SYNOPSIS

- Adani Power Limited received a **B score** in the Management band for fulfilling climate change & water security commitments
- A score of B signifies that APL is **taking coordinated action on climate issues**
- For climate change, this is above the global and Asia regional average of C and same as the thermal power generation average of B
- For water security, this is same as the global, Asia regional and thermal power generation average
- The previous year's CDP score was C in climate change and B- in water security categories

**Ahmedabad, 21 December 2022:** Adani Power Limited (APL), a part of the Adani Group, has received a B score for climate change transparency from CDP (Carbon Disclosure Project) for 2022. This is higher than the global and Asia regional average of C, and same as the thermal power generation average of B. This score highlights APL's stewardship in setting competitive benchmarks and fulfilling commitment to reducing the impact of climate change. In the thermal power generation sector, 12% companies fall in disclosure band, 16% in awareness band, 48% in management band and 24% in leadership band.

APL's performance was good in the areas of Governance, Scope 1, 2 and 3 emissions and risk management process, opportunity disclosure, and business strategy, financial planning, and scenario analysis as compared to the global average.

APL also received a B score in water security. This is on par with the thermal power generation, Asia regional and global average of 'B'. APL performed well in the areas of business impacts, integrated approaches to environmental challenges, water-related opportunities, water policies, water accounting, targets and goals, governance and business strategy. APL is among 48% of companies that reached Management level in climate change and is among 77% of companies that reached Management level in water security.

## Power

APL has put in place a robust risk management system to manage various impacts as well as keep up with emerging risks in the industry. Moreover, key opportunities and risks are kept in mind while developing short-term and long-term strategies. The critical risks and opportunities include various factors related to climate change, regulatory norms, and changes in investor behaviour among others. APL's value-led growth is attributed to its adherence to the UN sustainable development goals, the Adani Group's vision of nation-building, and sustainable value creation.

CDP is a global environmental impact non-profit organisation, providing a platform for companies, cities, states and regions to report information on their climate, deforestation and water security impacts. The global economy looks to CDP as the gold standard of environmental reporting. The CDP scores capture the ESG credentials of organisations on the criteria of climate change, forests and water security.

### **About Adani Power**

Adani Power (APL), a part of the diversified Adani Group, is the largest private thermal power producer in India. The company has an installed thermal power capacity of 14,410 MW spread across seven power plants in Gujarat, Maharashtra, Karnataka, Rajasthan, Chhattisgarh, Jharkhand and Madhya Pradesh, apart from a 40 MW solar power plant in Gujarat. With the help of a world-class team of experts in every field of power, Adani Power is on course to achieve its growth potential. The company is harnessing technology and innovation to transform India into a power-surplus nation and provide quality and affordable electricity for all.
