Dear Sir/ Madam,

**Sub: Newspaper Publication**

Pursuant to Rule 6 of the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, please find enclosed herewith, copies of the Notice for transfer of all unpaid/unclaimed shares for the last seven (7) consecutive years to IEPF Authority, published in newspapers, namely Financial Express (English) and Makkal Kural (Tamil), dated September 20, 2023 respectively.

Kindly take the same on record and acknowledge.

Thanking you.

Yours faithfully,

**For TAKE Solutions Limited**

**Srinivasan. P**  
**Company Secretary**  
Encl: As above.

## APPLE'S MCAP IS NEARING \$2.8 TRN

# Microsoft may soon surpass Apple as the world's largest stock

Cloud and AI fuel investors' faith in the software giant

RYAN VLASTELICA  
September 19

**MICROSOFT CORP.** IS narrowing the gap with Apple Inc in the stock market as investors see better growth and far less China risk in the software giant.

The Redmond, Washington-based company's shares have outperformed the iPhone maker's this month, bringing its market value closer to Apple, which is at the center of a flareup in tensions with China. While hundreds of billions of dollars still separate the two companies, Microsoft's positions in markets including cloud computing and artificial intelligence make it more attractive to some investors. "Microsoft has more of what the market wants right now, and given where we stand on the pair's growth prospects, we wouldn't be surprised to see it overtake Apple," said David Klink, senior equity analyst at Huntington Private Bank.

"We have more faith in Microsoft's margins, while the cloud and AI are growth areas that can stand the test of time over a decade. We don't know if the iPhone can do the same," he said. "It's hard to make a bear case for Apple, given its service business, but the bull case clearly favors Microsoft."

The last time Microsoft was larger than Apple was in November 2021. Apple's market cap is nearing \$2.8 trillion, down from a peak of nearly \$3.3 trillion but still above Microsoft's roughly \$2.4 trillion. While Apple shares have dropped this month,

### MARKET GIANTS

Microsoft's growth could help it overtake Apple in size

Spread between Apple and Microsoft's market cap (\$)

Source: Bloomberg

Microsoft has held steady, narrowing the gap between the two to roughly \$200 billion at one point last week. A preference for Microsoft over Apple is fairly common on Wall Street. The company's recommendation consensus — a proxy for its ratio of buy, hold, and sell ratings — stands well above Apple. Nearly 90% of Microsoft analysts recommend buying the stock, compared with under two-thirds for Apple.

While neither stock seems as particularly cheap, Microsoft's growth outlook may make its valuation of 29 times estimated earnings easier to justify. The software giant is expected to see double-digit growth in revenue and net earnings per share in fiscal 2024 and the subsequent three years. That consensus reflects the strength of the company's cloud-computing business, with investors also enthusiastic about its backing of OpenAI, the fast-growing

startup behind ChatGPT.

Apple is coming off three straight quarters with negative revenue growth, and a fourth — as analysts expect to see — would represent its longest streak in two decades. While that's expected to turn positive in Apple's 2024 fiscal year and continue growing in the subsequent two years, the rate isn't expected to be nearly as robust as that of Microsoft, according to data compiled by Bloomberg.

The iPhone maker is "looking like the old IBM," wrote Tom Saccomagi, an analyst at Bernstein. "Consistency is worth a lot when considering a company's valuation, and Microsoft, because of its consistency and projected growth rate, has an advantage over Apple right now," said Tim Ghirrisi, senior portfolio strategist at Ingalls & Snyder.

"I like both, but the risk is higher with Apple," —BLOOMBERG

**EVERY TIME KRISHNA** Kumari sparred her opponent in Gangwa, she's met with one request from her youngest daughter Antim — dahi mixed with red chilli powder and fried onions, namkeen rice and kadhi. This isn't a request that's out of place for Kumari since every time Panghal returns from a wrestling tournament in a far-away foreign land, her immediate solace is to buy herself in the comforts that only home can provide.

Even in the midst of this wrestling induced madness, Antim's near and dear manage to provide her with the calm that comes before her storms. The fairies lives on the outskirts of Hissar. They moved there from their village of Bhagana because she needed to be near the Baba Lal Das Kushti akhada — where she is currently training.

Her father Ram Niwas Panghal had to sell off some of his buffaloes, acres of his land and his tractor as well to buy the house they now live in. These rooms and a small kitchen make up for the inside of the house, while the outside has a small courtyard along with a shed next to it where the family's buffalo and cow rest. Most of the structure is covered in grey cement with the insides of the house painted in shades of white. The remaining bit of land left in their village of Bhagana is taken care of by Antim's uncle and her grandmother.

"Woh kam-se-kam 15 dangal lad chuki hai. Dangal mein laadate they taaki garh ka kharab nhi nikal jaye. Agar jeetegi toh Rs 10-200000 haath aa jate they. Use time pe koi facility nahi thi, ko competition nahi thi. Kabin se bhi paise nahia a rahayeth," said Antim's father Ram Niwas Panghal to the Indian Express. She's fought at least 15 dangals so house expenses could be borne with Rs 15,000-20,000. There were no fans expected to attend the match and no money. The family may not have wanted another girl (thus the name Antim) but

## Antim steps into Vinesh-sized boots

A playful teenager off the mat, Antim Panghal can fiercely leap out of the gates, grab a tight hold on her opponent's foot and be midway through a determined takedown before the eye blink, when in mood for an attack

has given up more than most to do so to her race this stage. With less than ten days before her first senior World Championships began, training had been going full steam, but there were the occasional breaks. On August 31st, Antim celebrated her 19th birthday. Her request — a birthday party. The remnants of the day still remain in her room — there are streamers, there is a "Happy birthday" sign hung and then there are three huge shockingly pink teddy bears — each a different kind and size.

Playfighting with her brother, bullying her elder sister and occasionally watching reels on her phone, Antim comes across as every other teenager. And yet it's been seven years since she first started wrestling, and four years since she went for her first tournament outside

India — the U-15 Asian Championships in Japan, where she won the silver medal. Since that time, Antim's wrestling pedigree continues to ask questions of the world as she now looks over ominously towards the podium.

It's Sunday morning so Antim's coach has given her some leeway. Instead of waking up for training four in the morning as is her usual schedule, she's allowed another hour of rest. The short ride away from her home to her akhada is made on her bright red scooter — one she won after winning a dangal in Hissar along with Rs 21,000. As she enters the Baba Lal Das Kushti Akhada in Gangwa, the playfulness of the Antim demeanor disappears. In the presence of her coach, who demands absolute discipline, the 19-year-old's face turns determined. A light train-

ing session follows where she practices her rolls and does multiple squats before pulling out her best impression of Krut Das in Soldier and dimbs a knotted rope tied to the ceiling of the hall. The intense part of the training though comes when Antim stands at the centre of the mat. One by one, a small stream of other wrestlers at the akhada start wrestling against her. Every round her opponent changes, and every round her coach asks the wrestlers to target a certain area. Each time Antim avoids the attack on her legs, springs behind the backs of her teammates and once the whistle is blown, leaps back into position waiting for whoever chooses to be next. Even when she's taking a session lightly, there is an unmistakable air of technique that follows her trail. When in the mood for an attack, Antim

can leap out of the gates, grab a tight hold on her opponent's foot and be midway through a takedown before the eye has had a chance to blink. She then follows the momentum of that speed with the ability to change her level quickly and slide to the back of her opponent. Going for a takedown and then converting that to a two-point play may be the bread and butter of a freestyle wrestler, but the acceleration that takes her from crawling to grunting to pinning is exhilarating to witness.

"Her wrestling has improved a lot in the last year," says Bhagat Singh, one of the coaches of the akhada. "The first U20 win gave her a lot of confidence but then the bout against Vinesh showed her what level she needs to get to. She started working on certain areas where she felt she could defend better and not let her opponent get points. She would look at a position and then say, 'Main yahaa se number nahii dung!' And these are what the coaches describe as 'light' training sessions. They've had to do so because of the tournament body has taken over the past few months. And in particular, it's the weight cuts that kill. Between trials and competition, Antim will go through 5 weight cuts in all in a frenzied two months.

While there are two separate teams for the Asials and the Worlds, Antim is going to be the only Indian to be in both teams. It's strange when one thinks about it but Antim's ascension to the senior level was heralded on the back of two losses — one against Vinesh Phogat at the 2022 Commonwealth Games trials where Phogat edged through on the back of a 3-3 result. The second loss was more recent — at Panghal's first-ever senior Asian Championships where she cruised to the final until she met Japan's Akari Fujiwami — a wrestling phenom that has set her in a bout since 2017. In her bout against Phogat, the speed with which Antim caught her for a takedown was indicative of just how good the consecutive year of her could be.

The IICC, built at a cost of ₹5,400 cr, was inaugurated by PM Modi on Sept 17.

# Yashobhooni: 200 events planned over two years

FE BUREAU  
New Delhi, September 19

**THE NEWLY-INAUGURATED** India International Convention and Expo Centre (IICC), Yashobhooni, will be handed over to the operator on October 1, and over 200 events in the next two years have already been planned at the venue, a senior official said Tuesday.

Kinexin Convention Management Pvt Ltd, a consortium of Korea International Exhibition Centre (KINTEX) and eSang Networks Company Ltd, was selected as the operator of the centre after a bidding process. It is one of the biggest exhibition and convention

centre operators in the world, and with its deep connection in the industry, it would be able to bring books for the centre, secretary in the department for promotion of industry and internal trade Rajesh Kumar Singh said.

The Korean company was selected out of three bidders and would share 33% of the revenues earned from events at the centre with the government, he said. The period of the concession is 20 years.

The IICC, built at the cost of ₹5,400 crore, was inaugurated by Prime Minister Narendra Modi on September 17.

Special secretary and IICC Dwarka managing director

and chief executive officer Sumita Dawra said over 100 exhibitions and over 100 conventions have already been planned for the next two years at Yashobhooni.

Singh said along with Bharat Mandapam, the IICC would help garner a greater share of the global meetings, incentives, exhibitions and conference (MICE) industry, which is worth ₹45 trillion.

India's share of this industry is currently less than 1%.

The IICC, built at the cost of ₹5,400 crore, was inaugurated by Prime Minister Narendra Modi on September 17.

## Will use AI to trim consumer court cases, says govt

PRESS TRUST OF INDIA  
New Delhi, September 19

**THE CONSUMER AFFAIRS** Ministry on Tuesday said it is working on using artificial intelligence (AI) to reduce the pendency of cases in various consumer courts in the country.

The ministry also said the National Consumer Dispute Redressal Commission (NCDRC) has successfully resolved 854 cases in August, the highest disposal rate in the current year.

This was possible due to steps taken by the NCDRC and advanced technology like E-daakhil, which helped resolve cases faster than ever before, it added. "In furtherance of keeping the same momentum of disposal of cases, the Department has made filing of cases through E-daakhil in consumer commissions compulsory and soon going to launch the feature of video conferencing on E-daakhil," the ministry said.

As the scope of AI is increasing rapidly, the ministry is also working on using the AI facilities in reducing the pendency of cases in the national, state and district consumer commissions, it added.

# Aditya L1 begins journey to L1 point

ANONNA DUTT  
New Delhi, September 19

**"OFFTO SUN-EARTH L1 POINT"** said the Indian Space Research Organisation (ISRO) on Tuesday as an early morning manoeuvre put the Aditya L1 spacecraft in a trajectory towards the point 1.5 million kilometres away from where it will continuously study the Sun.

The spacecraft will remain in the Trans-Lagrangian Point 1 trajectory for 110 days before being inserted into an orbit around the point where the gravitational pull of the Sun and the Earth on the spacecraft will be completely balanced. "It is the fifth consecutive time ISRO

has successfully transferred an object on a trajectory toward another celestial body or location in space," the space agency said. This is the first mission by India where the spacecraft will go into an orbit around a point and not a celestial body like Earth, Moon, or Mars. Mission

director Nigam Shaji said: "This halo orbit insertion at L1 is something that ISRO has not done so far."

The L1 point that lies at only 1% of the distance between the Earth and the Sun has been selected as it allows for an unobstructed view of the Sun. No

celestial body can come in between to cause an eclipse. The point also allows one to study the Sun without any interference of dust found in the Earth's atmosphere or the atmosphere and magnetic fields that do not allow some of the harmful radiation like UV radiation from the Sun to enter the Earth. There are seven scientific on-board the observatory space spacecraft. The observations started after the necessary instrument health checks were completed. "The data collected during Earth's orbits helps scientists to analyse the behaviour of particles surrounding the Earth, especially in the presence of the magnetic field of Earth," ISRO said.
