LEADERSHIP INDICATORS

1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board.

The consultation with the Board on key stakeholder concerns is largely mediated by different organizational functions which are responsible for the respective stakeholders. Periodic Board reviews are held at least once a quarter, during which the Board holds extensive discussions with the Chief Executive Officer (“CEO”) and other senior leaders representing these functions. For example, feedback on customer trends and issues is provided by the Heads of Businesses and Market Units, that on investors by the Chief Financial Officer (“CFO”) and his team, on employees by the Chief Human Resources Officer (“CHRO”) and his team, on sustainability issues by the Chief Sustainability Officer, etc. Please refer to “Engagement Mode and Frequency” and “Topics of Engagement” in the “Stakeholder Engagement” Section of Wipro Annual Report for FY 2023-24.

2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes/ No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity.

Yes, stakeholder engagement covers key material issues driven by strategic objectives through various modes of engagements. There is a primary internal custodian for each stakeholder group. For example, feedback from employees involve certain informed steps which are taken leading to enhanced communications and collaboration forums. For suppliers, this has improved the ease of doing business and ability to address environmental and social aspects. For communities, under the community ecology initiative, we focus on striking an ecological balance in our proximate communities by taking up projects that have direct and tangible benefits and strengthening our urban primary healthcare system is a focus area for us. This is because vulnerable communities still lack adequate personnel and amenities for their healthcare needs. Similarly, for employees, at Wipro, the health, safety, and wellbeing of our employees is of paramount importance. We look at wellbeing holistically, connecting mind, body, and community to help us focus on being healthy, feeling happy, and living our life’s purpose. Our employee wellness programs encompass three areas of employee wellbeing: Physical, emotional, and financial. Inputs are received through the employee feedback mechanism. Customer surveys are conducted periodically to get customer inputs. Additionally, Quarterly reviews are held with customers where inputs are sought.

3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/marginalized stakeholder groups.

Wipro engages with communities and civil society networks to work on systemic issues that can act as force multipliers for social transformation and sustainable development. Within this ambit, we deliberately focus on disadvantaged groups in a significant majority of our social initiatives e.g. Children with Disability, the Urban Poor, Women from disadvantaged communities, Suppliers from under-represented groups (e.g. Women owned enterprises), Employees with disability or from LGBTQ+ groups. Boosting and strengthening our urban primary healthcare system is a focus area for us. For example, enhancing education facilities for children with disabilities in marginalized communities, providing healthcare to migrant workers.

The Company does not have operations in ecologically sensitive areas.

- 4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:**

S. No.	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Global Energy command center	Aggregates Building Management System (BMS) inputs on a common platform.	Optimize operational control and improve energy efficiency.
2	Indoor Air Quality	Continuous Air Quality monitoring system (PM 2.5, PM 10, TVOC, Co2, Temperature, RH) using certified sensors. Old campuses will also have improved air filtration and IAQ (Improved Air Quality) monitoring in place (phase wise execution plan based on RTW). Air quality audit & Implemented 2nd stage filter with > 99% Viral load reduction efficiency.	Improved air quality monitoring and management for occupants
3	UPS Capacitor replacement	Conversion of VRLA ("Valve Regulated Lead Acid") batteries to Lithium Batteries (LIB) with monitoring system.	LIB's have a longer life of more than 2 to 3 times of VRLA ("Valve Regulated Lead Acid") batteries. It helps in the reduction of UPS capacity requirement & backup related capacity optimization.
4	Ultrafiltration and nano-filtration	6 of the Wipro owned locations have installed ultra-filtration where water from these locations is being treated completely. Membrane Bio reactor ("MBR") is used in 2 of the campuses. And further installation in 2 more locations is being carried out. Nano filtration is used in 4 locations for treatment of fresh water.	Improved water recycling efficiency.

- 5. Does the entity have a business continuity and disaster management plan? Details of entity at which business continuity and disaster management plan is placed or weblink.**

Yes. Wipro is aligned to ISO 22301 Business Continuity Management System ("**BCMS**") framework which is applicable across global locations, accounts, and service functions. Wipro's VirtuaDesk™ Business Continuity Solution is designed to introduce desktop and application virtualization to the workplace in a quick and cost-effective manner. We also have a well-developed Business Continuity Management Plan which helped us recover from COVID-19 pandemic. Our business continuity policy is used to plan for climate related disruptions which could impact business objectives.

- 6. Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard.**

Around 80% of the environmental impact, for example GHG emissions, is from our extended value chain. The main contributing categories are purchased goods and services, upstream fuel and energy emissions, business travel and employee commute. We have mitigation plans for each of these - at a high level it is based on engagement and disclosures with our suppliers; travel reduction and avoidance for business travel; EV, public transport and pooling for employee commute and RE procurement for reducing upstream energy emissions.

7. Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts.

We estimate that close to more than 50% of suppliers by value of business would be assessed for environmental impact - across key categories of IT hardware, facility management services and Civil. The natural capital valuation program assesses the environmental impact of our value chain activities, including purchased goods and services. This is based on our spend data for each supplier and categories they belong to. Details of the same are provided in Annual Report under Wipro's Natural Capital Valuation Program. We engaged with 57 suppliers, who contributed to 80% of carbon emissions impacts through Carbon Disclosure Project ("CDP") Supply Chain Program. This year we plan to engage with 250+ suppliers through the CDP Supply Chain Program.

INDEPENDENT PRACTITIONER'S LIMITED ASSURANCE REPORT ON IDENTIFIED SUSTAINABILITY INFORMATION OF WIPRO LIMITED

To the Board of Directors of WIPRO LIMITED

1. We have undertaken to perform limited assurance engagement, for **WIPRO LIMITED** (the "Company") vide our engagement letter dated April 8, 2024 in respect of the agreed Sustainability Information listed below (the "Identified Sustainability Information") in accordance with the Criteria stated in paragraph 3 below. This Sustainability Information is included in the Business Responsibility and Sustainability Report (the "BRSR" or the "Report") within the Integrated Annual Report (the "IAR") of the Company for the year ended March 31, 2024. This engagement was conducted by our multidisciplinary team including assurance practitioners, environmental engineers, and specialists.

2. Identified Sustainability Information

Our scope of limited assurance consists of the Sustainability Information listed in the Appendix I to our report. The reporting boundary of the Report is as disclosed in Question 13 of Section A: General Disclosure of the BRSR with exceptions disclosed by way of note under respective questions of the BRSR, where applicable.

Our limited assurance engagement was with respect to the year ended March 31, 2024 information and we have not performed any procedures with respect to earlier periods or any other elements included in the Report and, therefore, do not express any conclusion thereon.

3. Criteria

The Criteria used by the Company to prepare the Identified Sustainability Information is as under:

- Regulation 34(2)(f) of the Securities and Exchange Board of India (the "SEBI") (Listing Obligations and Disclosure Requirements), Regulations, 2015 as amended;
- Business Responsibility and Sustainability Reporting Requirements for listed entities per Master Circular No. SEBI/HO/CFD/PoD2/CIR/P/2023/120 dated July 11, 2023; and
- SEBI Circular SEBI/HO/CFD/CFD-SEC-2/P/CIR/2023/122 dated July 12, 2023 and clarifications thereto issued by SEBI.

4. Management's Responsibility

The Company's management is responsible for selecting or establishing suitable criteria for preparing the Sustainability Information including the reporting boundary of the Report, taking into account applicable laws and regulations, if any, related to reporting on the Sustainability Information, identification of key aspects, engagement with stakeholders, content, preparation and presentation of the Identified Sustainability Information in accordance with the Criteria. This responsibility includes design, implementation and maintenance of internal controls relevant to the preparation of the Report and the measurement of Identified Sustainability Information, which is free from material misstatement, whether due to fraud or error.

5. Inherent limitations

The absence of a significant body of established practice on which to draw to evaluate and measure non-financial information allows for different, but acceptable, measures and measurement techniques and can affect comparability between companies.

6. Our Independence and Quality Control

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India (the "ICAI") and the SEBI Circular No. SEBI/HO/CFD/CFD-SEC-2/P/CIR/2023/122 dated July 12, 2023, and its clarifications thereto and have the required competencies and experience to conduct this assurance engagement.

We apply Standard on Quality Control ("SQC") 1, "Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements", and accordingly maintain a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards, and applicable legal and regulatory requirements.

7. Our Responsibility

Our responsibility is to express a limited assurance conclusion on the Identified Sustainability Information listed in Appendix I based on the procedures we have performed and evidence we have obtained.

We conducted our engagement in accordance with the Standard on Sustainability Assurance Engagements (SSAE) 3000, “Assurance Engagements on Sustainability Information”, (the “Standard”), issued by the Sustainability Reporting Standards Board (the “SRSB”) of the ICAI.

This Standard requires that we plan and perform our engagement to obtain limited assurance about whether the Identified Sustainability Information is free from material misstatement.

As part of limited assurance engagement, in accordance with the Standard, we exercise professional judgment and maintain professional skepticism throughout the engagement.

8. Limited Assurance

A limited assurance engagement involves assessing the suitability in the circumstances of the Company’s use of the Criteria as the basis for the preparation of the Identified Sustainability Information as listed in Appendix I, assessing the risks of material misstatement of the Identified Sustainability Information whether due to fraud or error, responding to the assessed risks as necessary in the circumstances, and evaluating the overall presentation of the Identified Sustainability Information.

A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both the risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks.

The procedures we performed were based on our professional judgment and included inquiries, observation of processes performed, inspection of documents and evaluating the appropriateness of quantification methods and reporting policies and agreeing with underlying records.

Given the circumstances of the engagement, in performing the procedures listed above, we:

- Obtained an understanding of the Identified Sustainability Information and related disclosures;
- Obtained an understanding of the assessment criteria and their suitability for the evaluation and/or measurements of the Identified Sustainability Information;
- Made inquiries of Company’s management, including Sustainability team, Facilities Management Group, Human Resource team amongst others and those with the responsibility for preparation of the Report;
- Obtained an understanding of the key systems and processes for recording, processing and reporting on the Identified Sustainability Information at locations /offices on a sample basis;
- Based on the above understanding and the risks that the Identified Sustainability Information may be materially misstated, determined the nature, timing and extent of further procedures; and
- Reviewed the Company’s process for collating the sustainability information through agreeing or reconciling the Identified Sustainability Information with the underlying records on a sample basis.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance opinion about whether the Identified Sustainability Information have been prepared, in all material respects, in accordance with the Criteria.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our limited assurance conclusion.

9. Exclusions

Our assurance scope excludes the following and therefore we do not express a conclusion on:

- Aspects of the Report and the data/information (qualitative or quantitative) other than the Identified Sustainability Information; and
- The statements that describe expression of opinion, belief, aspiration, expectation, aim, or future intentions provided by the Company.

10. Limited Assurance Conclusion

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention

that causes us to believe that the Identified Sustainability Information listed in Appendix I and presented in the Report for year ended March 31, 2024 are not prepared, in all material respects, in accordance with the Criteria as stated in paragraph 3 above.

11. Restriction on use

Our Limited Assurance report has been prepared and addressed to the Board of Directors of the Company at the request of the Company solely, to assist the Company in reporting on Company's sustainability performance and activities. Accordingly, we accept no liability to anyone, other than the Company. Our Limited Assurance report should not be used for any other purpose or by any person other than the addressees of our report. We neither accept nor assume any duty of care or liability for any other purpose or to any other party to whom our report is shown or into whose hands it may come without our prior consent in writing.
