Bond sale devolves as market seeks high yields

Gopika Gopakumar
gopika.g@livemint.com
MUMBAI

A day after the success of a special bond auction, the market on Friday saw the ₹26,000 crore bond auction devolve, as the Reserve Bank of India decided not to pay the high yields demanded by the market.

The central bank said primary auctions bought bonds worth ₹6,736 crore of 6.22% 2035 bonds at the weekly auction.

Out of the government securities worth ₹11,000 crore put up for auction, the government sold ₹4,263.725 crore of 2035 notes at 6.55%; ₹5,625 crore of 4.48% 2023 bonds, compared to ₹5,000 crore of bonds offered at 4.67%; ₹7,000 crore of 2033 floating rate bonds (FRB) compared to ₹5,000 crore worth bonds offered at 4.63%; and ₹3,500 crore of 6.67% 2050 bonds compared to ₹5,000 crore offered at 6.69%.

After the auction, the 10-year bond yield closed at 5.99%, up three basis points from its previous close.

On Thursday, RBI intervened to pull down the 10-year benchmark rate to below 6% in a special auction of government securities. The central bank accepted bids for 10-year and five-year bonds at 5.97% and 5.54%, respectively in the auction of securities that it refused to sell last week at higher yields demanded by the market.

India's Ajay Mathur to take over as ISA chief

His appointment is set to be finalized after Mauritius withdrew from race

Utpal Bhaskar
utpal.b@livemint.com
NEW DELHI

Ajay Mathur, who heads the New Delhi-based The Energy and Research Institute, is set to become the next director general of the International Solar Alliance (ISA), with Mauritius withdrawing from the race, said two people aware of the development.

ISA, co-founded by India and France, is the first treaty-based international government organization to be based in India. The alliance has become a significant public policy tool for India and is considered a counter to China's ambitious One Belt One Road initiative.

A special virtual assembly of ISA is scheduled for 15 February where Mathur's name is slated to be approved and announced, with him taking charge from 15 March, said one of the two people cited above requesting anonymity. Mathur will replace Upendra Tripathy, a former secretary in India's ministry of new and renewable energy (MNRE).

Mint reported on 21 December about India through MNRE proposing Mathur's candidature. The director-general has a four-year term, which can be renewed for an additional term.

"With Mauritius' withdrawal, Ajay Mathur is the only person remaining for the top post. He is the right candidate for the job, given his exhaustive experience on the global stage and the technical expertise he possesses," said one of the two people mentioned above requesting anonymity.

Mathur is also a member of the Prime Minister's Council on Climate Change and

Ajay Mathur, who heads The Energy and Research Institute, is expected to be appointed as ISA's next director general on 15 February. He will take charge from 15 March.

was earlier the director general of the Bureau of Energy Efficiency. Apart from working at the World Bank, Mathur was also president of Suzlon Energy Ltd.

"Ajay Mathur is the right person for this job," said an Indian government official, the second person cited above, who also did not want to be named.

Mathur did not comment. Queries emailed to the spokespersons of ISA and MNRE on late Thursday night remained unanswered. An external spokesperson for Teri also did not comment.

The ISA first proposed by Prime Minister Narendra Modi forms an important part of India's efforts at a global leadership role on tackling climate change. "We are already part of international groupings such as the G20 and BRICS. The Coalition for Disaster Resilient Infrastructure and the International Solar Alliance are realities today due

to India's efforts," finance minister Nirmala Sitharaman said in her recent budget speech.

India and France were re-elected as the president and co-president respectively of the ISA for a two-year term at its third assembly in October last year.

The ISA framework agreement was opened for signing up at the Conference of the Parties (COP-22) at Marrakesh in November 2016. As many as 90 countries have signed the framework agreement, while 73 have ratified it. Apart from working towards setting up a World Solar Bank (WSB), which is also expected to be headquartered in India, ISA is also the nodal agency for implementing India's global electricity grid plan, One Sun One World One Grid, that seeks to transfer solar power generated in one region to feed the electricity demands of others.

RBI tightens norms for investments in NBFCs from non-FATF nations

Shayan Ghosh
shayan.g@livemint.com
MUMBAI

The Reserve Bank of India (RBI) on Friday tightened the rules governing investments in non-bank lenders originating from countries that are not compliant with global standards on prevention of money laundering.

"Investments in non-banking financial companies (NBFCs) from FATF non-compliant jurisdictions shall not be treated at par with that from the compliant jurisdictions," RBI said.

FATF, or the Financial Action Task Force, is the inter-governmental watchdog for global money laundering and terrorist financing. It periodically identifies jurisdictions with weak measures to combat money laundering and terrorist financing in two of its publications: High-risk jurisdictions subject to a Call for Action, and jurisdictions under Increased Monitoring. Put together, they have identified 17 countries at present.

These rules, RBI said, will apply to new investors from or through such non-compliant jurisdictions, whether in existing non-bank lenders on in those seeking registrations.

"New investors from or through non-compliant FATF jurisdictions, whether in existing NBFCs or in companies seeking certification of registration (COR), should not be allowed to directly or indirectly acquire 'significant influence' in the investee," it said.

According to the new rules, fresh investors from non-compliant jurisdictions should hold less than the threshold of 20% of the voting power, including

RBI says investments in shadow banks from FATF non-compliant jurisdictions shall not be treated on a par with that from compliant jurisdictions.

potential voting power in an NBFC. The central bank pointed out that potential voting power could arise from instruments that are convertible into equity, other instruments with contingent voting rights, and contractual arrangements that grant investors voting rights in the future.

However, investors in existing NBFCs holding their investments prior to the classification of the source or intermediate jurisdiction as FATF non-compliant, will be able to continue with the investments or bring in additional investments.

Reports had surfaced last year about RBI's decision to not allow financial companies to be set up through funds from such nations.

According to a report in *The Economic Times* in October, the central bank said financial companies cannot be set up with foreign direct investment from Mauritius or other countries that are non-FATF compliant.

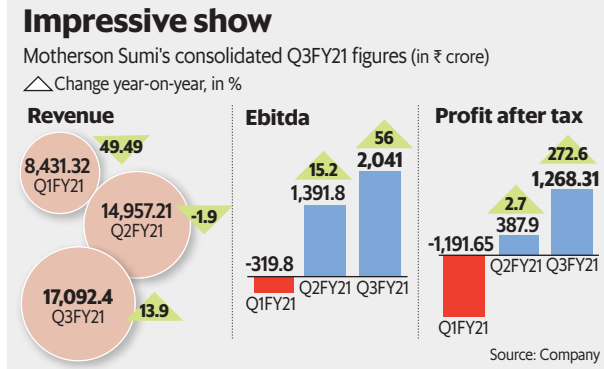

According to the new rules, fresh investors should hold less than the threshold of 20% of the voting power in an NBFC

Motherson Sumi sees robust recovery in Oct-Dec

Malyaban Ghosh
malyaban.g@livemint.com
NEW DELHI

Motherson Sumi Systems Ltd, a leading automotive component manufacturer, posted a sharp rebound in profit and revenue for December quarter, driven by recovery in vehicle production globally.

The Noida-based company reported its highest ever revenue during the quarter, indicating strong recovery in operations to pre-covid level. Motherson's consolidated net profit for the quarter increased

272.68% from the year-ago period to ₹1,268.31 crore as production in its factories across geographies, including India,

registered pre-pandemic-level capacity utilization. Profit in the year-ago period stood at ₹304.32 crore, and improved

substantially on a sequential basis from ₹474 crore in the September quarter.

The manufacturer returned to profitability after reporting an unprecedented loss of ₹1,121.60 crore in the June quarter, as sales of automobiles picked up gradually in India, Europe and other developed markets, due to easing curbs.

Revenue from operations grew 13.9% to ₹17,092.40 crore as vehicle production in India and other countries gathered momentum. Pointing towards a robust recovery in operations on a sequential basis, revenue jumped from ₹14,957.21 crore

in the September quarter.

As a result of revenue growth and cost cutting initiatives, the operating profit or earnings before interest, taxes, depreciation and amortization also jumped 55.9% from the year-ago period to ₹2,041 crore. According to the company, most of its production facilities are running at over pre-covid level of capacity utilization.

Vehicle manufacturing, especially passenger vehicles, in India improved sharply as Original Equipment Manufacturers increased production to replenish stocks at dealerships after recovery in retail sales.

Disney+ Hotstar has 25 mn users

Lata Jha
feedback@livemint.com
NEW DELHI

Three out of 10 paid subscribers of Walt Disney's streaming video service are in India where it operates as Disney+ Hotstar, the entertainment conglomerate's quarterly earnings report showed.

Disney+ Hotstar has around 25 million paid users out of Disney's global total of 94.9 million, the company said. The figure however, also includes Indonesia where the service has around 2.5 million subscribers.

In March 2020, Hotstar, the

video streaming service of the Star network, was rebranded as Disney+ Hotstar in India and a few other Asian markets. Elsewhere, the service is known as Disney+.

Meanwhile, rival US streaming giant Netflix may close 2020 with 4.6 million paid subscribers in India, according to a recent analysis by Media Partners Asia (MPA), an independent provider of research, advisory and consulting services across media, telecom, sports and

entertainment industries in Asia Pacific. Amazon Prime Video's subscriber base is estimated at 17 million by MPA.

Walt Disney reported revenues of \$1.62 billion for the quarter ended 2 January. There is however, a downside to the growth in subscriber base, with much of it coming from unpaid users in Asia. That has led to a drop in average revenue per user (Arpu), which fell 28% to \$4.03 this quarter for the service in all markets.

Much of Disney's subscriber growth is coming from unpaid users in Asia, dragging down its revenue per user by 28%
